U.S. DISTRICT COURT
DISTRICT OF NEVADA

BY _____ DEPUTY

UNITED STATES DISTRICT COURT
DISTRICT OF NEVADA

FEDERAL TRADE COMMISSION,

Plaintiff,

v.

GREEN FOOT GLOBAL, L.L.C.,
a Nevada Limited Liability Company,
also d/b/a Green Foot Global, Greenfoot
Global, GFG, GFG Commercial, GFG
Industrial, www.GreenFootGlobal.com,
GFG Fuel Tech, LLC, and GWO Network,

WILLIAM C. HYMAN, also known as
Bill Hyman, individually and as an officer
of GREEN FOOT GLOBAL, L.L.C.,

MARY ANN P. HYMAN, also known as
Mary Ann Proulx Hyman, Mary A. Hyman,
Mary P. Hyman, Mary Ann Proulx,
MaryAnn Denise L. Proulx, Mary Ann
Prouleaux, Mary P. Proulx Hyman,
Mary Ann A. Hyman, and Mary Hyman,
individually and as an officer of
GREEN FOOT GLOBAL, L.L.C.,

2:13-CV-2064-JCM-GWF

COMPLAINT FOR PERMANENT
INJUNCTION AND OTHER
EQUITABLE RELIEF

RALPH M. FLYNN, JR., also known as
 Ralph Flynn, individually,)
)
 MARTINEZ VAN TURNER, also known)
 as Martinez V. Turner, Marty Turnberg,)
 and Marty Turner, individually, and)
)
 PATRICK HINTZE, also known as Pat)
 Hintze, individually,)
)
 Defendants.)

Plaintiff, the Federal Trade Commission ("FTC"), for its Complaint alleges:

1. The FTC brings this action under Section 13(b) of the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. § 53(b), to obtain permanent injunctive relief, rescission or reformation of contracts, restitution, the refund of monies paid, disgorgement of ill-gotten monies, and other equitable relief for Defendants' acts or practices in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), in connection with the advertising, marketing, distribution, offering for sale, and sale of fuel-saving products or devices.

JURISDICTION AND VENUE

- 2. This Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331, 1337(a), and 1345, and 15 U.S.C. §§ 45(a) and 53(b).
- 3. Venue is proper in this district under 28 U.S.C. § 1391(b) and (c), and 15 U.S.C. § 53(b).

PLAINTIFF

- 4. The FTC is an independent agency of the United States Government created by statute. 15 U.S.C. §§ 41-58. The FTC enforces Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), which prohibits unfair or deceptive acts or practices in or affecting commerce.
- 5. The FTC is authorized to initiate federal district court proceedings, by its own attorneys, to enjoin violations of the FTC Act and to secure such equitable relief as may be appropriate in each case, including rescission or reformation of contracts, restitution, the refund of monies paid,

and the disgorgement of ill-gotten monies. 15 U.S.C. § 53(b).

DEFENDANTS

6. Defendant Green Foot Global, L.L.C., also doing business as Green Foot Global, Greenfoot Global, GFG, GFG Commercial, GFG Industrial, www.GreenFootGlobal.com, GFG Fuel Tech, LLC, and GWO Network ("GFG"), is a Nevada limited liability company with its principal place of business at 2360 Corporate Circle, Suite 400, Henderson, Nevada 89074-7722. GFG transacts or has transacted business in this district and throughout the United States. At all times material to this Complaint, acting alone or in concert with others, GFG has advertised, marketed, distributed, or sold fuel-saving products or devices to consumers throughout the United States.

7. Defendant William C. Hyman, also known as Bill Hyman ("Bill Hyman"), is an owner and officer of GFG. At all times material to this Complaint, acting alone or in concert with others, Bill Hyman has formulated, directed, controlled, had the authority to control, or participated in the acts and practices of GFG, including the acts and practices set forth in this Complaint. Defendant Bill Hyman, in connection with the matters alleged herein, transacts or has transacted business in this district and throughout the United States.

8. Defendant Mary Ann P. Hyman, also known as Mary Ann Proulx Hyman, Mary A. Hyman, Mary P. Hyman, Mary Ann Proulx, MaryAnn Denise L. Proulx, Mary Ann Prouleaux, Mary P. Proulx Hyman, Mary Ann A. Hyman, and Mary Hyman ("Mary Ann Hyman"), is an owner and officer of GFG. At all times material to this Complaint, acting alone or in concert with others, Mary Ann Hyman has formulated, directed, controlled, had the authority to control, or participated in the acts and practices of GFG, including the acts and practices set forth in this Complaint. Defendant Mary Ann Hyman, in connection with the matters alleged herein,

transacts or has transacted business in this district and throughout the United States.

9. Defendant Ralph M. Flynn, Jr., also known as Ralph Flynn (“Ralph Flynn”), was an owner or officer of GFG from 2010 until 2012. At times material to this Complaint, acting alone or in concert with others, Ralph Flynn has formulated, directed, controlled, had the authority to control, or participated in the acts and practices of GFG, including the acts and practices set forth in this Complaint. Defendant Ralph Flynn, in connection with the matters alleged herein, transacts or has transacted business in this district and throughout the United States.

10. Defendant Martinez Van Turner, also known as Martinez V. Turner, Marty Turnberg, and Marty Turner (“Marty Turner”), was an employee of GFG from 2010 until 2012. At times material to this Complaint, acting alone or in concert with others, Marty Turner has formulated, directed, controlled, had the authority to control, or participated in the acts and practices of GFG, including the acts and practices set forth in this Complaint. Defendant Marty Turner, in connection with the matters alleged herein, transacts or has transacted business in this district and throughout the United States.

11. Defendant Patrick Hintze, also known as Pat Hintze (“Pat Hintze”), was an employee of GFG from 2010 until 2012. At times material to this Complaint, acting alone or in concert with others, Pat Hintze has formulated, directed, controlled, had the authority to control, or participated in the acts and practices of GFG, including the acts and practices set forth in this Complaint. Defendant Pat Hintze, in connection with the matters alleged herein, transacts or has transacted business in this district and throughout the United States.

COMMERCE

12. At all times material to this Complaint, Defendants have maintained a substantial course of trade in or affecting commerce, as “commerce” is defined in Section 4 of the FTC Act, 15 U.S.C. § 44.

DEFENDANTS' BUSINESS ACTIVITIES

13. Since at least 2010, Defendants have manufactured, advertised, promoted, marketed, distributed, offered for sale, or sold EnviroTabs to consumers nationwide, claiming that it is the "World's 1st Multi-Vitamin for Your Engine!"
14. Defendants sell EnviroTabs directly to consumers via the Internet, including through the website: www.greenfootglobal.com. Defendants also sell EnviroTabs to consumers via multi-level marketing, a system whereby Defendants' "distributors" or salespeople are compensated not only for sales they personally generate, but also for the sales of the distributors or salespeople that they recruit.
15. Defendants promote EnviroTabs as an environmentally-friendly, eco-friendly, or "green" fuel additive that provides general environmental benefits such as increasing fuel economy and reducing emissions.
16. Defendants hold EnviroTabs out as a product, available in tablet form, that primarily consists of organometallic compounds, including ferrocene.
17. As co-founder and CEO of GFG, Bill Hyman actively participates in Defendants' deceptive scheme. For example, Bill Hyman is the voice behind many online and telephonic presentations for EnviroTabs, asserting his first-hand knowledge of EnviroTabs' alleged benefits. Bill Hyman was directly involved in the installation of a "fuel saver calculator," which purports to show how much fuel consumers will save by using EnviroTabs, on a GFG website. Bill Hyman also reviews and approves language contained in advertisements and marketing materials for EnviroTabs, and he has drafted documents relating to how EnviroTabs works and why consumers should use the product.
18. As co-founder and CEO of GFG, Mary Ann Hyman actively participates in Defendants'

deceptive scheme. She is responsible for much of the wording of GFG's advertisements and promotional documents. Mary Ann Hyman also reviews and approves the claims printed on the EnviroTabs product packaging and on GFG's websites, including documents relating to the major "benefits" of EnviroTabs.

19. As former co-CEO of GFG, Ralph Flynn was responsible, from 2010 until 2012, for all aspects of GFG strategy, products, financial performance, daily operations, field organization and development. He also was responsible for drafting marketing and recruitment materials containing misrepresentations as to the efficacy of EnviroTabs.

20. As GFG's former Director of Customer & Distributor Services, Marty Turner was responsible, from 2010 until 2012, for drafting and distributing marketing materials containing misrepresentations as to the benefits of EnviroTabs. Responsible for overseeing GFG's customer service department, Marty Turner also received inquiries and complaints about the efficacy of EnviroTabs and responded to those inquiries and complaints, sometimes using fictitious names such as "Mary Tanner."

21. While employed by GFG, Pat Hintze drafted the instruction manual that explains to consumers how to use EnviroTabs. Pat Hintze also drafted marketing materials containing misrepresentations as to the efficacy of EnviroTabs, including a document titled "Proof EnviroTabs Reduces Emissions." Additionally, Pat Hintze participated in GFG's efforts to obtain substantiation for EnviroTabs.

22. To induce consumers to purchase EnviroTabs, Defendants have created, prepared, disseminated, or caused to be disseminated advertisements and other marketing materials in English and Spanish, including, but not limited to, the attached Exhibits 1-5. These materials contain, among other things, the following statements and depictions:

FUEL EFFICIENCY AND EMISSIONS REDUCTION CLAIMS

- A. "You'll see improved fuel mileage with every tank" (Ex. 1, p. 7.)
- B. "INCREASE FUEL ECONOMY More Miles per Gallon!" (Ex. 1, p. 11.)
- C. "10% Increase in fuel mileage" (Ex. 1, p. 18.)
- D. "10% [increase in fuel mileage] is very conservative, customers have reported savings of over 30%" (Ex. 5, p. 10.)
- E. "That's an additional 2 MPG! = 40 extra miles per tank!" (Ex. 1, p. 18.)
- F. "INCREASE FUEL MILEAGE Save \$\$\$" (Ex. 1, p. 22.)
- G. "EnviroTabs improves the burn rate in the combustion chamber providing a significant improvement in the fuel economy." (Ex. 1, p. 22.)
- H. "As maintenance costs and emissions decrease, expect engine life, fuel economy, performance, and horse power to increase." (Ex. 1, p. 32.)
- I. "You have nothing to lose and only horsepower and fuel efficiency to gain."
(Ex. 1, p. 18.)
- J. "Greatly reducing your vehicles [sic] harmful tailpipe emissions by up to **75%**"
(Ex. 1, p. 6.)
- K. "Real Results Putting a Tablet in Your Tank Can ... Reduce Emissions Hydro Carbons (Parts Per Million) BEFORE: 60ppm AFTER 14ppm 76.5% REDUCTION IT CLEANS!!"
(Ex. 1, p. 10.)
- L. "... EnviroTabs helps reduce emissions, which include carbon monoxide, nitrogen oxide, and other volatile organic compounds." (Ex. 1, p. 19.)
- M. "Many EnviroTabs customers have found that after not passing their initial emission test they were able to after using EnviroTabs in just two tanks of fuel." (Ex. 1, p. 21.)

N. “. . . reduce the overall carbon footprint on this planet by making the air cleaner to breathe for you your children and your grandchildren. This alone makes the use of EnviroTabs invaluable.” (Ex. 1, p. 22.)

FUEL EFFICIENCY AND EMISSIONS REDUCTION ESTABLISHMENT CLAIMS

O. “Double blind, statistical testing proved your mileage will increase from 7% to 14% and customers have reported as much as 19% or more.” (Ex. 3, p. 4.)

P. “Independent Emissions Testing Facilities have found you can dramatically reduce emissions with the use of EnviroTabs. Testing has shown 40-91% reduction.” (Ex. 1, p. 22.)

Q. “EnviroTabs has been proven safe and effective through millions of miles of use.” (Ex. 1, p. 17.)

R. “Patented and [] tested for over 40 years with intensive road testing & commercial use.” (Ex. 4, p. 14.)

S. “Organometallic Technology Proven by 20 Million+ Operating Hours” (Ex. 3, p. 1.)

T. “. . . based on over 30 years of research on combustion catalysts and burn rate modifiers in both the aerospace industry and the fuel additive industry.” (Ex. 1, p. 17.)

VIOLATIONS OF THE FTC ACT

23. Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), prohibits “unfair or deceptive acts or practices in or affecting commerce.”

24. Misrepresentations or deceptive omissions of material fact constitute deceptive acts or practices prohibited by Section 5(a) of the FTC Act.

**COUNT I - FALSE OR UNSUBSTANTIATED
FUEL EFFICIENCY AND EMISSIONS REDUCTION CLAIMS**

25. Through the means described in Paragraphs 13-22, Defendants have represented, directly or indirectly, expressly or by implication, that EnviroTabs, when added to any type of fuel, will

increase fuel efficiency, reduce emissions, and save consumers money on fuel.

26. The representations set forth in Paragraph 25 are false or misleading or were not substantiated at the time the representations were made.

27. Therefore, the making of the representations set forth in Paragraph 25 of this Complaint constitutes a deceptive act or practice, in or affecting commerce, in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a).

**COUNT II - FALSE FUEL EFFICIENCY AND EMISSIONS REDUCTION
ESTABLISHMENT CLAIMS**

28. Through the means described in Paragraphs 13-22, Defendants have represented, directly or indirectly, expressly or by implication, that scientific testing proves that EnviroTabs increases fuel mileage and reduces emissions.

29. The representations set forth in Paragraph 28 are false.

30. Therefore, the making of the representations in Paragraph 28 of this Complaint constitutes a deceptive act or practice, in or affecting commerce, in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a).

CONSUMER INJURY

34. Consumers have suffered and will continue to suffer substantial injury as a result of Defendants' violations of the FTC Act. In addition, Defendants have been unjustly enriched as a result of their unlawful acts or practices. Absent injunctive relief by this Court, Defendants are likely to continue to injure consumers, reap unjust enrichment, and harm the public interest.

THE COURT'S POWER TO GRANT RELIEF

35. Section 13(b) of the FTC Act, 15 U.S.C. § 53(b), empowers this Court to grant injunctive and such other relief as the Court may deem appropriate to halt and redress violations of any provision of law enforced by the FTC. The Court, in the exercise of its equitable jurisdiction,

may award ancillary relief, including rescission or reformation of contracts, restitution, the refund of monies paid, and the disgorgement of ill-gotten monies, to prevent and remedy any violation of any provision of law enforced by the FTC.

PRAYER FOR RELIEF

36. Wherefore, Plaintiff FTC, pursuant to Section 13(b) of the FTC Act, 15 U.S.C. § 53(b), and the Court's own equitable powers, requests that the Court:
- A. Enter a permanent injunction to prevent future violations of the FTC Act by Defendants;
 - B. Award such relief as the Court finds necessary to redress injury to consumers resulting from Defendants' violations of the FTC Act, including, but not limited to, rescission or reformation of contracts, restitution, the refund of monies paid, and the disgorgement of ill-gotten monies; and
 - C. Award Plaintiff the costs of bringing this action, as well as such other and additional relief as the Court may determine to be just and proper.

[SIGNATURE PAGE FOLLOWS.]

Respectfully submitted,

JONATHAN E. NUECHTERLEIN
General Counsel

Our History

Greenfoot Global™ is the company behind the patented product, EnviroTabs®. EnviroTabs® was developed as a result of work on experimental burn-rate modifiers for solid rocket propellant systems used in the aerospace industry. For over 30 years, various blends of this product have been used in large commercial and government applications. Millions and millions of miles and hours of usage have proven the product effective in multiple categories.

In early 2009, a group of professional marketers pursued their desire to create the product in a tablet form for use by consumers around the world. By partnering with a team of scientists and engineers who have worked with this unique, multi-functioned combustion catalyst since the mid-1980s, EnviroTabs® was born!

Later that year, a group of on-line marketers started selling EnviroTabs® through an affiliate marketing campaign. In just a short time, the affiliates sold in excess of 4000 one-month supplies of the product, each covered by a 100% money-back guarantee. Over a year later, not a single person has returned the product!

As a result of that success, Greenfoot Global™ purchased the affiliate marketing company and started a Network Marketing program with a unique philosophy and an electric Compensation Plan. We have created an exciting opportunity for the individual home-based entrepreneur, who desire to capitalize on the exploding worldwide "Green" movement.

Greenfoot Global™ has the exclusive worldwide Network Marketing distribution rights to our EPA-registered and patented product, EnviroTabs®.

How Does It Work?

EnviroTabs[®] is an organometallic metal conditioner that acts as a burn-rate modifier that catalyzes fuel. This action allows more of the fuel to burn in the power stroke of the engine, and therefore, less fuel burns in the exhaust stroke.

EnviroTabs[®] simultaneously improves fuel economy, increases power and reduces emissions by creating a micro-thin coating in the combustion chamber of your engine that allows fuel to burn quicker.

EnviroTabs[®] burns off carbon deposits and catalytically causes a chemical reaction to happen at a lower temperature. The fuel particles begin to combust at temperatures as low as 200° C, as opposed to 600° C. This chemical reaction allows the impurities and the hard carbon deposits to completely burn off.

EnviroTabs[®] changes the surface-heat-absorption characteristics of metal. **Note:** The greatest loss in efficiency in an automobile engine is the loss of heat. Heat is energy released by the mixture of fuel and air producing a heat spike, that creates expansion used to power the vehicle. The cylinder walls and head are water-cooled, and the pistons are oil-cooled. The thin coating inhibits the transfer of radiant heat. This means higher-combustion temperature, greater expansion, and more power with reduced emissions. By increasing the burn in the combustion chamber (rather than as after-burn), performance can be increased, while reducing fuel consumption and emissions. Heat recovery is the single best method that can reduce harmful emissions, increase fuel economy, improve engine performance, and extend oil and engine life.

Does it work with all types of fuels?

Yes - EnviroTabs[®] works at the chemical level of the combustion process and therefore, works exactly the same way, regardless of the type of fuel in which it is used. EnviroTabs[®] is formulated for use with all types of gas and diesel fuel grades, which include Ethanol Blends, two-cycle mixed fuels, and blends of diesel (winter, summer and bio). EnviroTabs[®] works in any combustion engine-car, truck, motorcycle, generator - you name it!

Just put EnviroTabs[®] in your fuel tank before filling up, per dosing instructions. The tablet will completely dissolve in minutes, often times before you are done filling up. Once dissolved it passes through the fuel line and past the fuel filter, using the fuel as a carrier. EnviroTabs[®] does not modify or alter the fuel in any way.

Product Usage Rules for Maximum Performance

[Download PDF](#)

Please keep in mind that results may vary, based on temperature, road and traffic conditions, vehicle and engine age, and operator variables. Greenfoot Global™ is confident that you will be completely satisfied and enjoy all the benefits associated with EnviroTabs[®]. Therefore, we stand by a 60-Day, 100% Money-Back Guarantee for our customers!

Watch an Introduction to EnviroTabs[®]

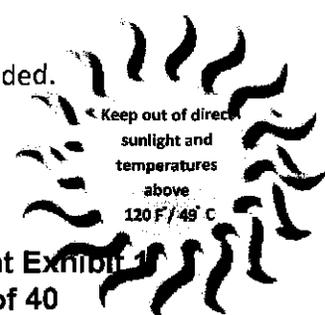

Listen to The Science Behind EnviroTabs[®]

- Before using EnviroTabs®, you must establish an accurate baseline. Follow the detailed instructions on the Mileage Tracking Form to determine your baseline. Do this for the first two tanks. **Do not guess.**
- **Do not rely** on your vehicle's computer to calculate mileage. The computer in your vehicle measures tire rotation, not fuel consumption, and may not give accurate mpg/kpl results.
- Know **exactly** how many gallons/liters your tank holds. Check your Owner's Manual or contact the manufacturer to obtain the actual tank size.
- EnviroTabs® will be blocked from entering the fuel tank if your vehicle has an **anti-siphoning device**. Check your manual or **with** your dealer to find out if your vehicle has such a device. If so, crush the tabs before you **put** them in the fuel flute or dissolve EnviroTabs® in a small container of fuel before adding it to the tank.
- EnviroTabs® **eliminates** the need for high octane fuel. You will notice your engine runs better without the use of high octane fuel when using EnviroTabs®.
- Always add EnviroTabs® to the fuel tank or fuel container **before** adding your fuel. This ensures the tab will get past the check valve that most cars have in the filler tube.
- After your baseline is established, prepare your engine for maximum results. Double dose the first tank only. If you have a large tank, **double dose** for the first tank, or 120 gallons/454 liters, whichever comes first. Double dosing does not mean double the tabs. For example, if you have a 10 gallons/38 liter tank you would treat 20 gallons/76 liters. After the first tank there is no need to double dose.
- For proper dosing instructions refer to the Mileage Chart. Dose accordingly and record your results on the Mileage Tracking Form.
- Remember upon future fill-ups to treat only the **untreated fuel**. For example, if you have a 20-gallon/76 liter tank and you are filling at a half-tank, you treat 10 gallons/38 liters only.
- **Do not overdose**, less is often more. EnviroTabs® can be divided using a pill cutter if needed.

Is It Safe?

Can EnviroTabs® Harm My Engine Over Time?

EnviroTabs® is based on over 30 years of research on combustion catalyst and burn-rate modifiers in both the aerospace industry and the fuel-additive industry. EnviroTabs® has been proven safe and effective through millions of miles of use.

To obtain EPA registration, one must supply Tier One Testing to the EPA. Once that is done and passed, the EPA registers the product, which means it is determined to be no more dangerous for the car or the environment than the fuel it is in. EnviroTabs® is EPA-registered. This technology is patented, scientifically designed, and engineered to eliminate any potential side effects.

In addition, Congress passed the Magnuson-Moss Warranty Act in 1975, which states "Engine manufacturers cannot discriminate against the use of a fuel additive". Under the terms of the Magnuson-Moss Warranty Act, engine manufacturers must take the position that the use of a fuel additive does NOT void the engine warranty, unless it can be proven that the specific additive was the cause of the failure.

Testing by an independent third-party testing facility has proven the product does not change fuel specifications. The use of EnviroTabs® will not void an engine manufacturer's warranty. The fuel simply acts as a carrier to the combustion chamber, where the catalyst goes to work.

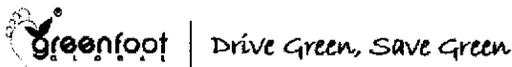

EnviroTabs® combustion catalyst technology is **actually good** for your engine, helping extend the life of your engine by preventing hard carbon deposit formation and can removing hard carbon deposits that are already present in the combustion chamber. These deposits cause abrasives to build up in the oil over time causing excessive engine wear. By using EnviroTab®, your oil stays cleaner and maintains its initial lubricity.

Deposits related to pre-ignition and knocks can also damage an engine. By using EnviroTabs®, you will also help reduce the frequency of these undesirable events. Not only is EnviroTabs® harmless in your fuel, but many of the potentially harmful effects of untreated fuels are greatly reduced or eliminated.

Why Use EnviroTabs®

EnviroTabs® has numerous benefits that can save you money, reduce harmful fuel emissions, lower maintenance cost and increase horsepower.

Save Money!

EnviroTabs® Saves You Money at the pump!

10% Increase in fuel mileage
20 MPG / 20 gal tank
20 MPG x 10% =
That's an additional 2 MPG!
= 40 extra miles per tank!!!

With EnviroTabs® in your tank you can consume less fuel!

Helps Increase Fuel Economy.

The improved burn rate in the combustion chamber provides a significant improvement in fuel economy; the more complete combustion of fuel in the combustion chamber, the better the fuel economy. The prevention and removal of combustion deposits and their subsequent migration into the engine lubrication system reduces friction and provides an additional improvement in fuel economy.

Can Lower Octane Requirements.

EnviroTabs® can help eliminate engine knock without the aid of higher-octane fuels. Think how much money you could save by switching from premium to regular fuel; it could be anywhere from 15 to 25 cents per gallon or more!

Reduce Emissions

How Does EnviroTabs® Help Reduce Emissions?

EnviroTabs® simply allows fuel to burn quicker inside the combustion chamber, leaving less emission to exit out the tailpipe.

Lowers Maintenance Cost

EnviroTabs® Can Help Extend the Life of Your Engine

EnviroTabs® removes carbon deposits, which can extend oil life, extend engine life and inhibit the formation of new engine deposits.

The impurities that exist in petroleum based fuels can cause carbon deposits to form along the surfaces of the combustion chamber. This is what causes your motor oil to become contaminated.

If hard carbon deposits are allowed to build up in the engine it results in greater friction causing excessive wear. EnviroTabs® will burn off any existing carbon deposits leaving your engine free of this abrasive material. Consistent use will also prevent new deposits from being formed. This catalytic action helps to improve the life of your engine.

It also extends oil life and engine life by allowing the oil to stay cleaner longer. This means better lubrication is taking place inside the engine. This can help you reduce maintenance and repair costs.

Horsepower

Yes- Independent tests on the catalyst have shown a dramatic increase in horsepower without the aid of expensive engine modifications. EnviroTabs® can be used as a horsepower booster for any fuel-burning engine.

- EnviroTabs® offers benefits like an Octane Booster. EnviroTabs® can be used in place of expensive octane booster fuel additives
- By increasing the efficiency and burn of the fuel greater power is achieved at the drive wheels without the use of higher-octane fuel.
- EnviroTabs® can produce as much horsepower as you would from installing an air intake system and headers... for a lot less money!

Horsepower is increased as EnviroTabs® goes to work on the surfaces of what is known as the "Fire deck" of an internal combustion engine. This creates an environment where the fuel burns quicker and therefore more completely before the exhaust cycle actually starts.

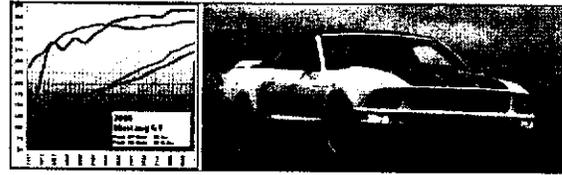

This has been found to create up to 30% increase in down stroke efficiency to the piston during the combustion cycle. Due to this effect you will experience a noticeable increase in horsepower.

That is the scientific explanation... we simply encourage you to try EnviroTabs® and notice the difference for yourself. You have nothing to lose and only horsepower and fuel efficiency to gain. Take a Test Drive today!

Backed by our 100% Money Back Guarantee!

Treating your engine with EnviroTabs® also prevents new and existing carbon deposits from forming in the combustion chamber. This means that your engine stays clean and the environment stays cleaner. Let's face it, the fuels we put into our vehicles are dirty, and they don't burn completely. When we operate our vehicles, unburned fuel is emitted into the air as exhaust, thus, causing air pollution.

Each consumed gallon of gas or diesel fuel produces 16 pounds of CO2 and in some cases over 21 pounds of greenhouse gas emissions. EnviroTabs® helps reduce emissions, which include carbon monoxide, nitrogen oxide, and other volatile organic compounds.

In many states, vehicles must pass an emissions test before they are able to be driven legally. Many EnviroTabs® customers have found that after not passing their initial emission test they were able to after using EnviroTabs® in just two tanks of fuel. This is good for them and great for the environment. You can do your part to protect the Planet with every tablet that you drop into your tank.

Greenfoot Global™ is committed to reducing emissions in at least 10 % of the world's vehicles!

Please keep in mind that results may vary, based on temperature, road and traffic conditions, vehicle and engine age, and operator variables. Greenfoot Global™ is confident that you will be completely satisfied and enjoy all the benefits associated with EnviroTabs®. Therefore, we stand by a 60-Day, 100% Money-Back Guarantee for our customers!

The Benefits of EnviroTabs®

Greenfoot Global™ is confident that you will be completely satisfied and enjoy all the benefits associated with EnviroTabs®. Therefore, we stand by a 60-Day, 100 % Money Back Guarantee for our customers!

<p>DECREASES HARMFUL EMISSIONS Independent Emissions Testing Facilities have found you can dramatically reduce emissions with the use of EnviroTabs®. Testing has shown 40-91% reduction. You can effectively do your part to reduce the overall carbon footprint on this planet by making the air cleaner to breathe for you, your children and your grandchildren. This alone makes the use of EnviroTabs® invaluable.</p>	<ul style="list-style-type: none"> • Wrap a white cloth around your exhaust pipe and run your engine for five minutes prior to and after using EnviroTabs®. Note the difference. • Clean your tailpipe or emissions stacks (large trucks) and see how clean they stay after the continued use of EnviroTabs®.
<p>INCREASES HORSEPOWER & PERFORMANCE Although you can use a scan gauge or a dynamometer to measure the increase in horsepower, the difference is usually substantial enough to feel within the first few tanks. Increasing horsepower makes "laboring" to get up big hills or travel with heavy loads a thing of the past.</p>	<ul style="list-style-type: none"> • Note the horsepower of your engine prior to using EnviroTabs®. • Note the increase in horsepower when accelerating. • Note the increase in horsepower when driving up hills or with heavy loads.
<p>INCREASES LIFE OF YOUR ENGINE Save \$\$\$ EnviroTabs® causes the engine to burn so efficiently it eliminates any new carbon in your engine (the black in your engine, spark plugs and oil). Additionally, the continued use of EnviroTabs® dissolves the hard carbon deposits that have already formed in your engine that cause your engine's performance to deteriorate over time. Carbon is like sandpaper and it wears your engine quicker.</p>	<ul style="list-style-type: none"> • Note the carbon on your spark plugs, EGR valve, cylinders, etc. prior to using EnviroTabs®. • Have a mechanic remove a spark plug and look inside your engine with a borescope. • Note the carbon build-up. Note how much cleaner the engine and the parts are after the continued use of EnviroTabs®.
<p>INCREASES OIL LIFE Save \$\$\$ Again the carbon in your oil is like a sandpaper or acid to your engine. Recirculating cleaner engine oil is much better for your engine operationally. Oil life is definitely extended with the continued use of EnviroTabs®. It's cleaner, clearer and the "grit" associated with engine wear is significantly reduced.</p>	<ul style="list-style-type: none"> • Note the color and the texture or "grit" prior to using EnviroTabs® (rub it between your fingers). • Note how much cleaner, clearer and less "gritty" your oil is after the continued use of EnviroTabs®. • Change your oil and see how long it stays cleaner and clearer.
<p>DECREASES HEAT OR TEMPERATURE Save \$\$\$ EnviroTabs® allows your engine to burn fuel quicker at a lower temperature. Lowering heat extends the life of your engine and engine components (gaskets, valves, seals, etc.). Many vehicles and large trucks have gauges which measure temperature including exhaust temperature. Decreasing temperature increases the efficiency of the engine both in mileage and in horsepower. Reducing heat leads to better performance.</p>	<ul style="list-style-type: none"> • Note the "warm" or running temperature of your engine using the gauges on your dashboard. Note how much cooler ALL your gauges read after the continued use of EnviroTabs®. • Note the temperature of your exhaust. Note how much cooler your exhaust is after the continued use of EnviroTabs®.
<p>DECREASES MAINTENANCE COSTS Save \$\$\$ Carbon deposits cause excessive wear. Reducing or eliminating carbon has several benefits. Maintenance costs associated with carbon are reduced dramatically.</p>	<ul style="list-style-type: none"> • Note the black deposits on the internal parts of your engine. Check your EGR valve, spark plugs, etc. • Note how clean they are after the continued use of EnviroTabs®.
<p>ELIMINATES THE NEED FOR HIGH OCTANE Save \$\$\$ High performance engines require high-octane fuel or an expensive additive that forces the fuel to burn at a lower temperature. EnviroTabs® allows your engine to burn fuel at a lower temperature, eliminating the need for the added expense of high-octane fuel.</p>	<ul style="list-style-type: none"> • If your engine requires high-octane fuel and you are not using high-octane fuel notice the knocking (misfiring). This reduces performance, efficiency and mileage. • Note the knocking is eliminated after the continued use of EnviroTabs® without the use of high-octane fuel.
<p>INCREASE FUEL MILEAGE Save \$\$\$ EnviroTabs® improves the burn rate in the combustion chamber providing a significant improvement in fuel economy. However, it can be hard to gauge MPG's consistently because of the inherent inaccuracies built into the calculations. There are over forty variables that affect fuel mileage. Driver's habits, temperature, traffic, weather, ethanol blends, seasonal fuel, are just a few.</p>	<ul style="list-style-type: none"> • Establish a baseline prior to using EnviroTabs®. • Record your results on the Mileage Tracking Form. • Note the increase in fuel mileage after the continued use of EnviroTabs®.

Commercial Use

At Greenfoot Global™, we are extremely excited about the seemingly countless opportunities with a product as dynamic as EnviroTabs®.

We are currently in our Pre-Launch phase and have made the strategic business decision to limit our initial product packaging to the individual consumer market.

As we progress, we will aggressively expand our product packaging options to better meet the needs of larger commercial applications. Thank you for your support.

Remember: EnviroTabs® will work in any size internal-combustion engine.

Approved for use in:

Gas, Diesel, and Ethanol Blends

Greenfoot

Company History

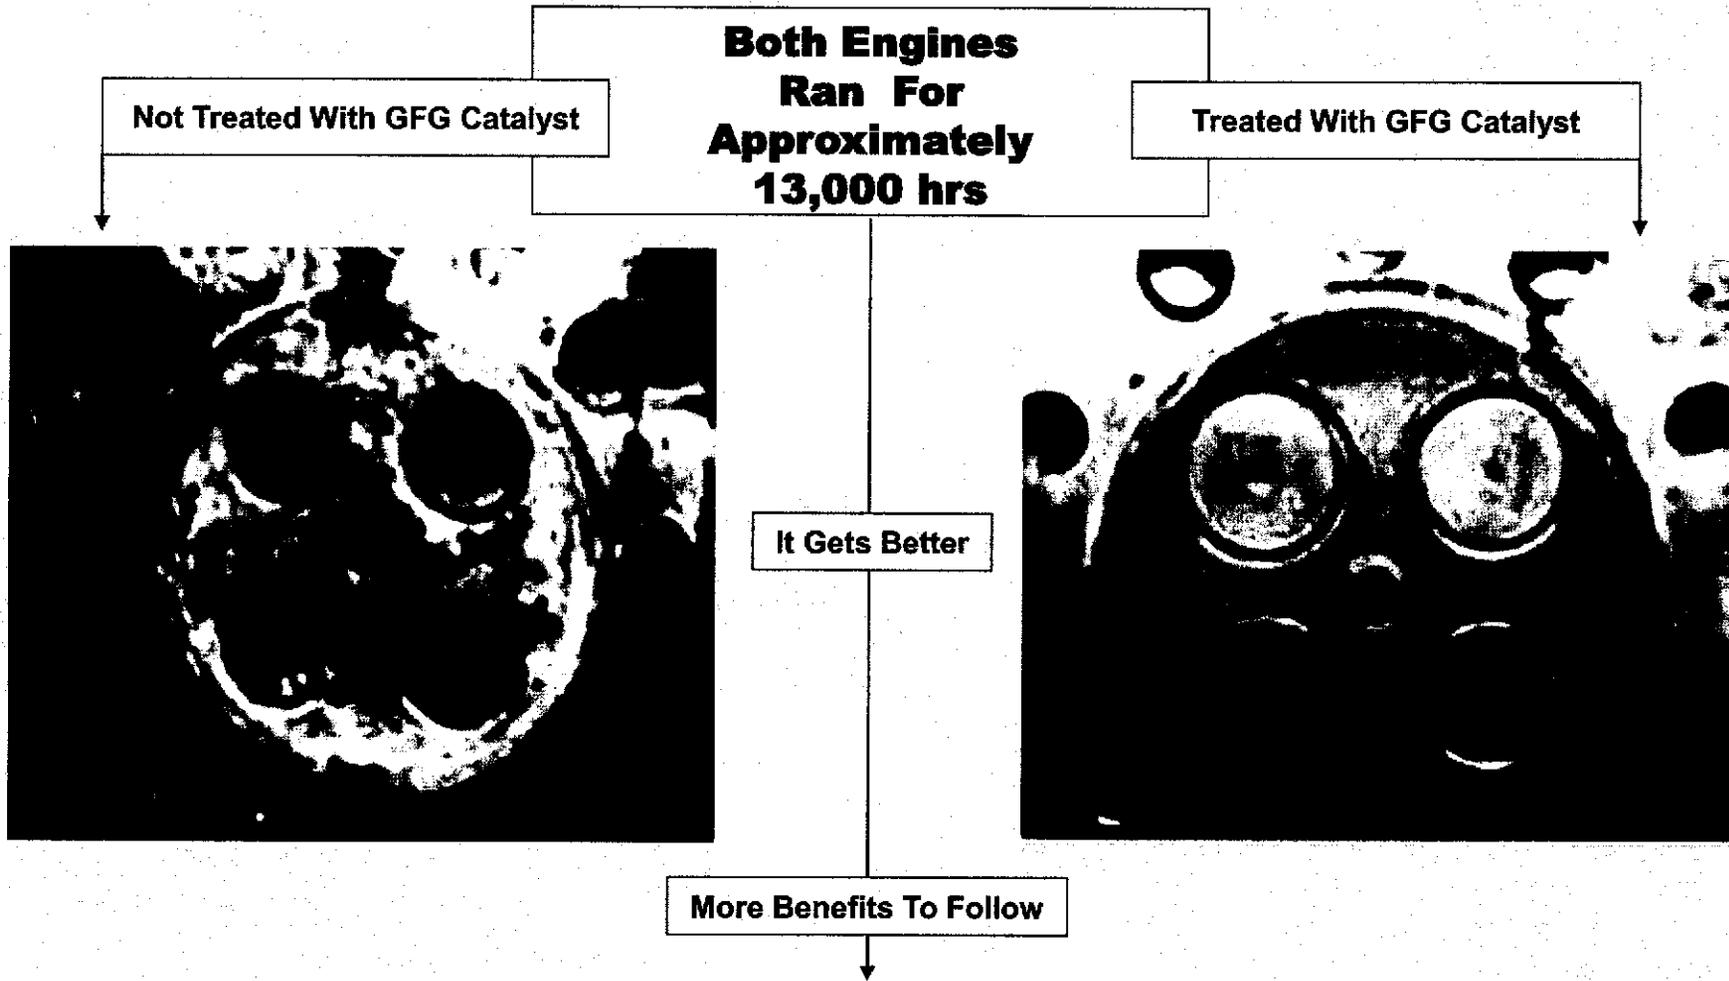

The Greenfoot Global™ Catalyst was originally developed as a result of work on experimental burn rate modifiers for solid rocket propellant systems used in the aerospace industry.

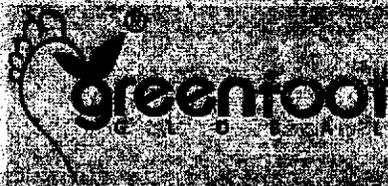

In 2009, a new consumer division was established to probe the market for this innovative product. A 90+ percent customer retention rate is a testimony to Greenfoot Global's™ success.

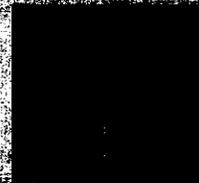

Proven and Tested

Reduce Maintenance... Increase Profits!

Benefits

Many of the benefits obtained from GFG products are derived from the combustion surface and deposit surface modifiers included in the GFG formulation.

- *Removes Deposits*
- *Inhibits Deposit Formation*
- *Decreases Fuel Consumption*
- *Emissions are Reduced*
- *Carbon Content of Ash Will Drop*
- *Extends Oil Life*
- *Extends Equipment Life*
- *Octane-Requirement Decrease*
- *Reduce Knocking, Pinging & Dieseling*
- *Inhibits Stratification, Sludge Formation*

The #1 Benefit
Using a product with claims, backed by results.

GFG...BEST In The Industry

As a catalyst GFG's Fuel Technology lowers the energy of the activation rate. This allows carbon deposits to burn off at temperatures 400°C lower, than the 600°C required in non-catalyzed fuel.

- This unique bonding takes advantage of the greatly reduced burn threshold to ignite combustion inhibited fuel impurities and the slower reacting long-carbon chains.**

UPU...ELIMINATING IMPURITIES

The impurities that exist in petroleum-based fuels cause carbon deposits to line the surfaces of the internal combustion chamber.

These deposits will not combust at normal engine operating temperatures. Hard carbon deposits are a problem, causing your fuel mileage to drop over the life of the equipment.

Carbon Deposits

Carbon deposits are a problem for all engines.

Cat Engine

Engine scheduled for rebuild at 13,800 hours

Note absence of combustion deposits.
The GFG Catalyst had been added for
the last 900 hours.

Reduce Maintenance

Side by Side Engine Comparison

Not Treated with GFG Catalyst

**Both Engines
Ran for
Approximately
13,000 hours**

GFG Fuel Tech is a
Catalyst
NOT
a Detergent

Treated with GFG Catalyst

- Eliminating combustion deposits will increase engine life and improve performance.
- Hard carbon deposited as build-up in the engine results in greater friction, causing excessive wear.
- Any existing carbon deposits, will burn off freeing the engine of this abrasive material, preventing new deposits when used consistently.
- As maintenance costs and emissions decrease, expect engine life, fuel economy, performance, and horsepower to increase.

Reducing Emissions A Worldwide Challenge

GFG is leading the way in the reduction of harmful pollutants emitted from combustion engines. A goal made possible by offering a cost effective catalyst to a world that thrives on fuel.

EMISSIONS REDUCTION RANGE FOR POLLUTANTS WHEN USING GFG PRODUCTS

- Oxides of Nitrogen (NOx): 15 - 25%
- Carbon Monoxide (CO): 15 - 20%
- Sulfur Oxides (SOx): 35 - 50%
- Hydrocarbons (HC): 25 - 30%
- Particulate Matter (DPM): Up to 75%
- Stack Smoke 50 - 90%

Oxides of Nitrogen (NOx) is a precursor to the formation of ground level ozone, which causes health problems such as damage to lung tissue, reduction of lung function, and sensitization of lungs to other irritants.

Greenool

Made in the USA

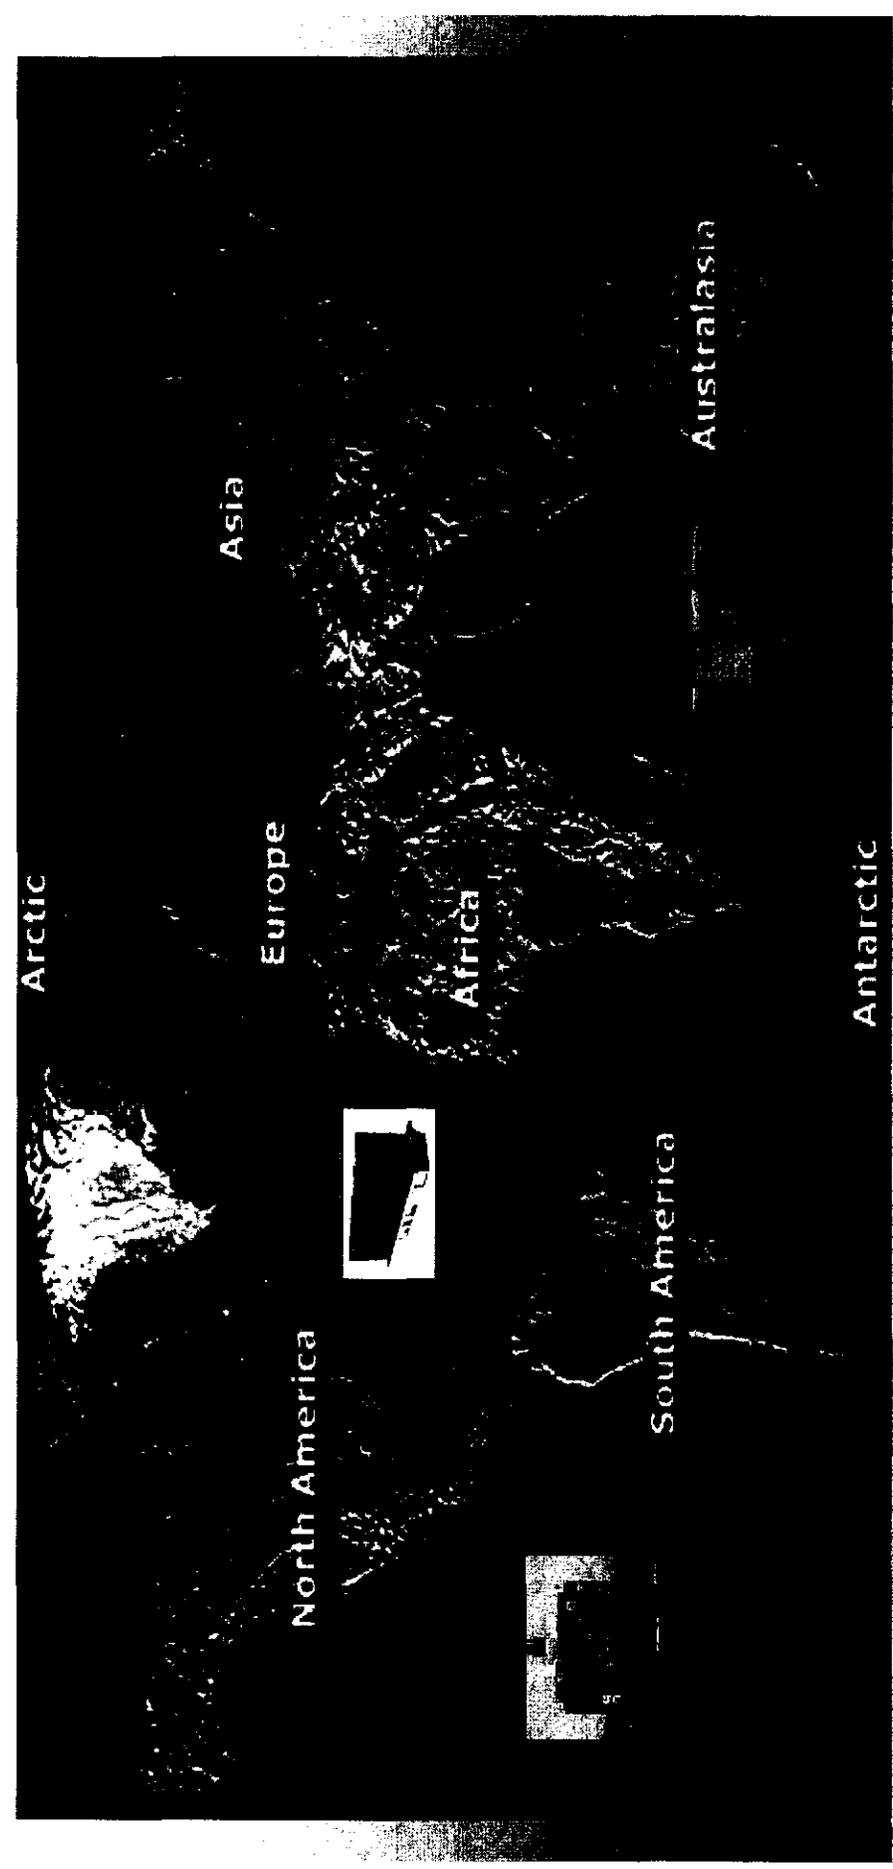

Approved for use in gasoline, ethanol, diesel

GFG products can help bring you into compliance with EPA, DOT & MSHA

Product Shipping

GFG can meet large quantity demands, and ship any size container worldwide.

100 % Money Back Guarantee

Our product is backed by a 100% Money Back Guarantee

Nuestra Historia

Greenfoot Global™ es la compañía detrás del producto patentado EnviroTabs®. EnviroTabs® fue desarrollado como resultado de trabajo experimental sobre modificadores de velocidad de combustión para sistemas sólidos de propulsión de cohetes, utilizado en la industria aeroespacial. Durante más de 30 años, varias mezclas de este producto han sido utilizadas en grandes aplicaciones comerciales y gubernamentales. Millones y millones de millas y horas de uso han probado que el producto es eficaz en varias categorías.

A principios de 2009, un grupo de profesionales de mercadeo siguieron su deseo de crear el producto en forma tableta para su uso por los consumidores en todo el mundo. Al asociarse con un equipo de científicos e ingenieros quienes han trabajado con este catalizador de combustión único y multi-funcional desde mediados de 1980, ¡nació EnviroTabs®!

Más tarde durante ese año, un grupo de vendedores en línea comenzó a vender EnviroTabs® a través de una campaña de mercadeo de afiliación. En poco tiempo, los afiliados vendieron más de 4.000 suministros de un mes el suministro del producto, cada uno cubierto por una garantía de 100% de devolución. Más de un año después, ¡ni una sola persona ha devuelto el producto!

Como resultado de ese éxito, Greenfoot Global™ compró la compañía de mercadeo de afiliación y comenzó un programa de comercialización de la red con una filosofía única y un plan de compensación eléctrica. Hemos creado una oportunidad emocionante para el empresario individual basado en el hogar que desea aprovecharse del movimiento "verde" que está explotando en todo el mundo.

Greenfoot Global™ tiene los derechos exclusivos de la distribución de venta directa mundial para nuestro producto registrado por la EPA y patentado, EnviroTabs®.

¿Cómo Funciona?

EnviroTabs® es un acondicionador organometálico de metal que actúa como un modificador de la velocidad de combustión que cataliza el combustible. Esta acción permite que más del combustible que quema en la descarga eléctrica del motor, y por lo tanto, menos combustible que quema en la descarga de combustión.

EnviroTabs® mejora simultáneamente la economía de combustible, aumenta la potencia, y reduce las emisiones mediante la creación de una capa micro-fina en la cámara de combustión de su motor que permite que el combustible que quema más rápidamente.

EnviroTabs® quema depósitos de carbón y provoca catalíticamente que una reacción química ocurra a una temperatura más baja. Las partículas de combustible comienzan a quemar en temperaturas tan bajas como 200 ° C, en vez de 600 ° C. Esta reacción química permite que las impurezas y los depósitos de carbón duro quemen completamente.

EnviroTabs® cambia las características de la absorción del calor del superficie de metal. Note: La mayor pérdida en la eficiencia de un motor de automóvil es la pérdida de calor. El calor es la energía liberada por la mezcla de combustible y aire, que produce un salto de calor, el cual crea la expansión que se utiliza para dar fuerza al vehículo. Las paredes del cilindro y la cabeza son refrigeradas por agua, y los pistones son enfriados por aceite. La capa fina inhibe la transferencia de calor radiante. Esto significa mayor temperatura de combustión, mayor expansión, y más potencia con menos emisiones. Al aumentar la combustión en la cámara de combustión (en vez de después de la quemadura), el rendimiento puede ser mayor, mientras que el consumo de combustible y las emisiones se reducen. Recuperación de calor es el mejor método para reducir las emisiones dañosas, aumentar la economía del combustible, mejorar el rendimiento del motor, y extender la vida del aceite y del motor.

¿Funciona con todo tipo de combustibles?

Sí - EnviroTabs® funciona en el nivel químico del proceso de combustión y por lo tanto, funciona exactamente de la misma manera, independientemente del tipo de combustible que se utiliza. EnviroTabs® está formulado para el uso con todo tipo de combustible, gasolina y diesel, que incluyen Ethanol Blends, combustible mezclado de dos-ciclos, y las mezclas de diesel (invierno, verano, y bio). ¡EnviroTabs® funciona en cualquier automóvil, camión, motocicleta, o generador lo que sea - que tenga motor de combustión!

Sólo hay que poner EnviroTabs® en su tanque de combustible antes de llenar, siguiendo las instrucciones de dosificación. La tableta se disolverá completamente en algunos de minutos, muchas veces antes de que haya terminado de llenarse. Una vez disuelto, pasa a través de la línea de combustible y pasado el filtro de combustible, utilizando el combustible como un portador. EnviroTabs® no modifica ni altera el combustible de ninguna manera.

Normas de uso del producto para un rendimiento máximo.

¿Es seguro?

¿Puede EnviroTabs® dañar mi motor con el tiempo?

EnviroTabs® se basa en más de 30 años de investigación sobre catalizadores de combustión y los modificadores de la velocidad de combustión, tanto en la industria aeroespacial y la industria de aditivos de combustibles. EnviroTabs® ha sido comprobado como seguro y eficaz a través de millones de millas de uso.

Para obtener registro de la EPA, uno debe proporcionar pruebas de nivel uno de la EPA. Una vez hecho y pasado, la EPA registra el producto, que significa que se ha determinado que no es más peligrosa para el coche ni para el medio ambiente que en el combustible en el cual se encuentra. EnviroTabs® es registrado por la EPA. Esta tecnología está patentada y diseñada científicamente para eliminar cualquier efecto secundario que pueda existir.

Además, el Congreso aprobó la Magnuson-Moss Warranty Act en 1975, que establece que "Los fabricantes de motores no pueden discriminar en contra del uso de un aditivo de combustible". Bajo los términos del Magnuson-Moss Warranty Act, los fabricantes de motores deben tener la posición de que el uso de un aditivo de combustible no anula la garantía del motor, a menos que se pueda demostrar que el aditivo específico fue la causa de la falla.

Las pruebas independientes realizadas por un laboratorio de terceros han comprobado que el producto no cambia las especificaciones de los combustibles. El uso de EnviroTabs® no anulará la garantía de un fabricante del motor. El combustible simplemente actúa como un portador a la cámara de combustión, donde el catalizador trabaja.

La tecnología de combustión catalizadora de EnviroTabs® es de verdad bueno para el motor, ayudando a extender la vida de su motor, evitando la formación de depósitos de carbón duro, y eliminando depósitos de carbón duro que ya están presentes en la cámara de combustión. Estos depósitos crean abrasivos en el aceite a través del tiempo, causando un desgaste excesivo del motor. Mediante el uso de EnviroTabs®, el aceite se mantiene más limpia y mantiene su lubricación inicial.

Los depósitos relacionados con la pre-ignición y golpes también pueden dañar el motor. Al utilizar EnviroTabs® Ud. también ayudará a reducir la frecuencia de estas reacciones adversas. No sólo es EnviroTabs® inofensivo en el combustible, pero muchos de los efectos potencialmente nocivos de los combustibles no tratados son muy reducidos o eliminados.

Beneficios?

EnviroTabs® tiene numerosas ventajas que pueden ahorrarle dinero, reducir emisiones de combustible dañosos, bajar el costo de mantenimiento, y aumentar caballos de fuerza.

¡Ahorre dinero!
¡EnviroTabs® le Ahorra Dinero en la Bomba!

¡Con EnviroTabs® en su tanque, su vehículo puede consumir menos combustible!

Le Ayuda Aumentar la Economía de Combustible.

La tarifa de quemadura mejorada de quemadura en la cámara de combustión proporciona una mejora significativa en economía del combustible; entre más completa la combustión del combustible en la cámara de combustión, cuanto mejor es la economía del combustible. La prevención y el retiro de los depósitos de combustión y de su migración subsecuente en el sistema lubricante del motor reducen la fricción y proporciona una mejora adicional en economía del combustible.

Puede Bajar Requisito de Octano

¡EnviroTabs® ayuda a eliminar golpes de motor sin la ayuda de combustibles de alto octano. Piense en cuánto dinero usted podría ahorrar cambiando de superior al combustible regular. ¡Podría ahorrar hasta entre 15 a 25 centavos por galón o más!

Reducir Emisiones

¿Cómo Ayuda EnviroTabs® a Reducir Emisiones?

EnviroTabs® simplemente permite que el combustible queme más rápido dentro de la cámara de combustión, así dejando que menos emisión salgan por la pipa de cola.

Bajos Costos de Mantenimiento

EnviroTabs® Ayudan a Prolongar la Vida de Su Motor

Los EnviroTabs® disuelven los depósitos de carbón, el cual puede prolongar la vida del aceite y del motor, e inhibir la formación de nuevos depósitos de carbón en su motor.

Las impurezas que existen en combustibles pueden causar depósitos de carbón sobre las superficies de la cámara de combustión. Esto es lo que contamina el aceite de motor.

Si los depósitos de carbón duros acumulan en el motor, esto da lugar a la mayor fricción que causa desgaste excesivo. EnviroTabs® consumirá cualquier depósito de carbón existente, y esto deja su motor libre de este material abrasivo. El uso constante también evitará que los nuevos depósitos se formen. Esta acción catalítica ayuda a mejorar la vida de su motor.

También amplía la vida del aceite y del motor, permitiendo que el aceite permanezca más limpia para más tiempo. Esto significa que una mejor lubricación está ocurriendo dentro del motor. Esto puede ayudarlo a reducir los costos de mantenimiento y de reparos.

Caballos de Fuerza

Si - Las pruebas independientes han demostrado on the catalyst un aumento espectacular en caballos de fuerza sin la ayuda de modificaciones costosas del motor. Se puede utilizar EnviroTabs® como aumentador de de caballos de fuerza para cualquier motor que utiliza combustible.

- EnviroTabs® ofrece ventajas similares a un propulsor de octano. Se puede utilizar EnviroTabs® en lugar de costosos aditivos de propulsor de octano.
- Al aumentar la eficacia y la quemadura del combustible, se alcanza más energía se alcanza en los rodillos impulsores sin el uso del combustible del alto-octano.
- EnviroTabs® puede producir tantos caballos de fuerza como si usted instalara un sistema de ventilación y cabezazos... ¡para mucho menos dinero!

Se aumentan los caballos de fuerza mientras que EnviroTabs® se pone a trabajar en las superficies de lo que se conoce como la "culata del fuego" de un motor de combustión interna. Esto crea un ambiente donde el combustible quema más aprisa y por lo tanto más completo que antes de que realmente comience el ciclo del extractor.

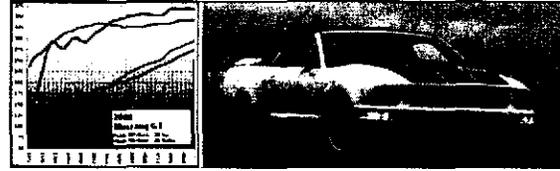

Esto crea un aumento de hasta 30% en eficacia del descenso del pistón durante el ciclo de combustión. Debido a este efecto, usted experimentará un aumento notable en caballos de fuerza.

El tratar de su motor con EnviroTabs® también evita que nuevos y existentes depósitos de carbón queden en la cámara de combustión. Esto significa que su motor se mantiene limpio, y el medio ambiente queda más limpio. Los combustibles que ponemos en nuestros vehículos son sucios y no queman completamente. Cuando manejamos nuestros vehículos, el combustible que no se queme se emite al aire como exhosto, así causando contaminación atmosférica.

Ésa es la explicación científica... nosotros le animamos simplemente a probar EnviroTabs® y a experimentar la diferencia para usted mismo. Usted no tiene nada que perder y solamente caballos de fuerza y eficacia del combustible para ganar. ¡Tome una prueba de conducción hoy!

¡Apoyado por nuestra garantía de 100% de devolución del dinero!

Cada galón de gas o de diesel consumido produce 16 libras de CO2 y en algunos casos, más que 21 libras de emisiones de gases contaminantes. EnviroTabs® ayuda a reducir emisiones, incluyendo el monóxido de carbono, el óxido de nitrógeno, y otros compuestos orgánicos volátiles.

En muchos estados, los vehículos deben pasar una prueba de emisiones antes de que se pueda conducirlos legalmente. Muchos clientes de EnviroTabs® han encontrado que después de no haber podido pasar su prueba de emisión inicialmente, ya podían después de usar EnviroTabs® en apenas dos tanques de combustible. Esto es les cae muy bien y es muy bueno para el medio ambiente. Usted puede hacer su parte para proteger el Planeta con cada tableta que usted ponga en su tanque.

Greenfoot Global™ se compromete a reducir emisiones en por lo menos 10% de los vehículos del mundo!

Please keep in mind that results may vary, based on temperature, road and traffic conditions, vehicle and engine age, and operator variables. Greenfoot Global™ is confident that you will be completely satisfied and enjoy all the benefits associated with EnviroTabs®. Therefore, we stand by a 60-Day, 100% Money-Back Guarantee for our customers!

Uso comercial

En Greenfoot Global™, estamos muy entusiasmados con las oportunidades, que parecen incontables, con respecto a un producto tan dinámico como EnviroTabs®.

En la actualidad, estamos en nuestra etapa beta del lanzamiento y hemos tomado la decisión económica estratégica de limitar nuestro embalaje inicial del producto a fin de que sea disponible solamente para el mercado de consumidores individuales.

A medida que avanzamos, ampliaremos agresivamente nuestras opciones de embalaje del producto para satisfacer mejor las necesidades de grandes aplicaciones comerciales. Gracias por su apoyo.

Recuerdese: EnviroTabs® funcionará en cualquier tamaño de motor de combustión interna. Sin embargo, está actualmente disponible solamente en una forma de tableta de 20 galones.

**Aprobado para su uso en:
gasolina, etanol, diesel, bio-diesel
y cualquier otra mezcla de hidrocarburos.**

Company History

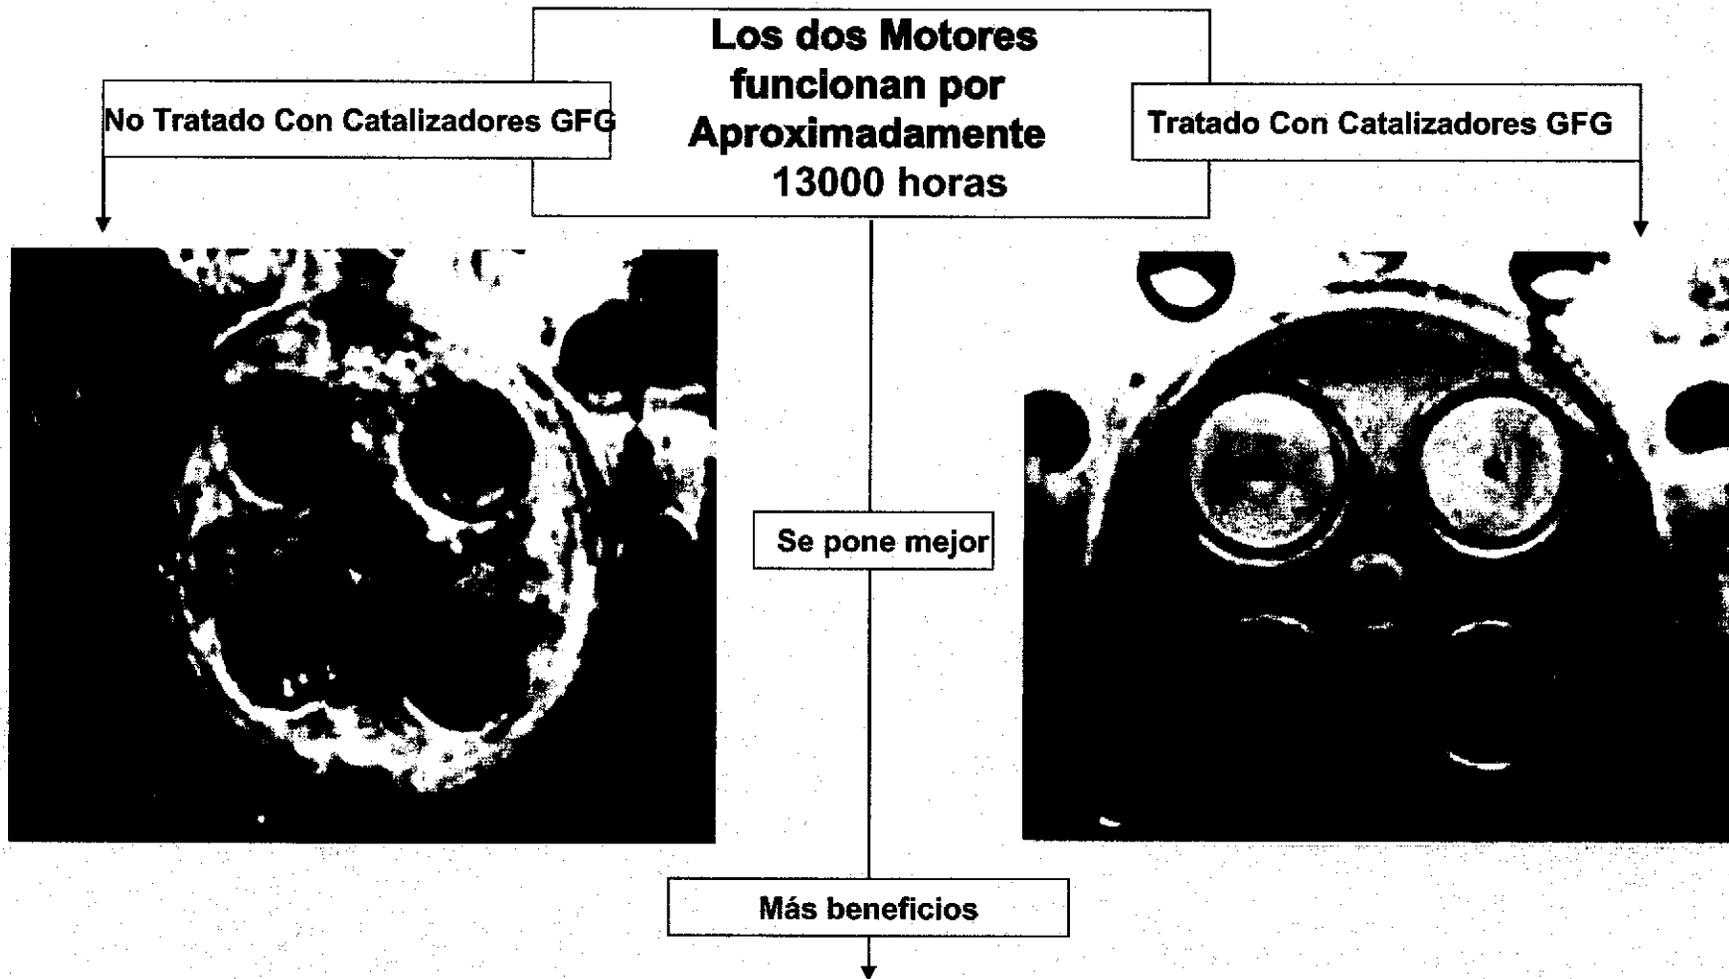

El Catalizador de Greenfoot Global™ fue desarrollado originariamente como resultado de una experimentación en modificadores de tasas de consumo para los sistemas de propulsión de cohetes utilizados en la industria aeroespacial.

En 2009, una nueva división de consumo fue establecida para estudiar el mercado para este innovador producto. Más del 90% del promedio de fidelidad de clientes es un claro testimonio del éxito de Greenfoot Global™.

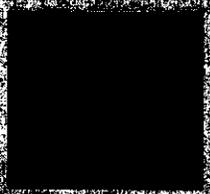

Proven and Tested

Reduce el Mantenimiento... ¡Aumenta tus Ganancias!

Benefits

Muchos de los beneficios obtenidos con los productos GFG son derivados de los modificadores de la superficie de combustión y depósito, incluidos en la formulación de GFG.

- *Elimina los Depósitos*
- *Inhibe la Formación de Depósitos*
- *Reduce el Consumo de Combustible*
- *Reduce las Emisiones*
- *Reduce el Contenido de Cenizas en*
- *Más vida al combustible*
- *Más vida al equipamiento*
- *Requiere menos octano*
- *Reduce el golpeteo, el ruido y el autoencendido*

Beneficio # 1

Usas un producto solicitado, respaldado por resultados reales

GFG - BEST In The Industry

Como Catalizador, la Tecnología de Combustibles de GFG reduce la energía de la tasa de activación.

Esto permite que los depósitos de carbono se quemén a temperaturas cerca de los 400°C, y no con los 600°C que necesitan los combustibles no catalizados.

- Esta unión única saca provecho la temperatura de quemado reducida para eliminar la acumulación de impurezas del combustible y las cadenas de carbono de reacción lenta

- Los resultados son una combustión casi perfecta y emisiones

U.G. Eliminación Impurezas

Las impurezas que existen en los combustibles con base de petróleo provocan que los depósitos de carbono cubran la superficie interna de la cámara de combustible.

Estos depósitos no comenzarán la combustión con las temperaturas normales de funcionamiento del motor. Los grandes depósitos de carbón son un problema, hacen que el kilometraje de combustible reduzca la vida útil del equipo.

Los Depósitos de Carbono

Los depósitos de carbono se forman en la cámara de combustible y en el sistema de inyección.

Estos depósitos de carbono se forman por la combustión incompleta del combustible.

Cat Engine

Motor programado para reconstrucción a las 13800 horas

Vea la ausencia de depósitos de combustión. El Catalizador de GFG ha sido agregado en las últimas 900 horas. Las válvulas están limpias, los números de las partes están visibles.

Tratado Con el Catalizador de GFG

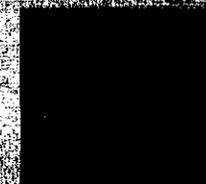

La Tecnología de
Combustibles de GFG es
un Catalizador,
NO
un Detergente

- Con la eliminación de depósitos de combustión se alargará la vida útil del motor y mejorará su rendimiento.
- El carbono depositado y acumulado en el motor resulta en más fricción, lo que causa un uso excesivo.
- Cualquier depósito de carbono existente desaparecerá, liberando al motor de este material abrasivo y evitando nuevos depósitos si se usa constantemente.
- Como se reducen las emisiones y los costos de mantención, se espera que la vida del motor, la economización de combustible, el rendimiento y los caballos de fuerza aumenten.

Reducing Emissions

A Worldwide Challenge

GFG es líder en la reducción de contaminantes dañinos emitidos por motores de combustión. Un objetivo hecho posible ofreciendo un catalizador rentable a un mundo que crece con el combustible.

REDUCCIÓN DE EMISIONES PARA CONTAMINANTES CON LOS PRODUCTOS DE GFG

- Óxidos de Nitrógeno (NOx): 15 - 25%
- Monóxido de Carbono (CO): 15 - 20%
- Dióxido de Azufre (SOx): 35 - 50%
- Hidrocarburos (HC): 25 - 30%
- Materia en Partículas (DPM): Hasta un 75%
- Humo Acumulado 50 - 90%

El Dióxido de Nitrógeno (NOx) es un precursor a la formación de ozono al nivel del suelo, lo que causa problemas de salud tales como daños en los tejidos pulmonares, reducción de la función pulmonar y sensibilización de los pulmones con otros irritantes.

Los hidrocarburos resultan de una combustión incompleta.

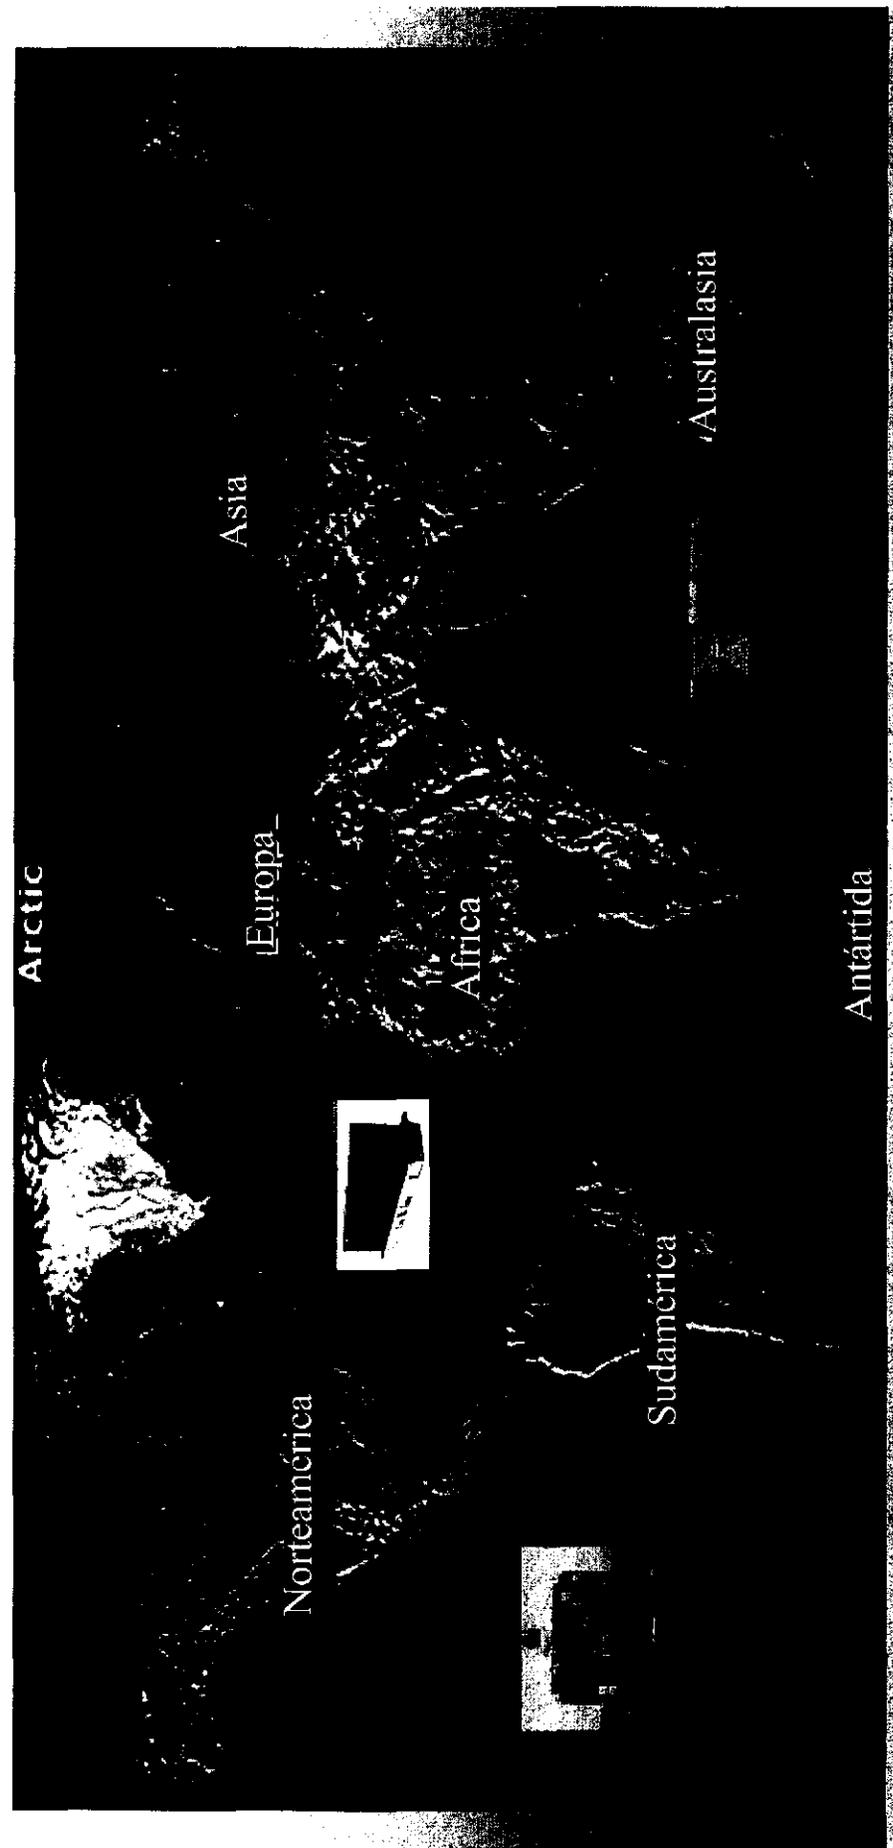

Aprrobadado para uso en gasolina, etanol, diesel

Los productos de GFG pueden ayudarte a cumplir con las condiciones necesarias de
EPA, DOT & MSHA

Product Shipping

GFG puede cumplir con demandas en gran cantidad y hacer envíos de cualquier tamaño a todo el mundo.

100 % Money Back Guarantee

Nuestro producto está respaldado por una Garantía de Reembolso del 100%

Para más información y para saber sobre las pruebas contacta a la persona que te brindó esta página web.

EXHIBIT 3

A Technology Whose Time Has Come

Our Mission!

**To reduce emissions in
10% of the worlds vehicles.**

Reduces Harmful Emissions

Decreases CO, NOx, SO2 & other tailpipe emissions

Saves You Money at the Pump

Increases fuel economy & lowers octane requirements

Lowers Your Maintenance Costs

Cleans combustion surfaces, increases engine & oil life

Increases Engine Horsepower

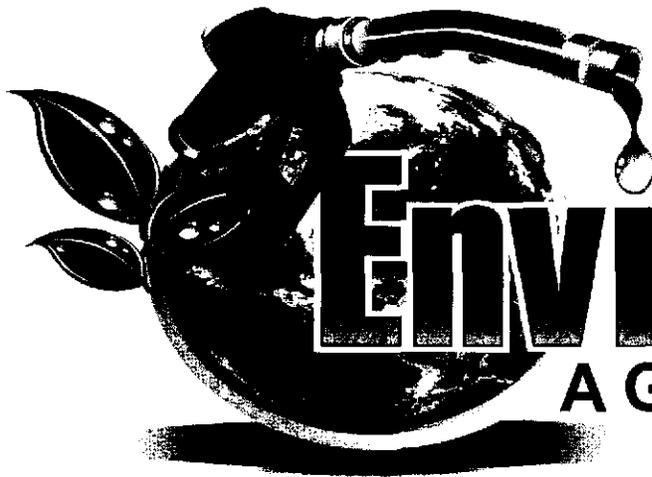

Increases horsepower, engine torque & acceleration

Lowers Octane Requirements ♦ Saving More 

Completely Dissolves in Minutes ♦ No clogged filters or injectors

Will Not VOID Any Engine Warranties  

EPA Registered ♦ Patent Pending ♦ Made in the USA

Why Should Everyone Use EnviroTabs?

Reduces Tailpipe Emissions

EnviroTabs Green Technology simply allows fuel to burn better inside the combustion chamber leaving less emissions to exit out the tail pipe.

ET Results
Perceived Results
Actual Baseline

MPG 1st Tank 2nd Tank 3rd Tank 4th Tank 5th tank

Double blind, statistical testing proved your mileage will increase from 7% to 14% and customers have reported as much as 19% or more

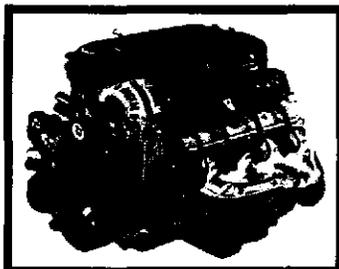

Lowers Octane Requirements

EnviroTabs will help eliminate engine knock without the aid of higher octane fuels. Think how much money you could save by switching from premium to regular fuel?

Helps Extend Oil & Engine Life

EnviroTabs Green Technology allows oil to stay clean longer. This means that better lubrication is taking place inside the engine. This can help you reduce maintenance costs and possible expensive repair costs due a major engine failure.

Increases Horsepower

Independent studies have shown EnviroTabs Green Technology can provide an increase in engine torque and noticeable acceleration.

How Does EnviroTabs Work?

Just put EnviroTabs in the fuel tank before filling up. The tablet will completely dissolve in minutes. EnviroTabs dissolves 11 times faster and is 9 times smaller in particle size than other products on the market. Once dissolved it passes through the fuel line and past the fuel filter using the fuel as a carrier. (EnviroTabs does not modify the fuel)

EnviroTabs is an organometallic engine conditioner that simultaneously improves fuel economy and power by creating a micro-thin coating in the combustion chamber of your engine allowing your fuel to burn more efficiently.

EnviroTabs Green Technology is a combustion chamber catalyst. The fuel particles begin to combust at temperatures as low as 200° C. Therefore the fuel burns quicker and more completely through the combustion stroke.

EnviroTabs changes the surface heat absorption characteristics of metal. Note: The greatest loss in efficiency in an automobile engine is the loss of heat. Heat is energy released by the mixture of fuel and air; and produces a heat spike which creates expansion used to power the vehicle. The cylinder walls and head are water cooled, and the piston is oil cooled. The thin coating inhibits the transfer of radiant heat. This means higher combustion temperature, greater expansion and more power with reduced emissions. By increasing the burn in the combustion chamber (rather than as after-burn) performance can be increased while reducing fuel consumption and emissions. Heat recovery is the single best method to reduce harmful emissions, increase fuel economy, improve engine performance and extend oil and engine life.

Does it work with all types of fuels?

Yes - EnviroTabs Green Technology works at the chemical level of the combustion process and therefore works in exactly the same way regardless of the type of fuel in which it is used. EnviroTabs are formulated for use with all types of gas and diesel fuel grades which includes: E-85, Two-cycle mixed fuels, blends of diesel (winter, summer and bio)

EnviroTabs 100% Money Back Guarantee!

Following this procedure will qualify you for a 100% Money Back Guarantee

- 1. Record mileage before using EnviroTabs.** Use the mileage tracking form below to figure out your baseline mileage. Establish your current fuel mileage on two tanks of fuel.
- 2. Use one EnviroTab to treat up to 20 Gals. / 76 Liters of Fuel (Snap tablet in half to treat up to 10 Gals. / 38 Liters) (Double the dosage for the 1st two tanks for best results)** Place the tablet(s) in the fuel tank before filling up each time.
- 3. Record your mileage for at least 8 tanks of fuel at the recommended treatment ratio.** If you don't save more money on fuel than you spent on the package of tablets we'll refund your money.
- 4. Please send your empty pouch of EnviroTabs and Mileage Tracking Form below filled out completely to: EnviroTabs - 2010 Corporate Way - Orlando, FL 99999**

Name: _____ Date of Purchase: _____
 Address / City: _____
 State & Zip Code or Prov. & Postal Code: _____

No Use of EnviroTabs Use Double Dosage for 1st Two Tanks Use Regular Dosage

Starting Odometer	Ending Odometer	Miles / Kilo. (Divided By)	Gals. / Liters =	MPG / KPL
After figuring out your baseline above - Use 1 tablet to treat up to 20 gallons / 76 liters (Snap tablet in half to treat up to 10 gallons / 38 liters) Double Dosage for 1st two tanks for best results. Place the tablet(s) in the tank before filling up. The tablet will completely dissolve in minutes.				

How Does EnviroTabs Reduce Emissions?

EnviroTabs Helps Save Money At The Pump!

EnviroTabs Reduces Maintenance Costs!

Removes carbon deposits, extends oil life, extends engine life, inhibits the formation of new engine deposits.

The impurities that exist in petroleum-based fuels cause carbon deposits to form along the surfaces of the combustion chamber. They are what causes your motor oil to become contaminated and can plug up fuel injectors.

EnviroTabs Green Technology is a combustion catalyst and lowers the energy of activation rate, which allows the carbon deposits to burn off at temperatures as low as 200° C as opposed to 600° C. EnviroTabs bonds to fuel impurities and carbon deposits and catalytically causes a chemical reaction to happen at a temperature where it normally wouldn't happen. This chemical reaction allows the impurities and the hard carbon deposits to completely combust during the combustion stroke of the engine.

Removes Carbon Deposits

Hard carbon deposits build up in the engine and result in greater friction, causing excessive wear. EnviroTabs will burn off any existing carbon deposits leaving your engine free of this abrasive material. Consistent use will also prevent new deposits from being formed. This catalytic action helps to improve the life of your engine.

Reduces Engine Wear

Over an extended period using EnviroTabs a micro thin protective coating will be produced on the cylinder walls and on the other combustion surfaces. Overtime the cylinder walls are polished by the rings on the piston, becoming more durable than the original metal helping extend the life of your engine.

Look at the EnviroTabs Difference

These engines were both in operation for over 13,000 hours. The engine on the right was ran with regular fuel. The engine on the left was treated with EnviroTabs Green Technology. Will not VOID your engine warranties

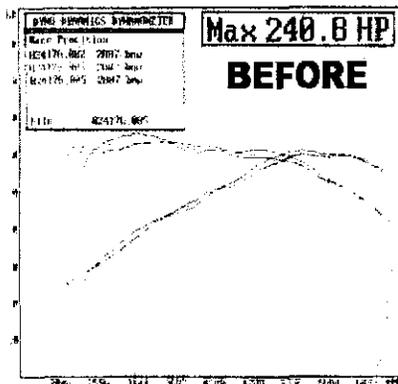

Will EnviroTabs Increase My Horsepower?

YES - Independent tests have shown a dramatic increase in horsepower without the aid of expensive engine modifications. EnviroTabs can be used as a horsepower booster for any fuel burning engine.

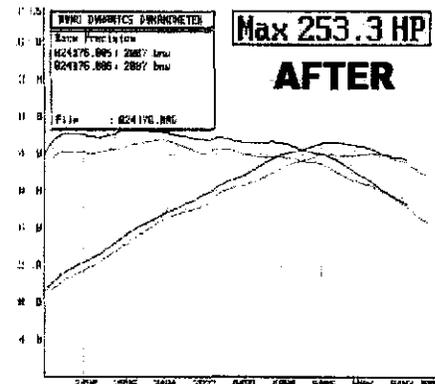

EnviroTabs Offers Benefits Like An Octane Booster

EnviroTabs can be used in place of expensive octane booster fuel additives. By increasing the efficiency and burn of the fuel, greater power is achieved at the drive wheels without the use of higher octane fuel.

You can produce as much horsepower with EnviroTabs as you would from installing an air intake system and headers....for a lot less money!

Dyno Test 2007 BMW 335i

EnviroTabs Increases Horsepower with no Engine Modifications Quote from our Test Lab:

"Finally, I was able to get a vehicle with a carburetor on the dyno. The engine increased in HP from 334 to 353. No adjustments were made to the engine. The purpose of this test was to see if the EnviroTabs would bring up the air to fuel ratio within range. We were successful in past tests on injected turbo charged vehicles, but this was our first attempt with a carburetor. EnviroTabs worked perfectly. The engine was blueprinted and tuned with 114 octane racing fuel. At the time of the dyno test the engine had been running for a total of 20 minutes. EnviroTabs was then added to 93 octane fuel and run on the dyno. EnviroTabs delivered the same performance as the racing fuel. Racing fuel is \$10.00 / gallon vs. 93 octane fuel for \$3 to \$4 / gallon."

Will EnviroTabs Harm My Engine?

EnviroTabs Green Technology is based on over 30 years of research on combustion catalysts and burn rate modifiers in both the aerospace industry and the fuel additive industry. EnviroTabs are organometallic compounds proven effective by over 20 Million operating hours of use!

EnviroTabs combustion catalyst technology is good for your engine. It will actually extend the life of your vehicle. This product is EPA registered. EnviroTabs patent pending green technology has been carefully designed and engineered to eliminate any potential side effects.

Testing has proven the product doesn't change fuel specifications. The use of EnviroTabs will not void engine manufacturer's warranties. The fuel is a carrier to the combustion chamber where the catalyst goes to work. Simply follow the directions on the package and enjoy the results.

EnviroTabs will prevent hard carbon deposits that cause abrasives to build up in the oil over time, causing excessive engine wear. EnviroTabs will prevent hard carbon deposit formation during the combustion process and will remove hard carbon deposits which are already present in the combustion chamber.

The oil stays cleaner, maintains its initial lubricity and will actually prolongs engine life. Deposit related pre-ignition and knock can also damage an engine and the use of EnviroTabs will also reduce the frequency of these undesirable events, thus prolonging the engine life.

Not only is there no harm done using EnviroTabs in your fuel, but many of the potentially harmful effects of untreated fuel are greatly reduced or eliminated.

Consider Becoming an Affiliate of EnviroTabs

Everyone Buys Fuel!

Do you think anyone you know would like to save money on fuel, vehicle maintenance and cost, while making a positive impact on the environment?

The reality is that almost every person you know buys gas or diesel. Most people, if given the opportunity, are indeed interested in doing their part to reduce air pollution.

Most people would love to learn how to save money on fuel. Ask the person who gave you this Test Drive Kit for details on how you can become an Affiliate. For more information contact:

FAQ

As of 11-15-09 - Item #3036

Q: What are EnviroTabs and why should I use them?

A: EnviroTabs are organometallic compounds that you put in your gas tank at fill-up which dissolve completely and works in the combustion chamber to improve the combustion properties of gasoline and diesel fuel. You should use EnviroTabs to do your part to lower your carbon footprint, increase overall vehicle performance; this includes your fuel efficiency in miles per gallon / kilometers per liter, a decrease in engine wear and tear and reduction in engine operating temperatures and exhaust pollution. **ALL FOR FREE!**

Q: Why do you say EnviroTabs benefits are 'ALL FOR FREE'? I still have to pay for them!

A: True, but using EnviroTabs will actually save you more money than it costs to buy the product! **WE GUARANTEE IT!** Think of it this way, If you don't use EnviroTabs, every time you fill your tank, you are buying 2 to 3 gallons more than you should! Do that 10 times and it's \$50 to \$100, depending on the cost of gas, out the window! EnviroTabs are as low as \$20 USD per 10 Pack, plus you get all the other money saving benefits! So ... actually ... it's ... **BETTER than FREE!!**

Q: Does EnviroTabs reduce tailpipe emissions and improve the environment?

A: Yes, EnviroTabs can reduce carbon monoxide, hydrocarbons, nitrogen oxide, carbon dioxide and more.

Q: Does EnviroTabs improve my vehicle's horsepower and fuel mileage?

A: If you drive with a heavy foot, you will notice an increase in performance, but not a big increase in mileage. If you drive normally, double blind, statistical testing proved your mileage will increase from 7% to 14% and customers have reported as much as 19% or more.

Q: How can I figure out and track my mileage improvements?

A: First: You will need to establish a baseline MPG / KPL for your vehicle.

1. Use a minimum of 2 fill-ups to establish your baseline MPG / KPL.
2. Use the [ET Mileage Log PDF](#) available on our [100% Money Back Guarantee page](#) or in the Test Drive Kit.
3. Try not to use your vehicles on-board computer for mileage tracking.

Second: Begin the tracking by adding EnviroTabs to your tank. For best results: "Double the Dose" for the first 2 tanks! Then use as directed. (1) Tablet treats up to 20 Gallons/76 Liters - (Snap tablet in half to treat up to 10 Gallons/38 Liters)

Third: Calculate your mileage savings with EnviroTabs using the [ET Mileage Log](#).

Q: What type of fuel should be used with EnviroTabs?

A: Any grade of diesel or gasoline may be used. If you are using Premium fuel, you can switch to regular with no reduction in performance, which will be a large savings.

Q: How often should I use EnviroTabs? **A:** EnviroTabs should be used with every fill-up.

Q: How do EnviroTabs differ from other fuel additives?

A: EnviroTabs are a combustion catalyst that works on the combustion chamber. Other fuel additives are only detergents.

Q: Can EnviroTabs be used in other motorized machines as well?

A: Yes, EnviroTabs can be used in all diesel or gasoline powered engines such as motorcycles, boats, agricultural equipment, heavy machinery, etc. as well as 2-cycle equipment such as outboard motors, chain saws, lawn mowers, etc.

Q: How are EnviroTabs beneficial to my engine?

A: EnviroTabs will actually extend engine and oil life by removing hard carbon deposits that damage your engine also, shown to help engines start in cold and hot temperatures.

Q: Will EnviroTabs work in my antique or classic car?

A: Yes, EnviroTabs will improve the performance of older cars as well.

Q: Are EnviroTabs harmful to my engine's seals?

A: No, EnviroTabs do not contain anything harmful to the engine, gaskets, or seals. They are EPA registered, which means they are not dangerous to your car or the environment.

Q: Can EnviroTabs cause any damage to my car's fuel system or catalytic converter?

A: No, EnviroTabs will not damage fuel systems or catalytic converters.

Q: Will EnviroTabs aid in starting my car in extreme temperatures?

A: Yes, Your engine will start easier in both cold and hot temperatures.

Q: Will EnviroTabs improve my vehicle's power for climbing hills?

A: Yes, EnviroTabs will increase the vehicle's low-end torque which will provide more power for climbing hills and improve performance when the vehicle is used for towing.

Q: Are EnviroTabs EPA approved?

A: EnviroTabs are EPA registered. The EPA does not officially approve, endorse or recommend the use of any specific products, however registration is required.

Q: Are there any "mothball or mothball components" in EnviroTabs?

A: NO! The ingredient in question here is called Naphthalene - which is a primary ingredient in mothballs. Unfortunately, some unethical manufacturers in the past have used Naphthalene - which in the 1950's was discovered to boost octane and performance in racing cars - in their fuel additives. This is very unsafe for any engine and can result in major engine damage. EnviroTabs has - NO NAPHTHALENE!

Q: What happens if I get EnviroTabs on my hands?

A: Simply wipe off the EnviroTabs residue with a clean paper towel and wash your hands.

PRODUCT DATA SHEET

EnviroTabs - A GreenFoot Global, LLC Product
www.envirotabs.com - 1-800-693-8288

DESCRIPTION: EnviroTabs is a revolutionary combustion catalyst that significantly lowers emissions, extends engine and oil life plus increases performance for FREE. *(You are sure to save more in fuel costs than the cost of the product! GUARANTEED!)* EnviroTabs increase the life your engine by inhibiting formation of unwanted residues, reduces carbon build-up and eliminates after-run. EnviroTabs are safe to use. The proprietary active ingredients make the fuel burn quicker. Therefore more fuel burns in the power stroke and less burn in the exhaust stroke. That creates a more efficient burn which *eliminates nearly all harmful exhaust emissions, increases gas mileage, saves money and increases horsepower.*

USES:

EnviroTabs are designed for use in all gasoline & diesel powered engines including, but not limited to the following:
Autos • Trucks • Boats • RV's • ATV's • Motorcycles • Snowmobiles • Generators • Heavy Equipment

BENEFITS:

Significantly reduces exhaust & emissions • Lowers smoke & pollution • Increases gas mileage • Extends engine and oil life • Increases horsepower • Quilckens cold starts
Safe for catalytic converters • Helps you do your part to lower your carbon footprint
Does this all for FREE or your money back

FEATURES:

EnviroTabs does not alter the fuel in any way. Lubricates critical top engine wear surfaces

DIRECTIONS FOR USE:

EnviroTabs are recommended for use at 1 tablet for up to 20 gallons / 76 liters of gasoline or diesel fuel. Insert in fuel tank prior to filling up • Recommended for use with all grades of gasoline and diesel fuels. Dissolves in fuel down to -25° F / - 32 ° C

GENERAL PROPERTIES:

Melting Point, 171°F • Sediment: Nil • Flash Point, COC - N/A • Solubility, Water %: Nil
Specific Gravity 0.84 to 0.86 @ 15.6° C • Odor: Bland • Solubility Rate, Fuel: 100% • Color: Green
Size: .5 grams • Ash %: Nil • Average treatment: 1 tablet to 20 Gals. / 76 Liters of fuel

HANDLING:

Maximum storage temperature of 140° F / 60° C. Store in accordance with rules for combustibile solid. Protect from Ignition or heat source.

REMARKS: EPA Registered for use in gasoline and diesel powered vehicles • Prolongs the life of spark plugs and glow plugs, exhaust system, carburetor, valves and enhances overall engine performance • Can help stop pings and dieseling caused by deposits
Increases power and torque for instant response; near instant starting • Lubricates valves
Reduces hydrocarbon emissions • Revitalizes old or low-octane / cetane fuels. Item #3037

EXHIBIT 4

WELCOME TO GREENFOOT GLOBAL

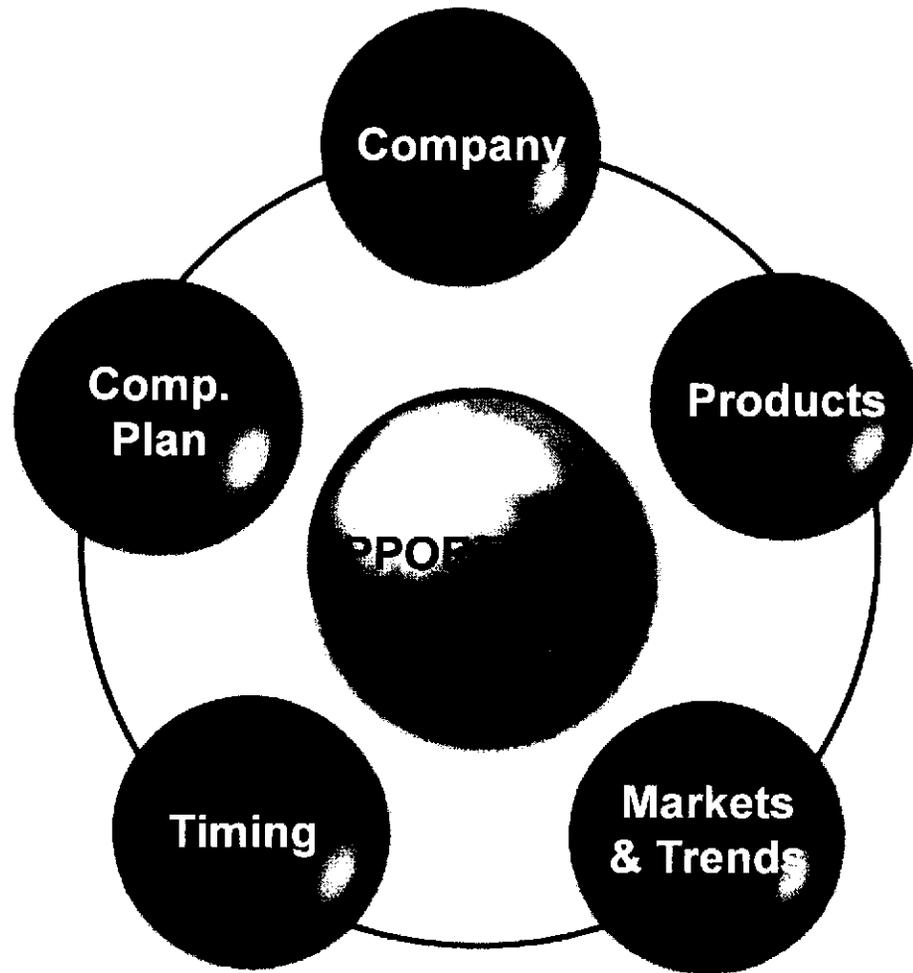

Mission Statement:
Greenfoot Global is dedicated to marketing products that leave our planet greener, provide our customers substantial savings and offer our independent entrepreneurs a sustainable long term business opportunity.

UNIQUE OPPORTUNITY

The convergence of five key components to success in business

Company
Products
Markets & Trends
Timing
Comp. Plan
= Success!

COMPANY BACKGROUND & BENEFITS

The Right Leadership, Right People with the Right Product

- **Was an Affiliate Marketing Company Since 2009**
- **Just now launching**
- **Debt Free Company** (with substantial financial backing)
- **Embracing Technology** (Encouraging on-line marketing)
- **Just starting International Expansion**
- **Over 150 years of Corporate & Field experience**

Management Team

The Corporate Dream Team and it's still growing!

- Full Time Distributor Support Staff
- Full Legal Team
- Full Time Accounting and finance Staff
- Full IT Department
- Complete Shipping Department
- Graphics Department

Committed 110% to:

**Checks on time the clear the bank
Products shipped within one business day of order
Excellent Customer and Distributor Support
Training tools and system second to none.**

PERFECT GLOBAL PRODUCT

Everyone is looking for simple way to go green!

What if there was a product that could:

Lower vehicle emissions by as much as 75%

Improve performance & power of your engine

Extend the longevity of your 2nd largest investment.

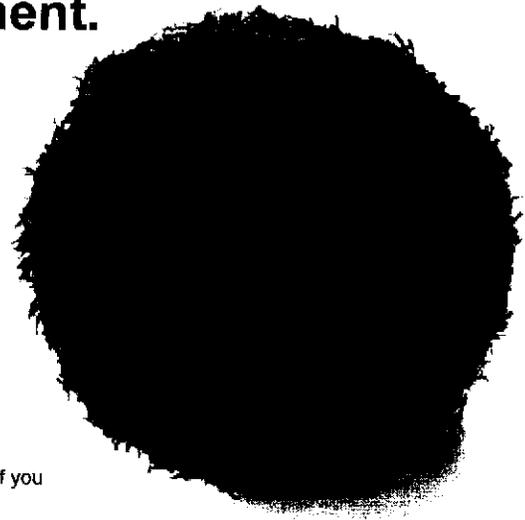

Allow you to use lower octane fuel

AND . . . Did this all for **FREE!**

This is a game changer!

A first to market product that will revolutionize the industry!

Results may vary based on temperature, road & traffic conditions, vehicle and engine age, and operator variables. However, if you do not save more money than the cost of the product, we provide a full 100% money back guarantee.

INTRODUCING... EnviroTabs

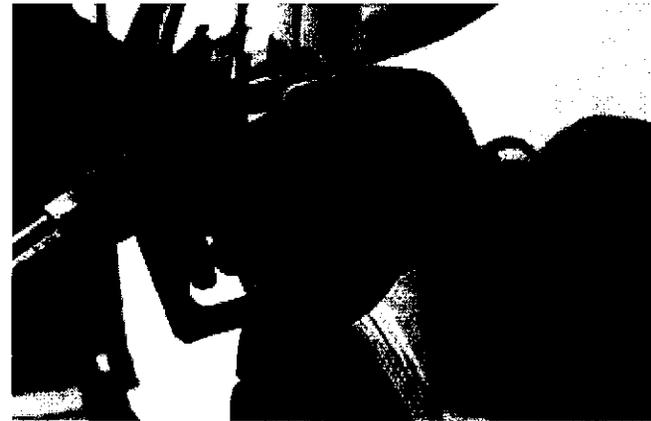

**PLUS . . . you can purchase
Greenfoot products
at wholesale!**

***“The World’s 1st Multi-Vitamin
for your Engine!!”***

Simply add
EnviroTabs
To every tank
of fuel and
see the
Benefits
for yourself!

100% Money Back Guarantee!

Made in the USA

**Approved for use in:
gasoline, ethanol blends
and any mix of hydrocarbon fuels**

**EPA
Registered**

KUNGL.
VETENSKAPSAKADEMIEN
THE ROYAL SWEDISH ACADEMY OF SCIENCES

Press Release: 23 October 1973

The Royal Swedish Academy of Sciences has decided to award the 1973 Nobel Prize in Chemistry half each to:

***Professor Ernst Otto Fischer**, Technical University of Munich, Munich, Federal Republic of Germany and **Professor Geoffrey Wilkinson**, Imperial College, London, Great Britain **for their pioneering work performed independently on the chemistry of the organometallic, so called sandwich compounds.**

****"Chemistry for Chemists"**

Chemistry is a scientific discipline with very wide applications ranging from biological-medical to the technological field. In most cases it is therefore easy to indicate potential practical application of discoveries which have motivated a Nobel Prize in chemistry. This year the prize has been awarded for work, practical applications of which are not very obvious, it is a prize in "chemistry for chemists". A very essential part of a scientific discipline is its structure and its concepts. Fischer and Wilkinson widened the basic concepts of chemistry by their work and therefore also changed the structure of chemistry.

***It is necessary to look back in the history of chemistry to be able to appreciate their contributions. The birth of organometallic chemistry can be traced to the 18th century, but the first organometallic compound proper was prepared 1849 by Frankland in Great Britain. This discovery had a great impact on the chemical thinking of the time, mainly because it was the first chemical compound between a metal atom Zn and an organic radical methyl CH₃. In the chemical language of our time it was the first compound which contained chemical bonds between a metal atom and carbon atoms (see figure 1). Organometallic compounds of this type have since been prepared and studied in considerable detail. Some of them are well known, or rather ill-known, because of the environmental hazards they have caused, such as organo-mercury and organo-lead compounds. They have, however, also been very useful in preparative chemistry and two Nobel Prizes have been awarded for such applications: 1912 to Grignard and 1963 to Ziegler and Natta. A very remarkable discovery was that the coenzyme vitamin B₁₂ contained direct cobalt-carbon bonds (Nobel Prize to Crowfoot Hodgkin 1964).**

HOW DOES IT WORK?

EnviroTabs is a Combustion Chamber Catalyst

It creates a proprietary catalytic coating on the combustion surfaces of the engine once in the combustion chamber

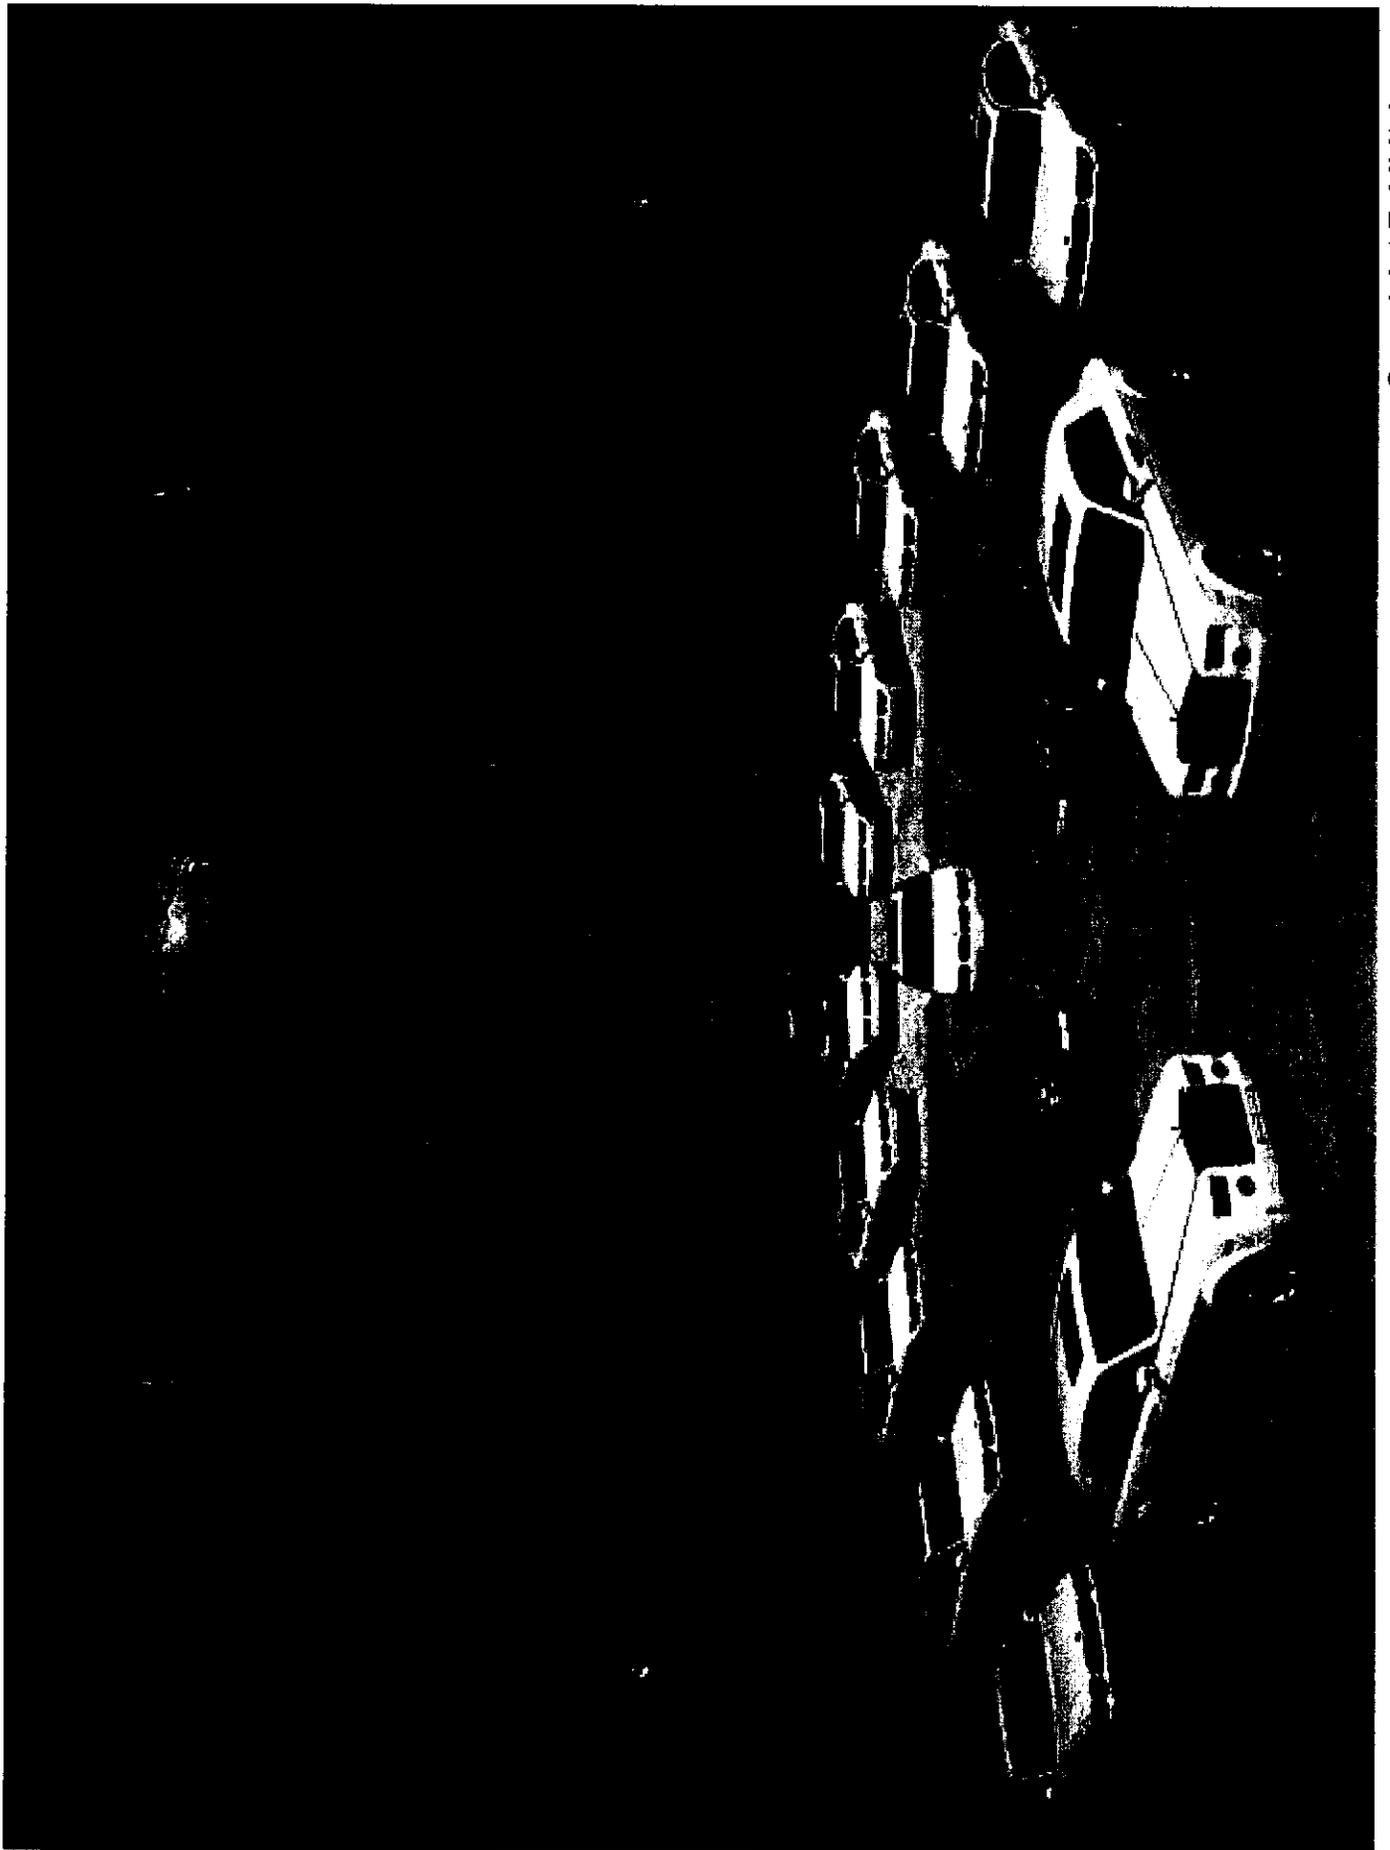

It allows the fuel to burn quicker and therefore more completely!

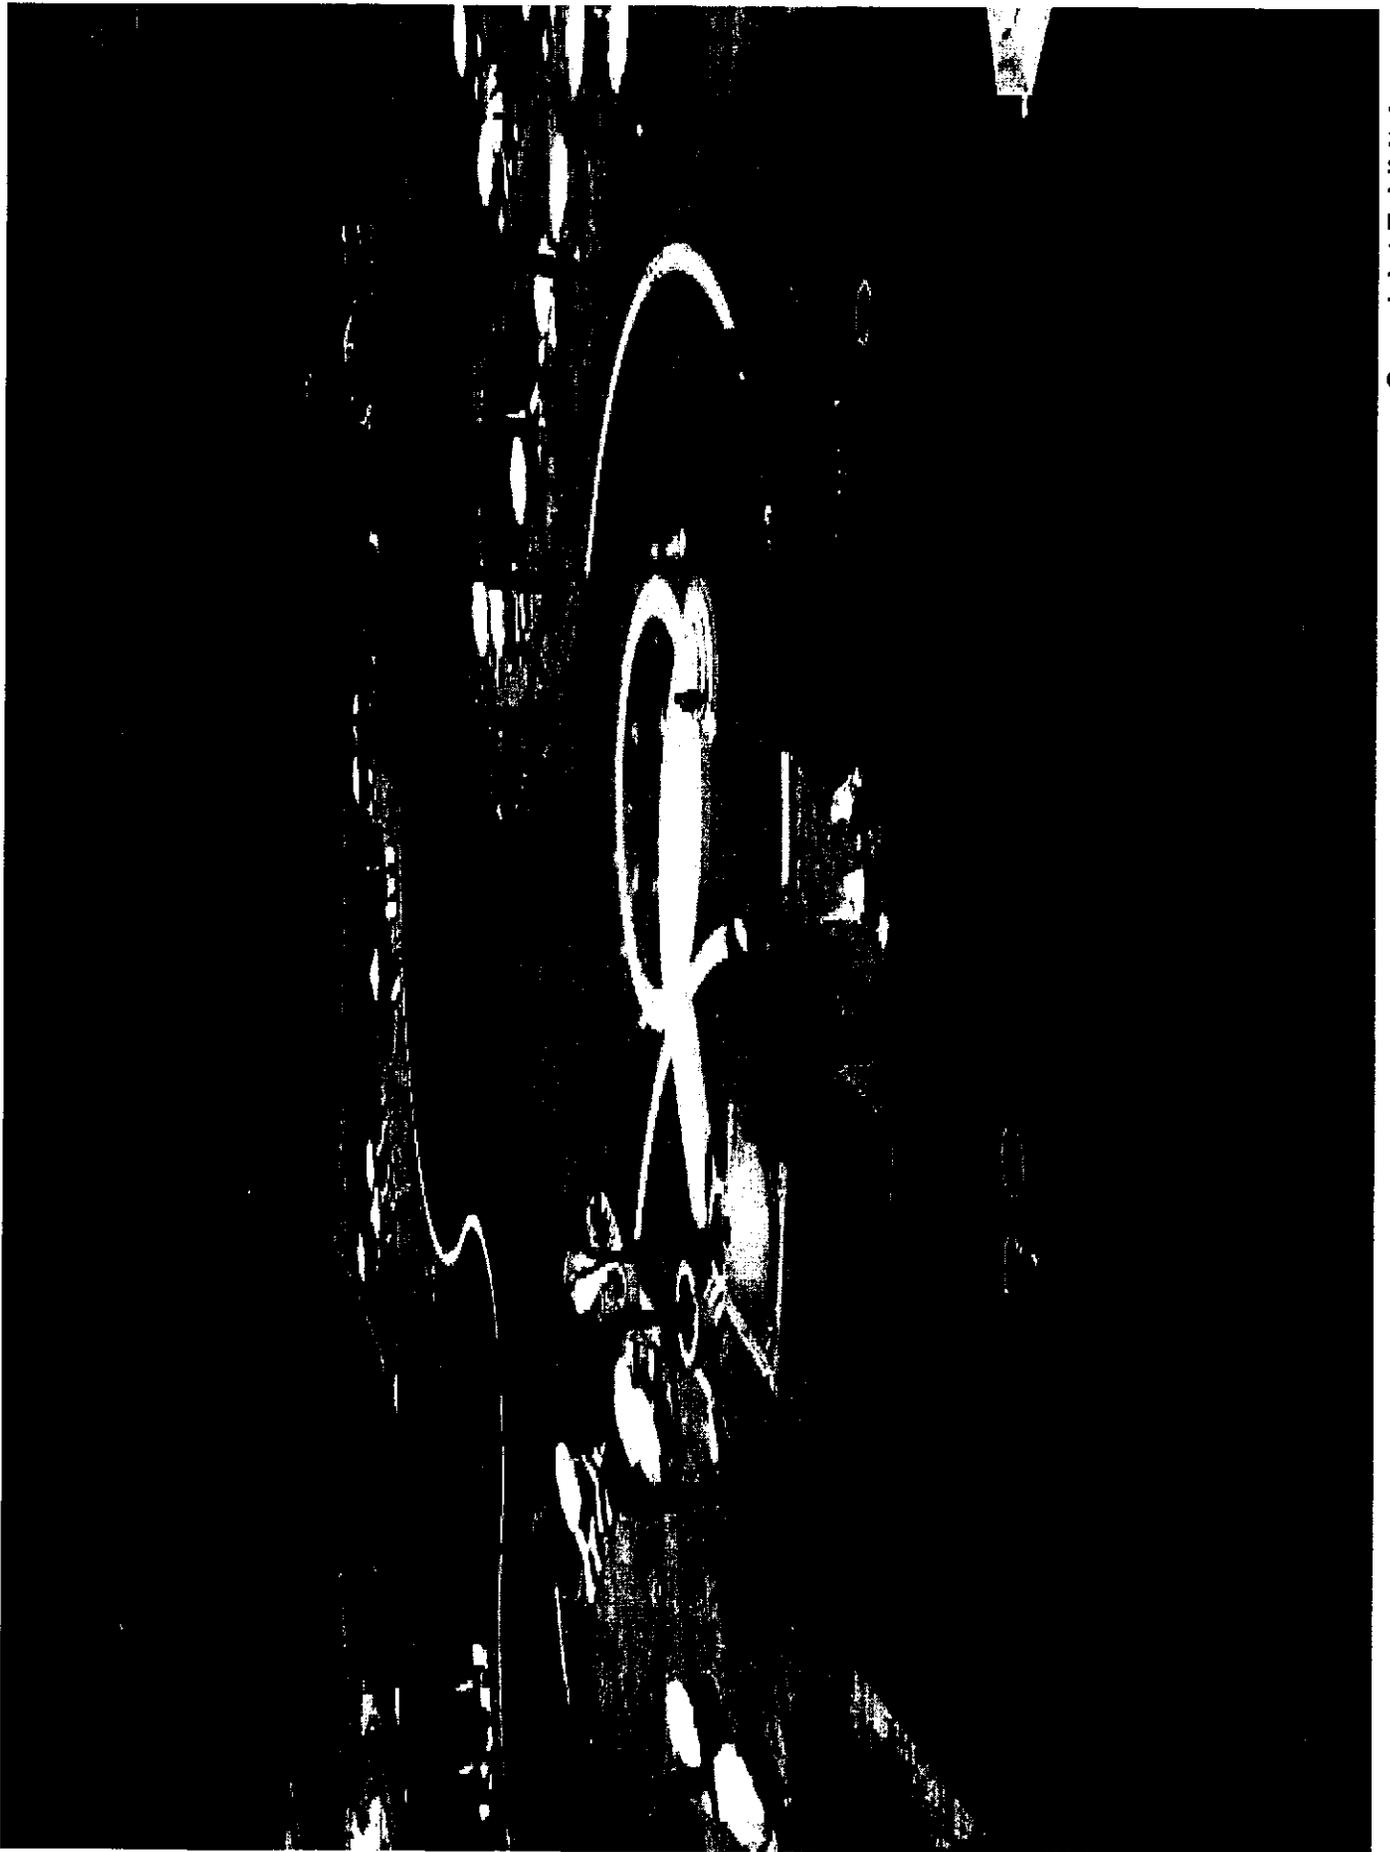

More fuel burns in the power stroke, therefore less burns in the exhaust stroke

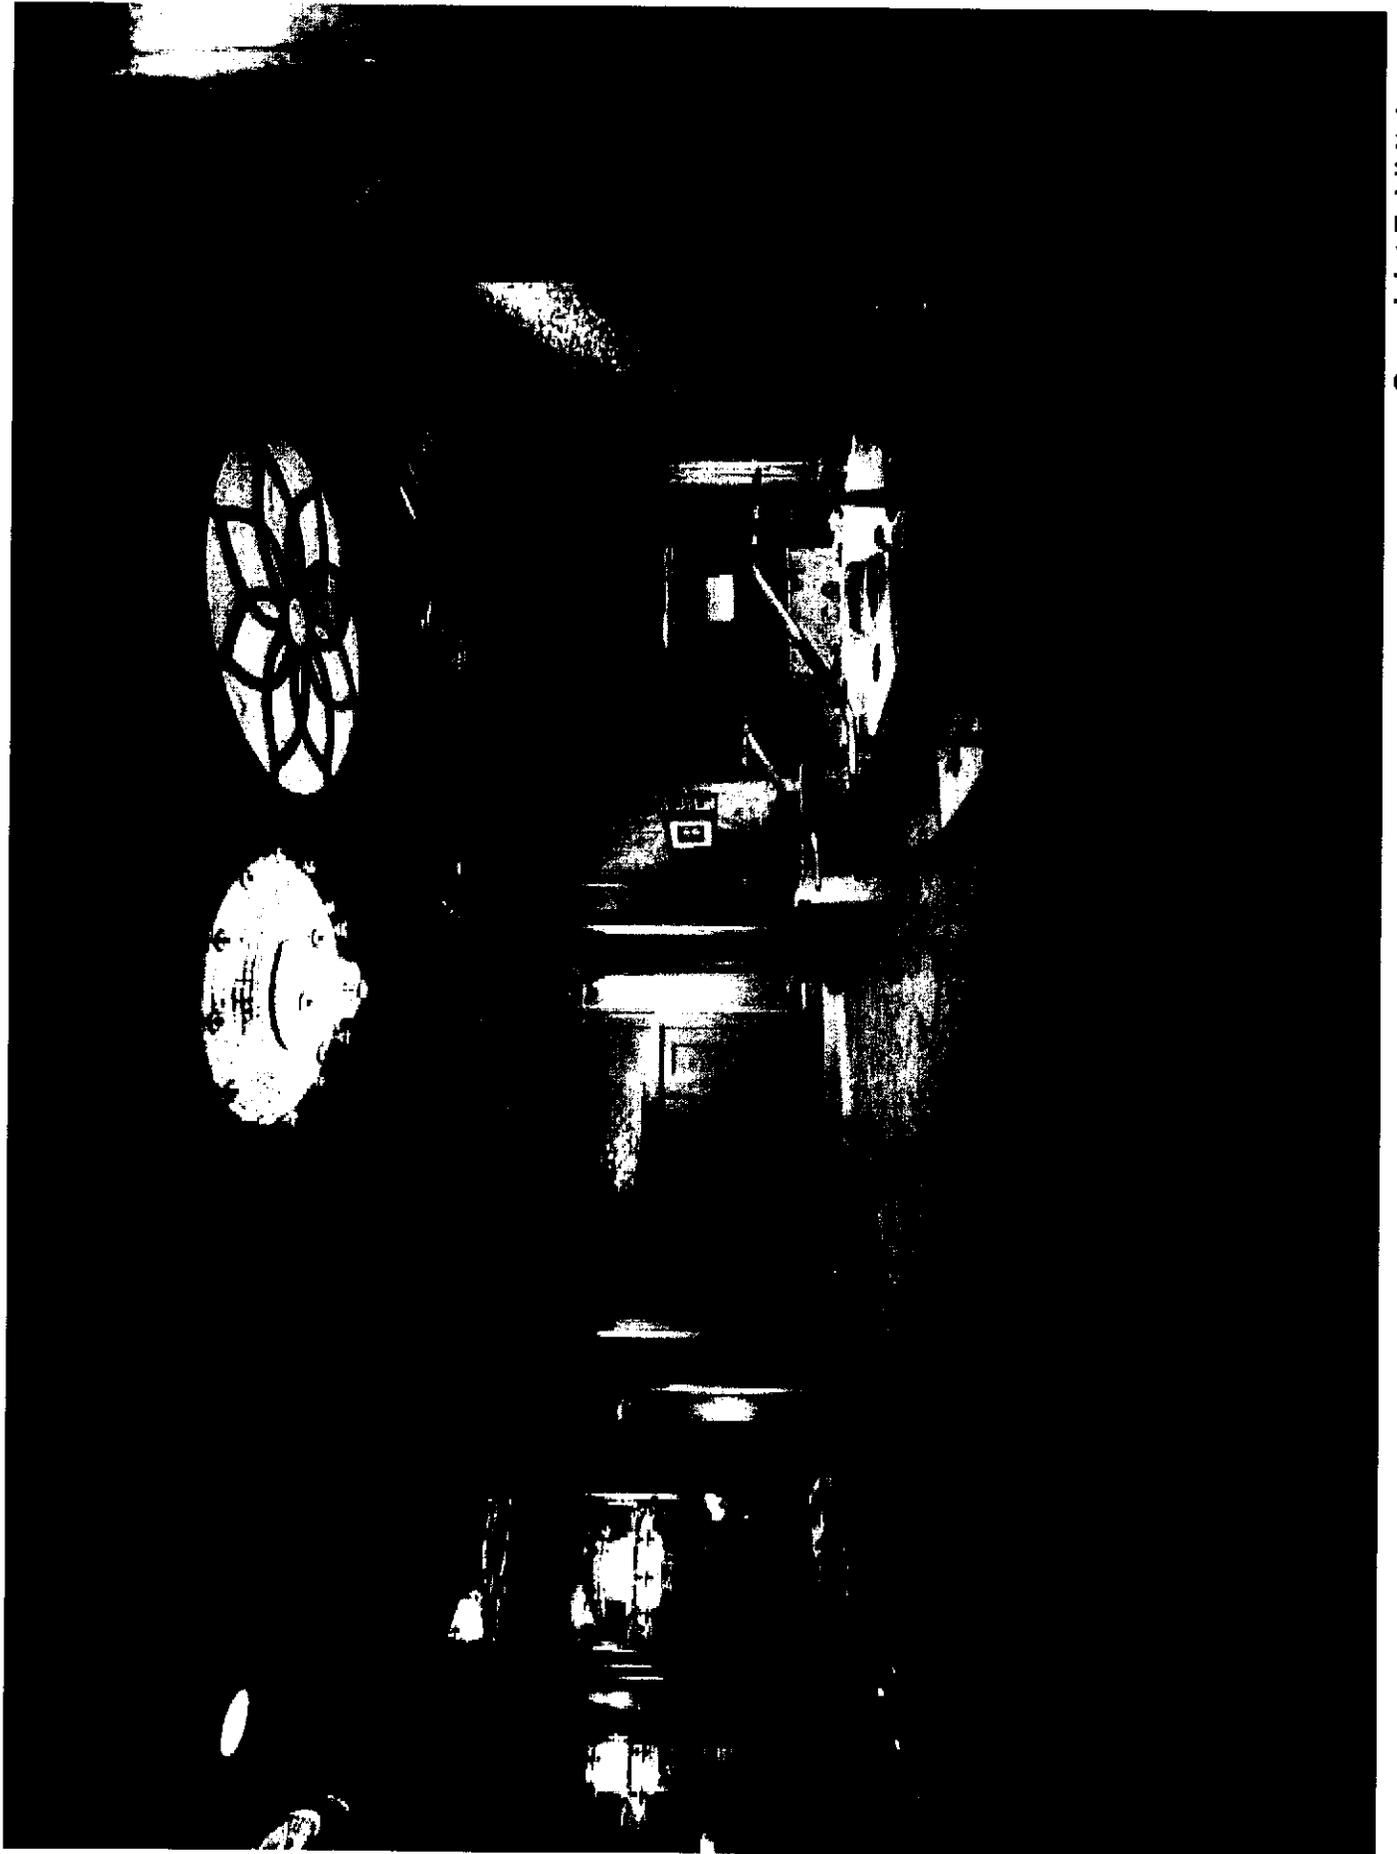

Your fuel burns more efficiently creating a host of benefits:

- **It's good for the environment & Saves you Money!**
- **Prolongs Oil Life!**
- **No need to use expensive premium gasoline**
- **Increases Horsepower!**

This is NOT a Hotel or Resort

**It is actually the home of an
oil sheik.**

**Wouldn't it be nice if we
could be just a bit less reliant
on foreign oil?**

IS IT SAFE?

**Yes - EnviroTabs is EPA
Registered & 100% Safe!**

**The technology is Patented and has been tested for
over 40 years with intensive road testing & commercial use**

\$250,000 tier one test to receive EPA registration

**By Law Can Not Invalidate Any Vehicle's Warranties
Magnusson Moss Act 1978**

**EPA
Registered**

Worldwide Insurance Policy (\$1,000,000 .00 Coverage)

Composed of 100% active ingredients, no diluents or fillers

Actually extends the life of your engine

Researchers Predict That.....

By 2050, about 100 million premature deaths caused by respiratory health problems linked to air pollution could be avoided through measures

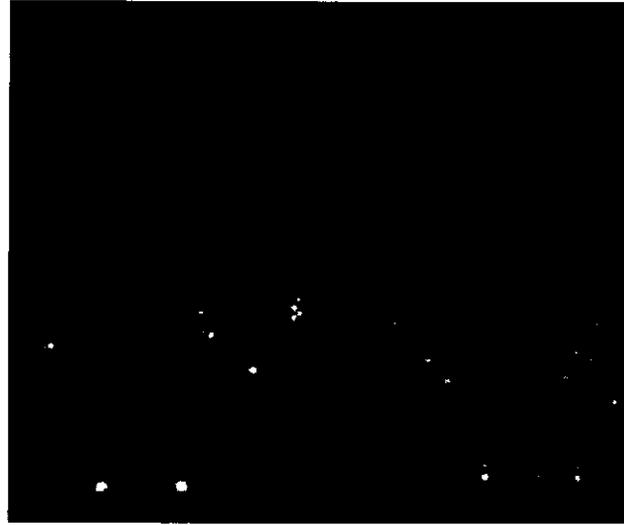

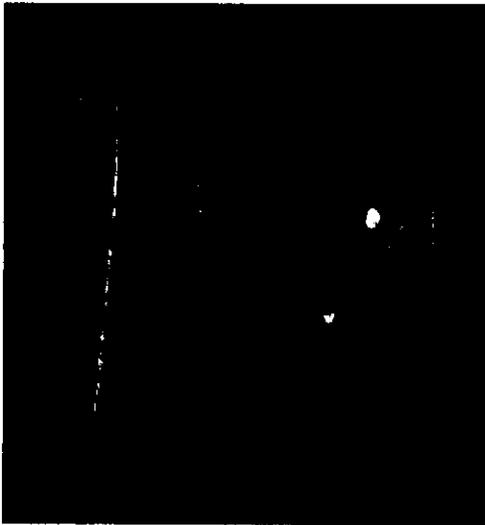

Emissions and YOUR HEALTH In the News

In News: Mortality & Morbidity Due to Air Pollution

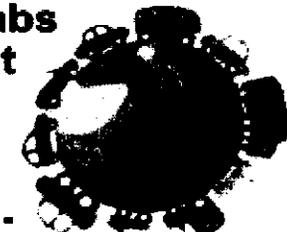

- *2010-12-23, The Press TV, "Air pollution is responsible for 40,000 premature deaths every year in France".
- *2010-12-21, Ecologist, "Air pollution linked to 200,000 premature deaths in UK".
- *2010-10-16, Financial Express, Dhaka, Bangladesh, "Major air pollutant - suspended particulate matter - responsible for 10,000 deaths every year".
- *2010-09-30, Science Daily, USA, "Strong links established between diabetes and air pollution in USA".
- *2010-06, Acid News, Europe, "Air pollution by fine particles is estimated to cause half a million premature deaths in European countries every year".
- *2010-05-17, National Post, China, "Indoor air pollution kills 2.2 million youth each year".
- *2010-03-26, Asia News, Mongolia, Ulaanbaatar, "Air pollution-related health costs account for as much as 4 per cent of Mong GDP".
- *2010-03-24, CO2 Science, United States

CAN REDUCE EMISSIONS BY UP TO 75%

- Oxides of Nitrogen (NOx): 15 - 25%
- Carbon Monoxide (CO): 15 - 20%
- Sulfur Oxides (SOx): 35 - 50%
- Hydrocarbons (HC): 25 - 30%
- Particulate Matter (DPM): Up to 75%
- Stack Smoke 50 - 90%

We are committed to our mission to bring EnviroTabs to the world and help reduce the emissions in at least 10% of the world's vehicles. This is one way we are doing our part to help protect the planet we all share.

SAVES YOU MONEY AT THE PUMP!

With just a 10%* Increase in Fuel Mileage

20 MPG Average x 10% Increase = 22 MPG

2 MPG More x 20 Gallon Tank = 40 More miles per Tank

Normally takes you 2 gallons to go 40 miles

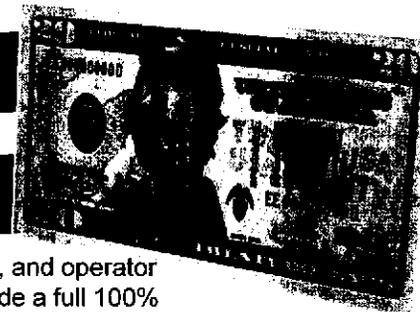

2 gals. of gas at \$2.50 per gal. is \$5 x 10 Tablets / Pack = \$50 in Savings

Save up to \$50 in gas with each pack that costs as little as \$20!

Would you BUY a \$50 bill for \$20?

Could you SELL a \$50 bill for \$20?

Results may vary based on temperature, road & traffic conditions, vehicle and engine age, and operator variables. However, if you do not save more money than the cost of the product, we provide a full 100% money back guarantee.

WORLDWIDE TESTING

EPA Registered

SWORN AFFIDAVIT OF PHILLIP J. RATTE

STATE OF MINNESOTA }
COUNTY OF ANOKA } ss.

I, Phillip J. Ratte, being first duly sworn, do hereby depose and say:

- I am of legal age and make this affidavit of my personal knowledge.
- I am a retired Mechanical Engineer (BME U of MN 1961) who practiced as a Professional Engineer in the State of Minnesota for 27 years. I have tested over 100 fuel saving devices, magnets, and additives since 1978. I appeared as an expert witness on fuel saving devices in a criminal trial in Missouri in 1992.
- I personally designed and conducted or observed three studies to determine the effect of EnviroTabs, a fuel saving Organometallic Compound, on automotive fuel economy. The testing was conducted in August, 2011.
 - 2008 Dodge Grand Caravan - 131,000 miles - 231 mile route weekdays - package deliveries - 12 tanks of Regular instead of Premium Gas - 9.96 gal vs 12.8 gal = 23.4% SAVED. Jack Dabala has just gotten himself a \$2,400/yr increase in income for \$200/yr.
 - 2010 Chevy HHR - 40,000 miles - three tanks - on-board computer - Tony Proletis GM retiree - city driving - 29 mpg increased to 33 mpg - a 13.8% SAVINGS - more to come.
 - 2000 Honda Accord - 287,000 miles - ScanGauge used to get mpg at 60, 80, 70 mph. 70 mph - 25.7 mpg inc to 29.6 mpg=15.2% - 80 mph - 26.1 mpg inc to 34.5 mpg=22.6% - 50 mph - 31.0 mpg inc to 38.6 mpg=24.8% AVERAGE SAVINGS = 20.8% on 3rd tank.
- EnviroTabs - an Organometallic Compound whose technology was discovered in 1961 and won the Nobel Prize for Chemistry in 1973. In 2011, a patent was issued on EnviroTabs. My test results indicate that there is a substantial improvement over the 11 percent associated with the removal of carbon from the combustion chamber. It is my Professional Opinion that this improvement is caused by earlier initiation of the flame front and a quicker burn of the hydrocarbon charge. Further, my exceptional test results have been equaled only twice before in the well over 100 fuel saving products I have tested since 1978.

I have become a distributor for Greenfoot Global because it has long been my goal to do all I can to help our country achieve Energy Independence and Environmental Balance.

Phillip J. Ratte
Phillip J. Ratte ME

NOTARY PUBLIC - MINNESOTA
MY COMMISSION EXPIRES 01/01/2013

Car-E Diagnostics Inc.
vHealth System Increase Your Knowledge at Work

Experiment Design:
Local Road DYNAMIC Test Experiment:

A test vehicle connected with vHealth tool box was driven at Local Street for 30 minutes, the average of Generic Powertrain parameters were listed in Table 1 (Actual Road Test with similar loads)

MPG numbers computed from formula 1 are shown in table 3:

Table 3:

2008 Welch Lashare D.M.					
1	2	3	4	5	6
Speed (mph)	MPG	MPG w/ Fuel Additive	MPG w/o Fuel Additive	Calculated Fuel (%)	Mass Air Flow (lb/min)
1	22.79	27.71	22	6.889	1.87
2	25.41	24.66	22	7.886	1.79
3	28.06	19.72	26.28	7.975	

Conclusion:

Based on the theory behind EnviroTabs technology, we would expect the thin organometallic film would prevent the heat lost and consequently increase the fuel economy. From row 4 at column 1 of table 3 of traditional Local Road Test, we saw a significant 19.1 %MPG improvement after adding fuel additive with loads around 7.9%

Nine Major Benefits of EnviroTabs

1. Decreases Harmful Emissions
2. Increases Horsepower and performance
3. Increases the life of your engine. Saves you \$\$\$
4. Increases Oil Life. Saves you \$\$\$
5. Decreases Running Temperature
6. Decreases Maintenance Costs Saves you \$\$\$
7. Eliminates the need for high octane Saves you \$\$\$
8. Engine Runs Smoother
9. Increases Fuel Mileage Saves you \$\$\$

MARKETS & TRENDS

**Green is no longer a color,
it's a Movement!**

**"The Green Wave is sweeping the business community.
Environmental problems and challenges can be turned in to GOLD."**

Company Background

The Greenfoot catalyst was originally developed as a result of work on experimental burn rate modifiers for solid rocket propellant systems used in the aerospace industry over 30 years ago.

Greenfoot is partnered with a technically advanced manufacturer, whose chemist brings with them many years of research and manufacturing process experience.

In 2009 a new consumer division was established to market this innovative technology to the general public.

- Reduces Harmful Emissions
- Saves You Money at the Pump
- Lowers Your Maintenance Costs
- Increases Horsepower & Torque
- Can use Regular instead of Premium
- Completely Safe for Your Engine

How does it work?

EnviroTabs is a Combustion Chamber Catalyst

It creates a proprietary catalytic coating on the combustion surfaces of the engine once in the combustion chamber

It allows the fuel to burn quicker and therefore more completely!

More fuel burns in the combustion cycle
therefore less burns in the exhaust cycle

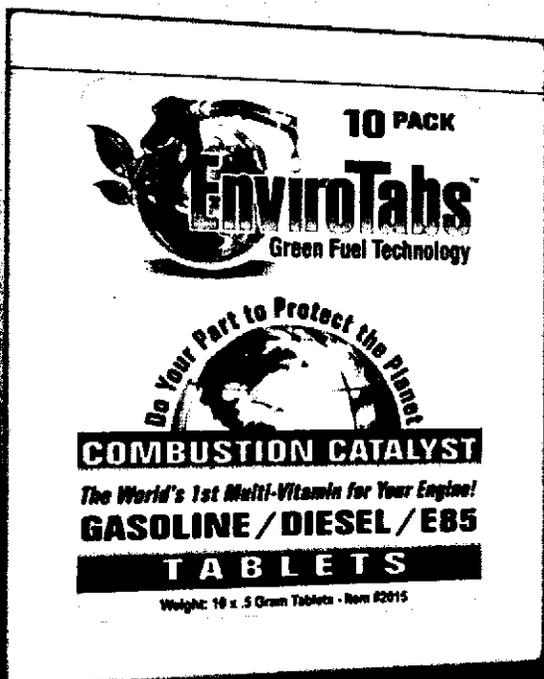

Your fuel burns more efficiently creating a host of benefits:

- It's good for the environment! & Saves you money
- Prolongs Oil Life!
- No need to use expensive premium gasoline
- Increases Horsepower!

Many Product Benefits

#1 Benefit: Using a product with claims backed by results!

- *Removes Hard Carbon Deposits*
- *Inhibits Deposit Formation*
- *Decreases Fuel Consumption*
- *Emissions are Greatly Reduced*
- *Carbon Content Of Ash Will Drop*
- *Exhaust Will Be Cooler*
- *Extends Oil Life*
- *Extends Life of the Engine*
- *No Need for Higher Octane Fuels*
- *Reduce knocking, pinging & dieseling*
- *Inhibits Corrosion*
- *100% Money Back Guarantee*

Reduces Emissions by up to 75%

GFG is leading the way to help reduce harmful pollutants emitted from engines. A goal made possible by offering a cost effective catalyst to a world that thrives on fuel.

EMISSIONS REDUCTION RANGE FOR POLLUTANTS WHEN USING GFG PRODUCTS

- Oxides of Nitrogen (NOx): 15 - 25%
- Carbon Monoxide (CO): 15 - 20%
- Sulfur Oxides (SOx): 35 - 50%
- Hydrocarbons (HC): 25 - 30%
- Particulate Matter (DPM): Up to 75%
- Stack Smoke 50 - 90%

Oxides of Nitrogen (NOx) is a precursor to the formation of ground level ozone, which causes health problems such as damage to lung tissue, reduction of lung function and sensitization of lungs to other irritants.

Hydrocarbon emissions result from incomplete fuel combustion and from evaporation.

Particulate Matter (DPM) Diesel particulate matter (DPM) and diesel engine particulate matter (DEPM) are the most harmful pollutants emitted from diesel engines.

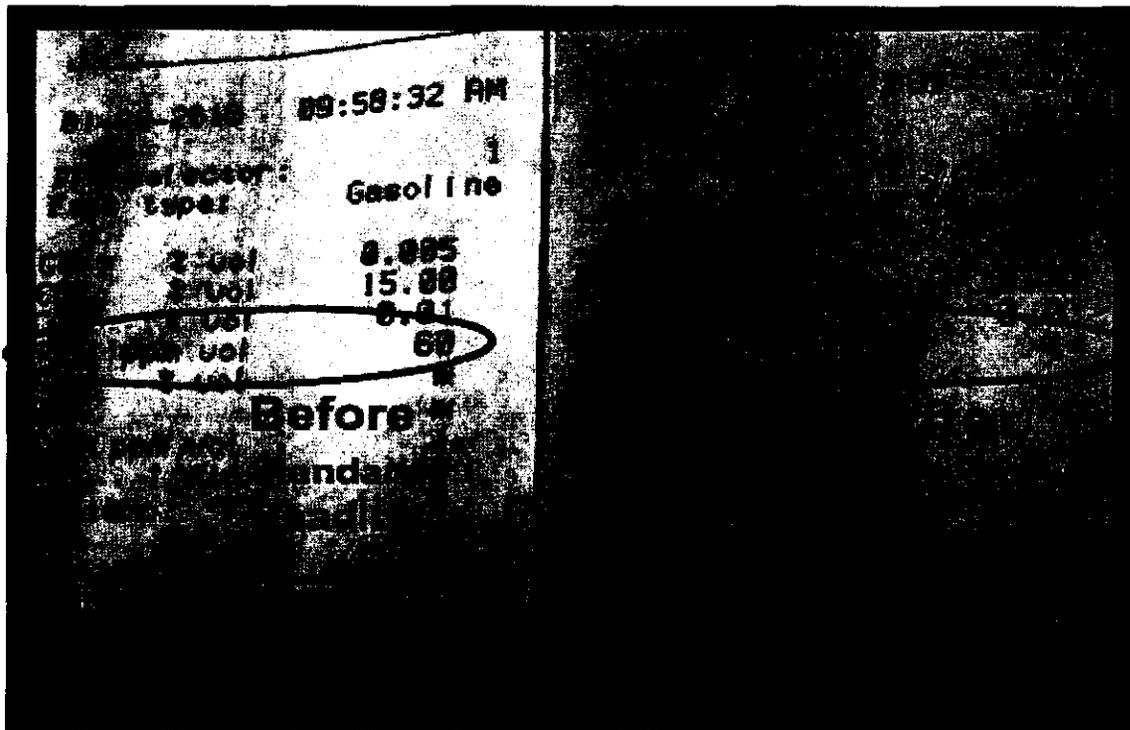

We are committed to our mission to bring EnviroTabs to the world and help reduce the emissions in at least 10% of the world's vehicles. This is one way we are doing our part to help protect the planet we all share.

Emissions Testing

I was very excited about the fuel saving I could get with EnviroTabs. However, I wanted to know that it would really reduce my emissions. So, I decided to find a testing station here in the Chicago area that would test my truck before I started using the product. Well, the baseline test was very average and within

the acceptable range for for emissions. A week later after using the product I went back in and the Tech. didn't think a little pill could have any effect. After he re-tested the emissions, he re-checked it because he couldn't believe the results. The hydrocarbons dropped from 60 to a very impressive 14. I was sold on the product and felt great that it really does do what it says. - Greg G. ('03 Tahoe)

Saves You Money at the Pump

With just a 10%* Increase in Fuel Mileage:

WTMJ Milwaukee

Fuel Efficiency Testing

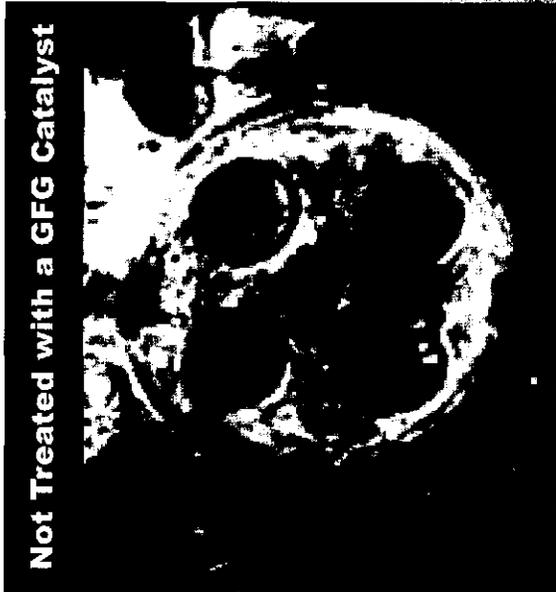

County Sheriff's Office in WI conducted a fuel efficiency test on the patrol fleet over an entire year

County Sheriffs Department Fuel Budget	\$243000
Total estimated gallons needed without GFG	90000
Total estimated gallons needed with GFG	79515
Total gallons saved at 11.7 %	10485
Projected Cost of Fuel with GFG	\$214690
Total dollars saved at 11.7 % @ \$2.70/Gal	\$28310
Total cost of GFG	\$3200
Total estimated dollars saved	\$25110

Reduces Maintenance Costs

Side by Side Engine Comparison

Both Engines
ran for
Approximately
13,000 hours

GFG is a catalyst
NOT a Detergent

Dyno Testing

Is it Safe to Use Long Term?

Yes - EnviroTabs is EPA Registered & Patented

- Technology has been tested over 30 years with intensive road testing & commercial use
- Does not alter the fuel (South West Labs)
- By Law Can Not Invalidate Any Vehicle's Warranties (Magnusson Moss Act 1978)
- Full Worldwide Insurance Policy (\$1,000,000.00 per occurrence)

Worldwide Testing

Tallinn University of Technology Testing Results The use of Combustion Catalyst in Diesel Trucks

When using the diesel fuels and the catalyst, air pollution decreased correspondingly to EU norm 6 normative act 715/2007-2015. Pursuant to normative act 715/2007-2015 the following concentrations in exhaust gas are allowed: carbon oxide (CO) - 0.5 g/km and nitric oxides (NO_x) - 0.08 g/km. These indicators in the tested trucks were as follows: Mercedes-Benz Reg. No. 048 MKB, the concentration of carbon oxide (CO) 0.35 g/km and the concentration of nitric oxides (NO_x) 0.078 g/km, Mercedes-Benz Reg. No. 062 ARU, the concentration of carbon oxide (CO) 0.44 g/km and the concentration of nitric oxides (NO_x) 0.06 g/km, Mercedes-Benz Reg. No. 302 APZ, the concentration of carbon oxide (CO) 0.49 g/km, the concentration of nitric oxides (NO_x) 0.03 g/km.

Thus, all the Mercedes-Benz trucks conform to the Euro 6 norms.

Therefore, on the basis of laboratorial and operational test results we can conclude that the use of the catalyst improves engine performance by increasing engine power output, reducing fuel consumption, diminishing forge scale and carbon formation, prolonging engine lifetime and reducing the concentration of harmful components in exhaust gas and thus protecting the environment and the trucks conform to the requirements of Euro 6 normative act 715/2007-2015.

Markets & Trends

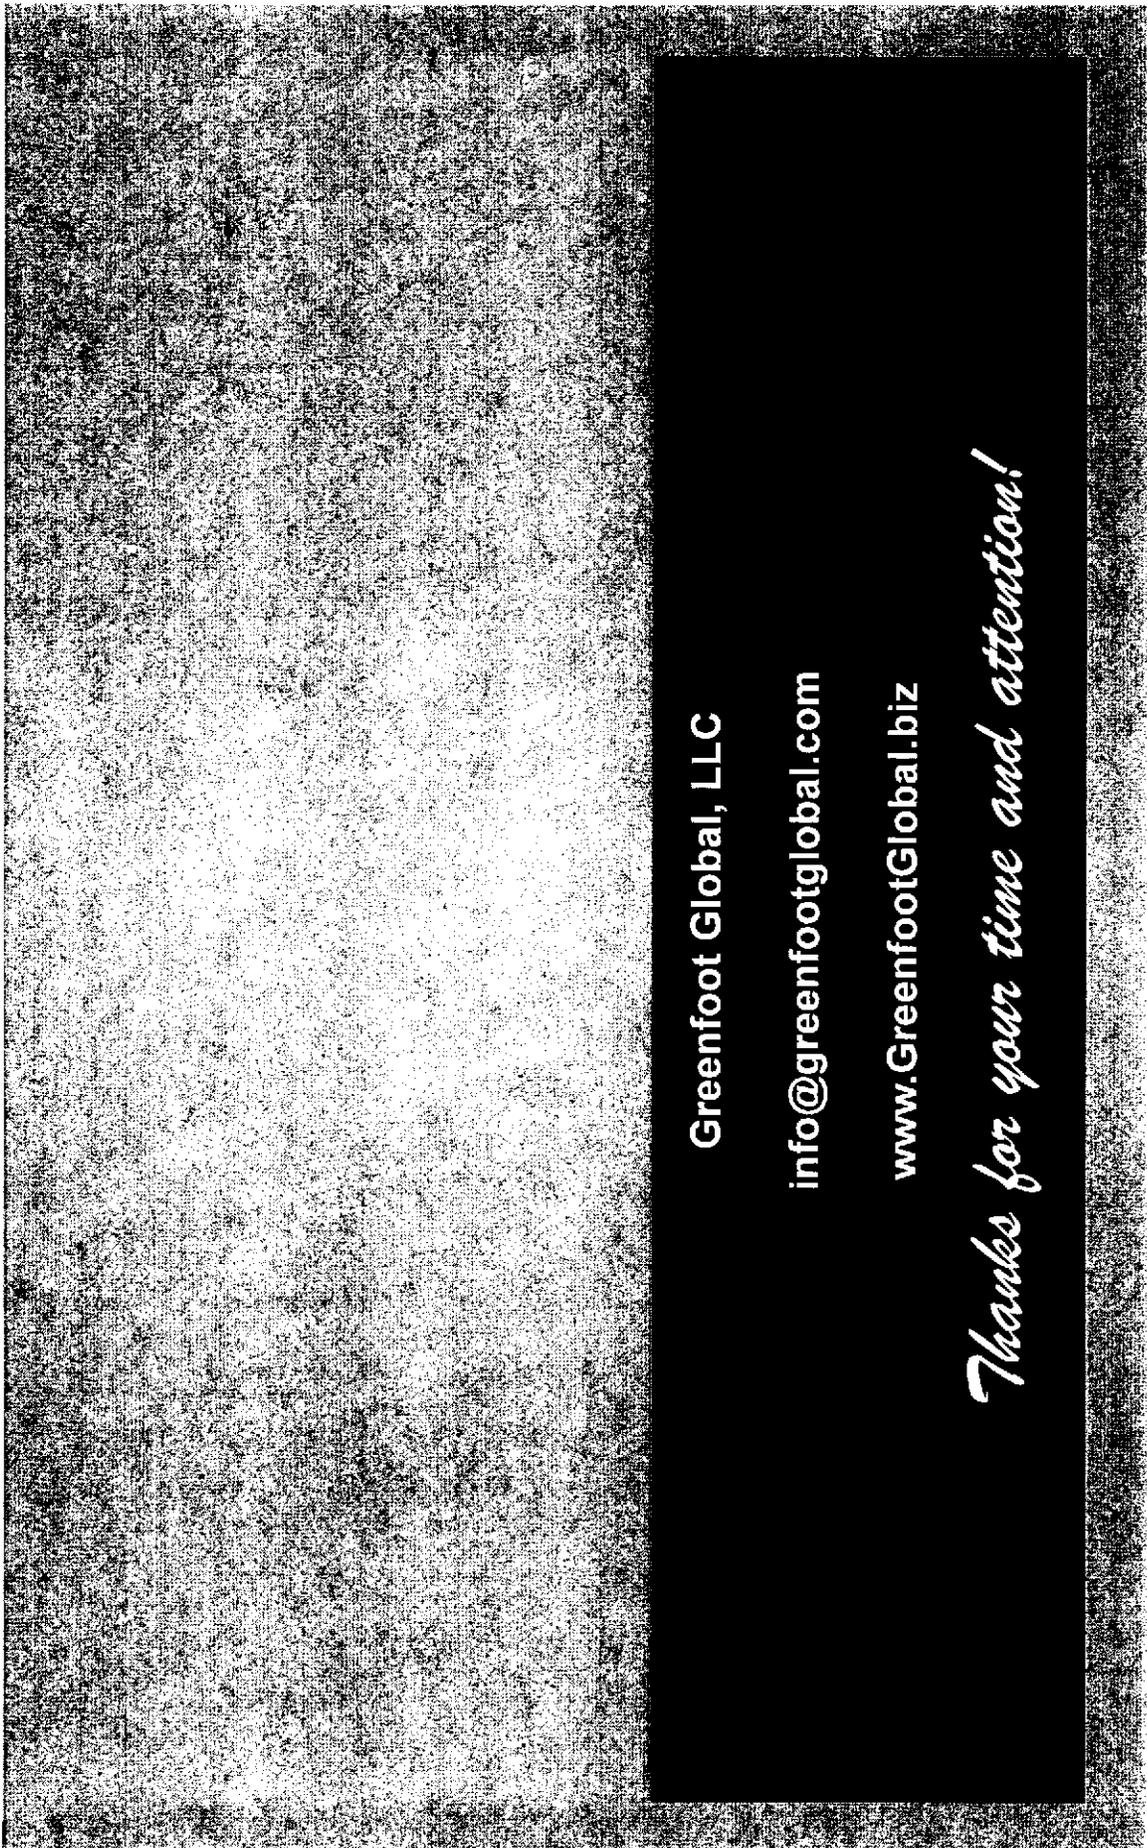

Everyone is looking for simple way to go green!

During the past century humans have substantially added to the amount of greenhouse gases in the atmosphere by burning fossil fuels such as coal, natural gas, oil and gasoline to power our cars, factories, utilities and appliances. The added gases, primarily carbon dioxide and methane are enhancing the natural greenhouse effect, and likely contributing to an increase in global average temperature and related climate changes.
