EXHIBIT 2
CellMark Biopharma is focused on developing innovative products for the unmet medical needs of our global population. With its first product launches focused on the oncology or cancer sector, CellMark has provided two patent pending advanced cancer nutrition supplements CellAssure and Cognify.

CellAssure specifically addresses the malnutrition suffered by over 80% of all cancer patients by providing one of the most advanced nutritional formulas for one's cancer diet than has been available in the past.

Cognify is the first nutritional supplement specifically formulated to protect against and/or help reduce brain fog (a.k.a. chemo brain) associated with cancer and cancer treatments such as chemo therapy.
