## FEDERAL TRADE COMMISSION

### **Division of Consumer and Business Education; Agency Information Collection Activities: Proposed Collection; Comment Request; Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery**

**AGENCY:** Federal Trade Commission (“FTC” or “Commission”).

**ACTION:** 30-Day notice of submission of information collection approval from the Office of Management and Budget (“OMB”) and request for comments.

**SUMMARY:** As part of a Federal Government-wide effort to streamline the process to seek feedback from the public on service delivery, the FTC is submitting a Generic Information Collection Request (Generic ICR): “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery” to OMB for approval under the Paperwork Reduction Act.

**DATES:** Comments must be submitted May 15, 2017.

**ADDRESSES:** Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write “FTC Generic Clearance ICR, Project No. P035201” on your comment, and file your comment online

at <https://ftcpublic.commentworks.com/ftc/genericclearance> by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC-5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

#### **SUPPLEMENTARY INFORMATION:**

*Title:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

*Abstract:* The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate,

methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The FTC received one responsive comment<sup>1</sup> in reply to the 60-day notice published in the **Federal Register** on January 30, 2017 (82 FR 8755). The commenter pointed to several issues that may arise when conducting small group or focus group discussions. When it conducts these groups, the FTC works with experienced professional moderators who are familiar with, and prepared for, the potential hazards of small group dynamics. The FTC is aware that small group discussions don't necessarily reflect public opinion in general, but they can be illuminating and help us understand specific people's experiences and opinions. The FTC encourages these skilled moderators to engage group members and help it learn others' perspectives. That way, the FTC can adjust and improve service as needed.

Below are the FTC's projected average annual estimates for the next three years:

*Current Actions:* New collection of information.

*Type of Review:* New collection.

*Affected Public:* Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.

*Average Expected Annual Number of Activities:* 39.

*Respondents:* 2,680.<sup>2</sup>

*Frequency of Response:* Once per request.

*Annual Responses:* 2,680.

*Average Minutes per Response:* 26 (rounded to nearest whole minute).

<sup>1</sup> Douglas Waterman, University of Idaho. <https://www.ftc.gov/policy/public-comments/initiative-694>.

<sup>2</sup> Projected activities: (1) Three customer satisfaction surveys per year of 500 respondents each and one customer satisfaction survey per year of 800 respondents each (surveys to get feedback about major campaigns, publications, Web sites, branding and other consumer and business education products to test their appeal and effectiveness), .25 hours (*i.e.* 15 minutes) per response; (2) Twenty focus groups per year, 10 respondents each (to test education products and Web sites), 2 hours per response; and (3) Fifteen usability sessions per year, 12 respondents per Web site (to test the usability of FTC Web sites by inviting people to complete common tasks on those sites), 1 hour per response. These estimates reflect an increase from those the FTC published in the associated prior **Federal Register** Notice of January 30, 2017. The current projected estimates more accurately reflect the FTC's assessment of potential needs to reach audiences in different ways.

*Burden Hours:* 1,155.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The control number for the existing clearance (expiring April 30, 2017) is 3084-0159. The FTC seeks renewed three-year clearance under this control number for the prospective collection of information and the associated burden estimates.

#### Proposed Project

##### APPLETREE Performance Measures—New—Agency for Toxic Substances and Disease Registry (ATSDR)

##### Background and Brief Description

The Agency for Toxic Substances and Disease Registry (ATSDR) serves the public through responsive public health actions to promote healthy and safe environments and to prevent harmful exposures in communities across the nation. ATSDR’s Partnership to Promote Local Efforts to Reduce Environmental Exposure (APPLETREE) Program is critical to ATSDR’s success in this mission. The purpose of the program is to: (1) Identify pathways of exposure to hazardous substances at hazardous waste sites and releases; (2) identify, implement, and coordinate public health interventions to reduce exposures to hazardous substances which occur at levels of health concern; and (3) provide training at the state level to promote and achieve the safe siting of child care facilities in the United States. The APPLETREE Program is also a mechanism which enhances ATSDR’s communication with state, local, and federal health and environmental agencies. This program is authorized under sections 104(i)(15) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986 [42 U.S.C. 9604(i)(15)].

Under the new three-year APPLETREE cooperative agreement

(Funding Opportunity Announcement No. CDC-RFA-TS17-1701), eligible applicants include federally recognized American Indian/Alaska Native tribal governments; American Indian/Alaska native tribally designated organizations; political subdivisions of states (in consultation with states); and state and local governments or their bona fide agents. ATSDR technical project officers (TPOs) will assist approximately 25 APPLETREE awardees to address site-specific issues involving human exposure to hazardous substances. Key capacities include identification of human exposure pathways at ATSDR sites, education of affected communities and local health professionals about site contamination and potential health effects; making appropriate recommendations to prevent exposure; reviewing health outcome data to evaluate potential links between site contaminants and community health; and documenting the effects of environmental remediation on health.

ATSDR will collect information related to awardee activities, and the process and outcome performance measures outlined by the cooperative agreement program. Information will be used to monitor progress toward program goals and objectives, and for program quality improvement.

*ATSDR Health Education Activity Tracking (HEAT) Form:* For each environmental health assessment and health education activity conducted at ATSDR sites, APPLETREE awardees must quantitatively assess and report efforts to educate community members about site recommendations and health risks using indicators to assess community understanding of site findings about health risks and community understanding of agency recommendations to reduce health risks. This information will be entered in the ATSDR HEAT system for each activity at ATSDR sites. Based on past experience, ATSDR assumes a maximum of 925 activities will be entered into the HEAT database each year; therefore, each of the 25 awardees will enter an average of 37 activities into the HEAT database.

*ATSDR Technical Assistance (TA) Activity Form:* Throughout the budget year, this form is used to record the routine requests made of the awardees and their program responses. These responses do not evaluate environmental data and do not make health calls. They are not reviewed and cleared through ATSDR clearance processes but are monitored by ATSDR as part of the awardees’ performance. ATSDR anticipates each awardee will
