Subject: my rights as a contact lens consumer

I DO support this law giving me the right to MY OWN contact lens prescription. Where I purchase my lenses should be my decision; they are commonly MORE expensive at the Eye Doctors office. As long as I have a valid prescription from a licensed Doctor, I don't see any issue concerning where I purchase them. I can choose my pharmacy for medications, so why should I not be allowed to choose my contact lens supplier? I currently choose a mail order supplier and it is extremely convenient for me as well as less expensive.

Thank you for the opportunity to voice my opinion.
