Increase and Rebuild your Brain Activity

The ingredients within CogniPrin™ are proven to nourish your brain and slow mental decline. These amazing nutrients are vital for improving age-related mental decline by rejuvenating and supporting the integrity of cell membranes in your brain. It encourages the activity or neurotransmitters that are essential for good memory.

CogniPrin™ supercharges cell membranes in your brain to work like they did when you were younger. What most people don't know is that as you age, your body's Phosphatidylserine or PS decline and your cells' membranes become less fluid. But if you take CogniPrin™ every day, you can roll back cognitive decline up to 12 years, which has been proven in an eye-opening study conducted by medical researchers at Stanford University.

This is the only single supplement with ingredients clinically proven to help...

- Slow down memory loss and improve your memory by up to 44%
- Help clear up brain fog and improve learning and memory capability up to 33%
- Wake up "sleeping" brain cells and increase brain wave activity by 20%

Research shows memory loss is easier to prevent and improve in its earliest stages. In fact, the Texas Department of Health says early steps taken "increase the chances of treating concerns of memory loss successfully."
