To whom it may concern,

I work for a Dr. Office In Lenior City TN, We have a patient, Megan Glasgow 20 year old female who got her Contact lenses from a privately owned optical In Lenior City called Lonnie Jones There phone number is

. This patient came in with extreme pain in her eyes. After looking at her chart I saw that her Contact lens RX was 3 yrs. old. I asked her if she was still getting contacts and she said yes, from Lonnie Jones. I called Lonnie Jones and one of the ladies working for him told me there was nothing showing the date of her CTL RX in her chart so they were still giving her Contacts. She also told me that they (within 2-3 months) sold her 4 boxes. I told them not to give her any more contacts. We seen her on 2-6-04, Her last exam was 12-13-00. She had Keratitis and Keratoconjunctivitis due to overwearing old contacts. She was put on Quixin and Alrex. Please let me know if there is anything else I can do to prevent this kind of thing happening again.

Please keep me updated if you can do that. You may e-mail me with any questions at this e-mail.

Thank you

Niki Van Hoose
