**Subject:** Support the new Contact Lense Law

I support the new contact lense law. Everyone should be able to choose to purchase their lenses from any approved provider. Doctors should not be allowed to limit the purchase of lenses of any kind to the companies they own or have an interest in.

Our economy is built on competitive services. No one should be allowed to have a monopoly or limit choice.

My experience is that the optometry businesses in doctors offices give fewer choices and charge more.

Mary
