Subject: Please support the new Contact Lense Law

Dear Federal Trade Commissioners.

It has recently come to my attention that the new law which requires my eye doctor to give my prescription to me so that I can get my contacts at the most economical place, may be in jeopardy. I am sure I am adding my voice to the many other people who ask that you continue to protect this right.

My eye doctor is well paid for his services and it is not fair that he could force me to buy more expensive lenses from a particular provider where he gets a commission. For several years I have been well satisfied with the lenses I get through a mail order service. It's quick, convenient and easy - and always cheaper.

Thank you for supporting this new law.

Heidi Watson
