FEDERAL TRADE COMMISSION

MATTER NO. 2023188

TITLE ERIC A. NEPUTE, DC

DATE POSTED TO FACEBOOK ON AUGUST 11, 2020 AT 10:47 A.M.

TRANSCRIBED: AUGUST 31, 2020

REVISED: SEPTEMBER 4, 2020

PAGES 1 THROUGH 29

---

DR. NEPUTE: -- Eric Nepute. I hope you’re having an amazing day today. It is Wednesday. It’s an interesting day in the world. Missouri just had their primary elections. Record number of mail-in ballots. We’ve been -- we’ve had an amazing story that broke in the media locally yesterday in St. Louis that’s not getting any national press that we’ve got to talk about. So I’ll give everybody a minute to jump on.

Where’s everybody watching at from this morning? Good morning, good morning, good morning this morning. Where are you all watching from?

I got Kelly’s who’s in Tennessee.

Melissa, good morning.

We got Joanie. Howdy, Ms. Joanie. Hope you’re well.

Cynthia, good morning this morning.

Janet is in California.

Jesse’s in West Virginia.

Good morning, everybody. Hope you guys are good.

I got a little rant I’m going to go off on...
Eric A. Nepute, DC 8/11/2020

2020-08-24_This is Going Cause Issues
8/11/2020

1  this morning. I just tell you, dammit, I just -- I'm
2  an optimist at heart. You know, I just am. I'm an
3  optimist at heart and I know many of you are as well.
4  So we'll give everybody a second to jump on.
5  We got Benita's in Alaska.
6  We got Tom who's in Florida.
7  We got some South Carolina folks.
8  Good morning, Scott in St. Louis. I'll be
9  back in St. Louis at the end of this week.
10  Karen, good morning, from Illinois. I hope
11  you're doing well.
12  Shelly, good morning, from Charlotte, North
13  Carolina. I'm not too far from your neck of the woods
14  right now.
15  Everybody, this is Dr. Eric Nepute. I hope
16  you're having a great day.
17  Like I said, you know, I'm an optimist at
18  heart. I'm -- I give everybody the benefit of the
19  doubt, right? I tell everybody that, you know, people
20  make mistakes, people move on, people learn. It's all
21  about helping each other. And those of you that
22  really know me, you know that my heart really is just
23  helping people. You know, that's all I really want to
24  do. I just want to help people.
25  But as a doctor, and I feel that's an

1  obligation -- even before I was a physician, it was my
2  job to help people. I was always that kid that helped
3  people. You know, I helped people. That's just what
4  I was -- how I was raised and I think that's just the
5  right way to raise, and I don't know any different.
6  But I'm really pissed off right now. You
7  know, in March of this year when shit was starting to
8  hit the fan and people were going crazy about COVID-
9  19, I came out and I said, everybody needs to start
10  getting on some things to boost their immune system.
11  I talked about the importance of zinc. I talked about
12  the doctor that went famous for talking about
13  Schweppes Tonic Water. And I was only talking about
14  tonic water because it is -- it has quinine in it and
15  quinine is one of the zinc ionophores that allows zinc
16  to get in the system.
17  So there's a story that just broke yesterday
18  in St. Louis, local media. It hasn't gone national
19  yet. It should. It absolutely should. It 100
20  percent should. And here's what they said.
21  Olivia, check out this -- this story.
22  (Looking down and reading from document.)
23  Washington University, which by the way is
24  one of the top medical schools in the world, which
25  that doesn't mean anything to me. It means they're

1  good at prescribing drugs and doing surgery. I'm all
2  about helping and healing people.
3  (Reading from document.)
4  Washington University says boosting your
5  immune system may be treatment strategy for COVID-19.
6  Well, no shit, Sherlock. Are you kidding me? Are you
7  kidding me? Of course it is.
8  You guys, when I came out and said that,
9  when I said that in March and I was talking about the
10  importance of zinc, every one of you needs to be on
11  zinc every day. Every one of you needs to be on zinc
12  every day. Every day. Every day, they
13  need to be on zinc. As an adult, you should take 25
14  to 50 milligrams every day of zinc, period. Period.
15  That's all there is to it. Period. That's what they
16  need to do.
17  And when I came out about it, we had a
18  couple videos that 30 million, 50 million people saw.
19  I had the Attorney General's Office come after me; the
20  FTC came after me; the Missouri Board of Healing Arts
21  came after me to try to shut me down and silence me.
22  But, yet, now --
23  (Holding up document.)
24  -- Washington University, one of the most
25  prestigious medical schools and research schools on

1  the planet comes out and says, boosting the immune
2  system may be the best thing to do for COVID-19.
3  Well, no kidding. Are you kidding?
4  My family got -- I got death threats, my
5  family got death threats. We got all these problems
6  out there -- and by the way, within 24 hours, we were
7  able to -- the FTC, we shut them up. The Attorney
8  General's Office, we shut them up. The Missouri Board
9  of Health and Healing Arts, we shut them up because we
10  showed them the facts. We showed them the facts and
11  the benefits of zinc, D, vitamin C and et cetera.
12  So those of you that are saying you're
13  having trouble finding zinc, go right now, do this
14  right now. I'll give you a damn bottle of zinc. You
15  know what? I'm going to give away 2,000 bottles of
16  zinc today. You know what? That's it. I don't give
17  a shit. I just don't even care. Right now, right
18  now, here's what I want you to do. There's 2,000
19  bottles of zinc. I'm going to tell my people right
20  now. I don't care -- I just do not care what anybody
21  says or does.
22  If the FTC comes after me again, so be it.
23  I'll wear that with a badge of honor. They're coming
24  after me because I'm trying to help you. These other
25  doctors out there aren't trying to help you. I'm
Zinc is a virus killer. Zinc does not allow for viruses to proliferate, period. That’s a fact.

Nobody can argue it. Fact, fact, fact.

Go right now. Here’s what I’m telling you right now. Go to myfreezinc.com. Myfreezinc.com. You got to pay shipping and handling. It’s like 7 bucks. Buy as many bottles as you can. Buy as many bottles as you can. I’m going to give you -- right now, my guys that are -- I’ll tell them as soon as I get off here, I’m going to give 2,000 bottles away for free. All you got to do is pay shipping and handling. For free.

Zinc, all of you that are saying, Terri, you can’t find zinc, go to myfreezinc.com. Myfreezinc.com. That’s what you want to do. And for you, as an adult, you take 25 milligrams to 50 milligrams a day. That’s what you do. As a kid, if it’s a kid -- so I have children. I give my kids one -- so I give them 25 milligrams of zinc twice a week.

That’s what I give them. That’s what my kids are getting right now. They’ll get one on Monday and they’ll get one on Wednesday or Thursday. They don’t need as much as an adult does. That’s what they need.

Go right now. Go to myfreezinc.com. It’s not sold out. It’s -- I guarantee you it’s not. I got 2,000 bottles. I’ll just tell my guys right now to put it on there. Put 2,000 bottles on there of zinc. Give them away. Give the damn 2,000 bottles of zinc away. Every damn day, you should be taking zinc.

This pisses me off. This article right here from Washington University, they talk about how they heard one of my talks about this. They saw my research about this. They saw how KSDK Channel 5 tried to vilify me and now they’re saying, well, Washington University has the solution, they say boosting the immune system is the answer. You’re damn right it is. But they don’t talk about how. I’m going to tell you how and I’m going to give you a solution.

Go right now. Go to myfreezinc.com and buy a damn bottle of zinc. It’s 7 bucks, or whatever it is, for shipping and handling, you can have that.

This is what you need. Take zinc every day. Take zinc every day, 25 to 50 milligrams a day. If it’s a kid, anywhere below 18, give them 25 milligrams a day. That’s all they’ll need. They’ll be fine with that. They need vitamin D3 every day. You, as an adult, need 10,000 IUs of vitamin D3 every day, 10,000 IU of D every day -- D3 every day. Your kids, your kids need 2,000 IUs a day. It’s just that simple. Give your kids some vitamin C every day. Either dose it to bowel tolerance -- if you have trouble finding vitamin C, if you don’t -- if -- start eating bell peppers, banana peppers, zinc -- or sorry, zinc -- sauerkraut and -- and other foods that have C in them, like oranges and grapefruits and things like that, every damn day.

You guys, this is what you need to be doing. You guys, this is what you need to be doing. Vitamin C, but zinc -- zinc stops the cells from regenerating viruses that stops viral proliferation. It’s a fact. It’s been in so many medical journals. But the damn doctors don’t know it, so they poo poo it. So somebody in Wash U, in my backyard, I guarantee you they heard one of my talks about this. They saw my research about this. They saw how KSDK Channel 5 tried to vilify me and now they’re saying, well, Washington University has the solution, they say boosting the immune system is the answer. You’re damn right it is. But they don’t talk about how. I’m going to tell you how and I’m going to give you a solution.

Go right now. Go to myfreezinc.com and buy a damn bottle of zinc. It’s 7 bucks, or whatever it is, for shipping and handling, you can have that.

Take one of those every day. The answer is, for shipping and handling, you can have that.

Eric A. Nepute, DC  8/11/2020

2020-08-24_This is Going Cause Issues

1. about it like weeds growing. Well, once that weed
2. gets into your system, the virus gets into your
3. system, it gets into your body and it starts to
4. regenerate. That’s called proliferation. Okay?
5. That’s called proliferation.
7. that from happening. Zinc is one of the number one
8. mineral deficiencies on the planet. So zinc being low
9. causes your smell to go away. Remember people saying,
10. well, I’m getting cold hands and fingers, blue hands
11. and feet and toes. Zinc. It’s zinc deficiency. I
12. can’t smell and taste. It’s zinc. It’s not
13. coronavirus; it’s zinc.
14. It just so happens that when you get under
15. attack from a virus, your body’s going to use all the
16. zinc that you’ve got. But guess what? You don’t have
17. enough zinc. Go right now. Myfreezinc.com. I
18. guarantee the FTC is going to be pissed whenever they
19. hear about this, so -- but I don’t give a shit. I’m
20. sorry, I don’t give a shit. This is wrong.
21. How many -- if people would have listened to
22. this, when I talked about this in March, March, April,
23. May, June, July, August, that’s almost six months ago.
24. How many hundreds of thousands of lives could have
25. been saved? How many -- how many billions of dollars,
sucks. So get some zinc right now and start taking
that stuff every day.
2. Every person in your family should be on
3. zinc every day. And you know what? You want to get
4. zinc into your system, that zinc needs to have
5. “corsequine” (phonetic). “Corsequine” is a better
6. zinc ionophore even then quinine is. Quinine is in
7. tonic water. “Corsequine” is in grapefruits and in
8. grapefruit juice. Grapefruit juice is going to sell
9. off the shelves now, right, even though there’s a lot
10. of sugar in that stuff.
11. But you need zinc in your system every damn
day. Every damn day, you need zinc, 25 to 50
12. milligrams a day, period. Okay? Period. Go and
13. order some. Okay? I’m going to give it to you. I
14. got 2,000 bottles. I’m telling you right now, 2,000
15. bottles right now. 2,000 bottles you can have.
16. They’re going to be gone by today, 2,000 freaking
17. bottles of zinc. You need to get them. You can’t
18. find them on the shelves. You can’t -- there’s no
19. contraindications for any medications that you’re
20. going to take.
21. By the way, death from medicine is the
22. third-leading cause of death on the planet, the third-
23. leading cause of death. Let me tell you a couple
24. trillions of dollars we could have saved? This is --
25. there should be crimes against humanity for the people
that came after me.

And by the way, where’s my apology? Where’s
my apology? Which, by the way, you can take my --
that apology and shove it up your rectum because,
quite honestly, here’s the deal. You’re wrong and
you’re -- you’re -- there should be crimes against
humanity for all the people that come against doctors,
like myself, that are just trying to help people. I
mean, this is just -- it’s insane. Get on zinc now.

Are there side effects of zinc? No. People
sometimes when they take vitamins, they can get a
little bit of upset stomach. Take it with food. Take
your zinc with your lunch or your dinner. That’s what
you should do. You’ll be fine. Take it. It’s zinc.
It’s a mineral. You’re deficient in it.

By the way, a lot of times when you take
vitamins, if you don’t feel well, especially when
they’re good quality vitamins, like mine are non-GMO,
organic, whole food, plant-based products. Guess
what? You might feel like shit because your body’s
detoxing because all you’ve done is drink Mountain Dew
and ate McDonald’s for the last six years and you
wonder why you feel like crap and your immune system
other things that are just asinine within this paper
that was written by Washington University. They said,
well, there’s a theory out there that boosting the
immune system can help you reverse or stop sickness.
Theory? That’s a fact, stupid. I don’t even know
what to say about it. My God. Stop trying to spin
it. Just because you can’t patent zinc and the
pharmaceutical companies can’t sell zinc and zinc
manufacturers are not going to...

Molly, you know why I swear? Because I’m
pissed. And if you don’t like it, turn the damn page.
Sorry, but I’m pissed and I don’t give a shit. I
mean, I’m sorry if that upsets you. By the way, you
know, I’m a super-passionate person because I’ve had
over 40,000 people just during 2020 that we’ve taken
care of. We’ve only had two of them that have been in
hospitals, one on a ventilator. Period, that’s it.
Period, that’s it.

If it says sold out, go back later and check
it out, myfreezinc.com, myfreezinc.com. This is so
frustrating, man, because common sense is just not
that common, especially in the health care space.

Here’s what else they said. Listen to this.
Listen to this. This is hilarious. They said in this
-- in this article that Wash U put out about how the
immune system is going to be the key for this. They said an autopsy studied how it showed large amounts of coronavirus patients in the organs of people who died of the viruses, suggesting that their immune systems were not working well enough to fight it. No kidding. Your immune system is the key. The immune system is what fights viruses and bacteria and sickness off. That’s the key. That’s the key.

So then, again, here’s what they said. They said -- they, being the researchers, Wash U, compared the blood to 26 hospitalized sepsis patients and 18 others who were very sick but didn’t have COVID-19. And guess what they found? They found that the people who -- the people who got their immune system boosted lived.

Let me tell you something about sepsis. Dr. Marik -- write that down -- Dr. Marik, Dr. Marik, who’s a South African native physician, who works at, I think, it’s West Virginia Medical Institute. Hospital came up with a protocol that he got from the doctors -- ortho-molecular doctors like myself that he started using vitamin C IVs in hospitals to cure sepsis. He went from a 60 percent fatality rate to a 20 percent fatality rate by using vitamin C. They’re finding patients that died from COVID-19 get infections in their blood because their immune system sucks because they don’t have enough zinc and they don’t have enough vitamin C.

But, yet, when I talk about zinc and vitamin C, the FTC comes after me, the Attorney General comes after me and Simone Gold and Rashid Buttar and Dr. Tenpenny and other doctors like Andrew Saul were in charge or had something to say, we wouldn’t be locked down. We wouldn’t have spent $5 trillion on a bogus “plandemic” that’s happening right now. That’s the deal.

Go right now and get some zinc. Go to myfreezinc.com. I’m giving it away. 2,000 bottles of it, I guarantee they’ll be gone by tomorrow. So you better get yourself some zinc, get your friends some zinc. Tag your friends and your family in this. I’m sorry if my -- by the way, I’m a four zinc. Tag your friends and your family in this. I’m a four right now. I’m a four. I can go to a ten, but you don’t want to see that. My emotions are at a four.

Get some zinc, get some D3, eat some healthy food, lose some damn weight, drink some water. And guess what you don’t have to worry about? You don’t have to worry about all this bullshit that’s happening in the world right now. You’re going to be -- you’re wearing a mask that’s got holes in it. Is this going to help you? No. Boosting your immune system is, dummy. Are you -- are we that stupid? Has Fauci talked about that? Has Birx talked about that? Has King Bill Gates talked about that? Hell no, they haven’t.

Go right now. 2,000 bottles of zinc. You got them. You got them. Go get it. Go to myfreezinc.com. You can buy it. It’s freaking 7 bucks. I don’t even know how much it is. Shipping and handling, seven bucks. Get it done. My team will get it out to you as soon as they can, I promise. But I’m telling them right now, they’re earmarking 2,000 bottles of zinc for you. Get it and get it for your family, get it for you kids. Stockpile that stuff. I’ve got months and months’ supplies of this stuff at home and in my offices. Me and my family, we ain’t worried. My patients ain’t worried. My people aren’t worried.

But I’ll tell you right now, we need to get more people woke up. We need to get more people to
they’re being touted as geniuses for saying, well, did
you know that boosting the immune system may be the
Six months ago, we said this. $5 trillion
later, unemployment off the charts later, families
separated because of beliefs, lives ruined, kids not
being able to go back to school, 600 percent increase
in the suicide hotline, people wearing masks thinking
that’s going to help them with something, are you
shitting me? People not getting on an -- an elevator
more than two people, are you kidding me?
This is stupid. This is beyond stupid.
This is asinine. There is no science that supports
any of this shit. None. Zero. And the thing that
pisses me off more than anything is they will not even
have a dialogue. They won’t even talk about this
because they know they’ll get their asses handed to
them because the facts speak louder than emotions.
They’re trying to control you. Not even. They are
controlling you. And we bought that shit hook, line
and sinker, period.
Saddest thing that happened in this whole
“plandemic” is that the American population bought it.
You bought it. They sold you that shit and they
bought it. And guess what? Every year, they’re going
to sell it to you again. Get a vaccine, get a shot,
get this, get that. The immune system doesn’t do
shit.
Well, guess what? The immune system, if you
understand how it works, getting a vaccine does not
mean immunization. Vaccination does not equate to
immunization. It doesn’t. Let’s have that
conversation. Let’s debate that. 330 million
Americans on this planet, 26 percent of them right now
in the Moderna -- in the Moderna trial have shown
negative health effects. Negative. That’s 85 million
Americans that could have problems. Are you kidding
me right now?
And you’re worried about me saying shit.
Ha. That’s the least -- if that’s the worst thing
that happens today, I get it, I get it, I get it. But
if you can’t get offended and fired up and passionate
about where we’re at today, you’re a damn sheep and
I’m embarrassed because I’m an “Ameri-can” and I’m
raising lions not sheep and I’m a lion not a sheep.
What are you? What are you? What are you going to
do?
Are you going to step up and stand up, get
yourself healthy, find a doctor that knows what the
I appreciate all you guys more than you ever know. I’m just so sick and tired of the lies, the corruption, the deceit, the things that are happening literally under our noses. There’s like 35- to 40,000 people that have been arrested already for pedophile rings. We are seeing all the corruption that’s happening in the -- in the polit -- the political world. We’re literally seeing -- you’ve got guys like Jerry Nadler that are saying there’s no violence happening in Portland. One of my best friends lives there and he says it’s like a damn warzone.

You got people saying that hospitals are overflowing and they’re not. They’re not even anywhere near overflow. They’re nowhere close to that. We’ve got people not going to work, kids not going to school. Our lives have been shut down from a political reason. 150,000 people died. Yeah. Geez, man. It’s just so freaking wrong.

I’m so pissed off and I’m so embarrassed. I’m so embarrassed by America. I’m so embarrassed about how weak and soy latte’d and pussified we’ve become. It’s sad. We didn’t -- we weren’t always this way. We’re the greatest country on the planet. We need to wake up. We need to wake up. We’re getting played.

You’re nothing but a part of the machine now. It’s time to break that. It’s time to eat the shit out of those red pills, wake up, take that with your zinc and your vitamin D every day. Every day. Every day for the rest of your life.

I appreciate you guys praying for me. I pray for you. I pray for this world. I pray for our leaders every day as well because we deserve better. We deserve great things.

I want you to understand that we’re not fighting against flesh and blood, we’re fighting against spiritual evil, sickness is evil, and you can fight it, but you’ve got to put in the work. If you’re willing to put in the work, you’re going to get the results. If you’re not, you won’t. It’s just that simple. And that’s true with everything in life.

Teach your children. If you weren’t doing the vitamins and nutrients and eating right years ago, the best time to do it is now. Wake up. Step up. Step out. Yes, you can.

Get that zinc. I just told them 2,000 bottles of zinc, 2,000 bottles of zinc. I’ll give it to you. You pay shipping and handling, you can have it. Get as many bottles as you can. Send it to your friends and family. Tag them. Private message them. Go back afterwards and do a watch party with this. I just want to help you. I want to empower you. I want to give you body armor and you can do it. You don’t have to be a sheep anymore.

We are in this together, but we’re in this together not because we’re wearing a mask, social distancing, using antibacterial soaps on our hands. That’s all crap. We’re in this together because we understand the truth and the truth will set you free if you’ll let it, but you got to let it. Amen, amen, amen.

I want you guys to go right now, myfreezinc.com, myfreezinc.com. I’ve got 2,000 bottles laid out. If they’re still there, get them. If they’re not, go back later and I’ll check. I’ll have them put some more out. Get it going. Get some zinc in your body every day. D3 every day, vitamin C every day, probiotic every day, “corsequine” every day, ruby red grape juice or eat a grapefruit every day, grapefruit juice, eat a grapefruit, eat some oranges, get some healthy food in your system. Exercise every day, every damn day. That’s all you got to do.

Do it. Stretch, move, breathe. It’s not difficult. Think well, move well, live well, and you’ll be well.
CERTIFICATE OF TRANSCRIPTIONIST

I, Elizabeth M. Farrell, do hereby certify that the foregoing proceedings and/or conversations were transcribed by me via CD, videotape, audiotape or digital recording, and reduced to typewriting under my supervision; that I had no role in the recording of this material; and that it has been transcribed to the best of my ability given the quality and clarity of the recording media.
