Subject: I Support the Contact Lens Law

Please continue to support the contact lens law allowing consumers easy access to their prescriptions. In the past, I had a doctor refuse to release my prescription, and I had to have my lawyer call him before he would give me a copy. I am a teacher and don't have much money, and need to be able to get my contact lenses from whomever is going to give me the best deal - it seems that mail order companies are that, but without being able to get a copy of my prescription, I can't use these type of mail order providers. Thank you for your concern in this matter.
