RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

It is unfortunate that E15 is seriously considered. It seems as if those in power are only considering people who drive cars when they are serious about vehicle safety and maintenance. E10 also damages engines just look at all the expenses the owners had had to deal with for ATV's, cycles and marine engines with this additive. We do not need more but rather less or NONE in our gas. Our motors will run better, last longer and get better mileage without this in gasoline.

Please DO NOT cause us more grief by forcing E15 in our gas!

Sincerely,  
Larry McClintock, OR
