There are some ready strategies that capably address the problems caused by spyware:

1) Ad-aware software finds and disposes much of spyware resident on an infected machine.

<http://www.lavasoftusa.com/>

2) Programs downloaded only from a reputable source greatly reduces the likelihood that unsuspecting users will download spy and adware if they read the editor's plain language disclaimer.

e.g.

<http://download.com.com/3000-2139-10280033.html>

3) Internet Explorer can be secured by restricting the default 'Internet' zone.
