*Executive Vice President*

**Plastics Environmental Council**

Charles J. Lancelot, Ph.D.

Dr. Lancelot's 40 year technology and business career encompasses commodity and engineering plastics, elastomers and other materials. Dr. Lancelot founded and is a General Partner in CE Tech Consulting, Inc., specializing in materials, product and process development, recycled plastic production and procurement, forensic analysis, competitive product and material analysis, and failure analysis. Areas served include commercial, industrial and household consumer goods and medical products for clients including Newell Rubbermaid, Otto Industries, Rehrig International, Evercare Corp, Suncast Corp., Home Products Int'l. and others. His last corporate position was as Vice President of R&D at Ansell International's Protective Products Division, and prior to that held several positions at Rubbermaid Commercial Products, among them Director, Materials and Process Technology, where he put together a successful polyethylene stretch wrap closed recycling loop, incorporating up to 25% quality recycled plastic in dozens of household products. Dr. Lancelot received his Ph.D. in Organic Chemistry from Princeton University (1971) and his BS in Chemistry from the University of Notre Dame (1962). He is closely associated with the Materials Analysis Center at the Georgia Tech Research Institute, where most of the referenced testing is done.
