III. YEARLY INDEX OF HEALTH CARE ANTITRUST ADVISORY OPINIONS
     BY COMMISSION AND BY STAFF ........................................................................18
I. INTRODUCTION

The Federal Trade Commission will respond to requests for advice from health care providers and others through its advisory opinion process. On September 27, 1994, the Federal Trade Commission and the Department of Justice jointly issued nine statements of antitrust enforcement policies and analytical principles regarding mergers and various joint activities in the health care area. In response to changes in the health care market, on August 28, 1996, the agencies issued revisions to statements eight and nine concerning physician network joint ventures and multi-provider networks.

Under the statements, the Commission has committed to responding within 90 days to requests for advice from health care plans or providers about matters addressed by the “safety zones” or the non-merger policy statements; and within 120 days to requests for advice regarding multiprovider networks and other non-merger health care matters. The response period will commence once all necessary information has been received by the Commission.

In the mid-1970's, the FTC formed a division within the Bureau of Competition to investigate potential antitrust violations involving health care. The Health Care Division consists of approximately 40 lawyers and investigators who work exclusively on health care antitrust matters. The Commission and its health care staff have responded to numerous requests for guidance from health care industry participants through, among other things, the advisory opinion letter process. Those advisory opinions are listed below by topic and by year. Section II contains a list of advisory opinions by topic. Some advisory opinions are listed in more than one category because they discuss several issues. A yearly index follows this topic index in Section III. Commission advisory opinions are indicated by an asterisk (*); other opinions are staff advisory opinions. The indices, advisory opinions, and other information relating to the Commission’s advisory opinion program are available at the FTC’s website at https://www.ftc.gov/tips-advice/competition-guidance/industry-guidance/health-care (for the advisory opinions, look under the “Advisory Opinion” drop down menu and “View More Advisory Opinions”). For additional information concerning the advisory opinion program, contact Robert Canterman at (202) 326-2701.
