Subject: Spyware Workshop - Comment, P044509

I think spyware that doesn't get a user approval should be banned. It is an invasion of privacy and can also slow down and ruin a computer. It ruined my last computer that would have required several hundreds of dollars to fix so I ended up having to buy another computer. I was totally unaware of spyware as a novice user but no more. I now have several spyware stoppers on my computer as well as spyware detectors. NO ONE has the right to spy on me without me authorizing it.

Thank You,
Joe Power
