Pan/Tilt Internet Camera Server

The Pan/Tilt Internet Camera Server provides real-time security surveillance over a large viewing area. Monitor people in your camera's viewing field and manage the camera from any Internet connection. See more with one Internet camera—remotely pan the camera side-to-side a remarkable 330 degrees and tilt up-and-down 105 degrees.

Le serveur de caméra Internet Pan/Tilt permet une surveillance en temps réel sur une surface étendue. Contrôlez les personnes dans le champ de vision de votre caméra et gérez cette dernière depuis n'importe quelle connexion Internet. Obtenez un champ de vision plus étendu avec une seule caméra, en la faisant pivoter de 330° et en la faisant basculer de 105°.

El servidor de cámara de Internet "Pan/Tilt" ofrece vigilancia de seguridad en tiempo real en áreas de visión muy amplias. Controle a la gente en el campo de visión de su cámara y maneje la cámara desde cualquier conexión de Internet. Más alcance con una cámara de Internet - controle la cámara de forma remota de izquierda a derecha hasta 330 grados y muévala de arriba a abajo hasta 105 grados.

Die Internetkamera mit Schwenk-/Neigekopf erlaubt die Überwachung eines großen Bereichs in Echtzeit. Die Kontrolle der im Sichtfeld der Kamera anwesenden Personen und die Steuerung des Geräts können über eine beliebige Internetverbindung erfolgen. Lassen Sie sich nichts entgehen, auch wenn Sie nur eine einzige Internetkamera verwenden: Das Gerät lässt sich seitlich um beeindruckende 330 Grad schwenken und in der Höhe um 105 Grad neigen.

Il server per videocamera IP con funzione pan/tilt (TV-IP410) offre la sicurezza di una sorveglianza in tempo reale su una vasta area. Controlla chi entra nel campo di visualizzazione della tua videocamera e gestisci la videocamera da qualsiasi connessione internet. Controlla un'area più ampia con una sola videocamera IP – espandine il campo di visualizzazione orizzontale fino a ben 330° e verticale fino a 105°.

O Servidor de Câmera Internet com Pan/Tilt proporciona segurança em tempo real sobre uma vasta área. Monitore pessoas no campo de visão de sua câmera e gerencie a câmera a partir de qualquer conexão com a Internet. Veja mais com uma câmera Internet – movimento remotamente a câmera em incríveis ângulos de 330° para os lados e 105° de cima para baixo.

Беспроводная Интернет камера-сервер с поворотом в горизонтальной/вертикальной плоскости позволяет наблюдать за значительной площадью в режиме реального времени. Наблюдать за происходящим в зоне обзора и управлять камерой можно из любой точки с выходом в Интернет. Камеры могут поворачиваться на 330 градусов в горизонтальной и на 105 градусов в вертикальной плоскости, что значительно увеличивает зону обзора каждой камеры.
