Manufacturer 47% Energy Savings Pledge and Tax Credit Qualified*

Replace your old drafty, energy wasting windows and doors NOW and...

SAVE, SAVE, SAVE

- Enviroseal, triple glass with superior heat, cold & UV reflective properties
- Dual frame reinforced construction
- Deadbolt style locking system
- Year round savings
- Structural integrity
- Comfort & security

Sold and installed by exclusive dealers throughout the USA!

* Bristol super glass windows and doors exceed the 3030 AHPM requirement. Thermal and structural performance is guaranteed for 25 years of manufacturing. Triple glass units...per legacy of perfection and performance can now be yours. We've been saving the earth's energy for 25 years. Now it's your turn.

WINCHESTER INDUSTRIES • 724-630-3551
Although maintenance freedom is an important goal for many homeowners, the triple-pane design of some replacement windows, such as Bristol Windows, can also produce energy savings up to 50% per year. Where competitors, double-pane windows typically put a common bar in the air gap between the panes, Bristol's triple-pane replacement windows have two air spaces filled with their own proprietary gases, that act as a dual thermal insulator. Bristol adds high-tech heat reflective layers and a wett-edge spacer system that creates a ultimate thermal shield that does a much better job of slowing the transfer of cold in or heat out — thus halting the flow of heating and cooling dollars out the windows.

A complete selection of aesthetically, maintenance free, triple-pane, replacement windows by Winchester Industries are sold under the names of Bristol, Oxford, and Barlize. For best results, energy savings and comfort, these windows must be professionally installed. The company is looking for new dealers in certain U.S. regions to round out their national presence.

For more info, visit the website www.winchesterwindows.net; call 800-589-5497; email inquiry@winchesterwindows.net; or write to Winchester Industries at PO Box 166, 500 Leech Ave, Pittsburgh, PA 15236.

How Much Can New Windows Really Save You?

Homeowners are choosing another season of sky-high winter heating or blistering summer air conditioning bills. Even if you think you’re doing the right thing to save energy, your home’s windows could be leaking heat or cold.

The government’s Energy Star window rating, which measures energy efficiency, can help you find a window that will keep you cool in summer and warm in winter. But what if your windows are more than 25 years old? They may not meet Energy Star standards, and they could be costing you money.

Replacing your old windows with new, energy-efficient ones can save you money. But it’s not just about saving money. New windows can also improve the comfort of your home. They can help reduce drafts and noise, and they can make your home more energy efficient.

Winchester Industries

Manufacturer of the Ultimate Bristol Replacement Windows and Doors

47% Energy Savings Pledge

This pledges a savings of at least 47% of energy consumption for heating and cooling the residence at the address shown hereon during the 12 month period beginning with the the first full month after completed installation of Bristol units. In the event energy savings are less than 47% of the previous 12 months’ energy consumption, the homeowner should notify Winchester Industries who will provide the homeowner with the necessary forms to file for benefits under this Pledge. If energy savings are less than 47% of the previous 12 months’ energy consumption, the homeowner will be reimbursed the difference between actual savings and 47% of energy cost for the previous 12 months.

Notwithstanding anything herein to the contrary, it is hereby agreed and understood that this Pledge only be effective if the homeowner, located at the address shown hereon, has purchased a complete installation of Bristol Triple-E, A-Plus with ALPHA-10 insulated replacement windows, and is effective for a one year period after installation.

THIS PLEDGE IS BASED ON ENERGY(FUEL) CONSUMPTION, NOT COST. IT IS SUBJECT TO THE FOLLOWING PROVISIONS:

1) This factory pledge covers only Bristol SUPER Triple-E, A-Plus with Alpha-10 insulated glass replacement windows.

2) A complete, full-house, installation of Bristol’s SUPER Triple-E with Alpha-10 is defined as all windows, not less than eight, in this residence excluding basement, attic and porch.

3) This pledge covers only single and two family dwellings.

4) Maximum payment under this Pledge shall be $300.00 and is strictly for the time period indicated on the reverse side. Reimbursements, if any, can only be issued to a homeowner that has notified at the specified address for a full 12 month period before and after the completed installation date.

5) Homeowner must properly maintain heating and cooling system.

6) Appropriate allowances for abnormal weather conditions may be made in adjusting a claim.

7) Claims under this Pledge must be submitted in writing with supporting evidence to Winchester Industries within 30 days after expiration of this Pledge. Also forward a copy to the Bristol Distributor where purchased.

8) Proper allowance shall be made for cost of operation, taxes and service fees, of any utilities included in the fuel bill in adjusting a claim.

9) Claim adjustments, if any, will be issued from Winchester Industries within 50 days after all information has been verified and found to be accurate.

10) The homeowner referred to on the reverse side as the purchaser of Bristol units must have resided at the specified residence address for a full one year period preceding the installation.

11) Apparent changes such as room additions, i.e., sunrooms, heated garages, etc. to the said residence during the 12 month period of the claims shall make such claims invalid.

12) Homes moved from one utility service to another shall make this claim null and void.

13) Reimbursement at rates prevailing at time of window purchase. Comparison will be based on units of energy used rather than actual dollars to compensate for inflationary increases from one year to the next.

14) Complete utility bills for the 24 months in question or a summary form from the authorized utility must be submitted to claim a refund.

Claims must be submitted in writing along with proof of purchase and utility bills and addressed to:

Bristol

The Ultimate Replacement Windows & Doors
Eliminates Maintenance - Improves Security - Provides Energy-Efficiency

www.bristolwindows.com
"I must tell you that I am so elated over the change in my home. I used to think my air conditioning wasn't working properly and I would ask the technician if I needed them to make regular checks up. He always said it was fine. I sit in front of my windows and do a lot of crafts and saw a change immediately the next day. I have the sun come in from the west and afternoons are the hottest part of the day. I realized my air conditioning was blowing hot air around before that was coming in through the windows. Now my air conditioning is blowing cool air and it reaches across the whole room. I sit in my chair now and don't get over the change. I am so comfortable and this week has been a good test. I even raised my temp to 82° and the whole place is comfortable. I do have a fan on in the living room. Sorry to write such a long letter but I must tell you I also got the full hot sun from west. I used to close my bathroom door in the summer it was like an oven and in the winter it was so cold. I hated to go in to shower. Now I have the door open during the day and night and the temperature is the same as rest of the house. I wish I had done the windows sooner. I have lived here ten years. It is well worth the investment. I am enjoying my small space so much more. The heat outside is not coming in and I know I will be more comfortable this winter. I'm sure I will get more benefit from the heating system. A job well done and your men were fine gentlemen and I will be telling my friends what a difference the windows make."

Evelyn Roth, AZ

"This is a testimonial to the changes in my energy bills since I began replacing my old windows with Bristol windows. Prior to the initial installation in 2001, my energy bills (gas and electricity) were running $108 per month using the budget system. Since that time, I have been replacing windows at the rate of 3-5 per year. As of November 2003, I was spending $82 per month for energy. As of this December, I was spending $75 per month on energy after replacing 8 windows. It definitely has made a difference and I expect the savings to continue as I work toward replacing all my windows."

Mary Ann Melanet, NE

"I just wanted to send a note of appreciation to your organization. Everyone involved with the manufacturing process should know that they are doing a great job and that the windows your organization manufactures really do work! I was skeptical about the three-pane system and the projected energy savings that the salesperson made. However, after reviewing my consumption of gas and electric one year after the installation, I have to admit that investing in three pane glass paid for us. We consumed 6% less energy after getting the windows.

I like the lower energy bills...my wife likes the change in comfort level. Prior to investing in the windows, my wife would complain about how cold it was during the winter months and how hot it was upstairs (mainly the bedrooms) during the summer months. We have not had that conversation since having your windows installed.

What a great investment! Throughout the year I'm saving an average $160.00 per month. The monthly payment for the windows is less than $150.00 (I think that's awesome)! I read an article that new home construction will have to install a three-pane system if the builder wants to promote the home as a "green home." Excellent! Please give this letter to potential clients: the average consumer, unfortunately, doesn't know what I know. Energy bills go down...comfort levels change...it's such a great investment. Everyone should have your windows! More than satisfied."

K. Nes, Reston, VA

"We had Bristol Windows replace 12 of our existing windows in our home 2 years ago. It was a big decision for us because they were not the cheap variety, but we were convinced it was a good investment, we would get what we paid for, and we should do it. We only had 12 done instead of the 17 windows we have, and they said we could do the rest later if we wanted to. The service was fantastic, and we have now had time to pay it off. The time is now! We absolutely LOVE these windows. When everyone else was screaming about the heating cost which prices went up, ours stayed the same. This year our heating bill has actually gone down instead of up. They are SOOOO easy to clean, all from the inside, no ladders, we never have to struggle to get old windows open, some didn't open at all before. No more frosted over windows in winter either. Fresh air in the fall and spring is so easy to have. And they worked with us to make it affordable for us. It is definitely one of our best investments, and now we are getting the other 5 windows replaced."

Jim & Annette Helm - Fremont, NE
