Florida Statutes (2014)25, 28

Florida Deceptive and Unfair Trade Practices Act, Section 501.20425

Lifewatch, Inc., markets medical alert devices to elderly consumers throughout the country using third-party telemarketers that blast illegal robocalls and engage in deceptive telemarketing practices. Lifewatch is responsible for millions of prerecorded robocalls, which often make the completely false claim that consumers can receive a medical alert device for free because someone close to the consumer already purchased or recommended the device for them. Frequently, the robocalls describe the system as being endorsed by major organizations like the American Heart Association, American Diabetes Association, National Institute on Aging, AARP, American Red Cross, and a variety of other organizations – none of which actually endorse Lifewatch’s products or services. Consumers who stay on the line are transferred to live telemarketers, who reiterate and expand upon these misrepresentations.

Eventually, consumers learn that they will be responsible for paying a monthly monitoring fee (usually by credit card), but the telemarketers assure consumers that they will not be charged anything until they receive the device and choose to activate it. Lifewatch charges consumers almost immediately, however, and continues to charge even if the device is never activated. Consumers also are told that they can cancel the service at any time without any further obligation or payment, only to find out when they try to cancel that they have to return the device at their own expense or pay a penalty of \$400 or more.

Since 2012, tens of thousands of consumers have complained to the FTC about such robocall campaigns. That is not surprising given that just one of Lifewatch’s telemarketers alone blasted nearly two million robocalls – resulting in at least 800,000 telephone

connections – daily. Every one of these connected calls violated one or more provisions of the Telemarketing Sales Rule, 16 C.F.R. Part 310, the FTC rule aimed at combating deceptive and abusive telemarketing practices. These violations are separate and apart from the deceptive claims or misrepresentations made in the prerecorded messages and subsequent telemarketing pitch.

This instant case is just the latest in a series of legal actions against Lifewatch related to its telemarketing practices, none of which have stopped the conduct.¹ Lifewatch was first sued in November 2012 by the Indiana Attorney General because of the illegal robocalling being done on its behalf. Lifewatch’s response was that the telemarketers were independent contractors that Lifewatch could not control. Then in May 2013, Lifewatch was sued by one of its competitors, Life Alert Emergency Response, Inc., again because of the illegal robocalling, but also for alleged misrepresentations and trademark infringement claims made on Lifewatch’s behalf by these telemarketers. Again, Lifewatch said it could not control its telemarketers, and further, it would be impossible for it to follow any court order requiring it

to police its telemarketers.² There, the Ninth Circuit explicitly rejected this argument, stating:

At bottom, Lifewatch would have us believe that any infringement is traceable to actions by telemarketers for which it has no responsibility. The district court did not buy this story of telemarketers-gone-rogue, and neither do we.

Life Alert Emergency Response, Inc. v. Lifewatch, Inc., 601 Fed. Appx. 469, 474, 2015 U.S. App. LEXIS 1760, at *8 (9th Cir. Feb. 4, 2015). Yet even after this ruling, Lifewatch continues to rely upon this defense in a host of class actions and other private suits.

Plaintiffs themselves brought an action in January 2014 against the telemarketing enterprise responsible for the majority of Lifewatch's sales (the "Worldwide Telemarketers"), alleging the same misconduct at issue here.³ While the operation was eventually shut down, in conversations with Plaintiffs, Lifewatch again merely trotted out its "ostrich" defense, claiming that it had no idea that the telemarketers responsible for making such a large percentage of its sales were engaged in widespread illegalities. And now, remarkably, eighteen months later and more than a year after it began discussions with the FTC about the conduct now challenged here, Lifewatch's illegal telemarketing continues.

The simple truth is that Lifewatch is well aware of, and responsible for, the illegal tactics employed by its telemarketers. These tactics are not the unavoidable result of bad conduct by a few rogue telemarketers – these tactics are responsible for making Lifewatch

the company it is today.⁴ Unfortunately, most if not all of its sales come from blatantly illegal tactics.

Plaintiffs have submitted overwhelming evidence demonstrating both Lifewatch's abusive telemarketing practices and its widespread deceptive telemarketing practices. Either basis is sufficient to grant Plaintiffs' motion for a preliminary injunction, which seeks an immediate halt to the illegal telemarketing. The requested relief is necessary to prevent ongoing injury to consumers throughout the country, but is narrowly tailored so as not to interfere with any of Lifewatch's legitimate business.

I. LIFEWATCH'S DECEPTIVE PRACTICES

Defendant **Lifewatch, Inc.**, also does business as Lifewatch USA and Medical Alarm Systems. Lifewatch was incorporated in 1996 and is based in Lynbrook, New York.⁵ According to its website, Lifewatch also has an office in Lauderhill, Florida, and has regional offices in Illinois, California, Pennsylvania, and Texas.⁶ Defendant **Evan Sirlin** is the President and CEO of Lifewatch, and, as Lifewatch itself explained in its response to one of the many state law enforcement Civil Investigative Demands of which it has been served in the past few years, "creates the corporation's overall vision, formulates the company's overall business plan, and oversees business operations."⁷

Lifewatch is one of many companies that offer medical alert monitoring systems. These systems generally consist of a small pendant, usually worn on a necklace or wristband,

and a base unit about the size of an answering machine, connected to a telephone line. The systems are intended for the elderly and disabled, and marketed as a way to allow them to continue to live safely in their homes, instead of moving to a nursing home or other assisted living facility. In case of an emergency, the consumer can simply press a button on the pendant and be connected to a call center. The medical alert devices themselves are often provided at no cost, but require consumers to pay a monthly monitoring fee.

Lifewatch relies heavily on telemarketing to sell its medical alert device.⁸ These telemarketing campaigns have two components – a robocall, followed by a live telemarketing call. All aspects of Lifewatch’s campaigns are illegal.

A. Lifewatch’s Abusive Telemarketing Practices

Lifewatch is responsible for the transmission of hundreds of millions of robocalls.⁹ In 2012 and 2013, just one of Lifewatch’s telemarketers was itself responsible for sending out at least 800,000 robocalls that were answered by a person or answering machine each day.¹⁰ These robocalls are *per se* violations of the TSR.

Lifewatch’s telemarketing campaigns routinely violate other provisions of the TSR as well. For example, consumers complain that Lifewatch contacts them incessantly, regardless

⁸ PX 16, Kane Dec. ¶ 3 & Att. A at 6 (Lifewatch paid Worldwide \$15,741, 518.50 between March 2012 and December 2013); *see also* PX 14, Hilgar Dec. ¶ 11 (all of the telemarketing conducted by Worldwide and its related entities was on behalf of Lifewatch); PX 15, Settecase Dec. ¶ 6 (Worldwide telemarketing was exclusively outbound robocalls).

⁹ Since the robocall messages never identify Lifewatch as the seller – an independent violation of the TSR, 16 C.F.R. § 310.4(b)(1)(v)(B)(ii) – it is impossible to determine exactly how many consumers have complained to the FTC about Defendants’ telemarketing calls. But from 2012 to present, more than 90,000 consumers have complained about “medical alert” robocalls. PX 1, Menjivar Dec. ¶ 53. Consumers specifically complained about Lifewatch 665 times. *Id.* ¶ 54; *see also id.* ¶ 41r, Att. XX at 20 (telemarketing manager states the “main PBX server that generates the call” makes around 10,000 calls a day) & 24.

of whether they are on the National Do Not Call Registry.¹¹ This includes a great number of elderly consumers who complain of being harassed by Lifewatch's calls,¹² many of whom signed up for the Do Not Call list specifically to avoid these types of scams.¹³ Similarly, consumers continue to be harassed by these calls even after pressing the number specified in the robocall messages to be taken off of Lifewatch's calling list.¹⁴ Consumers who stay on

the line and directly ask live operators to stop calling also continue receiving calls.¹⁵ Nor can consumers screen these calls by looking at their Caller ID. Lifewatch's telemarketers transmit phony Caller ID information ("spoofing"), misrepresenting the caller and masking the origin of the call.¹⁶ Defendants also never transmit or disclose their company name, instead using a slew of fake names that cannot be traced back to them.¹⁷

B. Lifewatch's Deceptive Telemarketing Practices

Not only is the delivery mechanism of Lifewatch's calls illegal, but the substance of the telemarketing calls are also rife with misrepresentations designed to trick consumers into agreeing to monthly charges. From robocalls that imply that friends or family already have purchased Lifewatch's service for the consumer, or that the service is endorsed by prominent national organizations, to live telemarketers that reinforce these misrepresentations and introduce others, many consumers are pressured to sign up for Lifewatch's service when they otherwise would not have.

Lifewatch's prerecorded messages are also replete with false statements.²² Many of the robocalls claim that the consumer is getting the call because the consumer was referred by a doctor, friend, or family member, or even that the system has already been paid for.²³ In reality, nobody has truly referred the consumers to Lifewatch.²⁴ Other robocalls falsely claim that the American Heart Association, American Diabetes Association, or other health care organizations are urging senior citizens to get medical alert systems.²⁵ And still others claim that "[d]ue to new health care regulations, you are now eligible to receive a personal medical alert system at no cost to you."²⁶ Of course, no new regulations exist.

Several of the robocalls attempt to lure in senior citizens by promising them valuable bonuses for "taking advantage today."²⁷ One such recording, which sounds like a public service announcement, claims that a nonexistent new national senior assistance program or health care regulation is now available to the consumer which provides \$1000 or \$3000 in

free grocery coupons.²⁸ Other messages also offer 75% prescription discount cards.²⁹ Often the robocalls focus on these other benefits and portray the free medical alert device as if it is an added bonus rather than the focus of the call.³⁰ In reality, these coupons and discount cards offer little or no benefit to most consumers.³¹

The recordings all ultimately tell consumers to “press one” to get more information or to have the medical alert device shipped out to them.

2. Lifewatch’s Deceptive Live Telemarketing Calls

Consumers who press one are transferred to one of Lifewatch’s telemarketers. Plaintiffs know of more than fifty telemarketers that Lifewatch has used over the years,³² but no matter which telemarketer handles the call, consumers’ experiences are similar. After introducing themselves, Lifewatch’s telemarketers immediately tell consumers that they will receive “a FREE medical alert system package that has a value of over \$400.”³³ The

fee).⁵¹ This is not true, however, as consumers continue to complain of Lifewatch's unexpected charges.⁵²

Consumers who are reluctant to hand over their credit card or banking information are aggressively pressured to agree to the fee. Often, as with the robocall messages, the telemarketers promise consumers valuable bonuses such as free grocery coupons or prescription drug discounts which they claim will offset the cost of the monitoring services.⁵³ In addition, Lifewatch promises a generous cancellation policy. Consumers are frequently reassured, “[y]ou’re not on a contract so you don’t have to keep it at all. If you don’t like it for any reason, that’s fine. You can simply call the 1-800 number and cancel.”⁵⁴ Should

At the conclusion of the telemarketing call, consumers are walked through a verification process, where the telemarketers quickly recite Lifewatch's terms and conditions and prompt consumers to agree to the charges.⁶⁰ Recently, perhaps in a last ditch attempt to comply with the law, Lifewatch has begun a verification process by having its telemarketers

C. Lifewatch's Relationship with Telemarketers

Lifewatch has continued its practices, in the face of enforcement actions and civil lawsuits, apparently based on a misguided belief that it has structured its relationships with telemarketers in such a way as to insulate itself from liability. Lifewatch has relied on more than fifty telemarketers to sell its medical alert device, including the Worldwide Telemarketers who were shut down by Plaintiffs in 2014, and other Lifewatch telemarketers which have been sanctioned by regulators because of their illegal conduct.⁶² Just last week, Plaintiffs sued yet another telemarketer who had worked for Lifewatch.⁶³ No matter how its contracts between Lifewatch and its telemarketers are drafted, however, Lifewatch cannot escape responsibility for the abusive and deceptive practices of its telemarketers.

When Lifewatch first began using telemarketers, it maintained control over the outside companies by entering into contracts that required the telemarketers to “only use scripts identified by [Lifewatch] as approved...”⁶⁴ Not coincidentally, at approximately the time Lifewatch was being sued by the Indiana Attorney General, the company restructured its

contracts. In mid-2012, Lifewatch began entering into “Purchase Agreements,” which are designed to make Lifewatch appear to have no role in the telemarketing.⁶⁵ These Purchase Agreements, signed by Sirlin, purportedly allow third party “sellers” to independently market medical alert systems to consumers, and then subsequently offer live “contracts” to Lifewatch and other medical alert companies on a non-exclusive basis for purchase.⁶⁶ The sellers are also required to record all sales calls and make them available to Lifewatch. Unlike some of the other contract terms, which telemarketers routinely ignore, it does appear that sales calls are recorded and that Lifewatch has periodically reviewed them.⁶⁷

Regardless of the contract terms, the arm’s length relationship that Lifewatch claims to have with its sellers is a sham.⁶⁸ Lifewatch has claimed that it does not know which

sellers are engaged in telemarketing,⁶⁹ yet its employees have been able to identify Lifewatch's telemarketers when pressed by consumers.⁷⁰ Indeed, the reverse is true too – Lifewatch's telemarketers will sometimes reveal that they are working for Lifewatch when pressured by consumers.⁷¹ Furthermore, overwhelming evidence demonstrates that Lifewatch is not only keenly aware that its telemarketers are making misrepresentations and violating the TSR, but in fact condones and directs these practices.⁷² For example, Lifewatch provides its telemarketers with a "Call Center Welcome Package," which includes sample scripts replete with misrepresentations about Lifewatch's product and services, as well as explicit instructions that Lifewatch must review and approve all scripts and rebuttals.⁷³ Sirlin himself has also represented that Lifewatch monitors and controls its telemarketers, and

Furthermore, Lifewatch's frequent claim that its telemarketers are merely securing "leads" on a non-exclusive basis is simply not true. In reality, the telemarketers work exclusively for Lifewatch.⁷⁵ Moreover, when legal action has been taken against various Lifewatch telemarketers, Lifewatch has simply continued to do business with the same people at the same location but under the façade of a different corporate name.⁷⁶

These witnesses also confirm that, every week, Lifewatch received and reviewed numerous recordings of telemarketing calls containing misrepresentations.⁸¹

In addition to supervising and directing its telemarketers, Lifewatch also participates directly in the sales process. In fact, as mentioned above, consumers who make purchases from Lifewatch's supposed independent telemarketers are actually transferred to Lifewatch during the telemarketing call to confirm the terms of the transactions.⁸² Furthermore, the telemarketers do not process customers' initial charges; instead, Lifewatch (or the companies to which it assigns telemarketing clients)⁸³ are the only entities that ever bill consumers' credit cards or withdraw funds from consumers' bank accounts for their medical alert devices

and monitoring services. Significantly, those transactions take place almost immediately after the telemarketers hang up.⁸⁴

Lifewatch is fully aware of its telemarketers' illegal practices. Lifewatch and Sirlin, individually, have been sued numerous times in connection with the company's telemarketing, including an August 2012 action by the Indiana Attorney General alleging violations of Indiana's Do Not Call law;⁸⁵ the Life Alert lawsuit described above, which alleged both trademark violations and illegal robocalling; and more than a dozen private lawsuits asserting violations of the Telephone Consumer Protection Act, 47 U.S.C. § 227. Lifewatch also has received countless complaints from consumers about their marketing practices, both directly and from the Better Business Bureau.⁸⁶

The Ninth Circuit has already squarely rejected Lifewatch's attempt to hide behind its telemarketers. In its trademark infringement case against Lifewatch, Life Alert sought a preliminary injunction to stop Lifewatch from continuing to use Life Alert's trademarks in telemarketing campaigns. After extensive discovery and an evidentiary hearing, the district court rejected Lifewatch's argument that it cannot control its telemarketers, finding that the

D (email to Lifewatch executives from another medical alert company discussing consumer complaints related to Lifewatch's telemarketing practices). If Lifewatch has any doubts about whether its telemarketers are using scripts full of misrepresentations, it could simply ask the telemarketers to hand over the scripts the telemarketers themselves filed when they obtained telemarketing licenses, most of which include multiple lies.

Purchase Agreements still gave Lifewatch sufficient power to monitor and control what the telemarketers said, and to terminate the contracts if the telemarketers were violating the law.⁸⁷ The Ninth Circuit affirmed the district court’s decision, succinctly concluding that “ample evidence supports the inference that LifeWatch directs, induces, is aware of, and can control the infringing telemarketing.”⁸⁸

II. ARGUMENT

Defendants’ business practices violate Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), multiple provisions of the Telemarketing Sales Rule (“TSR”), 16 C.F.R. Part 310, and Section 501.204 of the Florida Deceptive and Unfair Trade Practices Act (“FDUTPA”), Chapter 501, Part II, Florida Statutes (2014). To prevent any further injury to innocent consumers, the FTC and State of Florida ask that the Court issue their proposed PI to enjoin Defendants’ ongoing law violations.

A. This Court Has the Authority to Grant the Requested Relief.

The FTC Act provides that “in proper cases the Commission may seek, and after proper proof, the court may issue, a permanent injunction.” 15 U.S.C. § 53(b). Once the Commission invokes the federal court’s equitable powers, the full breadth of the court’s authority is available, including the power to grant such ancillary final relief as rescission of contracts and restitution. *FTC v. Febre*, 128 F.3d 530, 534 (7th Cir. 1997); *FTC v. Amy Travel Serv., Inc.*, 875 F.2d 564, 571-72 (7th Cir. 1989). The court may also enter a

A at 17 (in response to BBB complaint: “As soon as we became aware of [consumer’s] Complaint as to what this particular Sales Agency was doing..., we cut them off. We will no longer do business with them.”); PX 6, Smith ¶ 9 (Lifewatch COO indicates company stops working with telemarketers who act illegitimately).

temporary restraining order, a preliminary injunction, and whatever additional preliminary relief is necessary to preserve the possibility of providing effective final relief. *FTC v. World Travel Vacation Brokers, Inc.*, 861 F.2d 1020, 1026 (7th Cir. 1988); *see also Amy Travel*, 875 F.2d at 571. Injunctive relief is appropriate even if a defendant has ceased its illegal activities if there is “cognizable danger of recurrent violation,” *U.S. v. W.T. Grant Co.*, 345 U.S. 629, 633 (1953), and the commission of past illegal conduct is “highly suggestive of the likelihood of future violations.” *CFTC v. Hunt*, 591 F.2d 1211, 1220 (7th Cir. 1979); *see also FTC v. Direct Mktg. Concepts, Inc.*, 648 F. Supp. 2d 202, 212 (D. Mass. 2009); *FTC v. Think Achievement Corp.*, 144 F. Supp. 2d 1013, 1017 (N.D. Ind. 2000).⁸⁹

B. Plaintiffs Meet the Applicable Standard for Injunctive Relief.

Section 13(b) of the FTC Act authorizes a preliminary injunction “[u]pon a proper showing that, weighing the equities and considering the Commission’s likelihood of ultimate success, such action would be in the public interest.” 15 U.S.C. § 53(b). To grant preliminary injunctive relief in an FTC Act case, the district court must: (1) determine the likelihood that the Commission will ultimately succeed on the merits, and (2) balance the equities. *World Travel*, 861 F.2d at 1029. Under this “public interest” test, “it is not necessary for the FTC to demonstrate irreparable injury.” *Id.* When the court balances the equities, the public interest “must receive far greater weight” than any private concerns. *Id.*

⁸⁹ The court’s expansive equitable powers also are available under the TSR. *See* 15 U.S.C. § 6105(b). Courts may enter any relief necessary to redress injury to consumers caused by the TSR violation, including “rescission or reformation of contracts [and] the refund of money or return of property.” 15 U.S.C. §§ 57b(a)(1) & (b).

C. Plaintiffs Have Demonstrated a Likelihood of Success on the Merits.

Defendants' false and deceptive claims squarely violate federal and state consumer protection laws. Defendants' telemarketing practices, including their use of robocalls and spoofed Caller ID information, also violate numerous TSR provisions. In fact, these practices have continued despite other lawsuits aimed at ending them.

1. Lifewatch's Deceptive Practices Violate the FTC Act, the TSR and the FDUTPA.

Defendants' activities are deceptive acts or practices under Section 5(a) of the FTC Act, 15 U.S.C. § 45(a). An act or practice is deceptive if it involves a material misrepresentation or omission that is likely to mislead consumers acting reasonably under the circumstances. *See FTC v. Bay Area Bus. Council, Inc.*, 423 F.3d 627, 635 (7th Cir. 2005); *FTC v. World Media Brokers*, 415 F.3d 758, 763 (7th Cir. 2005); *FTC v. QT, Inc.*, 448 F. Supp. 2d 908, 957 (N.D. Ill. 2006). The materiality requirement is satisfied if the misrepresentation or omission involves information that is likely to affect a consumer's choice of, or conduct regarding, a product or service. *See Kraft, Inc. v. FTC*, 970 F.2d 311, 322 (7th Cir. 1992), *cert. denied*, 507 U.S. 909 (1993). Reliance on express claims is considered presumptively reasonable. *See World Travel*, 861 F.2d at 1029. Courts consider the likely effect of a statement on the mind of an ordinary consumer when evaluating its deceptiveness, *see Bay Area*, 423 F.3d at 635 (citing *FTC v. Freecom Commc'ns., Inc.*, 401 F.3d 1192, 1202 (10th Cir. 2005)), and evaluate the overall net impression created by the acts or practices. *Kraft*, 970 F.2d at 322; *Sterling Drug, Inc. v. FTC*, 741 F.2d 1146, 1154 (9th Cir. 1984). The overall net impression is analyzed from the perspective of the target audience – in this case, elderly consumers. *See Kalwajtys v. FTC*, 237 F.2d 654, 656 (7th

Cir. 1956); *FTC v. Washington Data Resources*, 856 F. Supp. 2d 1247, 1272 (M.D. Fla. 2012); *FTC v. Think Achievement*, 144 F. Supp. 2d 993, 1010 (N.D. Ind. 2000).

Lifewatch's deceptive conduct similarly violates the TSR and FDUTPA. The TSR prohibits sellers and telemarketers from (1) misrepresenting a seller's or telemarketer's affiliation with, or endorsement or sponsorship by, any person or government entity, and (2) making a false or misleading statement to induce any person to pay for goods or services. 16 C.F.R. §§ 310.3(a)(2)(vii) and (a)(4). The FDUTPA declares unlawful "unfair or deceptive acts or practices in the conduct of any trade or commerce." Chapter 501, Part II, Florida Statutes (2012). In construing this Section, the Florida Legislature has declared that "due consideration and great weight shall be given to the interpretations of the Federal Trade Commission and the federal courts relating to Section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. § 45(a)(1), as of July 1, 2006." *Id.*

As described above, Lifewatch and its telemarketers make several false claims to induce consumers to part with their credit card or bank account information. First, Defendants falsely represent that somebody the consumers know has already purchased the medical alert system for them. Second, Defendants falsely claim that major health organizations and tens of thousands of health care professionals endorse Lifewatch's medical alert device. Third, they claim that consumers will not be charged until they receive and choose to activate the system. Finally, Defendants falsely claim that consumers may cancel Defendants' monitoring service at any time without any further financial obligation.

These claims are material because they explain why consumers pay money to Defendants.⁹⁰ There is no question that Defendants' false representations are likely to mislead consumers acting reasonably under the circumstances because, in fact, they do. Further, consumers have no obligation to doubt the veracity of Defendants' express claims, particularly since false claims are "inherently likely to mislead." *FTC v. Direct Mktg. Concepts, Inc.*, No. 04-11136-GAO, 2004 WL 1399185, at *5 (D. Mass. June 23, 2004).

2. Lifewatch's Telemarketing Practices Violate the TSR.

Defendants' conduct also violates a series of specific provisions in the TSR. In addition to prohibiting misrepresentations and material omissions, the TSR imposes requirements that apply to specified practices:

TSR Sections 310.4(b)(1)(iii)(A) & (B) prohibit telemarketers from initiating, or sellers from causing telemarketers to initiate, outbound telephone calls to: 1) a consumer who previously has stated that he or she does not wish to receive an outbound telephone call made by or on behalf of the seller whose goods or services are being offered; and 2) a consumer's telephone number on the National Do Not Call Registry. 16 C.F.R. § 310.4(b)(1)(iii)(A) & (B). Defendants' telephone calls are responsible for more than 90,000 Do Not Call complaints received by the FTC.⁹¹ By indiscriminately dialing, or causing others to dial, countless consumers, Defendants pay no attention to the Registry, or to consumers' removal

A at 28; PX 29, D'Addario Dec. ¶ 7; PX 30, Daniel Dec. ¶ 3 ("Because I believed that somebody I knew was concerned about me and had paid for the device, I gave the caller my banking information and agreed to pay a monthly monitoring fee of \$34.95."); PX 47, McCourt Dec. ¶ 3; PX 48, McCraw Dec. ¶ 5; PX 56, Rench Dec. ¶¶ 4 & 6; PX 57, Rivard Dec. ¶¶ 3 & 7; PX 61, Wagler Dec. ¶ 4.

requests conveyed to Defendants or their telemarketers.⁹² The Worldwide Telemarketers alone generated 800-900,000 such violations per day for the two years they called on behalf of Lifewatch.⁹³

TSR Section 310.4(a)(8) requires sellers or telemarketers to transmit the telephone number and name of the telemarketer or seller to any caller identification service in use by a recipient of a telemarketing call. 16 C.F.R. § 310.4(a)(8). Defendants or their telemarketers transmit fake telephone numbers and names to consumers' Caller ID services, in clear violation of the TSR.⁹⁴

TSR Section 310.4(b)(1)(v)(A) bans robocalls unless the seller or marketer has consumers' express agreement, in writing, to receive such calls. 16 C.F.R. § 310.4(b)(1)(v)(A). Defendants have no such permission and their robocalls are flatly prohibited.⁹⁵

TSR Sections 310.4(b)(1)(v)(B)(ii) & (d) mandate that calls delivering prerecorded messages disclose "truthfully, promptly, and in a clear and conspicuous manner" the identity of the seller, that the purpose of the call is to sell goods or services, and the nature of the goods or services. 16 C.F.R. § 310.4(b)(1)(v)(B)(ii). Defendants' robocalls use fake

The numbers that show up on consumers' caller IDs intentionally include local area codes because "consumers are more likely to answer telephone calls made from a local number." company names and do not disclose that they are selling a medical alert system.⁹⁶ Similarly, Lifewatch's telemarketers universally violate 16 C.F.R. § 310.4(d), which requires telemarketers to make the same disclosures during all outbound telephone solicitations.⁹⁷

3. Lifewatch is Liable for the Conduct of Its Telemarketers.

As a legal matter, Lifewatch is directly liable for the deceptive claims made by, and tactics of, the telemarketers it has employed. The telemarketers are Lifewatch's agents, and Lifewatch is therefore responsible for their deceptive acts and practices. *See, e.g., FTC v. Five-Star Auto Club Inc.*, 97 F. Supp. 2d 502, 527 (S.D.N.Y. 2000) (“The law is clear that under the FTC Act, a principal is liable for misrepresentations made by his/her agents (i.e., those with the actual or apparent authority to make such representations) regardless of the unsuccessful efforts of the principal to prevent such misrepresentations.”).

Lifewatch also is liable for the deceptive and abusive practices of its telemarketers under the TSR. Because Lifewatch is a “seller” under the TSR, it is strictly liable for the

telemarketers' deceptive practices.⁹⁸ *See Stefanchik*, 559 F.3d at 930. Similarly, Lifewatch is legally responsible for the abusive telemarketing practices because it caused its telemarketers to engage in the prohibited conduct.⁹⁹ *See, e.g., U.S. v. Dish Network, LLC*, 667 F. Supp. 2d 952, 958-59 (C.D. Ill. 2009) (unless a seller can demonstrate that it has adopted written procedures and training for its telemarketers to ensure compliance with the TSR, and that it monitors and enforces the guidelines, the seller is liable for any violations by its telemarketers). In *Dish*, the court held that "a seller 'causes' the telemarketing activity of a telemarketer by retaining the telemarketer and authorizing the telemarketer to market the seller's products and services." *Id.* at 959. The court recently reiterated this test in its summary judgment ruling, finding Dish liable for nearly three million calls in violation of the TSR. *U.S. v. Dish Network, LLC*, No. 09-3073, 2014 U.S. Dist. LEXIS 172020, at *174 (C.D. Ill. Dec. 12, 2014). Thus to establish Lifewatch's liability for its telemarketers' abusive practices under the TSR, Plaintiffs only must show that: (1) Lifewatch retained the outside sellers; (2) Lifewatch authorized the outside sellers to market its products and services; and (3) the outside sellers violated the TSR. *Id.* Plaintiffs have clearly met that standard.

Beyond that, it is clear that Lifewatch is well aware of the illegal tactics of its telemarketers and failed to take action to correct them. As noted, the Indiana Attorney

⁹⁸ *See* 16 C.F.R. § 310.3(a)(2) & (4). Under the TSR, a "Seller" is "any person who, in connection with a telemarketing transaction, provides, offers to provide, or arranges for others to provide goods or services to the customer in exchange for consideration." 16 CFR § 310.2(aa). "Telemarketing" is defined by the TSR as "a plan, program, or campaign which is conducted to induce the purchase of goods or services or a charitable contribution, by use of one or more telephones and which involves more than one interstate telephone call." 16 CFR § 310.2(dd).

⁹⁹ *See id.* at §310.4(b)(1). It is an abusive telemarketing practice for a seller to cause a telemarketer to do a variety of things, including calling people on the DNC registry, calling people who have made specific opt-out or removal requests, and making most robocalls. 16 CFR § 310.4(b)(1).

General, dozens of private plaintiffs, and Life Alert have all sued Lifewatch over the robocalls initiated by its telemarketers. Moreover, Plaintiffs have submitted overwhelming evidence demonstrating that Defendants are not only keenly aware that its telemarketers are making misrepresentations and engaging in abusive telemarketing practices, but also that they exercise actual control over their telemarketers.¹⁰⁰

Despite this knowledge, there is virtually no evidence that Lifewatch has made any serious effort to curb the illegal activities of its telemarketers. Instead, Lifewatch's reaction to any formal action being taken against its telemarketers appears to be nothing more than taking steps to further hide its own involvement.¹⁰¹

4. Lifewatch Has Assisted and Facilitated TSR Violations.

Alternatively, even if Lifewatch were not directly liable for the deceptive and abusive practices of its telemarketers, it is liable under the TSR's assisting and facilitating provision. Under § 310.3(b) of the TSR, it is a deceptive telemarketing act or practice and a violation of the TSR "for a person to provide substantial assistance or support to any seller or telemarketer when that person knows or consciously avoids knowing that the seller or telemarketer is engaged in any act or practice" that is deceptive or abusive under the TSR. 16 C.F.R. § 310.3(b).

Lifewatch has certainly provided its telemarketers with substantial assistance and support. Indeed, if Lifewatch did not offer and agree to pay the telemarketers, bill the

¹⁰⁰ See *supra* Section I.C, and accompanying notes.

¹⁰¹ As discussed above, after Indiana filed its suit, Lifewatch simply restructured its contracts with telemarketers from "Telemarketing Agreements" to "Purchase Agreements." See PX 1, Menjivar Dec. Att. R at 1 (Marketing Services Agreement with Platinum Marketing Group dated Oct. 25, 2012), Att. S at 1 (Purchase Agreement with Payless Solutions dated March 18, 2014), Att. T at 1 (Purchase Agreement with Life One Wireless dated May 1, 2013) & Att. U at 1 (Purchase Agreement with QCSS dated March 26, 2014).

consumers, and provide the monitoring service to consumers, the telemarketers would not engage in any of the solicitations in the first place. *See FTC v. Chapman*, 714 F.3d 1211, 1216-17 (10th Cir. 2013) (no need to show “direct connection” between assistance and misrepresentations to constitute “substantial assistance” under the TSR; affirming liability for defendant who provided the services and products marketed to consumers but was not involved in “marketing efforts”); *FTC v. Hes Merch. Servs. Co., Inc., et al.*, No. 6:12-cv-1618-ORI-22KRS, 2014 WL 6863506, at *7-8 (M.D. Fla. Nov. 18, 2014) (processing credit card transactions sufficient to constitute “substantial assistance”). As described above, Lifewatch also provided scripts, supervised and controlled its telemarketers, and provided the medical devices themselves for every customer.¹⁰² Given Lifewatch’s involvement and the history of governmental and private litigation taken against it and its telemarketers, there also can be no question that Lifewatch knew or certainly should have known of its telemarketers’ illegal conduct.¹⁰³

D. Sirlin is Personally Liable.

Defendant Sirlin is personally liable for the illegal conduct engaged in by Lifewatch. An individual defendant may be held liable for injunctive relief and monetary restitution under the FTC Act if the Court finds (1) that the defendant participated directly in or had some measure of control over a corporation’s deceptive practices, and (2) had actual or constructive knowledge of the practices. *See World Media Brokers*, 415 F.3d at 764; *Bay Area*, 423 F.3d at 636; *Amy Travel*, 875 F.2d at 573-74. Authority to control may be evidenced by “active involvement in the corporate affairs, including assuming the duties of a

corporate officer.” *World Media Brokers*, 415 F.3d at 764 (citing *Amy Travel*, 875 F.2d at 573). The knowledge requirement is satisfied by a showing that the defendant (1) had actual knowledge of the deceptive acts or practices, (2) was recklessly indifferent to the truth or falsity of the representations, or (3) had an awareness of a high probability of fraud coupled with an intentional avoidance of the truth. *Id.*; *Bay Area*, 423 F.3d at 636; *Amy Travel*, 875 F.2d at 573. An individual’s “degree of participation in business affairs is probative of knowledge.” *Id.* at 574. The Commission need not prove subjective intent to defraud. *See id.* To avoid liability, an individual defendant must do “‘everything in his power’ to assure compliance with the law.” *World Travel*, 861 F.2d at 1031 (quoting *U.S. v. Johnson*, 542 F.2d 710, 712-13 (8th Cir. 1976)).

Sirlin easily satisfies the standard for individual liability. Besides being an officer of Lifewatch,¹⁰⁴ Sirlin signed the Purchase Agreements Lifewatch entered into with the telemarketers,¹⁰⁵ and signed Lifewatch’s telemarketing license in Florida.¹⁰⁶ He also admitted to an executive at another medical alert company that Lifewatch employs companies engaged in robocalling but he has no intention of stopping.¹⁰⁷ Sirlin reassured the same executive that Lifewatch monitors and controls its telemarketers.¹⁰⁸ Sirlin had a first-hand view of the telemarketing operations as well, having visited the Worldwide

Telemarketers.¹⁰⁹ Finally, Sirlin was personally named in many of the governmental and private legal actions brought as a result of the illegal telemarketing.¹¹⁰

E. The Balance of Equities Decidedly Favors Injunctive Relief.

Not only are Plaintiffs likely to succeed on the merits, but the balance of the equities also tips decidedly in Plaintiffs' favor. In balancing the equities, the Court must assign greater weight to the public interest than to any of Defendants' private concerns. *World Travel*, 861 F.2d at 1029; *see also FTC v. Weyerhaeuser Co.*, 665 F.2d 1072, 1083 (D.C. Cir. 1981) (private equities alone insufficient to justify denial of injunction).

The public equities in this case are compelling, as the public has a strong interest in immediately halting an abusive and deceptive scheme targeting vulnerable consumers, which has harmed millions of consumers and resulted in thousands of complaints. Defendants, in contrast, have no legitimate interest in continuing to violate the law. *See FTC v. World Wide Factors, Ltd.*, 882 F.2d 344, 347 (9th Cir. 1989) (upholding finding of "no oppressive hardship to defendants in requiring them to comply with the FTC Act, refrain from fraudulent representation or preserve their assets from dissipation or concealment").

III. CONCLUSION

Plaintiffs have demonstrated that Defendants are engaged in widespread illegal telemarketing campaigns, and ask that the Court enter the proposed Preliminary Injunction.
