I don't pay for spyware or adware. I don't ask for it. I've closed my computer against it every week for years (using software to rid my computer of it. I have a legal right to refuse this unsolicited stuff that moves in and takes up space on my personal computer. That stuff is an infringement on my privacy. Under that definition, IT IS ILLEGAL AND SHOULD BE ENDED WITH CONTINUING PERPETATORS FINED AND/OR JAILED - SAME WITH SPAM EMAIL.
