26. Pages from Respondents' Web site dc1pages.com regarding "I use Brand X," dated April 2, 2008 [FTC-DCO 0157 - 0158]
27. Respondents' Responses to Complaint Counsel's First Request for Production of Documentary Materials and Tangible Things, dated December 8, 2008

Respectfully submitted,

David W. Dulabon (212) 607-2814
Federal Trade Commission
Alexander Hamilton U.S. Custom House
One Bowling Green, Suite 318
New York, NY 10004

Dated: February 24, 2009

CERTIFICATE OF SERVICE

I HEREBY CERTIFY that on February 24, 2009, I have filed and served the attached **COMPLAINT COUNSEL'S STATEMENT OF MATERIAL FACTS AS TO WHICH THERE IS NO GENUINE ISSUE**, and all documents and depositions cited therein as set forth below:

The original and one paper copy via overnight delivery and one electronic copy via email, and one bound copy of all documents and depositions cited herein, to:

Donald S. Clark, Secretary
Federal Trade Commission
600 Pennsylvania Ave., N.W., Room H-159
Washington, DC 20580
E-mail: secretary@ftc.gov

Two paper copies via overnight delivery, and one bound copy of all documents and depositions cited herein, to:

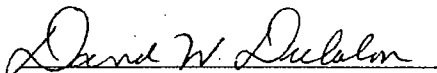

The Honorable D. Michael Chappell
Administrative Law Judge
600 Pennsylvania Ave., N.W., Room H-528
Washington, DC 20580

One electronic copy via email and one paper copy via overnight delivery, and one bound copy of all documents and depositions cited herein, to:

James S. Turner, Esq.
Betsy Lehrfeld, Esq.
Martin Yerick, Esq.
Swankin & Turner
1400 16th St., N.W., Suite 101
Washington, D.C. 20036
jim@swankin-turner.com

One electronic copy via email to:

Michael McCormack, Esq.
M.mccormack@mac.com

David W. Dulabon
Complaint Counsel

EXPERT REPORT OF DENIS R. MILLER, MD

I. QUALIFICATIONS

As detailed in my curriculum vitae, I am a board certified pediatric hematologist/oncologist and am licensed to practice medicine in the State of New Jersey. Currently, I am on the voluntary faculty (Clinical Professor of Pediatrics) at Robert Wood Johnson School of Medicine (New Brunswick, NJ).

For over 40 years I directed clinical care, education, laboratory and clinical research, and administration, heading divisions or departments at University of Rochester Medical Center, New York Hospital-Cornell Medical Center, Memorial Sloan Kettering Cancer Center (MSKCC), and Northwestern University Medical School (Chicago, IL). My major area of clinical and laboratory research was hematopoietic malignancies. I was the recipient of research grants from the National Cancer Institute, private foundations, and other organizations. As Chairman of the Department of Pediatrics at MSKCC, I directed one of the largest pediatric oncology/hematology programs in the world and held an endowed chair. Our department was heavily involved in more than 25 Phase I studies annually. Many of these investigational agents are now cornerstones in cancer treatment.

From 1990 to 1996, I served as Associate Medical Director of Cancer Treatment Centers of America (CTCA) and from 1993 to 1996 I was the Scientific Director of CTCA's Cancer Treatment Research Foundation (CTRF). In both capacities, I was involved actively in designing clinical research protocols for patients with a wide variety of malignancies. In my capacity as Scientific Director, I supervised the clinical research program, chaired the Scientific Advisory Committee of the Institutional Review Board, and was principal investigator for a number of Phase I/II studies. These studies included

innovative treatment for cancers of the head and neck, lung, breast, pancreas, and colon as well as hematological malignancies and other disorders. These new agents included antiangiogenic compounds, immunomodulators, differentiating drugs, inducers of apoptosis, and monoclonal antibodies directed against tumor-specific antigens.

I understand and respect the position and role of supportive care and complementary medicine in oncology and how they blend with conventional therapy. I conducted studies on Maitake mushroom and panax ginseng in patients with cancer. I also directed a Phase I/II randomized, open-label, single institution study of a commercially-available shark cartilage product (Cartilade®). A more detailed review of the design and results (Miller, et al, 1998) of this study will be presented in my review of the Daniel Chapter One (DCO) product known as Bio*Shark.

I have performed numerous studies in early (Phase I) and later clinical development (Phase II through Phase IV). I worked on differentiating and apoptosis-inducing agents (histone deacetylase inhibitors), monoclonal antibodies (rituximab, trastuzumab), small molecule epidermal growth factor receptor inhibitors (gefitinib), cyclin dependent kinase inhibitors (flavopiridol), and erythropoietic stimulating agents (epoetins alfa and beta). Specific tumor types included acute myeloid leukemia (AML), chronic lymphocytic leukemia (CLL), non-Hodgkin lymphoma (NHL), non-small cell lung cancer (NSCLC), mesothelioma, CRC, and cancers of the head and neck, esophagus, pancreas, breast, and skin (malignant melanoma).

Currently, I am the Oncology/Hematology Therapeutic Area Leader at PAREXEL International, one of the world's leading contract research organizations (CRO). CROs manage clinical trials for the pharmaceutical industry and are involved in the entire

process of testing and evaluating new agents through the various phases of clinical development. The ultimate goal is to make these new agents available to cancer patients and improve their survival and quality of life. As such, I am fully familiar with good clinical practice requirements, study design and conduct, regulatory requirements for each phase of clinical development, biostatistical considerations that demonstrate efficacy and safety, the role of supportive care in cancer drug development, informed consent, and regulatory guidelines for alternative and complementary treatments in patients with cancer and blood diseases. Because of potential drug-drug interactions, I am acutely aware of safety issues associated with the use of any anticancer agent and the use of concomitant drugs that might potentially increase a patient's risk of having adverse reactions (toxicity or "side effects") or decrease the efficacy of other required medications. These data are obtained in the early phases of drug development and is a major objective of Phase I/II.

I am a member of ASCO, AACR, and ASH and served on the editorial boards of the *British Journal of Haematology* and the *American Journal of Clinical Oncology* (Associate Editor, Pediatric Oncology). I have authored or co-authored over 300 book chapters, peer-reviewed articles, and abstracts. I was senior editor to 4 editions of a classic textbook in pediatric hematology/oncology, *Blood Diseases of Infancy and Childhood*

In summary, for the past 43 years (since 1966), I have been actively engaged in the design, implementation, completion, regulatory review, analysis, presentation, publication, and when appropriate, regulatory approval worldwide of many anticancer agents that were evaluated in studies designed to make these agents available to patients.

I am familiar with the pharmacology (pharmacokinetics, pharmacodynamics), mechanism(s) of action, safety, and therapeutic efficacy, including clinical benefit, of

drugs and other anticancer agents. I also understand the importance of formulation in cancer drug development. By definition, formulation is the process of adding all of the ingredients in a product, including specific concentrations of each of the active agents, excipients, stabilizers, solubilizers, flavoring, and colorizers, and determining whether the product will be in capsule, tablet, or liquid form. I am familiar with drugs and other agents as well as their formulations, doses, and dose schedules that are generally recognized by experts as safe and effective for human use in specific indications. This knowledge comes from a professional life devoted to my patients and my involvement in the process of clinical drug development.

Thus, based on my training, experience, and ongoing clinical activities, I am well qualified to offer my expert opinion in this case.

II. SCOPE OF WORK

I have been asked by the FTC to determine whether there is competent and reliable scientific evidence to substantiate the following claims:

- Bio*Shark inhibits tumor growth;
- Bio*Shark is effective in the treatment of cancer;
- 7 Herb Formula is effective in the treatment or cure of cancer;
- 7 Herb Formula inhibits tumor formation;
- GDU eliminates tumors;
- GDU is effective in the treatment of cancer;
- BioMixx is effective in the treatment of cancer; and
- BioMixx heals the destructive effects of radiation and chemotherapy.

Compensation: \$250/hour.

Prior Expert Testimony: A listing for the past 4 years is in APPENDIX I.

III. MATERIALS CONSIDERED

To form my opinion, in addition to drawing upon my extensive expertise in cancer care and treatment, I have conducted literature searches as follows:

- PubMed, Google, PDQ, NCI, MSKCC, MD Anderson Cancer Center, Dana Farber Cancer Institute, Search Medica, Stanford HighWire, Clinical Trials.gov, many cancer and hematology journals (e.g. Journal of Clinical Oncology, Clinical Cancer Research, Blood, British Journal of Haematology, Supportive Care in Oncology, American Journal of Oncology, New England Journal of Medicine, etc.) (APPENDIX III)

I have also reviewed the following material provided to me by the FTC:

- Official Transcripts of DCO Healthwatch Radio Program on Accent Radio Network, July 8, 2008, and July 14, 2008
- Testimonials submitted by 30 patients who used DCO products
- Respondents' Responses to Complaint Counsel's First Set of Interrogatories
- Daniel Chapter One Product Labels (for products for which representations have been made regarding cancers or tumors)
- BioGuide, the Biomolecular Guide for Daniel Chapter One
- Literature provided by DCO:

IV. SUMMARY OF OPINIONS

Based upon my professional training and experience and my review of all of the materials cited above, it is my opinion that there is no competent and reliable scientific evidence to substantiate the claims that the products at issue treat, cure, and prevent cancer.

V. WHAT CONSTITUTES COMPETENT AND RELIABLE SCIENTIFIC EVIDENCE

Based on my extensive experience in academic medicine from 1966 to 1996 and in the pharmaceutical industry from 1997 until today, it is my opinion that to constitute competent and reliable scientific evidence, a product that purports to treat, cure, or prevent cancer must have its efficacy and safety demonstrated through controlled clinical studies.

My understanding of what constitutes competent and reliable scientific evidence is consistent with the FDA's regulations that define the criteria for adequate and well-controlled clinical investigations, which are set forth at 21 C.F.R Sec. 314.126. My understanding also is consistent with the guidelines set forth by FDA entitled "Guidance for Industry on Complementary and Alternative Medicine Products and Their Regulation by the Food and Drug Administration, (October 2006)."

The proper format for any clinical trial protocol includes the following:

1) details of the **rationale** for the study relating the critical features (aims, target population, design, treatment, dosage, route of administration, duration, and primary endpoints) to the development of the investigational drug;

2) clear elucidation of **primary and secondary objectives**;

3) clear presentation of the **investigational plan**, including a) **study design**, including number of centers, type of study (e.g. open label or double-blind), randomization with or without stratification, duration of each study phase, total duration of study, treatment groups, special features, special subsets, and effects of interim analysis on power of study, if planned; b) **selection of subjects** including number, inclusion and exclusion criteria; c) **study treatments**, including dosage schedule, treatment assignment, randomization schedule, blinding/packaging/labeling, mechanisms to ensure compliance; d) documentation of **prior and concomitant illnesses and treatments**; and e) **study procedures and schedules** (for evaluation of safety and efficacy).

4) complete overview and description of specific methods of **data collection**, quality assurance, and quality control;

5) complete description of all **statistical procedures**;

- 6) if relevant, full reporting of results of studies of **pharmacokinetics, pharmacodynamics, quality of life, and health economics;**
- 7) complete and concise discussion of **overall conclusion** regarding safety and efficacy;
- 8) relevant **references;**
- 9) accompanying **Tables and Figures;**
- 10) selected **subject listings** of demographics, disease and treatment parameters, endpoints, safety factors, and deaths); and
- 11) subject narratives for serious adverse events and deaths.

Clinical drug development is a complicated, lengthy, and expensive process. Of any 5000 promising agents discovered in the laboratory and entering nonclinical testing, 5 enter Phase I and one is approved. Nonclinical studies are performed in the test tube and in animals with the aim of demonstrating potential activity and acceptable safety in animals. Once nonclinical studies have been performed, a new agent enters Phase I “first in humans” clinical trials. In oncology, previously treated cancer patients are usually enrolled in these Phase I studies. A Phase I study is designed to determine the pharmacokinetics, pharmacodynamics, maximal tolerated dose, dose limiting toxicity, safety, and recommended Phase II dose of the candidate new agent. In the next step, Phase II, the efficacy and safety of the new agent is evaluated in selected cancers and targeted patient populations. The last step is the performance of randomized, controlled Phase III clinical trials. The decision to proceed to Phase III is generally based on the justification for the dose/dose regimen, on the robustness of the efficacy data, and the assurance of an acceptable safety profile derived from the Phase II studies. A successful

Phase III study meets its predefined endpoints with statistical robustness and with an acceptable safety profile.

Determining the mechanism of action of a new agent to treat cancer is a critical aspect of cancer drug development. Anticancer agents may work by preventing cell proliferation (division), induce programmed cell death (apoptosis), inhibit growth factors or biochemical pathways that result in cell death, and important in this matter, inhibition of new blood vessel formation or angiogenesis.

Angiogenesis is an important and vital mechanism of tumor growth and metastasis. Antiangiogenic agents have an important role in the treatment of some types of cancer. During the past 9 years I have been involved in the development of a number of antiangiogenic agents, some of which are undergoing early stages of development and others are now approved to treat cancer. All of these approved antiangiogenic compounds underwent Phase I/II/III studies and have been the subject of scientific presentations and publications. These antiangiogenic agents are now being used with chemotherapy to treat a variety of solid tumors and hematologic malignancies.

Most of these antiangiogenic agents are highly purified, synthesized products, recombinant molecules, or humanized monoclonal antibodies with known mechanisms of action. They have well-characterized pharmacokinetics, pharmacodynamics, and dose/dose schedules. As targeted therapies, they have a different safety profile than conventional chemotherapy. Unlike crude raw materials, all have known targets regarding their active antiangiogenic activity.

Many of the studies cited by DCO in support of their position and provided to me by the FTC are nonclinical (in vitro or in animals). Other reported studies have evaluated

isolated compounds that are also present in certain DCO products. Some of these individual compounds showed nonspecific immunostimulatory activities or suggested cancer preventive effects. However, nonclinical studies can not replace the actual evaluation of DCO products themselves. Each DCO product or active ingredient must be subjected to the same experimental conditions to demonstrate anticancer activity. It is not possible to extrapolate from the results of a published nonclinical study of curcumin for example and state that GDU can eliminate tumors.

Complementary medicine's role is not to replace conventional anticancer therapy. Complementary medicine adds to the efficacy of standard anticancer therapy, reducing some of cancer therapy's adverse side effects (e.g. nausea and vomiting, severe neutropenia, anemia, fatigue), improving general well-being and quality of life, and permitting oncologists to administer effective doses of therapy on time. It is well known that many new targeted therapies work better when given with conventional anticancer therapy and rarely are as efficacious when given as single agents. Similarly, complementary medicine should and does not serve as an alternative to effective and safe anticancer therapy. Suggesting that it can be an effective substitute for traditional medicine would be a disservice to cancer patients. Delays in effective therapy may allow cancer cells to regrow, develop resistance to therapy, and metastasize.

Anecdotal reports of a drug's efficacy conducted outside the setting of a controlled clinical trial do not replace clinical trials that are designed to demonstrate safety and efficacy. Without confirmation of the diagnosis of cancer, predefined strict eligibility criteria, a rational and justified dosing schedule, safety monitoring, and carefully defined endpoints, anecdotal reports are not reliable and competent, lack statistical robustness, are

short on scientific quality or validity and can never substitute for a well-designed and well-conducted controlled clinical trial. Anecdotal reports represent the weakest form of evidence supporting the anticancer activity of a new agent. I am unaware that anecdotal reports provided adequate evidence to provide the basis for regulatory approval of any new anticancer agent.

As I will review, not only are there no peer-reviewed data to demonstrate a role for any DCO product in the treatment of human cancer, but also, the use of these products presents a potential harm. This is most acute if a cancer patient foregoes potentially beneficial and effective therapy and replaces that option with Bio*Shark, GDU, 7 Herb Formula, or BioMixx, alone or in combination with other DCO products. Diagnosing cancer early and treating it appropriately and effectively still offers the best chance of curing it. The use of complementary or alternative therapies exclusively as front-line (first) treatment will surely result in disease progression and death.

The risks of untested and unregulated remedies were succinctly stated by Angell and Kassirer in an editorial published in the New England Journal of Medicine in 1998:

“It is time for the scientific community to stop giving alternative medicine a free ride. There cannot be two kinds of medicine—conventional and alternative. There is only medicine that has been adequately tested and medicine that has not, medicine that works and medicine that may or may not work. Once a treatment has been tested rigorously, it no longer matters whether it was considered alternative at the outset. If it is found to be reasonably safe and effective, it will be accepted. But assertions, speculations, and testimonials do not substitute for evidence. Alternative treatments should be subjected to scientific testing no less rigorous than that required for conventional treatments.”

VI. DETAILED DISCUSSION OF FINDINGS

a. Bio*Shark

The key questions relating to Bio*Shark are:

- Does Bio*Shark inhibit tumor growth?

- Is Bio*Shark effective in the treatment of cancer?

Conclusion:

A thorough review of peer-reviewed literature and of all of the documents produced by DCO indicates that there is no competent and reliable scientific evidence that Bio*Shark inhibits tumor growth in humans or that it is effective in the treatment of cancer in humans.

Discussion

DCO cites 9 nonclinical and 1 clinical studies in support of the clinical efficacy of Bio*Shark, but Bio*Shark was not evaluated in any of them. In the absence of any nonclinical or clinical data on Bio*Shark, it appears that DCO considers any proprietary shark cartilage product as a surrogate for Bio*Shark. Such an assumption is not acceptable scientifically.

A number of reported nonclinical studies suggested that highly purified peptides isolated from shark cartilage may have antitumor activity and antiangiogenic activity. Common in all of these reports was a clear description of the experimental design that included concentration of the peptide being evaluated for its anticancer activity. The nonclinical studies of various, mostly partially purified isolates from shark cartilage suggested a number of effects including:

- Enhanced immune response and decreased tumor size in animals treated intraperitoneally (injected into the abdominal cavity).
- Inhibition of angiogenesis in rabbit cornea.
- Inhibition of endothelial cell function and decreased vascular endothelial growth factor (an important angiogenic factor) production in cancer cells.
- Inhibition of growth of lung carcinoma growth.

Three nonclinical *in vivo* studies of orally-administered crude shark cartilage have been published in the peer-reviewed literature. (PDQ, NCI, April 2008). In one study, an unidentified shark cartilage product inhibited chemically-induced angiogenesis in rats. In

a second study, shark cartilage (unknown brand) inhibited the growth of gliosarcoma in rats. In a third study, two other shark cartilage products (Sharkilage, MIA Shark Powder) did not inhibit the growth or metastasis of squamous cell carcinoma in mice. Thus, even the nonclinical efficacy data regarding orally administered shark cartilage are inconclusive.

The take home message from the nonclinical studies is that evidence of antitumor, antiangiogenic, and immunostimulatory activity in vitro or in animal models using *highly purified peptides* from shark cartilage administered parenterally (not by mouth) or shark cartilage powder administered orally does not translate to anticancer activity of crude shark cartilage given to human cancer patients. Specific amounts of antiangiogenic peptides were administered to animals or inserted in Petri dishes with tumor cells or endothelial cells to measure activity. Entirely unknown is the amount of functionally active antiangiogenic peptides or other anticancer compounds that are absorbed after oral administration of crude or aqueous extracts of shark cartilage in humans.

The DCO recommended dose is “2-3 800 mg capsules three times a day.” The calculated daily dose is 4.8 – 7.2 g/day. Most clinical trials of crude or partially purified shark cartilage used a dose of 1 g/kg/day. Thus, even if shark cartilage were active, the dose recommended by DCO is about 10% of that given to cancer patients enrolled in clinical trials. This would imply that Bio*Shark is 10 times more potent with respect to antiangiogenic activity than other commercially available products. Comparative bioavailability/bioequivalence studies of the different commercially available products and nonclinical studies to evaluate antiangiogenic and other alleged activities of shark cartilage are needed to establish an appropriate safe and effective dose in humans. These studies have not been done.

Are there any reliable scientific data supporting a role of orally-administered shark cartilage in treating patients with cancer? NCI/PDQ in April 2008 updated the current status of the use of shark cartilage in the treatment of cancer and summarized data from 8 clinical studies that had predefined clinical endpoints (Table 1).

Table 1. Summary of Clinical Trials of Shark Cartilage

| Reference* | Phase | Cancer Indication | Cartilage Product (Source) | N | Best Response | Concurrent Therapy | Level of Evidence* |
|---|--------------|-----------------------------------|----------------------------|-----|---|---------------------------------|--------------------|
| Prudden et al, 1995 | Case Studies | Advanced, metastatic | Catrix (bovine) | 31 | CR-19 | Yes | 3iiiDiii |
| Romano et Al, 1985 | II | Metastatic | Catrix (bovine) | 9 | CR-1 (RCC) | No | 3iiiDiii |
| Puccio, 1994 | II | Metastatic renal cell | Catrix (bovine) | 35 | PR-3/22 evaluable | Unknown | None ^f |
| Falandreau, et al, 2001 Batist, et Al, 2002] | I/II | advanced, refractory solid tumors | AE-941/ Neovastat (shark) | 331 | ↑ OS (NSCLC- Unplanned) RCC (planned) | Unknown | None ^f |
| Latreille et Al, 2002 | I/III | IIIB/IV NSCLC | AT-941/ Neovastat (shark) | 80 | No DLT ↑ OS @ ↑ doses No tumor Responses | Yes or refused standard therapy | None |
| Miller et al, 1998 | I/II | Advanced solid tumors | Cartilade (shark) | 60 | SD (12 wk), 10/50 | No | 3iiiDiii |

^ Full references in APPENDIX II, Bio*Shark

*For information about Levels of Evidence analysis and an explanation of the level of evidence scores, see [Levels of Evidence for Human Studies of Cancer Complementary and Alternative Medicine](#).

Not included in the above review was a subsequent randomized, double-blind, placebo-controlled study of Neovastat (AE-941) in Stage 3 inoperable NSCLC treated with standard induction chemotherapy and chemoradiation therapy. AE-941 did not improve overall survival when compared with placebo. (Lu et al, 2007) The development of Neovastat in cancer has been discontinued.

In summarizing these data in 2008, NCI concluded: “Although at least a dozen clinical studies of cartilage as a treatment for cancer have been conducted since the early 1970s, relatively few results have been reported in the peer-reviewed scientific literature. At present, the use of cartilage (bovine [cow] or shark) as a treatment for cancer cannot be recommended outside the context of well-designed clinical trials.”

A number of anecdotal reports of the safety and efficacy of shark cartilage (Cartilade™, BeneFin™, others) have been published in non-peer reviewed journals, presented on television, or have not conformed to good clinical practice required in Phase II or Phase III trials. These anecdotal studies do not provide any competent and reliable scientific evidence to substantiate the claims mentioned above concerning Bio*Shark. (Lane and Contreras, *J Naturopath Med* 1992; Menendez Lopez, JR et al, 1996; Milner, 1996). In some anecdotes, patients received conventional anticancer therapy followed by shark cartilage. However, shark cartilage was credited for the salutary effects. In summary, these anecdotal reports provide no scientifically useful, competent, valid, or reliable evidence about the efficacy or safety of shark cartilage in patients with cancer.

DCO relies on the work of Dr. I. William Lane of “Sharks Don’t Get Cancer” fame. However, Dr. Lane’s premise is false as careful studies at Johns Hopkins University indicate that indeed sharks do get cancer (Ostrander, et al, 2004). Ostrander et al provide details on more than 40 examples of tumors in sharks and related species.

Bio*Shark not only contains shark cartilage but also contains 50 mg of “Biomolecular Base”. In addition to a number of herbal ingredients (e.g. eleuthero root, garlic, and dandelion), BioMolecular Base contains unspecified amounts of interesting elements and minerals such as barium, bismuth, gallium, silicon, silver, strontium, titanium, vanadium,

and zirconium. I have searched the literature and am unable to find reliable and competent evidence from controlled clinical trials showing any nutritional value of or daily requirement for any of these constituents in Bio*Shark (and GDU).

There are no adequate and well-controlled studies demonstrating that Bio*Shark is antiangiogenic or is effective in the treatment for cancer. There have been no specific studies of Bio*Shark evaluating its bioavailability, absorption, distribution, metabolism, excretion, pharmacokinetics, pharmacodynamics (antiangiogenic activity), or dose response. There are no good data on the amount of antiangiogenic activity/gram, milligram, microgram, or nanogram of crude shark cartilage or the shelf-life of that activity. The argument that hundreds of thousands of patients have been “treated” with shark cartilage or that the “proof lies in the pudding” does not answer the myriad of unknowns regarding shark cartilage or justify its use in cancer patients. Because the most effective dose or dose schedule has never been established, it is not possible to offer adequate directions for the use of Bio*Shark in cancer patients.

In summary, there is no competent and reliable scientific evidence that any crude shark cartilage product has any proven efficacy in treating human cancer. Furthermore, the supporting nonclinical studies of crude or partially-purified shark cartilage products are extremely limited, particularly with regard to mechanisms of action, pharmacokinetics, pharmacodynamics, establishment of the MTD and recommended Phase II/III dose, all essential components in clinical drug development.

b. 7 Herb Formula

The key questions relating to 7 Herb Formula are:

- Is 7 Herb Formula effective in the treatment or cure of cancer?
- Does 7 Herb Formula inhibit tumor formation?

Conclusion

A thorough review of peer-reviewed literature and all of the documents produced by DCO indicates that there is no reliable and competent scientific evidence that 7 Herb Formula is effective in the treatment or cure of cancer or that it inhibits tumor formation.

Discussion

7 Herb Formula contains Burdock root, sheep sorrel, slippery elm bark, Turkish rhubarb root (the 4 ingredients of another product called Essiac, which has never been evaluated in clinical trials to determine if it has any anticancer activity), cat's claw, Siberian ginseng, and watercress. Unlike the other DCO products under review in this report, the concentrations of the seven ingredients are not provided in the label. Thus, the amount of each ingredient in the DCO-recommended total daily dose of 2 to 4 ounces of 7 Herb Formula is unknown.

I will now review briefly published data about each of the components of 7 Herb Formula. Of note is that according to the label, an ounce of 7 Herb Formula contains no calories, carbohydrate, protein, or fat, and no cholesterol or sodium. The label also indicates that each ounce contains 2% of the daily value of vitamins A and C but no other vitamins, and no calcium or sodium. An analysis of the constituents of 7 Herb Formula is provided in Table 2 and suggests that the label is misleading and in error or both. If indeed 7 Herb Formula contains no carbohydrates, proteins, or fats it must be inert with respect to nutrients. My understanding is that most plants contain carbohydrates.

Table 2. Constituents of Components of 7 Herb Formula (from Cassileth and Lucarelli)

| Constituent | Carbohydrates | Fats/cholesterol | Vitamins | Other ingredients |
|--------------|--|---|----------|-------------------|
| Burdock root | Inulin, mucilage, pectin, flavonols, polyphenols (quercetin), Phytosterols | Fatty acids, polyacetylenes, volatile oils, | | Bitters, tannins |
| Cat's claw | Oxindole alkaloids, glycosides, polyphenols, | | | Tannins, |

| | | | | |
|----------------------|---|--|-----------------------------|---|
| Sheep sorrel | Glycosides, | | A, B complex, C, D, E, K | anthraquinones Oxalates, tannins |
| Siberian ginseng | Polysaccharides, glycosides, eleutherosides, glucose, maltose, sucrose, | Oleanolic acid, terpenoids, volatile oils, coniferyl aldehyde | | Caffeic acid |
| Slippery elm bark | Mucilage, galactose, glucose, galacturonic acid, | Phyosterols; fatty acids (oleic, palmitic); cholesterol | | Tannin, calcium Oxalate |
| Turkish rhubarb root | Starch | Fatty acids, volatile oils | | Anthraquinones, tannins, calcium oxalate, |
| Watercress | Glycosides | | A, C, E, nicotinamide | Nitriles, calcium, iodine, copper, manganese iron, phosphorus, |

Neither nonclinical nor clinical studies of 7 Herb Formula have been reported in peer-reviewed literature. Thus, there is no evidence to support claims that 7 Herb Formula or any of its individual components are effective anticancer agents or inhibit tumor formation. Nonclinical and clinical studies of the individual components of 7 Herb Formula will now be reviewed.

Burdock root: Neither nonclinical nor clinical trials have been reported in cancer patients. In mice, burdock root stimulated macrophages (cells that phagocytose other cells, bacteria, and other debris). Other studies suggest that burdock root may induce hypoglycemia and increase carbohydrate tolerance. Other reports indicate that some Burdock root products were contaminated with belladonna alkaloids (atropine).

Cat's claw: An indole alkaloid from the tree *Uncaria tomentosa*, cat's claw appears to have immunostimulatory activity in vitro by enhancing phagocytosis and T-helper cell function, and inhibiting NF- κ B and TNF- α , and increases myelopoiesis. Anti-inflammatory activity was also noted. (Sandoval et al, 2002) Cat's claw inhibits CYP3A4 and thus will increase the serum levels of a number of drugs including protease inhibitors,

non-nucleoside reverse transcriptase inhibitors (NNRTI) and cyclosporine. It increases the activity of antihypertensive agents causing hypotension, causes diarrhea, and has anticoagulant and antiplatelet activity, increasing the risk of bleeding. In cancer patients with low platelet counts, this could be very dangerous. In vitro, cat's claw inhibited the growth of breast cancer cells (Riva L et al, 2001). To that extent that cat's claw enhances DNA repair after chemotherapy, this might actually interfere with the chemotherapy by preventing programmed cell death of cancer cells.

Published results from clinical trials of cat's claw in cancer patients do not exist. Thus, there is no established or recognized role of cat's claw in treating human cancer or causing regression of tumors in cancer patients.

Sheep sorrel: Simply stated, there are no published clinical trials of sheep sorrel in cancer patients. Adverse side effects include low potassium levels in the blood. Thus, its efficacy as an anticancer agent has not been established.

Siberian ginseng: Siberian ginseng comes from the root of *Eleutherococcus senticus* and anecdotally is thought to be an enhancer of physical and intellectual performance and an immunostimulant. Most of the data supporting the mechanism of action and beneficial effects of Siberian ginseng not surprisingly came from Russia. Some of the constituents of Siberian ginseng bind to estrogen, progesterin, and mineralocorticoid and glucocorticoid receptors, which might have an effect on cell proliferation. Stimulation of T-lymphocytes and natural killer cells has been reported but the mechanism of this immunostimulation is unknown. (Cassileth and Lucarelli, 2003) Randomized, controlled clinical trials in cancer patients have not been reported.

Slippery elm bark: As noted in Table 2, slippery elm bark contains carbohydrates (sugars), fatty acids, calcium, and cholesterol. Yet the label for 7 Herb Formula indicates that the content of these ingredients is 0%. Possible explanations are 1) the amount of slippery elm bark is so minimal that these ingredients are undetectable by the analytic methods used by DCO; 2) the label is wrong; or 3) what's claimed to be an active ingredient is actually inert. Specific data from an independent analysis of 7 Herb Formula and its individual components are needed to address this issue. There are no published animal or human studies that support a role for slippery elm bark as an effective anticancer agent in humans.

Turkish rhubarb root (rheum): The pharmacologically active ingredients are tannin, anthraquinones, emodin, and sennidin. At low doses of Turkish rhubarb root, tannins cause constipation; at higher doses, the metabolites of emodin and sennidin cause diarrhea. This illustrates a basic principle in drug development: Phase I studies establish the maximum tolerated dose of a new drug and identify its dose limiting toxicities. We also perform pharmacokinetic studies to learn how a drug is absorbed, distributed, metabolized, and excreted and pharmacodynamic studies to learn more about its mechanisms of action and its effect on some organ or function. Only then do we progress to evaluate the efficacy of a new agent in different types of cancer. Studies of Turkish rhubarb root in mice show antitumor effects but no studies have been performed in humans with cancer. Thus, there are no published data supporting a role of this agent in treating human cancer.

Watercress: The major active pharmacologic constituent of watercress is glucosinolates that irritate mucous membranes. This action conflicts with the purported usefulness of watercress as an agent that might reduce inflammation and mucous in the

respiratory tract. As with any pharmacologic drug, it is the dose that makes the poison. That is, low doses may be beneficial whereas higher doses may be toxic. Watercress has been used to treat urinary tract infections in children, bronchitis, and liver parasites (Hecht et al, 1995). Other studies (Hecht, 1996) indicated that glucosinolate phenethyl isothionate is released when chewing watercress leaves and inhibits the formation of a carcinogen that is present in tobacco smoke. However, there are no clinical reports to confirm the alleged beneficial effects of watercress on cancer treatment or prevention.

c. GDU

The key questions relating to GDU are:

- Does GDU eliminate tumors?

- Is GDU effective in the treatment of cancer?

Conclusion:

A thorough review of the literature and all of the documents produced by DCO, indicates that there is no competent and reliable scientific evidence that GDU is effective in the treatment or cure of cancer or that it inhibits tumor formation. An individual component of GDU, curcumin, is currently being evaluated clinically in controlled trials to determine its potential as a chemoprotective and cancer preventive agent.

Discussion:

DCO recommends that GDU is useful to eliminate and treat cancer. The product contains bromelain (quantity not stated), quercetin, a polyphenolic flavonoid with anti-inflammatory and anticancer activity, tumeric or curcumin with anticancer and cancer preventive activity, feverfew or parthenolide used primarily to treat migraine headaches, and boron. The DCO-recommended daily dose of GDU is 3-6 capsules 2-4 times per day or 6-24 capsules/day providing the following amounts of individual ingredients: tumeric 1800-7200 mg, quercitin 600-2400 mg, and feverfew 600-2400 mg. Because the amount

of bromelain and boron are not provided in the product label, the daily amount of these ingredients is unknown.

There are no controlled or uncontrolled clinical trials that have evaluated GDU in patients with cancer. I will now summarize the nonclinical and clinical studies of the ingredients of GDU in cancer patients.

Bromelain: Bromelain is a proteolytic and fibrinolytic enzyme purified from the stems of pineapple. It prevents platelet aggregation and adhesion on endothelial cells, can act as an anti-inflammatory agent, and has been proposed as an additive agent when given with conventional anticancer therapy. Proposed mechanisms of action include down-regulation of the immunosuppressive cytokine transforming growth factor- β (TGF- β) (Desser et al, 2001), modulation of immune cell function, modulation of cell adhesion, and inhibition of tumor cell growth. Bromelain is absorbed from the intestinal tract and may increase the risk of bleeding, decrease the risk of thrombosis, and increase the efficacy of certain anticancer agents (5-fluorouracil, vincristine) (Cassileth and Lucarelli, 2003). Again, bromelain is not an alternative to anticancer therapy but complements it. We do not know the amount of bromelain in GDU.

Tumeric (curcumin): Of the 5 ingredients of GDU and of all the DCO products being offered to patients for their anticancer potential, tumeric or curcumin is the single most promising agent. Curcumin is a polyphenol derived from the rhizome and root of tumeric. A spice and coloring agent, it has had a long history in traditional Indian and Chinese medicine to treat inflammatory diseases, abdominal disorders, and other ailments, including cancer. Recent studies suggest that curcumin may have activity as a cancer preventive and therapeutic agent. In animal studies, curcumin inhibited liver cancer

induced by a chemical carcinogen (Chuang et al, 2000) and has dose-dependent cancer preventive effects in rodent models of gastrointestinal cancers extending from the oral cavity to the colon and the skin (Huang et al, 1994; Rao et al, 1995; Kawamori et al, 1999). Some proposed mechanisms of action of curcumin that may have an antitumor effect include:

- Scavenger of free radicals and antioxidant protecting DNA
- Block the local spread and metastasis of tumor cells
- Inhibit the activation of a number of growth factor receptors and intracellular signal transduction pathways important in cell proliferation, programmed cell death, and angiogenesis

However, not all of these mechanisms are beneficial. For example, curcumin may actually inhibit the antitumor action of chemotherapeutic agents such as cyclophosphamide, doxorubicin, camptothecin, and mechlorethamine useful in treating breast cancer, colorectal cancer, and lymphomas, respectively. (Somassundaram et al, 2002). Neither the DCO BioGuide nor the GDU label warn about potential inhibitor effects of GDU on certain chemotherapeutic agents. The potent inhibition of cytochrome p450 might either increase the blood levels of certain drugs, increasing their toxicity or decrease the effective concentration of other drugs, decreasing their efficacy. Chelation of iron in cancer patients with marginal iron stores or those with anemia associated with cancer and chronic disease will have an adverse effect on these patients. (Jain, et al, 2009) The label warns patients about the risk of bleeding because of the effect of tumeric on platelet function but provides no information about potentially adverse drug interactions.

Based upon the DCO label, daily doses of 1800-7200 mg are recommended. Each GDU capsule contains 300 mg of tumeric and the daily recommended dose is 3-6 capsules 2-4 times daily or 6-24 capsules. This dose is within the range of some of the reported activities of tumeric in the Petri dish and in animals. In Phase I clinical trials, healthy volunteers tolerated curcumin doses as high as 8 g/day with no side effects (Cheng et al, 2001). These and other studies indicated that the bioavailability of curcumin is very low in rodents and humans and that curcumin undergoes extensive metabolic inactivation in the gastrointestinal tract. (Sharma et al, 2001).

Lacking are double-blind, placebo-controlled, randomized clinical trials of curcumin in cancer patients. These studies are required to determine the safety and efficacy of curcumin to treat or prevent cancer.

Quercetin: Quercetin is a plant-derived polyphenolic flavonoid and the major source of flavonoids in our diet. It is present in apples, teas, onions, and buckwheat. Nonclinical studies suggest that quercetin has anti-inflammatory, antioxidant, and anti-allergic properties. Proposed mechanisms of action in cancer cells include down-regulation of the mutant tumor suppressor gene p53, cell cycle arrest, and inhibition of tyrosine kinase, estrogen receptor binding, heat-shock proteins, and RAS protein expression. The DCO recommended daily dose of quercetin is 600-2400 mg. No randomized clinical studies of quercetin in cancer patients have been reported. Thus the anticancer activity of quercetin is not established and claims that it is an effective and safe anticancer agent are unsupported and unwarranted at this time.

Feverfew: The active ingredient in feverfew is parthenolide. Nonclinical studies indicated that parthenolide induced apoptosis (programmed cell death) in colorectal cancer

cells (Zhang et al, 2004). Curry et al (2004) reported results from an open label, single institution, non-randomized, Phase I study of feverfew (Tanacet[®]) in cancer patients who were given 1 mg/d po x 28 days with dose escalations to 2, 3, 4 mg/day using a standard Fibonacci design (3+3). Twelve patients with histologically or cytologically confirmed, previously treated and refractory cancer and measurable disease were enrolled. All 11 males had prostate cancer and the single female had breast cancer. All had measurable or evaluable disease, ECOG performance status 0-2, and a life expectancy of greater than 3 mos. Response was evaluated with quantitative, predefined criteria every 8 weeks (2 cycles). Even at these low doses, a number of adverse events were recorded and included fever, nausea, diarrhea, indigestion, chills, fatigue, blurred vision. The primary objective of the study was to determine the pharmacokinetics (PK) and maximum tolerated dose (MTD) of feverfew when given as a single agent. However, levels of parthenolide were undetectable in treated patients indicating that orally administered feverfew had very poor bioavailability. Not surprisingly, the MTD was not established and there were no responses to treatment. The authors concluded that more studies were needed.

The doses evaluated were at least two logs below the doses of feverfew recommended by DCO (600 mg-2400 mg/day) but were reasonable in an initial Phase I study. Considering that the relatively tiny doses administered in the Phase I study exhibited adverse effects, concern is raised about potential toxicity of higher doses of purified parthenolide. The amount of parthenolide, the active agent in feverfew, is not provided in the DCO label, nor are there any PK/PD studies of DCO's feverfew that is in GDU.

GDU also contains "BioMolecular Base" that has been discussed above.

In summary, there are no randomized, controlled clinical trials of any of the individual components of GDU or of GDU itself in patients with cancer. Some studies suggest that one of its components, curcumin may actually inhibit the anticancer activity of some approved anticancer agents. Recent studies suggest that curcumin may exacerbate iron deficiency. Yet this component is the most attractive ingredient of GDU because of its possible cancer preventive and perhaps, chemotherapeutic effects. Again, more research is needed to answer these important questions.

d. BioMixx

The key questions are:

- Is BioMixx effective in the treatment of cancer?
- Does BioMixx heal the destructive effects of radiation and chemotherapy?

Conclusion

A thorough review of peer-reviewed literature and all of the documents produced by DCO indicates that there is no competent and reliable scientific evidence that BioMixx is effective in the treatment of cancer or that it heals the destructive effects of radiation and chemotherapy.

Discussion:

BioMixx contains a mixture of so-called biomolecular nutrients including goldenseal, echinacea, ginseng, gamma globulin complex, vitamins, minerals, amino acids, and enzymes. BioMixx, according to the label contains 18 amino acids and 56 other components. However, careful scrutiny of the label indicates that the quantity of the pharmacologically-active ingredients of goldenseal, the alkaloids hydrastine, berberine, canadine, and canadine is not provided. A recommended dose of goldenseal is 250-500 mg three times a day or 750-1500 mg/day. (Cassileth and Lucarelli, 2003) The most active component of goldenseal is berberine which makes up 0.5-6% of this plant product.

Berberine and the other alkaloids in goldenseal are not mentioned as ingredients of BioMixx. Thus, the amount of berberine in the “recommended” daily dose of goldenseal would range from 4.5-90 mg/day, if goldenseal was in a given product or if pure goldenseal was taken. In vitro studies of berberine at a concentration of 50 µg/ml showed a tumoricidal effect on human and rat brain tumor cells. (Zhang RX, et al, 1990).

Clinical studies of goldenseal in cancer patients have not been reported but this argument is moot because it is uncertain if BioMixx contains either goldenseal or berberine, the presumed active anticancer agent in goldenseal. Furthermore, there are no reported studies of goldenseal in cancer patients.

BioMixx does contain echinacea (25 mg in the recommended daily dose of 151 grams or 5 scoops). The source of echinacea in BioMixx is not stated but the “recommended” daily dose of the dried root source of echinacea is 500 to 1000 mg three times a day or 1500 to 3000 mg. This represents about 2% of the recommended daily dose.

The role of ginseng (400 mg in 5 scoops of BioMixx), *Uncaria tomentosa* or cat’s claw (50 mg/day), shark cartilage (916 mg/day), bromelain (122 mg), and boron (2 mg) have been discussed above in the sections on Bio*Shark, GDU, and 7 Herb Formula and will not be reviewed again.

BioMixx contains some novel ingredients that raise other questions and warrant discussion. For example, the label indicates that a day’s dose of BioMixx contains ATP (153 mg), RNA (2931 mg), and DNA (1406 mg). ATP is an important high energy intermediary of intracellular metabolism but has no function as a food additive. It is uncertain what kind of “RNA” is added to Bio*Shark. Is it a viral RNA? Messenger RNA? What is the source of the DNA? Is it human? Bald eagle? Grasshoppers? Is it

nuclear or mitochondrial DNA? And what is the purported usefulness of ingesting RNA or DNA? Is this source better than eating a brook trout, a steak, or buffalo wings?

BioMixx contains 977 mg of guarana, whose major constituent is caffeine (2.5-7% or 24-68 mg). Caffeine is a recognized stimulant but does not have any anticancer activity. Another ingredient is bee pollen (365 mg). Except for its nutritive value, no salutary effect of bee pollen in cancer has been reported (Cassileth and Lucarelli, 2003). Patients allergic to bee stings should avoid taking BioMixx but there is no label warning.

This same label asserts that BioMixx is “used to assist the body in fighting cancer and in healing the destructive effects of radiation and chemotherapy treatments.” There are absolutely no data to support this statement. To do so, DCO or a clinical research group might consider conducting a randomized, placebo-controlled clinical trial in which patients on the same chemotherapy regimen (e.g. cisplatin plus paclitaxel for stage IIIb/IV NSCLC or the same radiation therapy regimen (e.g. 5400 cGy for head and neck cancer) would be randomized to 5 scoops/day of either BioMixx or placebo. All patients would be evaluated for frequency and severity of anticipated side effects of cancer therapy (e.g. lowering of blood counts, mouth ulcerations, and neuropathy). The objective would be to enroll enough eligible patients on the study so that it is powered to reject the null hypothesis (there is no difference between placebo and BioMixx) and show that BioMixx results in a statistically significant decrease in the frequency and severity of side effects and shortens the time to recovery from adverse effects of either chemotherapy or radiation therapy. Adverse effects of cancer therapy are graded by severity and can be quantified (using the common toxicity criteria of the NCI or NCI-CTC). In evaluating toxicity,

subjective descriptors of severity are replaced by objective and quantifiable measures (e.g. number of loose stools/day, degree of anemia).

As is clear from everything written to this point, only data from well-designed, controlled, clinical trials will substantiate claims that a new therapy for cancer is safe and effective to treat, cure, or prevent this disease. Rather than conducting their own clinical trials or having some outside research organization conduct the trial, DCO has provided testimonials from patients who reportedly used their products. Testimonials do not substitute for a well-designed clinical trial.

Review of Testimonials from Users of DCO Products

DCO submitted testimonials from 30 patients with cancer and other disorders to support their claims that their products have anticancer activities. These testimonials do not constitute competent and reliable scientific evidence as to the efficacy of DCO's products.

Nearly two thirds of the testimonial cancer patients also received conventional anticancer therapy (surgery, chemotherapy, radiation therapy, immunotherapy, targeted therapy) making it impossible to assess any alleged response to or benefit from DCO products. Three patients were treated with DCO products as the only treatment for their cancer after they were diagnosed with cancer and report that they had a complete response or had no evidence of disease at the time their testimonials were submitted. Two of these patients had non-melanoma skin cancer and one had leukemia, not otherwise specified. All three received 7 Herb Formula with either Ezekiel Oil (skin cancer patients) or BioMixx (leukemia). Further nonclinical and randomized placebo-controlled clinical

trials would be required to demonstrate any clinically relevant efficacy of these DCO products in the treatment of cancer.

Summary and Conclusions

There have been no studies of the bioavailability, absorption, distribution metabolism, excretion, pharmacokinetics, pharmacodynamics, or dose response of any DCO product when used singly, in combination with other DCO products, or in combination with conventional anticancer therapy. The argument that supposedly hundreds or thousands of patients have been treated with DCO products and claim benefit does not justify their use in cancer patients. The effective and safe dose of these DCO products has never been established. Thus, it is not possible to write adequate directions for their use in cancer patients.

A thorough review of peer-reviewed literature and all of the documents produced by DCO indicates that there is no competent and reliable scientific evidence that Bio*Shark, 7 Herb Formula, GDU, and BioMixx are effective either alone or in combination with other DCO products in the treatment or cure of cancer, in inhibiting tumor formation, and in preventing the destructive effects of radiation and chemotherapy.

Cancer comprises a heterogeneous group of malignancies. Good clinical practice requires that trained, skilled, and experienced physicians diagnose and treat cancer. Cancer can not be diagnosed and treated by individuals lacking that experience. Although a number of products have been marketed to complement conventional anticancer therapy, their use should be known by physicians providing primary oncology care because of potential adverse effects of their own or adverse interactions with conventional anticancer therapy or concomitant medications used to treat other medical conditions.

It is not justifiable to suggest that the traditional and evidence-based process of finding effective treatments for cancer can be replaced by testimonials. Nor is it justifiable to claim that this process can be ignored or evaded because the cure for many patients with cancer remains elusive.

Respectfully, I conclude my report.

I reserve the right to amend, edit, and modify this report if additional substantive data or facts relating to the issues of this case and presented in this report become available.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Denis R. Miller MD", written over a horizontal line.

**Declaration of Theodore Zang
Pursuant to 28 U.S.C. § 1746**

I, Theodore Zang, hereby declare as follows:

1. I am a United States citizen over eighteen years of age. I am an Attorney with the Federal Trade Commission (“FTC” or “Commission”). My business address is Federal Trade Commission, Northeast Region, One Bowling Green, Suite 318, New York, New York 10004.
2. Upon information and belief, in or about December 2007, former FTC Attorney Ronald Waldman visited the Web sites www.danielchapterone.com and dc1store.com and printed the pages he reviewed. Complaint Counsel assigned the documents Mr. Waldman printed Bates Numbers FTC-DCO 0430 - 0492. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0430 - 0492 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.
3. In or about late January or early February 2008, James Feijo sent a letter with attachments to the FTC Northeast Regional Office in response to a January 18, 2008 letter from Mr. Waldman to Mr. Feijo. Complaint Counsel assigned Mr. Feijo’s letter and attachments Bates Numbers FTC-DCO 0037 - 0043. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0037 - 0043 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.
4. On March 31, 2008, James Turner, Respondents’ counsel, sent a letter with attachments to Mr. Waldman and me. Complaint Counsel assigned the March 31, 2008 letter and

attachments Bates Numbers FTC-DCO 0058 - 0119. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0058 - 0119 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.

5. On or around April 4, 2008, Mr. Turner sent at least one other letter with attachments to Mr. Waldman and me. Complaint Counsel assigned the April 4, 2008 letter and these attachments Bates Numbers FTC-DCO 0120 - 0290, FTC-DCO 0382 - 0429, and FTC-DCO 2030 - 2041. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0120 - 0290 and FTC-DCO 0382 - 0429 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo. On January 8, 2009, Complaint Counsel produced true and correct copies of the documents with Bates Numbers FTC-DCO 2030 - 2091 to Respondents.
6. On June 2, 2008, Mr. Turner sent an additional letter with attachments to Mr. Waldman and me. Complaint Counsel assigned the June 2, 2008 letter and attachments Bates Numbers FTC-DCO 0292 - 0305. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0292 - 0305 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.
7. As part of the FTC's investigation into Daniel Chapter One and James Feijo, the FTC-Northeast Regional Office acquired a copy of Daniel Chapter One's *BioGuide: The BioMolecular Nutrition Guide to Natural Health 3* (the "BioGuide"). Complaint Counsel assigned the BioGuide Bates Numbers FTC-DCO 0306 - 0381. On January 5, 2009, Complaint Counsel produced a true and correct copy of the BioGuide with Bates Numbers FTC-DCO 0306 - 0381 to Respondents pursuant to discovery In the Matter of

Daniel Chapter One and James Feijo.

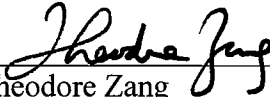

8. As part of the FTC's investigation into Daniel Chapter One and James Feijo, the FTC-Northeast Regional Office acquired a copy of Daniel Chapter One's Cancer Newsletter, Millenium [sic] Edition, 2002, entitled "How to Fight Cancer is Your Choice!!!" Complaint Counsel assigned the 2002 edition of Daniel Chapter One's Cancer Newsletter Bates Numbers 0390 - 0405. On January 5, 2009, Complaint Counsel produced a true and correct copy of the 2002 edition of the Cancer Newsletter with Bates Numbers FTC-DCO 0390 - 0405 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.
9. As part of the FTC's investigation into Daniel Chapter One and James Feijo, the FTC-Northeast Regional Office acquired a copy of Daniel Chapter One's Cancer Newsletter, 2004 Edition, entitled "How to Fight Cancer is Your Choice!!!" Complaint Counsel assigned the 2004 edition of Daniel Chapter One's Cancer Newsletter Bates Numbers 0406 - 0421. On January 5, 2009, Complaint Counsel produced a true and correct copy of the 2004 edition of the Cancer Newsletter with Bates Numbers FTC-DCO 0406 - 0421 to Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.
10. On or about November 7, 2008, as part of the FTC's investigation into Daniel Chapter One and James Feijo, the FTC-Northeast Regional Office reviewed the Daniel Chapter One Web site and printed the pages reviewed. Complaint Counsel assigned these Web pages printed from the Daniel Chapter One Web site on November 7, 2008 Bates Numbers FTC-DCO 0493 - 0496. On January 5, 2009, Complaint Counsel produced true and correct copies of these documents with Bates Numbers FTC-DCO 0493 - 0496 to

Respondents pursuant to discovery In the Matter of Daniel Chapter One and James Feijo.

11. Complaint Counsel are submitting many of the above cited documents in support of Complaint Counsel's Motion for Summary Decision.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on February 23, 2009.

Theodore Zang

**Declaration of Michael Marino
Pursuant to 28 U.S.C. § 1746**

I, Michael Marino, hereby declare as follows:

1. I am a United States citizen over eighteen years of age. I am an Investigator with the Federal Trade Commission (“FTC” or “Commission”). My business address is Federal Trade Commission, Northeast Region, One Bowling Green, Suite 318, New York, New York 10004.
2. As part of my regular duties, I monitor, research, and investigate parties who are suspected of engaging in unfair or deceptive acts or practices in violation of the Federal Trade Commission Act and other laws or rules enforced by the FTC. In late 2007, I was assigned to assist in the FTC’s investigation of Daniel Chapter One. During the course of this investigation, I acquired personal knowledge and information about the facts stated herein and, if called, would testify to the same.

Preservation of Daniel Chapter One’s Website

3. In or about December 2007, I was directed to preserve Daniel Chapter One’s website using a website preservation program called Teleport Pro. On December 20, 2007, I utilized an FTC stand-alone computer specifically designated for undercover investigations to capture Daniel Chapter One’s website at the Uniform Resource Locator (“URL”) www.danielchapterone.com, a website that was accessed through Microsoft Internet Explorer.
4. In order to preserve the website utilizing Teleport Pro, I performed the following steps: I double clicked on the Teleport Pro program icon on the desktop, I clicked the “Project” menu, I clicked on the “New Starting Address” option, I entered the starting address

properties of the Daniel Chapter One website (www.danielchapterone.com), I clicked “OK,” I clicked on the “Project” menu, I clicked “Project Properties” and selected the Netiquette tab to ensure Microsoft Internet Explorer was chosen, and then I clicked “OK.” To start the download process, I clicked the “Project” menu and chose “Start.” When the “Save As” box appeared, I typed in the file name “danielchapterone Teleport Pro Project” and clicked “Save.” When it was evident that the program had captured the relevant website pages, I clicked on the “Stop” button and clicked “OK” on the pop-up window. I then clicked on the “File” menu and “Exit.” I ensured that the downloaded Teleport Pro folders were saved to the desktop of the stand-alone computer and inspected the files to ensure Teleport Pro preserved the relevant content.

5. I then saved the downloaded Teleport Pro files of the Daniel Chapter One website to a CD-ROM disk. I reviewed the CD-ROM to ensure the relevant content was preserved.
6. I then placed the original Teleport Pro CD-ROM in a locked storage cabinet in my office. The CD-ROM containing this web capture continues to be maintained in the Commission’s Northeast Regional office in New York, New York.
7. A copy of this CD-ROM containing the “danielchapterone Teleport Pro Project” is attached hereto as **EXHIBIT A** (assigned Bates number FTC-DCO 0001).

Printing Selected Web Pages and the Cancer Newsletter from Teleport Pro

8. On or about June 26, 2008, I printed selected pages from the Teleport Pro preservation of Daniel Chapter One’s website www.danielchapterone.com mentioned above, including selected web pages and a pamphlet called the “Cancer Newsletter, Millenium (*sic*) Edition, 2002.” A true and correct copy of these web pages and the Cancer Newsletter, Millenium Edition, 2002, as I viewed and printed them are attached hereto as **EXHIBIT**

B (assigned Bates numbers FTC-DCO 2826-2861).

Undercover Purchase of Daniel Chapter One Products

9. On January 3, 2008, I purchased the following four products from Daniel Chapter One's website utilizing an FTC stand-alone computer specifically designated for undercover investigations: a) 7 Herb Formula, b) GDU Caps, c) BioShark, and d) BioMixx.
10. During the course of this undercover purchase, I printed selected pages from the website for evidentiary purposes. A redacted copy of these web pages as I viewed and printed them are attached hereto as **EXHIBIT C**, redacted to protect personal and financial information, including FTC credit card information, (assigned Bates numbers FTC-DCO 0711-0722 and Exhibit number 5 to Respondent James Feijo's January 13, 2009 deposition).
11. Prior to making this purchase, I created an undercover e-mail account to confirm and monitor the progress of my undercover purchase. During a periodic review of this e-mail account, I identified four e-mails which I printed for evidentiary purposes. These four e-mails are attached hereto as **EXHIBIT D**, redacted to protect personal and financial information, including FTC credit card information, (assigned Bates numbers FTC-DCO 0723-0729).
12. On or about January 24, 2008, I received all four products listed above and placed them in a locked storage cabinet in my office. In addition, the following items were included in this shipment: a) a pamphlet titled, "BIOGUIDE3: The BioMolecular Nutrition Guide to Natural Health 3," b) a "BioMolecular Nutrition Product Catalog," c) a blank purchase order form, and d) an invoice form. According to the UPS Ground shipping label attached to the package containing the above mentioned products and materials, the

shipment originated from Daniel Chapter One, 822 Anthony Road, Portsmouth, Rhode Island 02871-5604 and was sent to an FTC undercover address in a state other than Rhode Island in the United States. These products and materials were subsequently shipped to me at the Commission's Northeast Regional office in New York, New York. These products and materials continue to be locked and maintained in the Commission's Northeast Regional office in New York, New York. True and correct copies of the BIOGUIDE3: The BioMolecular Nutrition Guide to Natural Health 3, BioMolecular Nutrition Product Catalog, and purchase order form, are attached hereto as **EXHIBIT E** (assigned Bates numbers FTC-DCO 2862-2937), **EXHIBIT F** (assigned Bates numbers FTC-DCO 2938-2941), and **EXHIBIT G** (assigned Bates number FTC-DCO 2942), respectively. A redacted copy of the invoice form is attached hereto as **EXHIBIT H** (assigned Bates number FTC-DCO 2943), redacted to protect personal and financial information, including FTC undercover mailbox information.

13. I inspected the contents of this shipment and did not observe a separate document indicating that the purchase was a "donation" or thanking the purchaser for making a "donation" to Daniel Chapter One.
14. According to Commission records, the amount charged to the undercover credit card used for this purchase was \$175.75. These records also indicate that this charge was made by "DANIEL CHAPTER ONE."

Camtasia Recording of Undercover Purchase

15. To preserve the undercover purchase mentioned above as evidence, I used a computer program called Camtasia Studio 3 which captures action from a Windows desktop and saves it to an "avi" video file. The "avi" video file is like a recorded movie of what was

happening on my desktop as I went through the various pages of the website and made my undercover purchase. The "avi" file can later be viewed through software, such as Windows Media Player.

16. Immediately before I conducted the undercover purchase on January 3, 2008, I activated the Camtasia recorder program to capture my experience on the Internet. I did this by double clicking on the "Camtasia Recorder" icon on the desktop of the same stand-alone computer I used for the undercover purchase. When the "Camtasia Recorder" window appeared, I clicked "Capture" and then "Record." When I completed the undercover purchase, I double clicked on the "Camtasia Recorder" icon on the bottom of the computer screen, clicked "Capture," and then clicked "Stop."
17. The "Recorder Preview" screen automatically appeared, and I reviewed the recording to ensure it captured the undercover purchase. When I was done, I clicked the "Save" button. When the "Save Recording" window appeared, I typed in the file name "Daniel Camtasia" and designated the recording to be saved on the desktop of the stand-alone computer. Then, I clicked "Save." When the "Post Save Option" window appeared, I clicked on the "Produce my video in a shareable format" option and clicked "OK." I then reviewed the completed Camtasia recording saved on the desktop to ensure it accurately reflected the undercover purchase I just made.
18. After I saved the recording on the desktop, I made a copy of the Camtasia recording on a CD-ROM disk. I reviewed this CD-ROM and ensured it accurately reflected the undercover purchase I made.
19. I then placed the original Camtasia CD-ROM in a locked storage cabinet in my office. The CD-ROM containing this web capture continues to be maintained in the

Commission's Northeast Regional office in New York, New York.

20. On or about January 8, 2009, I was instructed to block out specific and limited sensitive undercover information such as a credit card number and drop box address from the "Daniel Camtasia" disk recording listed above. From within the Camtasia program I executed the "Call Out" feature to obscure the sensitive information. I also utilized the "Produce Video As" feature, which makes a Camtasia "avi" file playable on computers that do not have Camtasia software installed. The file was then saved as "Daniel Camtasia Call Out Final," and both files were copied to CD-ROMs. A compact disc containing the "Daniel Camtasia Call Out Final" version of the undercover purchase is attached hereto as **EXHIBIT I** (assigned Bates number FTC-DCO 0009).

Daniel Chapter One Radio Show Purchases

21. On July 21, 2008, I purchased two "Daniel Chapter One Healthwatch" radio programs hosted by Jim and Tricia Feijo. I purchased these recordings from Accent Radio Network's website at the URL www.accentradionetwork.com for \$19.95. According to Commission records, the amount charged to the undercover credit card used for this purchase was \$19.95. These records also indicate that this charge was made by "ACCENTRADIO." On or about September 4, 2008, I received the recordings of the requested radio programs in digital CD-ROM format. I reviewed these recordings to ensure they were the recordings that I purchased. Then, I arranged for copies of these CD-ROMs to be made by FTC employee Ethel Fischman, and I again reviewed these two copies to ensure they were the two recordings I originally purchased from Accent Radio Network.
22. On or about September 9, 2008, I sent CD-ROM copies containing the two Daniel

Chapter One Healthwatch radio programs mentioned above to For the Record, Inc. for transcription. On or about September 18, 2008, I received two transcripts from For the Record for each of the two Daniel Chapter One Healthwatch radio programs I originally purchased on or about July 21, 2008. A true and correct copy of these transcripts are attached hereto as **EXHIBIT J** (July 8, 2008 transcript assigned Bates numbers FTC-DCO 0499-0607) and **EXHIBIT K** (July 14, 2008 transcript assigned Bates numbers FTC-DCO 0608-0710).

Obtaining Records From Washington Secretary of State

23. On or about October 6, 2008, I obtained a certified copy of the Certificate of Incorporation for Daniel Chapter One from the Washington Secretary of State's office. A true and correct copy of this document is attached hereto as **EXHIBIT L** (assigned Bates numbers FTC-DCO 0735-0741). Additionally, on or about February 9, 2009, I obtained a certified copy of the Certificate of Incorporation for Messiah Y'Shua Shalom from the Washington Secretary of State's office. A true and correct copy of this document is attached hereto as **EXHIBIT M** (assigned Bates numbers FTC-DCO 2944-2949).

Downloading The Most Simple Guide

24. On or about February 4, 2009, I downloaded a document called, "[T]he most simple guide to the most difficult diseases" from the following website link: <http://www.accentradionetwork.com/pdfs/DC1SimpleGuide2002.pdf>. This document was accessible from Accent Radio Network's website at the following URL: www.accentradionetwork.com. A true and correct copy of this document is attached hereto as **EXHIBIT N** (assigned Bates numbers FTC-DCO 2714-2825).

I declare under penalty of perjury that the foregoing is true and correct.

Executed on FEB. 23, 2009.

Cancerous Tur

shark cartilage Supplemental Facts

Bio*Shark: Tumors & Cysts

Pure skeletal tissue of sharks which provides a protein that inhibits angiogenesis - the formation of new blood vessels. This can stop tumor growth, and halt the progression of eye diseases such as diabetic retinopathy and macular degeneration. Should not be used by pregnant women, or immediately after heart surgery. Shark cartilage may also reduce the pain, inflammation, and joint stiffness of arthritis, alleviate inflammatory bowel disease, and reverse psoriasis. Shark cartilage is an excellent source of Calcium, Phosphorus, amino acids, and a family of carbohydrates called mucopolysaccharides (sulfated Oligosaccharides and Chondroitin Sulfates A and C).

In summary, Bio*Shark works to reduce inflammation and swelling, affects the formation of new blood vessels and provides essential nutrients for healing.

Warning: If you are pregnant, nursing a baby, recovering from recent surgery, or have a heart or circulatory condition, consult a health professional before using shark cartilage !

How to fight cancer is your choice!

"No type of cancer is to be taken lightly. If it is not treated properly and completely removed, it will continue to spread and eventually prove fatal. The first step is to cleanse the bloodstream by thoroughly relieving constipation and making all the organs of elimination active ... I have been asked many times what my cure for cancer is. Here it is in a nutshell: correct food, herbs, water, fresh air, massage, sunshine, and exercise, rest. If cancer is suspected, clean out the system, and get a new supply of pure blood. There are nonpoisonous herbs that will purify the blood and kill malignant growths internally or externally, leaving no bad after-effects. Cancer will not live in a system when the bloodstream is pure."

Jethro Kloss, "Back to

Eden"

Lump is gone without dangerous surgery!

Joe Rocha, a custodian at Roger Williams University in Rhode Island, was outside washing windows a few years ago when a stiff breeze blew in from Mount Hope Bay. Shortly after, the career Navy veteran complained of severe pain on the right side of his face. He suspected neuralgia and then thought the pain was from a tooth. He went to his dentist and the problem was not his tooth. It was serious. Joe Rocha then went to a family friend, a physician, who thought the problem was something worse than neuralgia and he was right. There was a swelling of the neck and a lump was detected. He underwent a series of tests and a tumor was found. The prognosis sent fear through the Rocha family. Because of the location of the tumor, Joe Rocha was told that surgery could result in serious consequences. Joe's wife, Maria, said she was terrified of the prospects of the operation. Her husband's doctor was preparing his team of surgeons and nurses to perform the tricky operation in a Fall River, MA, hospital. There was little comfort from the doctor who admitted to the Rochas that the tumor was in such a difficult place the operation itself could result in a heart attack, a stroke and possible paralysis on one side. Mrs. Rocha insisted her husband see their former neighbors and longtime friends, Jim and Tricia Feijo before undergoing surgery. It was the second time

the Rochas turned to the Feijos for lifesaving advice. "Jim and Tricia saved my life when doctors said I would die from candidiasis. Thanks to the Feijos I'm here and well. I thought they could help Joe." Joe began taking herbs and shark cartilage. Mrs. Rocha, a lay minister, put her faith in God. The Rochas and their two daughters prayed that the operation could be avoided. Mrs. Rocha thought she detected the tumor getting smaller over a six-week period. It was just a few days before Joe was about to undergo surgery that the couple met with the physician at a clinic in Fall River, MA. The doctor examined his patient and Maria couldn't restrain herself. "Don't you think the lump is shrinking?" she asked the doctor. The physician said the type of tumor Joe had only grows bigger and never shrinks. Joe's wife insisted that it was her opinion that the tumor was smaller. The doctor wasn't convinced and set into motion all of the details for the surgery to take place in four days. A couple of days later, the phone rang at the Rocha home in Portsmouth, RI. It was the doctor and he asked that the Rochas meet with him in his office the day before the scheduled surgery.

"We were amazed," Mrs. Rocha said. According to Maria, "He (the doctor) told us that my words kept ringing in his ears and that a closer examination revealed the tumor had shrunk, something he had not seen before."

The family went to a restaurant to celebrate and while they were driving home Mrs. Rocha said she broke down and cried, overcome by the joy that her husband of many years had been spared. Joe faithfully took his herbs and shark cartilage and the prayers of the Rocha family were answered.

The Rocha story hit home for Tricia Feijo. She watched as her own mother had a similar growth years ago.

Tricia's mother opted to go the route prescribed by her physician and underwent surgery, radiation then chemotherapy. Initially, immediately after the diagnosis, she started on some herbs that Tricia recommended. The tumor stopped growing but the doctor insisted that Tricia's mom was wasting time and talked her into undergoing surgery.

"I'll never forget it." Tricia said. "My mother told me that when the doctor came in to her room after the operation, he sort of smiled and said the tumor he removed was shriveled and he never saw anything like it." Tricia believes it was the herbs that had stopped the growth of the tumor. She still wished the doctor had not talked her mom into accepting surgery.

Tricia says she also wishes 7 Herb Formula was available at the time her mother was diagnosed with cancer.

After a lengthy, painful ordeal of radiation ~ to kill "stray cancer cells" ~

and chemotherapy after the cancer returned, Tricia's mom ended up on oxygen.

7 Herb Formula battles cancer.

Tracey was given no hope!

The doctors had pretty much given up on Tracey. She had leukemia and tumors on the brain, behind the heart and on her liver. The allopathic methods of dealing with the advanced cancer would be more chemotherapy.

She had gone the chemo and radiation route just months before and knew her weakened body could not endure another round of chemo. The doctor tried to pressure Tracey into taking chemo and she refused, angering the doctor. Her rejection of his chemo protocol led to a heated argument in his office and Tracey decided to take control of her own recovery. A woman that Tracey had befriended while in the hospital accepted the chemo treatment and the unfortunate result was that her friend died. This is Tracey's story in her own words as told in 1997: "I had contracted leukemia and had three inoperable tumors. When I decided not to do chemotherapy or radiation, my father sent me Bio*Mixx and 7 Herb Formula. Each day as I took it and got it into my system more and more, the better I felt. Then I added Garlic Pur, Siberian Ginseng and BioShark." "I am now in complete remission. The cancer cell count has dropped, the doctors tell me. I had a tumor just above the brain stem in my brain that has completely disappeared. The tumor on my liver is shrinking and the tumor behind my heart has shrunk over 50%. My weight, which dropped to 103 pounds, is on an uphill. There are other alternatives besides chemo and radiation!" Tracey's father recently called the radio show. He said Tracey had a problem. Tricia Feijo said her heart skipped a beat when she heard Tracey's father. That concern soon evaporated. "Yeah, Tracey can't keep her feet on the ground these days," he said, then revealed that the young woman's new doctor had declared her free of cancer. Below you will find the reports of Tracey's progress and what she did as an alternative to the chemotherapy.

The Medical Report Cancer Count:

| | |
|-----------|------------------------|
| July 8 | 700 |
| July 15 | 1100 + |
| Aug. 11 | 1040 |
| Aug. 20 | 950 |
| Sept. 2 | 790 |
| Sept. 20 | 642 ~ free of leukemia |
| June 1998 | Free of all cancer |

Tumors

| | | | |
|---------|-------------------|-----------------|----------|
| July | Significant tumor | Size of quarter | 5x7 cm |
| Sept. | Smaller lump | Size of dime | 2x2 cm |
| Oct. | Gone | 50% smaller | smaller |
| June 98 | Gone | Gone | Gone |
| June 98 | On Brain | Behind Heart | On Liver |
| | Gone | Gone | Gone |

Weight and Energy

| | |
|-----------|---|

| Sept. 2 | 118 lbs, more energy, rode a bike |
| Sept. 20 | 121 lbs, rides bike, swims |
| Sept. 26 | Also taking GDU 4000 ~ "feels terrific" |
| June 1998 | 125 lbs and continues to be free of cancer |

7 Herb eliminates pre-cancerous growth

Kathy Carlton tells her story of how 7 Herb Formula helped her.

I'm 42 and I lived in Florida most of my life ... So, I've lived in the sun all my life. I had a pre-cancerous "wart" on the back of my leg and drinking 7 Herb Formula made it go away. I got these pre-cancerous things; the doctor checks me every several months. He says they are pre-cancerous. I had one on my hand once that was turning into a melanoma. The doctor burned it off. He usually burns them off. When they're small, he waits until they get bigger, then he burns them off. He gave me a cream when they were small but that irritated my skin. Anyway, I had one on the back of my leg that was getting big but the 7 Herb Formula made it go away. Maybe it took four or five weeks, but it just fell off: it got looser and looser and then it just fell off. I have the scar to prove it. I was taking the 7 Herb Formula and at first noticed no difference. But I took it about twice a day for five weeks. After five weeks I noticed better energy levels. I started taking it in August (1997) ~ so in the past four months I've gone through four bottles ~ because back in June I started getting stomach pains. In the morning I was waking up with bad pains. In June I went to the doctor because I was afraid I was having a heart attack or something. I was given an appointment for September to be tested. The doctor thought it was my

esophagus ~ a lot of acid and heartburn. So I went to the GI specialist in September and had an upper GI, but by then the pain had gone away. The 7 Herb Formula had cured it! It got rid of the acid problem but I keep taking it (7 Herb Formula). I would take a shot glass full in the mornings ~ usually straight ~ and then drink a lot of water afterward. Then I would take a shot before bed. Now I only take it once a day or, some days, not at all. If I feel I'm getting a cold or something, I take extra. I haven't gotten sick once since I've taken it ~ not the flu or anything. And usually I would have (become sick) by now. And I used to feel tired around 2:00 p.m. but not anymore. The 7 Herb really gives me energy and it keeps me from getting hungry. I do use Lean Body sometimes instead of skipping meals but I do not do Lean Body all the time. The 7 Herb helps me maintain my weight. I don't lose but I don't gain. At first I lost 10 pounds. Maybe because I have more energy, I do more. I used to get low blood sugar a lot and now I'm okay. And I don't have high blood pressure anymore (I also take dandelion root for a diuretic). I think 7 Herb Formula balances out the immune system. My sister has lupus ~ I wish she would try it out ~ I want to send her a bottle to Virginia. Mentally, I even feel better. I recently ran out before leaving for Las Vegas. We were there for seven days and I felt so tired without the 7 Herb. It makes a big difference. And the most amazing thing was when I had the upper GI in September, and the x-ray showed nothing there. Before, I had bad pain constantly ~ by then, nothing. It's so amazing. It would ease the pain ~ right away ~ in a few minutes. Before that, I tried Tagamet and it would do nothing. It actually made my stomach hurt worse. Really, it's amazing!

Pre Post™

Daniel Chapter One has been using its PrePost formula, a BioMolecular athletic food source for almost 15 years. PrePost is the world's first Soy based multi-nutritional high calorie sports supplement. Athletes and cancer patients all over the world have used PrePost for over a decade. By increasing an individual's caloric intake and adding Soy to their diet Daniel Chapter One has been able to see astounding results. Years of study and research helped Jim Feijo discover the benefits of using Soy as a protein base for overall better health. Recent studies have shown the importance of Soy protein in everyone's diet. Since Jim developed PrePost, many other Daniel Chapter One products have been developed with a Soy protein base. These products are now starting to get the recognition they have deserved. Attached below is an article from Vitamin Retailer

Magazine¹. This article explains the benefits of the Soy isoflavones, genistein and daidzein, found in Daniel Chapter One's BioMolecular formulas. "Soy isoflavones (genistein and daidzein) confer protection against the so-called hormone-dependent cancers, such as breast cancer, and prostate cancer. For instance, when breast cancer cells are grown in the laboratory, genistein arrests their growth."² Isoflavones are hypothesized to protect against cancer through at least four mechanisms. First, the weak estrogen activity of isoflavones reduces the risk of hormonedependent cancers. Second, the antioxidant effects of isoflavones protect against cancer causing free radicals. Third, isoflavones beneficially affect enzymes. Finally, isoflavones inhibit angiogenesis, a process which would otherwise nourish growing cancer cells. A growing problem faced by cancer therapy is the occurrence of very hardy tumors. A so-called "multidrug resistance gene" acts as a pump within some cancer cells, actually expelling anti-cancer drugs before they can eradicate the cancer. In effect, the isoflavones, in some difficult to treat cancer cases, may be one of the few treatments that the tumor is not able to resist."³

Ancient cancer remedy is improved upon

Herbal formula taken to maximum potency by Daniel Chapter One

Jim and Tricia Feijo are the founders of Daniel Chapter One and co-hosts of a nationally syndicated talk show. Jim is the founder of BioMolecular nutrition. He holds bachelor and master degrees from Springfield College in Massachusetts. He has trained athletes ranging from Pop Warner Football to professional. Tricia is a classical homeopath who graduated from the New England School of Homeopathy. She is also a trained writer whose column appeared in publications in New England. She has studied nutrition and whole food science for nearly two decades. Jim Feijo is the ever-active researcher who looks to God-given nutrients to deal with health issues. Over the years, he has developed a number of high quality products. His unique ability to develop all-natural nutritional products that could build body mass in athletes caught the attention of Chinese doctors and

scientists. Several years ago, He was invited to lead research at the Beijing Research Institute of Sports Science working with world-class Chinese athletes. He directed the athletes on the use of Daniel Chapter One products and monitored them through his unique computer program. The results were so impressive it caught the attention of Russian scientists and he was invited to Moscow to conduct similar studies. Besides helping world-class athletes, his computer program and products were found to be effective in helping people with chronic illness. In addition to his sports nutrition line, Jim has developed a line of health supplements and natural remedies. One of the products Jim Feijo is especially proud of is his 7 Herb Formula. The reason he is so delighted with 7 Herb is the effects he has seen on those who have used the product and the results that have been documented. The testimonials keep on coming in to Daniel Chapter One. Jim improved upon the ancient Ojibway Indian Tribe remedy known as Essiac and used by the late Dr. Charles Brusch ~ personal physician to President John F. Kennedy ~ to enhance the healing properties. Dr. Brusch said of the Essiac herbal formula: "It will greatly improve any condition afflicting the body!" As a result of his research, Jim found that by adding Siberian Ginseng and Cat's Claw to the Essiac formula, he could attain remarkable healing results. The two herbs were added to Burdock Root, Turkey Rhubarb, Slippery Elm, Sheep Sorrel and Watercress. It was determined that in order to achieve maximum effectiveness of this formula, the individual herbs must be cooked to a precise temperature for that specific herb and thus ensure 100% maximum phytochemical potencies. In similar products all of the herbs are cooked together, diminishing the potency and effectiveness of the herbs. So 7 Herb was formulated to the specific requirements of Daniel Chapter One. The rigid, precise individual preparation of the ingredients was a vast improvement over the original formula. It has been called "revolutionary." "We feel blessed that God has revealed this formula to us and that we have been able to provide those in need of help an alternative to chemotherapy and radiation," Jim Feijo said. Daniel Chapter One HealthWatch, which airs coast-to-coast five days a week, continues to hear the testimony of people who are using 7 Herb Formula. Among those who spoke of dramatic results using 7 Herb Formula ~ during the live talk show ~ are Joe and Maria Rocha and Jim Givens. Their stories are contained in this newsletter. Jim Feijo concluded: "There was a time in the not-so-distant past that we were voices in the wilderness, but today the American public is crying out for alternatives to harmful drugs. Our message has a vast audience today."

Victory over Gulf War Syndrome

The following is a letter Wayne L. Harms sent to the Gulf War Veterans Association, reprinted with his permission. Wayne went to the Persian Gulf in 1994 to lend his services as a minister for our troops overseas. He tells us how he victoriously overcame his personal war on cancer and Gulf War Syndrome with the help of Daniel Chapter One.

In January 1998, after years of declining health, my wife and I both tested positive for Mycoplasma Fermentans Incognitus (MFI), better known as Gulf War illness. In October 1998, we both tested negative. In June 1998, a skin cancer clinic identified seven spots of Squamous Cell Carcinoma Cancer on my arms and legs. The largest spot was about the size of a quarter and the smallest was about the size of a pencil eraser. In October 1998, there is no trace of the cancer with the exception of a very small spot of light colored scar tissue where the largest spot had been. The standard treatment for MFI is 2 or more years of antibiotics in cycles of 6 weeks with a 6-week rest period in between each cycle of medication. We veered from the standard treatment for reasons I will explain below. Immediately prior to deployment to the Gulf and while in the Gulf, I was given shots which were never entered into my shot records. They were entered into medical records, but those pages conveniently disappeared when I returned to the states. Without knowing it, I passed the MFI on to my wife. The following are problems (see My Symptoms below) which I did not have before Desert Storm but developed after returning home. We were unable to find a doctor to treat us or even talk about GWI until April 1998. At that time we both began a six-week cycle of Doxycycline. The symptoms became worse for about two weeks, then seemed to clear up very well. About 3 weeks after the end of the first cycle, the symptoms returned but not as severe as they had been before treatment began. It was at this time the cancer was discovered. I had been directly exposed to insecticides in the Gulf and it lay wet on my bare skin for up to an hour before I could get to a place to wash it off. The doctor believes this may have been the cause of the cancer and that it lay dormant until I began the antibiotic treatment. She said that one of the side effects of antibiotics is a suppression of the natural immune system, which would allow the cancer to grow more rapidly. I decided to stop the antibiotic treatment and try a natural herbal and vitamin remedy I had been told about. Within about 4 weeks, all my symptoms had cleared up and have never returned. I continued on the natural remedy until today, October 19, 1998, when I was notified my tests showed I was completely cured of MFI. My wife decided to continue on the antibiotic six-week cycles, but on the six weeks in between, she also used the natural remedies. None of her symptoms

came back after beginning the natural remedy. She also was notified today that she is completely cured of MFI. The natural remedy was obtained through an organization called Daniel Chapter One. They are on the Internet at www.danielchapterone.com. They also can be heard on the radio on Accent Radio Network. I don't know how this stuff works, but it worked wonders for me and my wife. The insurance agent just laughed when I suggested a partial reimbursement of some of the expenses so, in addition to my full-time job I took 4 part-time jobs to pay for it. It paid off for us and I hope the information may help a few of you. I know there are many forms of GWI caused by things other than MFI and I don't know which of the products will help the other forms. The main thing is NEVER GIVE UP. KEEP FIGHTING. This is easy to say now, but I was at a point where death looked like the only way out. Support and encouragement from friends helped carry me through and it can do the same for you. 6

My symptoms were: 1.Very bad night vision 2.Strong sensitivity to sunlight and bright lights 3. Pain in back of eyes 4.Eyes blur, then clear up on a frequent basis while driving, cars and highway would become like a smear of finger paint blending in together, then clear up 5.Frequent severe headaches and chest pain (hospitalized for heart attack but the doctors could not find anything wrong) 6.Constant muscle pain in left arm and leg 7 Severe loss of strength in left arm and leg 7.Frequent uncontrollable shaking of both arms and hands
My wife's symptoms were: 1.Frequent coughing, Difficulty inbreathing, Short-term memory loss, Pain in back of eyes, Dizzy spells, Balance problems, Periodic nausea, Aching joints and muscles, Loss of concentration, Fatigue, Nervousness/Anxiety, & Depression Of special interest is that our complete healing with natural products took place in less than 1/4 of the time as the average cure with antibiotics and without the side effects.

Doctors gave upon Michigan man

When Jim Feijo greeted Richard Nelson, a talk show caller from East Grand Rapids, MI, with "How are you doing Richard," he received this short reply: "Lots better now." There was more. The caller went on to explain his situation. He is living proof that doctors may be wrong in surrendering to defeat in life and death situations. Richard went into the hospital for treatment of a hemia and doctors broke the shocking news to him ~ melanoma. The outcome prediction was grim. It was in August of 1997 when Richard's cancer was discovered and he was soon undergoing chemotherapy. Even with treatment, he was told he would only have nine months to live. An angel he says, in the form of his brother-in-law, told him he had heard Daniel Chapter One HealthWatch and listened to Jim and Tricia Feijo talk about the success of 7 Herb Formula in helping people with cancer. "My brother-in-law asked me if he bought me the 7 Herb, would I take it and I assured him I would," Richard said on the coast-to-coast broadcast that was originating from Las Vegas, NV. Richard reveals: "I had lost my faith. After my fourth treatment with chemo, the cancer

masses stayed constant. I started taking the 7 Herb and that tumor was shrinking. At the last treatment, I was told the tumors had liquid centers and were on the verge of drying up. Then I had a CAT scan and it was found that there has been massive tumor shrinkage.* Jim Feijo called the Richard Nelson story a great example of how people can come to the rescue of others.

Pre-Cancerous Growths & Acid and Heartburn

"And the most amazing thing was when I had my upper G.I. in September, and the X-ray showed nothing there. Before, I had bad pain constantly...by then, nothing." ~Kathy Colton After using 7 HERB and other DC1 products for precancerous growths and for acid & heartburn.

Blo Shark™

In 1983, two researchers at the Massachusetts Institute of Technology published a study showing that shark cartilage contains a substance that significantly inhibits the development of blood vessels that nourish solid tumors, thereby limiting tumor growth. This effect is called anti-angiogenesis. Scientists recognize the benefits of starving a tumor to limit its growth. They have been looking for a drug to patent that can do the same thing as shark cartilage. They say the answer to curing cancer lies in preventing angiogenesis ~ the formation of blood vessels which feed the tumor. These scientists are trying to replicate what God has already presented to us so that they can claim rights to it, patent it and make a lot of money. But man can never lab synthesize a product and make it exactly the same ~ and all drugs have harmful side effects. Researchers have also demonstrated that shark cartilage can reduce the inflammation and pain associated with arthritis, alleviate psoriasis and have a positive effect on other degenerative diseases.

Breast Mass

Deloris Winter

Age 52, Lakeland, FL

"I went in for a breast examination by mammography. On 10/8/01 they said they found a mass that they believed was not cancerous, but benign.

I began taking GDU six times a day: 2 before breakfast, 2 before lunch, and 2 before dinner, and in a month I went to my doctors for the breast examination, and he found nothing on either breast.

Around that time I got another bottle of GDU and the Superior Herbal Fat Burners, which I took twice a day. In April I had my 6-month examination and the letter read: 'We are pleased to inform you that the results of your recent breast evaluation are normal.'

Praise GOD!"

7 Herb Formula: Detoxify, Acid Reflux & Cancer Help

7 Herb Formula with Cat's Claw & Siberian Ginseng: Herbs to purify the blood and promote cell repair. The ingredients in this tea concentrate work to clear skin, cleanse the liver, decrease cell mutation, and fight pathogenic bacteria and tumor formation. Also helps regulate blood sugar, heal ulcers, and stop indigestion and heartburn.

The herbs in 7 Herb Formula allow the body to heal by nourishing and cleansing the blood organs. In addition, the formula detoxifies blood and lymph, a key to vibrant health and fighting illness. Below is a list of these 7 herbal ingredients, which have been scrupulously and separately prepared, then combined to form a tea concentrate, and poured, boiling, into quart-size amber glass bottles to ensure freshness and potency. Many pounds of herbs go into the making of one 32 ounce bottle of 7 Herb Formula, making it 3 times the potency of any other product of its kind!

1. Burdock Root, used in Ayurvedic and Chinese medicine to treat cancer. It is a potent blood purifier, and is known to decrease cell mutation and inhibit tumors. It restores liver and gallbladder function. Burdock contains the nutrients zinc, iron, manganese, and vitamins B1, B6, B12. It also provides vitamin E and selenium, which combat free radicals. Burdock Root contains natural inulin, which is beneficial

in diabetes as the body can use this to produce natural insulin.

2. Sheep Sorrel, also rich in vitamins, minerals and trace elements, high in life-giving properties. It nourishes the glandular system, and is known to relieve internal ulcers. Sheep Sorrel is a traditional folk remedy for cancer.

3. Siberian Ginseng, an herbal "tonic" which has restorative power due to its glycoside content. Glycosides are natural phytochemicals that initiate the body's stress response: so while this ingredient tones the body it also supports the immune system, while working in synergy with the other 6 ingredients to allow for an inflamed stomach to be healed. Siberian Ginseng also produces saponins, steroids found in plants, which have tumor inhibiting effects.

4. Cat's Claw, an herb from Peruvian rain forest. The inner bark, which is what is in 7 Herb Formula, is one of the most powerful cleansers of the intestinal tract. It also is an anti-oxidant and anti-inflammatory in action. Cat's Claw stimulates the immune system, enhancing white blood cells, which fight infection. Cat's Claw is used by native Peruvians to treat many diseases, including cancer.

5. Slippery Elm, according to herbalist Jethro Kloss, should be used in all stomach troubles because of its ability to heal, strengthen, and nourish the stomach. He states that it can stay in an ulcerated or even cancerous stomach when nothing else will. It nourishes the organs and tissues due to its nutrient content: bioflavonoids, calcium, phosphorous, polysaccharides, and vitamins A, B, C, and K. Slippery Elm also helps to neutralize acids from indigestion.

6. Watercress, the same plant used for salad greens and gamishes, is an excellent cleanser in the body, and it can heal mucus membranes including the stomach lining. Protects kidneys and joints from oxalic acid buildup.

7. Turkey Rhubarb Root purges the body of wastes and toxic matter. Also called Indian Rhubarb, this herb counteracts acids due to indigestion and acts as a gentle laxative. The malic acid inherent in this herb carries oxygen to all parts of the body. A substance called rhein in the herb fights both bacteria and fungus. Studies done in the 1980s show Turkey Rhubarb has anti-tumor properties. It also reduces inflammation.

Supplemental Facts

GDU - Arthritis Pain Anti Inflammatory

Contains natural proteolytic enzymes (from pineapple source bromelain) to help digest protein - even that of unwanted tumors and cysts. This formula also helps to relieve pain and heal inflammation.

GDU caps also contain 300 mg Turmeric that protects the liver against toxins, 100 mg Quercetin, a natural bioflavonoid, which enhances the absorption of bromelain (the key ingredient) and relieves pain, bumps, and bruises, and 100 mg Feverfew, a natural pain killer. GDU caps with bromelain is a well-known herbal for digestive problems, helping users to digest proteins and aiding in pancreatic insufficiency.

GDU is also used for acute postoperative swelling, to heal surgical inflammation and bruises, to heal injuries, as a smooth muscle relaxant, for respiratory congestion and infections, sinusitis, pneumonia, bronchitis, angina, as a natural antibiotic, for painful menstruation, arthritis, thrombophlebitis, varicose veins, and as an adjunct to cancer therapy.

GDU caps possess a wide range of actions including anti-inflammatory and antispasmodic activity that make it suited to a wide range of uses. Safety: Even at very high dosages no toxic reactions have been found. Care should be taken when using GDU if on any medication that thins the blood. The nutrients in GDU: Bromelain, Turmeric, Quercetin, Feverfew, Boron

TURMERIC (CURCUMIN)

Turmeric: a spice and a potent anti-inflammatory. Herbalists have recommended turmeric for the pain and swelling of arthritis for many years. It also has a beneficial effect on the liver and gallbladder.

1. *Curcuma longa*, turmeric, with its active ingredient curcumin, is a potent anti-inflammatory. Jean Carper reports in *Food - Your Miracle Medicine* (HarperCollins, 1993)

2. Curcumin, "is an anti-inflammatory agent on a par with cortisone"

3. Has reduced inflammation in animals.

4. Reduced symptoms of rheumatoid arthritis in humans.

5. A rigorous double-blind, placebo-controlled study was conducted at the Seth 1G.S. Medical College in Bombay, India, to determine the herb's anti-inflammatory effect compared to that of powerful drugs, such as phenylbutazone, for post-surgical patients. The researchers concluded that curcumin was shown to possess significant anti-inflammatory activity following surgery.

Bromelain: Natural proteolytic enzymes, which can break down proteins that are involved in the inflammatory process. They also enhance the breakdown and removal of damaged tissue and aid the lymph to cleanse and drain the inflamed area of fluid and debris. Studies have shown that the potency of the enzymes used is critical in relation to their effectiveness.

Quercetin: A bioflavonoid, a compound widely distributed in plants. Bioflavonoids like quercetin are used in the treatment of athletic injuries because they relieve pain, bumps, and bruises. They also reduce pain located in the legs or across the back. Bromelain and quercetin are synergists, and should be taken together to enhance absorption.

Feverfew: Legend has it that this herb saved the life of someone who once fell off the Parthenon, the famous temple in ancient Greece! In 1985, the British medical journal *Lancet* reported that feverfew inhibited the release of two different inflammatory substances- one from platelets, the other from white blood cells – thought to contribute to the onset of migraine attacks and that may play a role in rheumatoid arthritis.

Boron: Essential nutrient included in GDU because of its many functions. Regulating appropriate body levels of hormones needed for bone health and maintaining minerals needed for healthy bones are two major functions of boron in GDU.

*Cancer Newsletter,
Millenium Edition, 2002*

"No type of cancer is to be taken lightly. If it is not treated properly and completely removed, it will continue to spread and eventually prove fatal. The first step is to cleanse the bloodstream by thoroughly relieving constipation and making all the organs of elimination active ... I have been asked many times what my cure for cancer is. Here it is in a nutshell: correct food, herbs, water, fresh air, massage, sunshine, and exercise, rest. If cancer is suspected, clean out the system, and get a new supply of pure blood. There are nonpoisonous herbs that will purify the blood and kill malignant growths internally or externally, leaving no bad after-effects. Cancer will not live in a system when the bloodstream is pure."

Jethro Kloss, "Back to Eden"

daniel chapter one

Lump is gone without dangerous surgery

Joe Rocha, a custodian at Roger Williams University in Rhode Island, was outside washing windows a few years ago when a stiff breeze blew in from Mount Hope Bay. Shortly after, the career Navy veteran complained of severe pain on the right side of his face.

He suspected neuralgia and then thought the pain was from a tooth.

He went to his dentist and the problem was not his tooth. It was serious.

Joe Rocha then went to a family friend, a physician, who thought the problem was something worse than neuralgia and he was right. There was a swelling of the neck and a lump was detected.

He underwent a series of tests and a tumor was found.

The prognosis sent fear through the Rocha family. Because of the location of the tumor, Joe Rocha was told that surgery could result in serious consequences.

Joe's wife, Maria, said she was terrified of the prospects of the operation. Her husband's doctor was preparing his team of surgeons and nurses to perform the tricky operation in a Fall River, MA, hospital.

There was little comfort from the doctor who admitted to the Rochas that the tumor was in such a difficult place the operation itself could result in a heart attack, a stroke and possible paralysis on one side.

Mrs. Rocha insisted her husband see their former neighbors and longtime friends, Jim and Tricia Feijo before undergoing surgery.

It was the second time the Rochas turned to the Feijos for lifesaving advice. "Jim and Tricia saved my life when doctors said I would die from candidiasis. Thanks to the Feijos I'm here and well. I thought they could help Joe."

Joe began taking herbs and shark cartilage.

Mrs. Rocha, a lay minister, put her faith in God. The Rochas and their two daughters prayed that the operation could be avoided.

Mrs. Rocha thought she detected the tumor getting smaller over a six-week period.

It was just a few days before Joe was about to undergo surgery that the couple met with the physician at a clinic in Fall River, MA.

The doctor examined his patient and Maria couldn't restrain herself. "Don't you think the lump is shrinking?" she asked the doctor.

The physician said the type of tumor Joe had only grows bigger and never shrinks. Joe's wife insisted that it was her opinion that the tumor was smaller.

The doctor wasn't convinced and set into motion all of the details for the surgery to take place in four days.

A couple of days later, the phone rang at the Rocha home in Portsmouth, RI. It was the doctor and he asked that the Rochas meet with him in his office the day before the scheduled surgery.

"We were amazed," Mrs. Rocha said.

According to Maria, "He (the doctor) told us that my words kept ringing in his ears and that a closer examination revealed the tumor had shrunk, something he had not seen before."

The family went to a restaurant to celebrate and while they were driving home Mrs. Rocha said she broke down and cried, overcome by the joy that her husband of many years had been spared.

Joe faithfully took his herbs and shark cartilage and the prayers of the Rocha family were answered.

The Rocha story hit home for Tricia Feijo.

She watched as her own mother had a similar growth years ago.

Tricia's mother opted to go the route prescribed by her physician and underwent surgery, radiation then chemotherapy.

Initially, immediately after the diagnosis, she started on some herbs that Tricia recommended. The tumor stopped growing but the doctor insisted that Tricia's mom was wasting time and talked her into undergoing surgery.

"I'll never forget it," Tricia said. "My mother told me that when the doctor came in to her room after the operation, he sort of smiled and said the tumor he removed was shriveled and he never saw anything like it."

Tricia believes it was the herbs that had stopped the growth of the tumor.

She still wished the doctor had not talked her mom into accepting surgery.

Tricia says she also wishes 7 Herb Formula was available at the time her mother was diagnosed with cancer.

After a lengthy, painful ordeal of radiation ~ to kill "stray cancer cells" ~ and chemotherapy after the cancer returned, Tricia's mom ended up on oxygen.

7 Herb Formula battles cancer

Tracey was given no hope!

The doctors had pretty much given up on Tracey. She had leukemia and tumors on the brain, behind the heart and on her liver.

The allopathic methods of dealing with the advanced cancer would be more chemotherapy. She had gone the chemo and radiation route just months before and knew her weakened body could not endure another round of chemo.

The doctor tried to pressure Tracey into taking chemo and she refused, angering the doctor. Her rejection of his chemo protocol led to a heated argument in his office and Tracey decided to take control of her own recovery.

A woman that Tracey had befriended while in the hospital accepted the chemo treatment and the unfortunate result was that her friend died.

This is Tracey's story in her own words as told in 1997:

"I had contracted leukemia and had three inoperable tumors. When I decided not to do chemotherapy or radiation, my father sent me Bio*Mixx and 7 Herb Formula. Each day as I took it and got it into my system more and more, the better I felt. Then I added Garlic Pur, Siberian Ginseng and BioShark."

"I am now in complete remission. The cancer cell count has dropped, the doctors tell me. I had a tumor just above the brain stem in my brain that has completely disappeared. The tumor on my liver is shrinking and the tumor behind my heart has shrunk over 50%. My weight, which dropped to 103 pounds, is on an uphill. There are other alternatives besides chemo and radiation!"

Tracey's father recently called the radio show. He said Tracey had a problem. Tricia Feijo said her heart skipped a beat when she heard Tracey's father. That concern soon evaporated.

"Yeah, Tracey can't keep her feet on the ground these days," he said, then revealed that the young woman's new doctor had declared her free of cancer.

Below you will find the reports of Tracey's progress and what she did as an alternative to the chemotherapy.

The Medical Report

Cancer Count:

| | |
|-----------|------------------------|
| July 8 | 700 |
| July 15 | 1100 + |
| Aug. 11 | 1040 |
| Aug. 20 | 950 |
| Sept. 2 | 790 |
| Sept. 20 | 642 ~ free of leukemia |
| June 1998 | Free of all cancer |

Tumors

| | | | |
|---------|-------------------|-----------------|---------|
| July | Significant tumor | Size of quarter | 5x7 cm |
| Sept. | Smaller hump | Size of dime | 2x2 cm |
| Oct. | Gone | 50% smaller | smaller |
| June 98 | Gone | Gone | Gone |

June 98

| | | |
|----------|--------------|----------|
| On Brain | Behind Heart | On Liver |
| Gone | Gone | Gone |

Weight and Energy

| | |
|-----------|---|
| July 8 | 103 lbs, no energy, feels bad, starts on natural products |
| Sept. 2 | 118 lbs, more energy, rode a bike |
| Sept. 20 | 121 lbs, rides bike, swims |
| Sept. 26 | Also taking GDU 4000 ~ "feels terrific" |
| June 1998 | 125 lbs and continues to be free of cancer |

7 Herb eliminates pre-cancerous growth

Kathy Carlton tells her story of how 7 Herb Formula helped her.

I'm 42 and I lived in Florida most of my life ... So, I've lived in the sun all my life. I had a pre-cancerous "wart" on the back of my leg and drinking 7 Herb Formula made it go away.

I get these pre-cancerous things; the doctor checks me every several months. He says they are pre-cancerous.

I had one on my hand once that was turning into a melanoma. The doctor burned it off. He usually burns them off. When they're small, he waits until they get bigger, then he burns them off.

He gave me a cream when they were small but that irritated my skin.

Anyway, I had one on the back of my leg that was getting big but the 7 Herb Formula made it go away. Maybe it took four or five weeks, but it just fell off: it got looser and looser and then it just fell off. I have the scar to prove it.

I was taking the 7 Herb Formula and at first noticed no difference. But I took it about twice a day for five weeks. After five weeks I noticed better energy levels. I started taking it in August (1997) ~ so in the past four months I've gone through four bottles ~ because back in June I started getting stomach pains. In the morning I was waking up with bad pains. In June I went to the doctor because I was afraid I was having a heart attack or something. I was given an appointment for September to be tested. The doctor thought it was my esophagus ~ a lot of acid and heartburn. So I went to the GI specialist in September and had an upper GI, but by then the pain had gone away. The 7 Herb Formula had cured it! It got rid of the acid problem but I keep taking it (7 Herb Formula).

I would take a shot glass full in the mornings ~ usually straight ~ and then drink a lot of water afterward. Then I would take a shot before bed. Now I only take it once a day or, some days, not at all. If I feel I'm getting a cold or something. I take extra. I haven't gotten sick once since I've taken it ~ not the flu or anything. And usually I would have (become sick) by now.

And I used to feel tired around 2:00 p.m. but not anymore. The 7 Herb really gives me energy and it keeps me from getting hungry. I do use Lean Body sometimes instead of skipping meals but I do not do Lean Body all the time. The 7 Herb helps me maintain my weight. I don't lose but I don't gain. At first I lost 10 pounds. Maybe because I have more energy, I do more. I used to get low blood sugar a lot and now I'm okay. And I don't have high blood pressure anymore (I also take dandelion root for a diuretic).

I think 7 Herb Formula balances out the immune system. My sister has lupus ~ I wish she would try it out ~ I want to send her a bottle to Virginia.

Mentally, I even feel better. I recently ran out before leaving for Las Vegas. We were there for seven days and I felt so tired without the 7 Herb. It makes a big difference.

And the most amazing thing was when I had the upper GI in September, and the x-ray showed nothing there. Before, I had bad pain constantly ~ by then, nothing.

It's so amazing. It would ease the pain ~ right away ~ in a few minutes. Before that, I tried Tagamet and it would do nothing. It actually made my stomach hurt worse. Really, it's amazing!

Pre Post-

Daniel Chapter One has been using its PrePost formula, a BioMolecular athletic food source for almost 15 years. PrePost is the world's first Soy based multi-nutritional high calorie sports supplement. Athletes and cancer patients all over the world have used PrePost for over a decade. By increasing an individual's caloric intake and adding Soy to their diet Daniel Chapter One has been able to see astounding results. Years of study and research helped Jim Feijo discover the benefits of using Soy as a protein base for overall better health. Recent studies have shown the importance of Soy protein in everyone's diet. Since Jim developed PrePost, many other Daniel Chapter One products have been developed with a Soy protein base. These products are now starting to get the recognition they have deserved. Attached below is an article from Vitamin Retailer Magazine¹. This article explains the benefits of the Soy isoflavones, genistein and daidzein, found in Daniel Chapter One's BioMolecular formulas.

"Soy isoflavones (genistein and daidzein) confer protection against the so-called hormone-dependent cancers, such as breast cancer, and prostate cancer. For instance, when breast cancer cells are grown in the laboratory, genistein arrests their growth.²

Isoflavones are hypothesized to protect against cancer through at least four mechanisms. First, the weak estrogen activity of isoflavones reduces the risk of hormone-dependent cancers. Second, the antioxidant effects of isoflavones protect against cancer causing free radicals. Third, isoflavones beneficially affect enzymes. Finally, isoflavones inhibit angiogenesis, a process which would otherwise nourish growing cancer cells.

A growing problem faced by cancer therapy is the occurrence of very hardy tumors. A so-called "multidrug resistance gene" acts as a pump within some cancer cells, actually expelling anti-cancer drugs before they can eradicate the cancer. In effect, the isoflavones, in some difficult to treat cancer cases, may be one of the few treatments that the tumor is not able to resist.³

Ancient cancer remedy is improved upon

Herbal formula taken to maximum potency by Daniel Chapter One

Jim and Tricia Feijo are the founders of Daniel Chapter One and co-hosts of a nationally syndicated talk show.

Jim is the founder of BioMolecular nutrition. He holds bachelor and master degrees from Springfield College in Massachusetts. He has trained athletes ranging from Pop Warner Football to professional.

Tricia is a classical homeopath who graduated from the New England School of Homeopathy. She is also a trained writer whose column appeared in publications in New England. She has studied nutrition and whole food science for nearly two decades.

Jim Feijo is the ever-active researcher who looks to God-given nutrients to deal with health issues. Over the years, he has developed a number of high quality products.

His unique ability to develop all-natural nutritional products that could build body mass in athletes caught the attention of Chinese doctors and scientists.

Several years ago, He was invited to lead research at the Beijing Research Institute of Sports Science working with world-class Chinese athletes. He directed the athletes on the use of Daniel Chapter One products and monitored them through his unique computer program.

The results were so impressive it caught the attention of Russian scientists and he was invited to Moscow to conduct similar studies.

Besides helping world-class athletes, his computer program and products were found to be effective in helping people with chronic illness.

In addition to his sports nutrition line, Jim has developed a line of health supplements and natural remedies. One of the products Jim Feijo is especially proud of is his 7 Herb Formula.

The reason he is so delighted with 7 Herb is the effects he has seen on those who have used the product and the results that have been documented. The testimonials keep on coming in to Daniel Chapter One.

Jim improved upon the ancient Ojibway Indian

Tribe remedy known as Essiac and used by the late Dr. Charles Brusch ~ personal physician to President John F. Kennedy ~ to enhance the healing properties. Dr. Brusch said of the Essiac herbal formula: "It will greatly improve any condition afflicting the body!"

As a result of his research, Jim found that by adding Siberian Ginseng and Cat's Claw to the Essiac formula, he could attain remarkable healing results.

The two herbs were added to Burdock Root, Turkey Rhubarb, Slippery Elm, Sheep Sorrel and Watercress.

It was determined that in order to achieve maximum effectiveness of this formula, the individual herbs must be cooked to a precise temperature for that specific herb and thus ensure 100% maximum phytochemical potencies.

In similar products all of the herbs are cooked together, diminishing the potency and effectiveness of the herbs.

So 7 Herb was formulated to the specific requirements of Daniel Chapter One. The rigid, precise individual preparation of the ingredients was a vast improvement over the original formula. It has been called "revolutionary."

"We feel blessed that God has revealed this formula to us and that we have been able to provide those in need of help an alternative to chemotherapy and radiation," Jim Feijo said.

Daniel Chapter One HealthWatch, which airs coast-to-coast five days a week, continues to hear the testimony of people who are using 7 Herb Formula.

Among those who spoke of dramatic results using 7 Herb Formula ~ during the live talk show ~ are Joe and Maria Rocha and Jim Givens. Their stories are contained in this newsletter.

Jim Feijo concluded: "There was a time in the not-so-distant past that we were voices in the wilderness, but today the American public is crying out for alternatives to harmful drugs. Our message has a vast audience today."

danielchapterone

Victory over Gulf War Syndrome

The following is a letter Wayne L. Harms sent to the Gulf War Veterans Association, reprinted with his permission.

Wayne went to the Persian Gulf in 1994 to lend his services as a minister for our troops overseas. He tells us how he victoriously overcame his personal war on cancer and Gulf War Syndrome with the help of Daniel Chapter One.

In January 1998, after years of declining health, my wife and I both tested positive for Mycoplasma Fermentans Incognitus (MFI), better known as Gulf War Illness. In October 1998, we both tested negative.

In June 1998, a skin cancer clinic identified seven spots of Squamous Cell Carcinoma Cancer on my arms and legs. The largest spot was about the size of a quarter and the smallest was about the size of a pencil eraser. In October 1998, there is no trace of the cancer with the exception of a very small spot of light colored scar tissue where the largest spot had been.

The standard treatment for MFI is 2 or more years of antibiotics in cycles of 6 weeks with a 6-week rest period in between each cycle of medication. We veered from the standard treatment for reasons I will explain below.

Immediately prior to deployment to the Gulf and while in the Gulf, I was given shots which were never entered into my shot records. They were entered into medical records, but those pages conveniently disappeared when I returned to the states. Without knowing it, I passed the MFI on to my wife. The following are problems (see My Symptoms below) which I did not have before Desert Storm but developed after returning home.

We were unable to find a doctor to treat us or even talk about GWI until April 1998. At that time we both began a six-week cycle of Doxycycline. The symptoms became worse for about two weeks, then seemed to clear up very well. About 3 weeks after the end of the first cycle, the symptoms returned but not as severe as they had been before treatment began.

It was at this time the cancer was discovered. I had been directly exposed to insecticides in the Gulf and it lay wet on my bare skin for up to an hour before I could get to a place to wash it off. The doctor believes this may have been the cause of the cancer and that it lay dormant until I began the antibiotic treatment. She said that one of the side effects of antibiotics is a suppression of the natural immune system, which would allow the cancer to grow more rapidly.

I decided to stop the antibiotic treatment and try a

natural herbal and vitamin remedy I had been told about. Within about 4 weeks, all my symptoms had cleared up and have never returned. I continued on the natural remedy until today, October 19, 1998, when I was notified my tests showed I was completely cured of MFI. My wife decided to continue on the antibiotic six-week cycles, but on the six weeks in between, she also used the natural remedies. None of her symptoms came back after beginning the natural remedy. She also was notified today that she is completely cured of MFI.

The natural remedy was obtained through an organization called Daniel Chapter One. They are on the Internet at www.danielchapterone.com. They also can be heard on the radio on Accent Radio Network.

I don't know how this stuff works, but it worked wonders for me and my wife. The insurance agent just laughed when I suggested a partial reimbursement of some of the expenses so, in addition to my full-time job I took 4 part-time jobs to pay for it. It paid off for us and I hope the information may help a few of you. I know there are many forms of GWI caused by things other than MFI and I don't know which of the products will help the other forms. The main thing is NEVER GIVE UP. KEEP FIGHTING. This is easy to say now, but I was at a point where death looked like the only way out. Support and encouragement from friends helped carry me through and it can do the same for you.

My symptoms were:

- I Very bad night vision
- I Strong sensitivity to sunlight and bright lights
- I Pain in back of eyes
- I Eyes blur, then clear up on a frequent basis while driving, cars and highway would become like a smear of finger paint blending in together, then clear up
- I Frequent severe headaches and chest pain (hospitalized for heart attack but the doctors could not find anything wrong)
- I Constant muscle pain in left arm and leg
- I Severe loss of strength in left arm and leg
- I Frequent uncontrollable shaking of both arms and hands

My wife's symptoms were:

- Frequent coughing, Difficulty inbreathing, Short-term memory loss, Pain in back of eyes, Dizzy spells, Balance problems, Periodic nausea, Aching joints and muscles, Loss of concentration, Fatigue, Nervousness/Anxiety, & Depression

Of special interest is that our complete healing with natural products took place in less than 1/4 of the time as the average cure with antibiotics and without the side effects.

danielchapterone

www.danielchapterone.com 1-800-504-5511

Doctors gave up on Michigan man

When Jim Feijo greeted Richard Nelson, a talk show caller from East Grand Rapids, MI, with "How are you doing Richard," he received this short reply: "Lots better now." There was more.

The caller went on to explain his situation. He is living proof that doctors may be wrong in surrendering to defeat in life and death situations.

Richard went into the hospital for treatment of a hernia and doctors broke the shocking news to him ~ melanoma. The outcome prediction was grim.

It was in August of 1997 when Richard's cancer was discovered and he was soon undergoing chemotherapy.

Even with treatment, he was told he would only have nine months to live.

An angel he says, in the form of his brother-in-law, told him he had heard Daniel Chapter One HealthWatch and listened to Jim and Tricia Feijo talk about the success of 7 Herb Formula in helping people with cancer.

"My brother-in-law asked me if he bought me the 7 Herb, would I take it and I assured him I would," Richard said on the coast-to-coast broadcast that was originating from Las Vegas, NV.

Richard reveals: "I had lost my faith. After my fourth treatment with chemo, the cancer masses stayed constant. I started taking the 7 Herb and that tumor was shrinking. At the last treatment, I was told the tumors had liquid centers and were on the verge of drying up. Then I had a CAT scan and it was found that there has been massive tumor shrinkage."

Jim Feijo called the Richard Nelson story a great example of how people can come to the rescue of others.

Pre-Cancerous Growths & Acid and Heartburn

"And the most amazing thing was when I had my upper G.I. in September, and the X-ray showed nothing there. Before, I had bad pain constantly... by then, nothing."

~Kathy Colton

After using 7 HERB and other DC1 products for pre-cancerous growths and for acid & heartburn.

Bio Shark-

In 1983, two researchers at the Massachusetts Institute of Technology published a study showing that shark cartilage contains a substance that significantly inhibits the development of blood vessels that nourish solid tumors, thereby limiting tumor growth. This effect is called anti-angiogenesis.

Scientists recognize the benefits of starving a tumor to limit its growth. They have been looking for a drug to patent that can do the same thing as shark cartilage. They say the answer to curing cancer lies in preventing angiogenesis ~ the formation of blood vessels which feed the tumor. These scientists are trying to replicate what God has already presented to us so that they can claim rights to it, patent it and make a lot of money. But man can never lab synthesize a product and make it exactly the same ~ and all drugs have harmful side effects.

Researchers have also demonstrated that shark cartilage can reduce the inflammation and pain associated with arthritis, alleviate psoriasis and have a positive effect on other degenerative diseases.

7 Herb Formula helps battle cancer

The amazing story of Jim Givens is documented. The outlook for Mr. Givens was bleak and he turned to Daniel Chapter One to help him through his battle with cancer. For the results, read the story below.

Jim Givens of Middletown, RI, has dedicated himself to saving others who get in harm's way. Among his patented inventions is the Givens Life Raft ~ uniquely designed to remain stable in the most severe conditions and credited with saving hundreds of lives.

Last September, and for the third time in recent years, a tumor was detected in Jim's prostate. The prognosis was bleak.

A survivor by nature, Jim was determined to beat the growth that was threatening his life.

The survival instinct of the Korean War veteran kicked in. After he overcame the second bout of prostate cancer, he admittedly stopped taking the Daniel Chapter One products, which had successfully helped to combat his previous tumor.

The Korean War vet quickly swung into action ~ meeting with his longtime friend Jim Feijo, founder of Daniel Chapter One, at the Rhode Island center.

Jim Givens was suffering from rectal bleeding and pain. He revealed to Jim Feijo that he was using chips of ice to ease the flow of rectal bleeding.

This is a portion of the report ~ dated October 17, 1997 ~ of the Department of Diagnostic Imaging at a hospital in Providence, RI: "The patient is status post prostatectomy with multiple surgical clips present in the pelvis. There has been interval development of a 2.5 cm AP x 3.5 cm transverse x 4.5 cm CC soft tissue mass in the rectovesical space on the left which causes extrinsic compression on the posterior wall of the bladder and may actually invade the bladder. There also may be involvement of the anterior wall of the rectum."

It goes on: "IMPRESSION: INTERVAL DEVELOPMENT OF THE 4.5 cm SOFT TISSUE DENSITY IN THE RECTOVESICAL SPACE ON THE LEFT SUSPICIOUS FOR LOCAL RECURRENCE OF PROSTATE CARCINOMA.

THERE MAY BE ASSOCIATED INVOLVEMENT OF THE POSTERIOR WALL OF THE BLADDER AND THE ANTERIOR WALL OF THE RECTUM."

The report was devastating. So Jim Givens asked his friend of many years if taking a whole bottle of 7 Herb Formula would hurt him and Jim Feijo replied that "NOT TAKING" 7 Herb would hurt him.

Jim Givens' physician is one of New England's leading oncologists but Jim ~ who when parachuting into combat over Korea had his chute fail to open and fell 500 feet before a comrade caught him and carried him safely to the ground ~ saw the need for alternative help if he was to win this battle for his life.

Jim Givens was determined to win this personal war as much for himself as for his three children, ages 14, 18 and 20 years, who need him.

A single father, Jim began taking the 7 Herb and shark cartilage. He continued on a hormone.

He sat himself down and drank an entire 32-ounce bottle of 7 Herb in less than an hour.

This was war and Jim is not one to surrender without a good fight.

The inventor said that as he drank the 7 Herb Formula, he experienced a strong burning sensation in the area of the tumor.

He went to bed that night. The burning persisted.

Eventually the burning sensation passed and Jim felt something had happened. He went to a physician at a hospital in Newport, RI, and the results are documented.

Within 60 days, Jim Givens' PSA level dropped from 256 to 5. X-rays were taken and he brought them to the oncologist in Providence. The report on December 17, 1997, based on diagnostic imaging at Newport Hospital, included the following impression:

"1. Status post prostatectomy with no evidence for metastatic disease.

2. Probable right renal cyst."

On December 22, 1997, the attending physician wrote the following subsequent to an examination.

"No evidence of ulcer or tumor."

Jim Givens took the reports, along with X-rays, to the renowned oncologist in Providence.

The doctor looked bewildered, Jim Givens said, and repeated the oncologist's words that still echo in the ears of the former soldier. The doctor told him, "Your tumor is gone."

Jim Givens said he feels like the proverbial cat with nine lives and he credits Daniel Chapter One and his old friend Jim Feijo with helping him beat his battles with prostate cancer.

He reports he is feeling great these days and is back on the job saving other people's lives. Jim Givens continues taking his 7 Herb and doesn't plan to stop this time around.

danielchapterone

Lump is gone without dangerous surgery

continued from page 2:

Tricia recalls how herbs, such as fenugreek, eased her mom's suffering and allowed her mother to breathe on her own and to live her final days without being attached on an oxygen machine.

Tricia convinced the Rochas that Joe's best hope was to take natural remedies rather than go under the knife.

The Rochas are ecstatic that they listened to Jim and Trish Feijo and avoided surgery.

The growth is gone and the Rochas spent part of February and March in Florida, soaking up the sun and getting together with old friends.

Joe and Maria continue to take Daniel Chapter One products and both credits the Feijos with saving their lives through natural remedies.

The Rochas told their story during the Daniel Chapter One HealthWatch Save the Nation tour in Florida.

Cancer Success a Lie!

The increase in cancer survival rates is deceptive, according to a study published in the *Journal of the American Medical Association* June 14, 2000. The study reveals the fact that the five-year cancer survival rate is misleading because people are being diagnosed earlier and consequently are living longer after detected cancer, appearing to be living longer due to cancer treatments. Dr. Gilbert Welch, lead author of the study, analyzed the data and concluded that the increase in survival rates is mostly influenced by earlier diagnoses of cancer, not advances in treatment.

In addition to the scam of all sorts of tests for cancer and earlier diagnoses, is the scam of surgery as cure. After removal of a symptomatic body part, oncologists wipe their hands and say "we got it all," so deceived are they or ignorant as to not perceive cancer as it really is, a systemic disease. (That's why cancer seems to "come back.") Or they continue with chemo or radiation to "get any stray cells," when those very treatments lead to secondary cancers, **ACCORDING TO THEIR OWN ONCOLOGY TEXTBOOKS!**

We personally choose not to spend the time or the money to be tested upon to make their stats look good. If our bodies develop any symptom, lump or otherwise, that could signal cancer we treat 'worse case scenario' ~ as if it were. And we treat ourselves naturally, with God's herbs and nutrients, knowing that if ever they don't 'work,' nothing else would have. We also choose not to be willingly tortured at the hands of men.

Enzymes attack growths

Daniel Chapter One GDU Caps contains proteolytic enzymes that metabolize protein and can aid the body in breaking down a tumor

The importance of oral enzymes in treating cancers has been the subject of scholarly papers and books for almost a century.

At the turn of this century, Dr. John Beard of Scotland discovered that cancer cells behave much like trophoblast cells, the placenta cells. He set out to determine why the placenta stopped invading the uterus, during pregnancy, and ceased growing at the end of the third month. Dr. Beard's study was conducted to find out if there was a way to stop the growth of cancer.

The Scottish researcher discovered that the very day the placenta stops growing and invading the uterus is the same day the fetus's pancreas starts producing its secretions. Enzymes, according to researchers, can change leukemia cells, returning those cells to a normal state. Enzymes have been shown to induce T cells and tumor necrosis factor.

The enzymes, while helping to destroy cancer cells, are not toxic, unlike other forms of treatment currently being imposed on cancer patients. Enzymes are most effective when they are included in a program of healthy diet, nutrients and detoxification procedures.

God has provided numerous forms of enzymes. There are plant-derived enzymes and enzymes from animals glandular.

Enzymes offer a non-toxic and inexpensive natural therapy in the battle against cancer.

Daniel Chapter One GDU Caps contains proteolytic enzymes that God created to break up an excess protein mass and can aid the body in eliminating a tumor.

Texas businessman has true friends for life

Florida family shares its discovery of Daniel Chapter One success

What are friends for?

The answer to that question is personified in the Dellinger family of Milton, FL. Drew, 37, and his parents, Dean and Dorothy, have been using Daniel Chapter One products for about a year and are enthusiastic about the results. The Dellingers heard Jim and Tricia's Daniel Chapter One HealthWatch radio show in Milton and ordered products that they say had remarkable results.

The Dellingers wanted to share their discovery with family friend, Dick N. of Garland, Texas, who has been suffering from emphysema, 18% capacity in one lung and 27% in another, and bladder cancer.

They employed the persuasive powers of a mutual friend, Ed Kulikowski, whose daughter Tracey (See related story on opposite page) is cancer-free as a result of using the Daniel Chapter One products.

Mr. Kulikowski contacted the Texas Oil company executive and said that the Dellingers were willing to provide him with Daniel Chapter One products for his breathing problems and problems associated with his cancer.

Drew Dellinger said the family friend received the package of products and hesitated to use them.

The package included 7 Herb Formula, AM*PM, Herbal Blast, Bio Shark and Bio*Mixx.

The Texas oil executive reportedly downed six ounces of 7 Herb Formula right away and as soon as he did, Drew said, Dick N. felt as though an "electrical wave" went through his system. Drew said his friend told him that he began shaking.

Dick didn't know what was going on, Drew Dellinger said. He reportedly asked his wife, Carmen, "You reckon this stuff will kill me?"

Every 15 minutes, she would bring AM*PM, 7 Herb, or Herbal Blast for Dick to drink, Drew reported.

What were the results for a man with partial use of his lungs and someone who had undergone several operations for cancer? He quickly began breathing better and is now off oxygen during the day but stays on it while sleeping. The excruciating pain that accompanied urination is gone.

According to Drew, the Texas businessman is back to work and telling people he never felt better.

He said that Dick told him the employees think he has been drinking because he seems like his jovial, energetic self.

The Dellingers are pleased they could come to the rescue of their friend. They said they have so much faith in Daniel Chapter One that it simply seemed the right thing to do to help their friend in a struggle to regain his health.

Bio Mixx™

**How does
Bio*Mixx work?**
Boosts the
immune system, cleanses the
blood and feeds the endocrine
system

Bio*Mixx is a combination of numerous herbs, vitamins, minerals, enzymes, amino acids and essential biomolecular nutrients. The purpose of this formula is to provide man natural immune-boosting properties in one tasty product. These include IGF-One, a natural gamma globulin complex essential for overall immunity with natural anti-fungal, antibacterial and anti-viral properties. Bio*Mixx is a foundational nutritional product.

Some other important herbs in Bio*Mixx include: Goldenseal, an antibacterial, Echinacea, an anti-viral, and Ginseng, an adaptogen that brings all body properties in to balance for overall wellness. Bio*Mixx boosts the immune system, cleanses the blood and feeds the endocrine system to allow for natural healing. It is used to assist the body in fighting cancer and in healing the destructive effects of radiation and chemotherapy treatments.

Not too late!

Joe's dad was first diagnosed with prostate cancer at the age of 83. Joe Sr., now 93, has endured much at the hand of allopaths. In January 1999 Joe's dad suffered from digestive tract pain and constipation, accompanied with intense pain in his groin. Pain and hardship was nothing new to the tough old bird who enjoyed the very active outdoors work of a farmer.

Father to eight kids and still active and fighting. Joe describes his dad as having a very sharp mind, and strong body that not only has endured time but 10 years of prostate cancer. It is not time nor the prostate cancer that has taken a physical toll, but the standard and accepted medical treatments that have been most destructive.

In 1997 Joe Sr., at the age of 91, had prostate surgery. Two years later in January 1999 his PSA was up to 36. As usual he had the best doctors, nutritionists, dietitians, radiologists, and everything necessary to assemble the finest team. Joe Sr. then endured 30 radiation treatments within six weeks. During this time he lost a lot of weight as to be expected. Over a five-month period he lost a total of 30 lbs. with his scale weight plummeting from 165 lbs. to 135 lbs.

With stage 4 cancer and given only 6 months to live, Joe's dad was not doing well. Morphine was given for pain in January. The morphine was stopped in February. Joe took things in his own hands! He shared what he heard about Daniel Chapter One and their approach using 7*Herb Formula, and with faith in God, not scientific lab reports, he said to his 81 year old mom, "I know this going to work."

So the family started dad on 7*Herb, 4 ounces a day. After radiation Joe described his dad as gray, something too many of us are familiar with. Weeks of sickness, vomiting, and loss of weight had taken its toll. With 4 ounces of 7*Herb Formula per day, in just 2 days Joe and the family watched dad's color come back. (Yes two days - well, God is awesome!)

Joe's dad was on morphine in January 1999 with a PSA of 36 and was given 2 months to live. (Incidentally the oncologist, a female doctor, had some negative comments when Joe said he believed in natural healing as an alternative to chemotherapy. She said, "it's a little late for that!") Fortunately for this Christian family it was not too late. Joe had been a faithful listener of Daniel Chapter One HealthWatch radio program when a local station used to carry the talk show. Remember January 1999 PSA 36? End of July 1999 PSA 3.3 Not bad!

Joe is still taking 2 oz. of 7*Herb a day. Some of you might be wondering what was done to replace morphine, the end-of-the-line allopathic treatment for pain. This is usually when they expect you're going to die soon. You see, the Cancer team, the best Cancer team really didn't expect Joe Sr. to live past February or March.

January ... two months to live. What had happened in January 1999 was a larger tumor had grown and was blocking normal urine flow from the kidneys to the bladder. This is why they gave morphine and radiation and two months to live.

GDU to the rescue! Yes, Joe used instead GDU ~ no morphine. Today Joe Sr. remains pain free.

PSA 3.3, no pain, alive August 1999! God bless Joe and his faith to trust in the Creator.

P.s. Mrs. Joe's rheumatoid arthritis is now under control, but that's another story. The never ending story of glory to God...

Garlic Pur-

Odorless garlic 100:1 extract. Fights infection, detoxifies the body, enhances immune function. Many healing properties including lowering blood pressure and improving circulation. A 2 capsule serving is equivalent to 10,000 mg whole clove garlic and contains: Hawthorn Berry Powder 500 mg and Cayenne 200 mg. Tarig Abdullah, MD of Florida found that white blood cells from garlic-fed people were able to kill 139% more tumor cells than white cells from non-garlic eaters. Garlic and onions fed to lab animals helped to decrease the number of skin tumors.

GARLIC PUR (Total Allicin Potential Garlic) Allicin is thought to be responsible for many of the health benefits of garlic. This active ingredient is formed when the important components of allin and allinase, which are present in garlic, combine when the clove is crushed. Because allicin can never be measured directly, we look instead at the amount of allicin that can be potentially formed. This is referred to as the Total Allicin Potential (TAP) and is the measure of garlic's potency. Garlic Pur is odor-controlled, easy to swallow and digest. Garlic Pur is the highest Allicin Potential Garlic available anywhere.

Research Summary: Supports the body's natural defense system. Helps combat viral, bacterial and fungal infections. Helps enhance the health of the entire cardiovascular system. Allicin promotes healthy blood pressure and cholesterol levels. The most common form of cancer worldwide is stomach cancer. Chinese researchers find that a high intake of garlic and onions cuts the risk of stomach cancer in half. Garlic provides the liver with a certain amount of protection against carcinogenic chemicals. Scientists find that garlic lowers blood pressure and fats in the blood, stimulates immune function, and generally improves health.

Scientific Review

reports garlic is a natural antibiotic with proven anti-cancer properties

An article in Scientific Review stated that garlic appears to have the strongest anti-cancer effect when consumed regularly before the onset of cancer or when cancer cell numbers are small. The article stated that garlic is a natural antibiotic, useful against infection, and may also lower blood pressure. Garlic detoxifies the body, helping to combat disease and is proven to have anti-cancer properties. It is said to destroy cancer cells and inhibit the initiation and promotion stages of cancer.

Daniel Chapter One Garlic Pur is a specially cultivated Japanese product which has been concentrated to yield high amounts of the compounds which may be responsible for many of garlic's renowned effects. Beneficial compounds found in Garlic Pur are also preserved through an 18-month aging process. Daniel Chapter One Garlic Pur has the added benefits of Hawthorn Berry and Cayenne, herbs found helpful for heart and circulatory health.

7 Herb Formula

Recipe for health

Herbs are meticulously prepared to enhance healing qualities

The herbs in 7 Herb Formula allow the body to heal by nourishing and cleansing the blood and organs. Below is a list of these herbs, which have been scrupulously and separately prepared, then combined, forming a tea concentrate, and poured, boiling, into quart-size amber glass bottles to ensure freshness and potency. These herbs are:

1. **BURDOCK ROOT**, used in Ayurvedic and Chinese medicine to treat cancer. It is a potent blood purifier, and is known to decrease cell mutation and inhibit tumors. It restores liver and gallbladder function. Burdock contains the nutrients zinc, iron, manganese, selenium, and vitamins A, B1, B6, B12 and E.
2. **SHEEP SORREL**, also rich in vitamins and trace elements, high in life-giving properties. It nourishes the glandular system, and is known to relieve internal ulcers. Sheep Sorrel is a traditional folk remedy for cancer.
3. **SIBERIAN GINSENG**, an herbal "tonic" which has restorative power due to its glycoside content. Glycosides are natural phytochemicals that initiate the body's stress response: so while this ingredient tones the body it also supports the immune system. Siberian Ginseng also produces saponins, steroids found in plants, which have tumor inhibiting effects.
4. **CAT'S CLAW**, an herb from the Peruvian rain forest. The inner bark, which is what is in 7 Herb Formula, is one of the most powerful cleansers of the intestinal tract. It also is anti-oxidant and anti-inflammatory in action. Cat's Claw stimulates the immune system, enhancing white blood cells, which fight infection. Cat's Claw is used by native Peruvians to treat many diseases, including cancer.
5. **SLIPPERY ELM**, according to herbalist Jethro Kloss, should be used in all stomach troubles because of its ability to heal, strengthen, and nourish the stomach. He states that it can stay in an ulcerated or even cancerous stomach when nothing else will. It nourishes the organs and tissues due to its nutrient content: bioflavonoids, calcium, phosphorous, polysaccharides, and vitamins A, B, C, and K.
6. **WATERCRESS**, the same plant used for salad greens and garnishes, is an excellent cleanser in the body, and it can heal mucus membranes.
7. **TURKEY RHUBARB ROOT** purges the body of wastes and toxic matter. The malic acid inherent in this herb carries oxygen to all parts of the body. A substance called rhein in the herb fights both bacteria and fungus. Studies done in the 1980s show Turkey Rhubarb also has anti-tumor properties.

7 Herb Formula

This ancient herbal remedy was passed down by the Ojibway Indians in Canada to Renee Caisse and later to Dr. Charles Brusck, President John F. Kennedy's personal physician. Dr. Brusck used the improved formula to heal his own bowel cancer. Daniel Chapter One took the formula two steps further ~ greatly enhancing its healing qualities by adding Siberian Ginseng and Cat's Claw.

What is in it?

Burdock Root, Sheep Sorrel, Siberian Ginseng, Cat's Claw, Slippery Elm, Watercress and Turkey Rhubarb. These herbs are all prepared individually and at precise temperatures to ensure maximum effectiveness. Daniel Chapter One uses substantially more herbs per quart, rendering it the most powerful concentrate of its kind.

How does it work?

Daniel Chapter One's 7 Herb Formula has been created to purify the blood and to promote cell repair. It fights pathogenic bacteria and tumor formation. The ingredients in this ready-to-drink concentrate clear skin, cleanse the liver and decrease cell mutation.

Surviving Cancer Naturally

An interesting article appeared in the Townsend Letter for Doctors & Patients, January 1999, by Carole Bradford, a breast cancer survivor. Carole was diagnosed in March 1993 as having a "high-grade infiltrating ductal cell carcinoma of the right breast ... grade 3." After a lumpectomy in May of 1993 doctors saw abnormal tissue in the left breast and feared the cancer had spread. One surgeon pushed for a double mastectomy; others "pestered" her to take chemotherapy. She refused, and chose instead to take a nutritional approach to healing her cancer. As of March 1998 Carole was tested and declared free of cancer for 5 years, breasts intact.

In retrospect, Carole Bradford questions a needle biopsy she had of a breast cyst back in 1990, and says "Of course I can't be sure, but I think that is what they would call "the initial insult." I don't feel right about biopsies and I'll never do one again." She later asserts "I have my doubts about mammograms too. I wouldn't do them again either. Squeezing the breast into a vice can't be any good. And it seems barbaric." She then goes on to explain that the only orthodox things she did in her cancer program was the lumpectomy, and tamoxifen which she took for only about 60 days. When she began having daily cervical discharges, she said "no more." To this she also says "I would never do it again. Some things are just intuitive in nature and you have to listen to your body!" This was before research later revealed that tamoxifen increases a woman's risk of both endometriosis and cervical cancer.

Mega Gains™

Daniel Chapter One Mega Gains was formulated to meet the high calorie needs of world-class athletes. However, for over a decade Daniel Chapter One has been using Mega Gains formula to help cancer patients who have lost weight due to the rigorous and harmful cancer therapies. When the body is sick and weak, it is unable to properly digest and assimilate food. By taking Mega Gains a patient is able to get the calories they need without going through the trouble and sometimes painful digestion process eating food. Nutritionists from well-renowned cancer hospitals have been recommending Mega Gains to their patients for increased muscle and weight gain for years. Daniel Chapter One Mega Gains is an essential nutritional weapon in the fight against cancer and disease. Providing approximately 1800 calories and high in necessary protein and essential fatty acids, Mega Gains is ideal for helping protect the body's muscle mass, halting cachexia (muscle loss).

Heartburn? Acid Reflux? Esophageal Cancer?

You don't need to watch and wait in fear! The herbs in 7*Herb Formula have been used by many to cure heartburn and excessive acid. The same herbs improve digestion, gall bladder and bowel function, cleanse and detoxify the body, heal ulcers anywhere, and may prevent and even heal cancer! Be in control, don't be a victim!

danielchapterone

Tumor Free!

"My mother has von-Hippel-Lindau; a genetic disease where your body makes tumors. She came to have an entire mass on her whole brain and whole spine. It began back in 1979 with a tumor in her back that was surgically removed. Then she developed a brain tumor in 1985, and had surgery for that. Then in 1995 she had another brain surgery. It was in 1995 that she was first diagnosed with this disease.

In 1996 she had another brain surgery, then a lifetime dose of radiation. The doctors said it would be the one cure-all : they did radiation on her entire brain and spine for one hour, 5 days a week, for 6 weeks. But in the fall of 1997 they said her whole brain and spine had become a tumor mass.

The doctors then said they had a new radiation technique they wanted to try. My father didn't want to only trust that, so he searched for other things that might help. He ended up speaking to a man with cancer who was taking DANIEL CHAPTER ONE 7 HERB FORMULA , and started her on that and now she takes 7 HERB, BIO MIXX, BIO SHARK, and GDU Caps.

In the winter of 1998 she started on the DANIEL CHAPTER ONE products. In February 1999 she had a follow-up MRI. To give us the report, the doctor sat down and did a little grin. She said, "We have good news." She said the tumors were completely gone. We couldn't believe it; we had never had any good luck. We told the doctor what she'd been taking, and the doctor said keep doing it." "We got my grampa to drink the 7 HERB FORMULA too, and we have it sent to an aunt in Hungary!"

Siberian Ginseng:

From Asia With Love

Siberian Ginseng, a spiny-stemmed shrub with numerous stalks, is indigenous to southeastern Russia and northeast China. Russian researchers described Siberian Ginseng as an adaptogen and non-specific immunostimulant. An adaptogen is defined as having the following qualities:

- A. A substance that causes minimal disorders in the physiological functions of an organ.
- B. Non-specific action such as the ability of Siberian Ginseng extracts to modulate stress and improve performance during a wide variety of stressful situations.
- C. Has a normalizing action irrespective of the direction of the pathologic state.

Traditional Chinese medicine uses ginseng for improving vital energy, treating the kidney and spleen, and restoring a normalization of the body functions.

It has been used as a folk remedy for bronchitis, heart ailments and rheumatism.

**Indigenous to southeastern
Russia and northeast China**

1. ENHANCES immune function
2. STIMULATES the appetite
3. NORMALIZES blood pressure
4. HELPS hormonal balance
5. IMPROVES alertness
6. REDUCES cholesterol
7. BENEFITS general health
8. HELPS under stress
9. PREVENTS metastasis
10. INCREASES stamina

**Siberian Ginseng is added to

The Power of Advanced Biomolecular Nutrition™

Bio-molecular nutrition was first established in 1986 by Daniel Chapter One and has expanded and improved since then. In 1991, the results and accomplishments of Daniel Chapter One reached China and Jim Feijo, founder of Daniel Chapter One and World Sports Nutrition, was invited by the Chinese government to conduct studies at the Beijing Research Institute of Sports Science. Jim led Chinese researchers in two studies involving world-class Chinese athletes, judo and weight lifting. After the conclusion of these studies, Dr. Li invited Jim to lecture to the institute's scientists.

At that time, Jim Feijo was invited to conduct studies and lecture at the Sports Research Center in Moscow. The science of Bio-Molecular nutrition is available to you through the research done by Daniel Chapter One and World Sports Nutrition.

Declared Free of Cancer

"Yeah, Tracey can't keep her feet on the ground these days, she has been declared free of cancer."

BIOGUIDE™

The BioMolecular Nutrition Guide to Natural Health 3

WELCOME

Welcome to

Daniel Chapter One®

Founder of BioMolecular Nutrition™

II
Hello!

We're Jim and Tricia Feijo and we would like to take the time to share with you our position pertaining to health, healing, life, and death. In the nearly 20 years that we have been involved with natural healing, we have been privileged to have been able to assist many people with the science we have come to call BioMolecular Nutrition.

The essential principles of BioMolecular Nutrition have their origins in the Word of God – in the scriptures from Genesis to Revelation. There are two aspects to BioMolecular Nutrition, the spiritual and the physical. The spirit of the law, and the letter of the law. The 'letter' is the actual physical creation, the products found within this BioGuide, the chemistry and the laws that govern it. The BioMolecular Nutrition principles we would like to share here are those concerning the spirit.

The very first principle is found in Genesis 1:29: basically, that all creation was given for man and to glorify God. The seed-bearing plants have the specific purpose of providing food, as a source of energy and to provide nutrients for daily life, health and healing.

The second principle of BioMolecular Nutrition is established in Colossians 1:15: that all things have their origin in God and that these things, visible and invisible, are for the purpose of glorifying the Lord God El Elohim Israel, Jesus.

We see that drugs have been positioned in society to usurp the function of herbs and nutrients. This practice is called pharmacopoeia, the true connotation of which is witchcraft. The worldwide view of holding drugs above natural nutrients steals from the glory that belongs to the Lord, Y'Shua.

The third principle of BioMolecular Nutrition is that no one will live forever, found in Ecclesiastes 3:1-2. However, if we obey the Lord all things will go well with us and sickness can be avoided and healing attained. If we become ill we can only pray that we will know how and be able to use God's creation for our healing. ("My people perish for lack of knowledge." Hosea 4:6)

Sickness can result from sin, or simply be for the glory of God (John 9:1-7). My own case of chronic illness exemplifies both. For nearly 10 years I battled with the pain and disability of multiple sclerosis. At times I wanted to take my own life. I refused drugs and believed that God was going to heal me. My illness and suffering was due to my own sin. I refused to obey the Lord and that I was called to establish Daniel Chapter One and continued to walk away from it. Tricia and I always wanted to spread the good news that salvation is free and Jesus the Lord shed his blood so we could have eternal life with Him. I did not see how this could be done sitting on a building, so I rejected the vision of Daniel Chapter One. For years I suffered, crying out night and day to die because of the pain. Fervently I maintained my dedication to not use drugs, however, as I came that would be hypocrisy. Finally, on my knees, I accepted whatever work the Lord God would have me do. He restored my health through nutrients and homeopathy.

All this bore much fruit! During that time I learned that multiple sclerosis, what the world thinks it is, demyelination of nerves, but it is instead a physical
