Dear Secretary,

Thank you for having the chance to express my support for passage of the guidelines for more healthful foods for children in our nation.

I hope that you will listen to the will of people and not food industry in making your choice to allow our children in schools and other venues where their wishes can become influenced by outside sources.

Nothing should stand in our way in advocating the best of habits starting as the lowest of ages. I think that these guidelines do just that.

Hoping to gain your support.

Sincerely,

George Weiner
