Subject: Spyware Workshop - Comment, P044509

Spyware kills computers. I would clean ignorant people's computers one week, and the next it's right back to where it was. For some people they don't even know they have an option. They don't know how to prevent jerks from installing crap on their PCs, of which makes spyware companies money.

At least anywhere else, usually, said "ignorant" person would have a opinion or be able to take some sort of action.
