Hi!

Having been overcharged for my contact lenses by my doctor just because I had to buy lenses through him in order to obtain my prescription was extremely aggravating at best. After doing research, I found that they charged me double what I could buy on line plus I had to make another trip to the office to pick them up. I was appalled that they were legally able to get away with this practice.

I'm very excited to know that there's been a law passed saying that have to be competitive with contact lens providers. It's only fair in a democratic society and the fact that they are trying to limit my rights by not giving me my prescription and forcing me to buy contacts from them is outrageous!

Please don't let them get away with it!!!

Sincerely,

Kimberly Downs
