To whom it may concern;

I am a voting citizen and I am concerned about the advertisement that is directed to all children - some very attractive to those who are not ready to make decisions concerning their health or well being.

It troubles me that so many of our young ones are products of poor decisions. Their health being endangered - because of lack of control - false promises, etc.

I want to go on record as promoting the FTC Project No. P094513 with the hope of seeing the numbers of healthy children increasing - The health costs decreasing. The more knowledge of the nutrition exposed in the foods we consume -

Sincerely -

I am a 84 yr. old Great Grandmother.
