Subject: Note About HSR Affidavit

RB concurs 3/11/08

Dear Ms. Clark-Coleman,

Thank you for speaking with me about an HSR affidavit question I had. I explained that the affiant was in a car accident and while recovering from that at his residence, he signed the affidavit and certification page before a witness, not the notary. I also told you the notary included a notarized certificate for proof of execution certifying that the witness is personally known to the notary and saw the affiant sign the pages. You advised this was acceptable in view of the unusual circumstances of the car accident and recommended that I note something to this effect in the cover letters I provide with the HSR filing. I intend to include a form of the following in my cover letters. If it is not sufficient, please let me know at your earliest convenience.

An original affidavit and certification page will be supplied later, to be substituted for the photocopied pages attached to the Report Form. A notarized certificate for proof of execution is included with these pages because the affiant signed the affidavit and certification page in the presence of a witness while recovering from an automobile accident.

Thank you again for your input.

With regard,
