June 7, 2006

Dear Sir or Madam:

I am concerned that if proposed Business Opportunity Rule R511993 is adopted, my business and livelihood as a Nature's Sunshine Manager would be greatly undermined.

I am a senior citizen with many health problems and it has been through this company and my business that I have been able to function and help other individuals. With all the new rules and regulations set forth in this proposed ruling, I know I will not be able to continue my business as it now exists. I've been in business over 20 years, which contributes not only to my well-being but to the finances of my family. It would be most burdensome for me to keep additional records which would cause delays in building a membership group which is how my Nature's Sunshine Business is functioning at the present time.

I hope the FTC will review this proposal carefully and take a less burdensome approach.

Sincerely,

[REDACTED]

Ellen B. Jackson
