KINOKI™ Cleanse And Energize Your Body

DETOX FOOT PADS Experience Kinoki's Natural Power of Nature

Frequently Asked Questions

Why use Kinoki™ Detox Foot Pads?

Because it's the natural way to assist your body in the removal of heavy metals, metabolic wastes, toxins, and other chemicals. Kinoki™ Foot Pads provide the one-two punch of powerful detox ingredients in conjunction with tourmaline, a mineral that generates negative ions, to capture toxins your body eliminates through the outer layer of the skin.

What specific benefits can I expect?

Kinoki™ Detox Foot Pads may help:

- Capture toxins eliminated by the body
- Assist in natural cleansing
- Promote vibrant health and wellness

How do you use the patches?

The patches are adhered like a big sticker to the soles of the feet overnight. At first, most people use the pads on the arches of the feet. Every night, a new patch is applied to your foot. Successive nights should result in a gradual lightening of the patch. Do not reuse patches. Once the feet no longer darken patches used overnight, patches may be applied to the skin on other areas of the body. Do not use on sensitive areas of the body or the face.

Depending upon what specific toxins are present, the color stain typically ranges somewhere between a green, grey, black, brown, or tan coloration.

* Individual results may vary. These results are not typical.

Why are these pads applied to the soles of the feet?

According to Chinese medical knowledge, our human body has over 360 acupuncture points, with more than 60 acupuncture points found on the soles of the foot. Ancient Chinese Reflexology teaches that stimulation and toxicity release from these sensitive mirror points, may also lead to vitality and wellness. At the very least, the removal of buildups in the body can only promote increased health.

When the blood circulates to the soles, and the skin draws the toxins from the blood to the outer layer, the Kinoki™ Detox Foot Pad can absorb eliminated toxins released from the acupuncture points. After only one night of use, there may be significant changes to the smell and color of the sachet (from brown to grayish black) as it reflects the amount and degree of toxins, which were eliminated by the body. With continuous usage, there should be a visible reduction in the stain and odor of the pad.

What ingredients are in Kinoki™ Foot Pads?

Kinoki™ Detox Foot Pads contain only 100% pure & natural ingredients: bamboo vinegar, tourmaline, chitin and detox herbs.

Are negative ions good for you?

Negative Ions have been shown in scientific studies to be beneficial. It is well known that consuming more alkaline foods, i.e. fruits and vegetables, is beneficial to human health. Conversely, some believe that an acidic PH balance of the body makes the body weak and more susceptible to sickness.

Are detox foot pads a fad?

Not at all. The detox foot patch phenomenon is growing in popularity throughout the world. In Japan alone, monthly sales figures are more than U.S. \$18 million – and that was five years ago! The worldwide popularity and use of detox foot pads made with all-natural tree extracts and fortified with negative ions is growing at a phenomenal rate, as the amazing properties of this unique and effective cleansing product become more widely known.
