

Wed 5/19/2004

If you think spyware/adware isn't a problem then I submit to you my bill for \$135.00. My computer crashed and that is the amount I paid to repair the problem. The problem according to the technician. Spyware/adware had corrupted my computer. I use the internet to read newspapers and sports items from across the US. My wife uses it for email. I also search how to do it yourself sights after my wife receives email from her sister as to her husband's latest DIY.

Allen Malcolm

Mo.

PS

Out congressman is not a resource for this problem. He is the problem. American enterprise can do no wrong.
