I agree with Mr. Urquart we are VICTIMS. Using spyware and adware should be outlawed in the USA.

Some states are moving to fill the void left by slow action at the federal level. On the last panel of the day, Utah state representative Stephen Urquhart explained his recently passed bill to stop adware and spyware. Utah is being sued by adware maker WhenU, which claims that the law restricts their rights. Perhaps the best line uttered all day came from Urquart, who said, "We can't call these people consumers, they're victims."
