RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I am writing to express my discontent with the fact that the Gov't wants to raise the ethanol levels in gasoline to 15 percent. It has been proven that it is detrimental to 2,3 and 4 cylinder engines in motorcycles. this is unacceptable. we must keep the fuel for these recreational vehicles free of this additive to prevent expensive damage to these vehicles. anything less would be a detriment to the service and safety of the operators of these vehicles and just the thought of it has me " highly urinated". this action by the gov't would be reckless and uncaring about the safety and the monetary expense inflicted upon the owners of these vehicles.

Sincerely,
doug miracco, FL
