Kem Moser, DDS
Commonwealth of Pennsylvania

Re: *In the Matter of Brain-Pad, Inc., and Joseph Manzo*
FTC Matter No. 122 3073, Docket No. C-4375

Dear Dr. Moser:

Thank you for the comment you submitted on September 9, 2012, regarding the above-referenced matter. Your comment was placed on the public record pursuant to rule 4.9(b)(6)(ii) of the Commission's Rules of Practice, 16 C.F.R. § 4.9(b)(6)(ii).

Your comment indicates that you agree with the comments submitted by Dr. Alan Moses of Illinois, who argued that mouthguards may help absorb and redistribute impacts to the lower jaw and that, in his opinion, such mouthguards may also reduce the risk of chin impact concussions. While the FTC does not dispute that mouthguards shield a person's teeth from being injured and that some can reduce impact to the lower jaw, the existing body of scientific evidence does not demonstrate that wearing a mouthguard prevents or reduces the risk of concussions. Although it may appear plausible to argue that any reduction in skull trauma flowing from reduced impact to the jaw through mouthguard use could result in fewer concussions, there is no evidence to date that supports such a cause and effect relationship.

After considering your comment, along with others received in this matter, the Commission has determined that the public interest would best be served by issuing the Decision and Order in final form without modification. A copy of the final Decision and Order is enclosed for your information. Relevant materials also are available from the Commission's Website at <http://www.ftc.gov>.

Thank you again for your comment. The Commission is aided in its analysis by hearing from a variety of sources, and we appreciate your interest in this matter.

By direction of the Commission, Commissioner Rosch dissenting

Donald S. Clark
Secretary
