

To whom it may concern-FTC,

I am a registered nurse by trade who works with the health and wellness industry as well as working with another business in the petroleum Industry by way of network marketing. I work at home and it is very convenient to do this working around my family. I also live in a remote town in Montana and during the winter do not need to leave my home to work in the middle of snowstorms.

I am an ethical person with no history of criminal records. I am a mother, nurse and law abiding citizen.

I do not agree with the new proposed law of business opportunity rule and do not support it. I am voting against it and would like my voice heard. The direct selling industry has helped mothers and fathers stay at home with their children to work and gives much more time to the family while still being able to contribute to the family income.

In my opinion it is a needless proposed law that will cause many problems in our culture and society. I support the direct selling, network marketing industry 100per cent for what it has done for my family and me. I work with other ethical, wonderful people and love it.

This letter is to tell you that I do not agree with this new proposed law and want my voice heard.

Thank you,

Margie Dettmann
