Please imagine that your phone is tapped.

Commercial companies know who you call and when. They may even know what you said. Now apply the same to adware and spyware.

While I don't mind a cookie to identify me to a specific company of MY choosing, I can not think how tapping my computer can be considered a "right" by anyone.

My rights are being abused daily.

Please, please stop adware and spyware now.

Thank you,

Philip E. Kupferman
