OMB Control Number: 3084-0113.

Type of Review: Extension of a currently approved collection.

Abstract: The Informal Dispute Settlement Procedures Rule (the Dispute Settlement Rule or the Rule) specifies the minimum standards which must be met by any informal dispute settlement mechanism (IDSM) that is incorporated into a written consumer product warranty and which the consumer must use before pursuing legal remedies under the Magnuson-Moss Warranty Act, 15 U.S.C. 2301 *et seq.* (Warranty Act or Act) in court. These minimum standards for IDSMs include requirements concerning the mechanism’s structure (*e.g.*, funding, staffing, and neutrality), the qualifications of staff or decision makers, the mechanism’s procedures for resolving disputes (*e.g.*, notification, investigation, time limits for decisions, and follow-up), recordkeeping, and annual audits. The Rule requires that IDSMs establish written operating procedures and provide copies of those

procedures upon request. The Rule applies only to those firms that choose to be bound by it by requiring consumers to use an IDSM. A warrantor is free to set up an IDSM that does not comply with the Rule as long as the warranty does not contain a prior resort requirement.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate,
