Subject: Spyware Workshop - Comment, P044509

Please help!

This problem with the spyware and adware is getting ridiculous! I cannot believe that you, the FTC, who are supposed to help Americans, are allowing spyware and adware to continue to be legal! This is like allowing those same people to come into our homes, look in our checkbooks, closets, cabinets, and refrigerators, and to report how we live our lives! This is an invasion of privacy at the very least, and breaking and entering truthfully! How can you stand by and do nothing?

Please place some restrictions on these adware and spyware companies. Just because the technology exists, it doesn't mean that it should be used!

Thank you,

Robyn Zigmond
