My Panic Button

Tired of people seeing what's on your PC?

Hide programs instantly with one click!

It's very simple. My Panic Button is an application that enables you to do the following:

- Hide sensitive programs from curious eyes through a mouse click or keystroke;
- Easily re-open those programs through the same mouse click or keystroke, allowing you to pick up where you left off;
- Leave decoy programs open on your desktop;
- Even close programs or mute your PC sound!

**Atomic Clock**

Free Software that keeps computer's clock 100% precise.

Download the free computer program called the Atomic Clock. The program matches a computer's clock to the US Government's Atomic Clock, making the time always precise.

The Atomic Clock is the most precise time system used worldwide to ensure proper time keeping.

It's free and easy to use:

1. Simply download and install the program.
2. Connect to the Internet.
3. Open the Atomic Clock and press the check button to compare your time to the Atomic Clock. Your clock can be synchronized to the Atomic Clock in less than 10 seconds.

You can set the program to run every hour, every day, every week or every month to update your clock. It will even automatically open your dial up connection to connect to the Internet if it even disconnects when finished.

Plus, you can even view world time in different time zones around the world.

It's free, fast, and easy.

**download now!**
