Consumer Collections Involves Myriad Participants

• Consumers who owe financial or non-financial debts
• Organizations who are owed funds
  o Lenders of all sorts
  o Non-financial firms serving consumers
  o Governments owed taxes, fines, etc.
• Third-party collection firms & debt buyers
  o Specializing in collecting debts owed to others
  o Mostly on a contingency basis
• Service providers
  o Credit reports, location services, collections scoring
  o Call centers, auto-dialers, software & computers
A Myriad of Participants (continued)

- Collections attorneys (at least 700 active firms)
  - Obtain judgments, liens, garnishments, etc.
- State or local courts (literally thousands)
  - Structure and process is highly diverse
  - Not always automated (especially in small claims)
- State governments and the federal government
  - Legislation governing collections occurs at both levels
  - Federal law sets a floor, not a ceiling
  - Creditor remedies and process are mostly state law
- Regulators and Attorneys General
  - State licensing requirements are common
  - CFPB examination authority for larger firms
Who Does Collections?

*: Calculated as the number for NAICS 561400, Business Support Services, less call centers
The Third-Party Collections Industry ~ 2010

- Approximately 4,200 firms
- Employment of 143,000
- About $54 billion in gross collections revenue (est.)
- Industry revenues of $11.7 billion
  - 70% from consumer collections (in 2007)
- More than 1 billion consumer contacts per year
- Growth relative to 1972 (controlling for inflation)
  - Consumer credit: 3.6 x
  - Industry employment: 4.7 x
  - Industry revenue: 6.7 x

Third-Party Collections Performance (2011)

Median values:

• The Recovery Rate is 13% of face value of debt
• Gross Collections are $69 per account
  o On a balance of $538
• The Commission Rate is 26% of gross collections
  o Commissions are $22 per account
• Expenses are $16 per account
  o Profits are less than $2 per account
• The median firm acquires 69,000 new accounts per year
  o On behalf of 200 clients
  o Mails 11,000 letters per month

Source: ACA International, 2011 Top Collections Markets Survey

*: Values are medians
Aspects of the Debt Buying Market

• Collections from purchased debt: $6 billion (est. 2007)
  o 34% of industry receipts (PWC)
  o At least 500 active debt buyers today
• This market is fairly concentrated
  o 10 firms bought 93% of bad credit card debt in 2011
  o Median share of revenues from purchased debt is 3%
• Before the crisis, ample capital stimulated growth:
  o Wall Street invested at least $500 million
  o Several firms are public (40% of bad debt purchases)
• Bad debt prices follow the business cycle
  o New charge-offs sold for 14¢ in 2006 (4¢ in 2009)
• Accounts are often re-sold several times

Sales of Consumer Debt in Default

$Billions, face value

*: Includes re-sales of debt previously sold by creditors.
Final Observations

• Effective collections is important for credit markets
  o But there are also important consumer protection issues
  o We need much more research on both of these aspects

• Consumer and commercial collections are very different
  o Millions of consumers experience collections activity
  o Millions of accounts are placed for collections each year
  o Balances are relatively small and recoveries much smaller
  o This influences collection strategy (including litigation)

• The U.S. collections market place is “Dis-Integrated”
  o Creditors vs. third-party collectors, or debt buyers
  o Also collections attorneys and courts
  o Data providers, repositories, and software platforms
Final Observations (continued)

• This activity (and industry) is large and changing
  o Industry is separating into smaller and very large firms
  o Widespread adoption of sophisticated information technology
  o Also reacting to consolidation of consumer lending

• The legal process for collections is primarily local
  o Continues to rely on paper and idiosyncratic docket systems

• The regulatory environment is highly complex
  o State and (multiple) federal laws & regulators
  o Law is largely based on 1970s technology & markets
  o Applicability depends on specific roles or activities
