COMPLAINT

The Federal Trade Commission, having reason to believe that Jim Koons Management Company, also d/b/a Jim Koons Automotive Companies (“Respondent”), has violated provisions of the Federal Trade Commission Act (“FTC Act”), and it appearing to the Commission that this proceeding is in the public interest, alleges:

1. Respondent is a Maryland corporation, with its principal office or place of business at 2000 Chain Bridge Road, Vienna, Virginia 22182. Respondent has marketed, advertised, offered for sale, and sold used motor vehicles.
2. The acts or practices of Respondent alleged in this complaint have been in or affecting commerce, as “commerce” is defined in Section 4 of the FTC Act, 15 U.S.C. § 44.
3. Since at least December 2014, Respondent has disseminated or has caused to be disseminated advertisements promoting the sale of used motor vehicles.
4. Respondent’s advertisements include, but are not necessarily limited to, advertisements and marketing materials posted on the website www.koons.com, excerpts of which are attached as Exhibits A through D. On its website, until at least June 2015, on a page prominently titled, “Koons Used Car Advantage,” and other pages similarly touting the “Koons Used Car Advantage,” it has made claims regarding the advantages of buying from Koons. These marketing materials have included the following representations regarding certified used vehicles:

“Backed by the Koons Used Car Advantage, each vehicle we carry has been carefully selected and tested”

Exhibit A at 1-2.

“The Koons Used Car Advantage Guarantees:

Koons Quality Inspection

Every certified Koons Outlet vehicle must pass a rigorous and extensive quality inspection before it can be sold. Our certified mechanics check all major mechanical and electrical systems and every power accessory as part of our rigid quality controls.”

Exhibit B.

5. Even though it has made the claims set forth in Paragraph 4, Respondent has advertised numerous certified used vehicles subject to open recalls for safety issues on its website.
6. In some instances, these open recalls for safety issues have included recalls for defects that can cause serious injury. For example, Respondent has advertised a used certified vehicle that has an open recall for safety issues for a key ignition switch defect, which can affect engine power, power steering, braking, and airbag deployment, thereby increasing the risk of a crash and occupant injury. Respondent has also advertised a certified used vehicle that has an open recall for safety issues for defects associated with the alternator, which can result in the vehicle unexpectedly shutting down or in an electrical fire. Respondent has also advertised a certified used vehicle that has a rear suspension defect that could result in a fuel leak or fire.
7. In numerous instances, until at least June 2015, when Respondent has advertised certified used vehicles that are subject to open recalls for safety issues making the claims set forth in paragraph 4, it has provided no accompanying clear and conspicuous disclosure of this fact.

8. When consumers search for particular categories of vehicles on Respondent's website, there is no disclosure regarding open recalls for safety issues. An example of such search results includes the following:
