

March 29, 2004

I support the law to get my own contact lens prescription. After I pay for the contact lenses eye exam I think that price should also include the prescription. This is causing people to have to pay about double what they would have to pay.

I want my right as a consumer protected from greedy doctors whose' associates over charge consumers for the lenses.

What is the difference in this and the medication prescription. I am allowed to have my medication prescription filled at WalGreens or Eckards or whoever has the lowest price.

Thank You,

A handwritten signature in black ink that reads "Melanie Wray". The signature is written in a cursive style with a long, sweeping tail on the letter "y".
