We check it, so you don't have to.

172-Point Inspection and Reconditioning

Our detailed, 172-Point Vehicle Inspection and Reconditioning Process is one of the most comprehensive in the industry. Before any Chevy, Buick, or GMC used vehicle earns the title of Certified Pre-Owned, it must first meet all of our rigorous standards.

Our 172-Point Vehicle Inspection and Reconditioning Process is conducted only by highly trained technicians and adheres to strict, factory-set standards to ensure that every vehicle's engine, chassis, and body are in excellent condition. The technicians ensure that everything from the drivetrain to the windshield wipers is in good working order, or they recondition it to our exacting standards. The vehicles are road-tested, put up on a lift for a complete underbody and frame inspection, and then completely checked for any cosmetic flaws.

And we do check it all. From the engine block to the shocks, right down to the floor mats, no major system is overlooked. If it fails a single point, we completely recondition it—or it won't be Certified.

View the points of our inspection below.
