Subject: spyware driveby d/l,s scuming scamware

hello

spyware affects all people every where. not just in the USA.
a lot of it is written there so it affects me directly.when surfing the web you must arm your self's against these vermin. in a few different ways I have 5 programs I use. and even then you not safe! with out becoming George Orwells 1984 type government there are many things that can be done to stop this. it gets so bad it can totally cripple an unprotected computer. and even the protected ones get nailed.
these lower forums of life that write these spyware and infect peoples machines with porno popups and other unwanted unasked for unneeded programs must be stopped!
you talk about how free your united states are. but these hold you hostage.
well land of the free and the spyware it seems to be!
have a spyware free day!
