Business Oportunity Rule, R511993

I have been an IBO for about 13 years. My biggest accomplishment in this business is reaching the level Diamond! I have many goals for the future, but my biggest one is for my people in my business grow to be well respected people and wealthy for them selves to see hope in there harts and to accomplish freedom! my life style that my family and I have we owe it to Quixtar and also our respect and our loyalty. I remember when I first decided to start my business the information the security made me fell good and safe and trusted that my buissness would grow to be big and I have always show the people the same info. that was shown to me when I started. I have never in my life tell people when the info. is given to them that there going to be rich in a short time no I allways tell my people that hard work is required to become successful in this incradable business. To have a simple registration without products is \$74.00 and with products and membership and many more is \$140.00. We have built our business from the botom to the top. concerning the 7 day waiting period i really fell it's not really a good idea ,the reason is this, the person (he/she) would already would of lost its enthusiasml! also dont think it would be right to let them see personal info. of our selves and other and thats crosslining and it's against our Quixtar rules. well thank you for you time and consideration .

sincerely,

Arturo machuca
