Hi, I am a legitimate Corporate business owner who despises "spyware" with a passion. I know in my heart that spyware will be deemed illegal in the future. Companies like "Gator/Claria" have NO business being online at all. They are **xxxx** and spyware and need to be abolished.

My rights of my websites are being violated with these type companies. You all need to do something and put your foot down.

To have a workshop on spyware is amazing. I hope you are trying to figure out a way to get rid of those companies and not acknowledging them as a legitimate business? If not, you all are just as bad as they are.

Thank you.
