To Whom it May concern:

I personally have had so many problems. Software accompanied by Adware, Spyware I've decided that when I remove the Adware and the spyware and the software does not work properly then I add that software to my own personal "DO NOT BUY" List !!!!!!!!!!!!!!!

My reasoning being that if the software can't stand alone then it is a weak program.

I will contribute to any anti-spyware software campaign or buy much quicker knowing that my business is my business. My (our) privacy is very definitely in jeopardy. It's as if everytime we buy a gallon of milk we had to put up with someone following us home and watching just how the milk is used.

Keep Spyware out of our "COMPUTERS SOFTWARE" and "OUR LIVES" PLEASE !!!!! !!
