# MEDEX Spot Service Platform

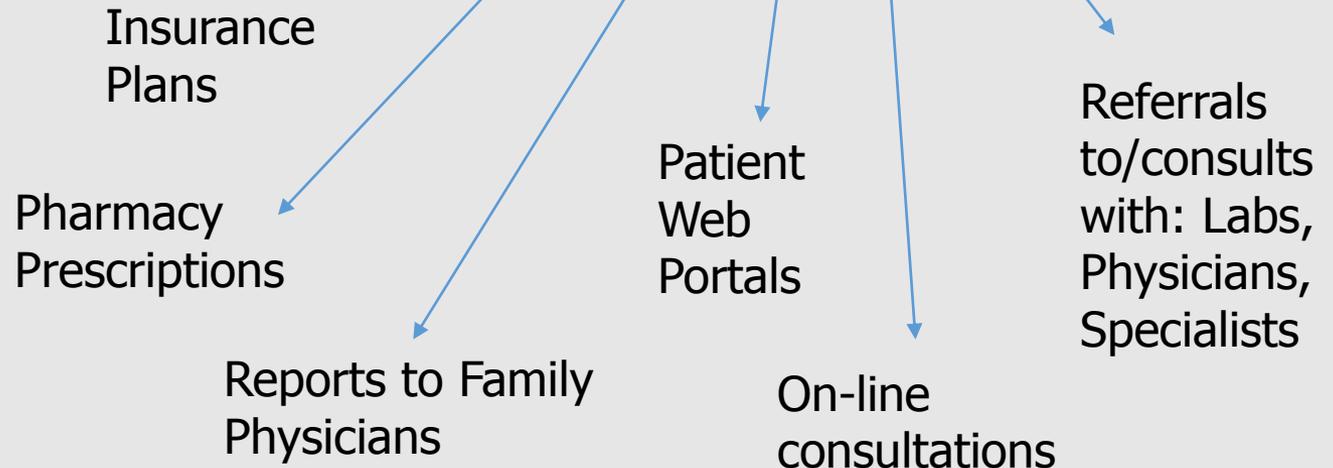

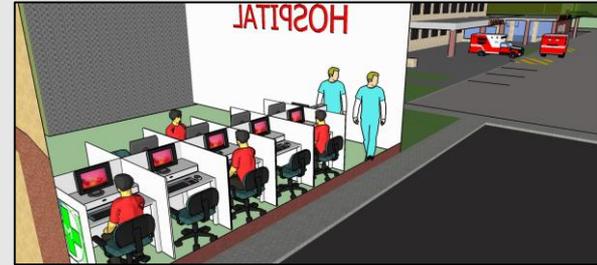

Scalable: Micro Clinics For Convenience & Need

Nurse Practitioners at Medical Call Centers In Hospitals or Clinics

\$40 per visit

Dedicated Broadband & Satellite Telecom

# Underlying Technology

Special Design for Satellite or Fiber

- Includes Robotics and Automation for Self-Service
- Broadband Videophone
- Ten Vital Signs Devices
- Sanitizing Systems

*Patents Pending*

- *Two Provisional Applications*
- *One Continuation-in-part Application*

Patient Focus: Seasonal Illnesses, Chronic Illnesses, Triage, Certificates

Patient Outcomes: Prescriptions, Advice, Referrals

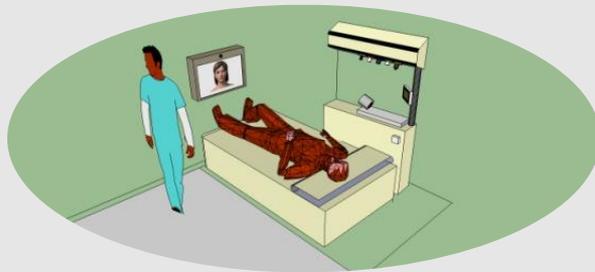

Demonstration Unit

# Needs Dictate Configurations

**Unmanned, standalone**

**Manned, static, multiple units**

**Unmanned, in existing room**

**Manned, static, plus aux. systems**

**Manned, mobile**

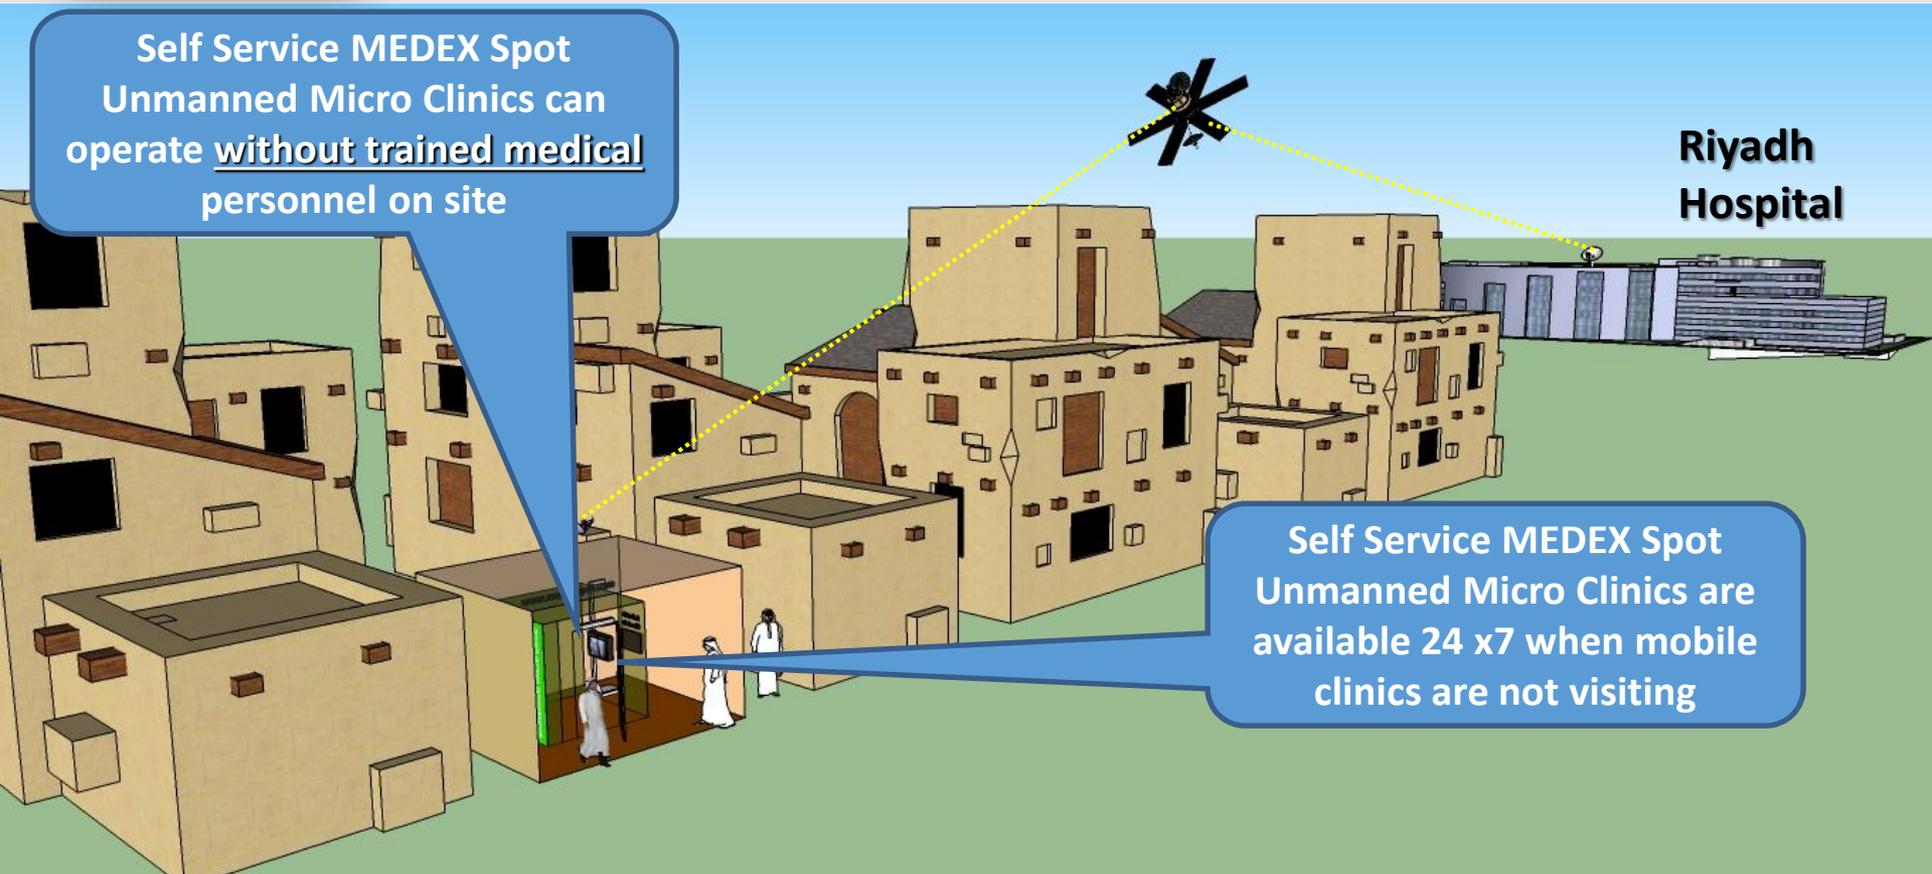

# MEDEX Spot Unmanned Micro Clinic

*A big idea in healthcare with a small footprint*

[www.medexspot.com](http://www.medexspot.com)

Self Service MEDEX Spot  
Unmanned Micro Clinics can  
operate without trained medical  
personnel on site

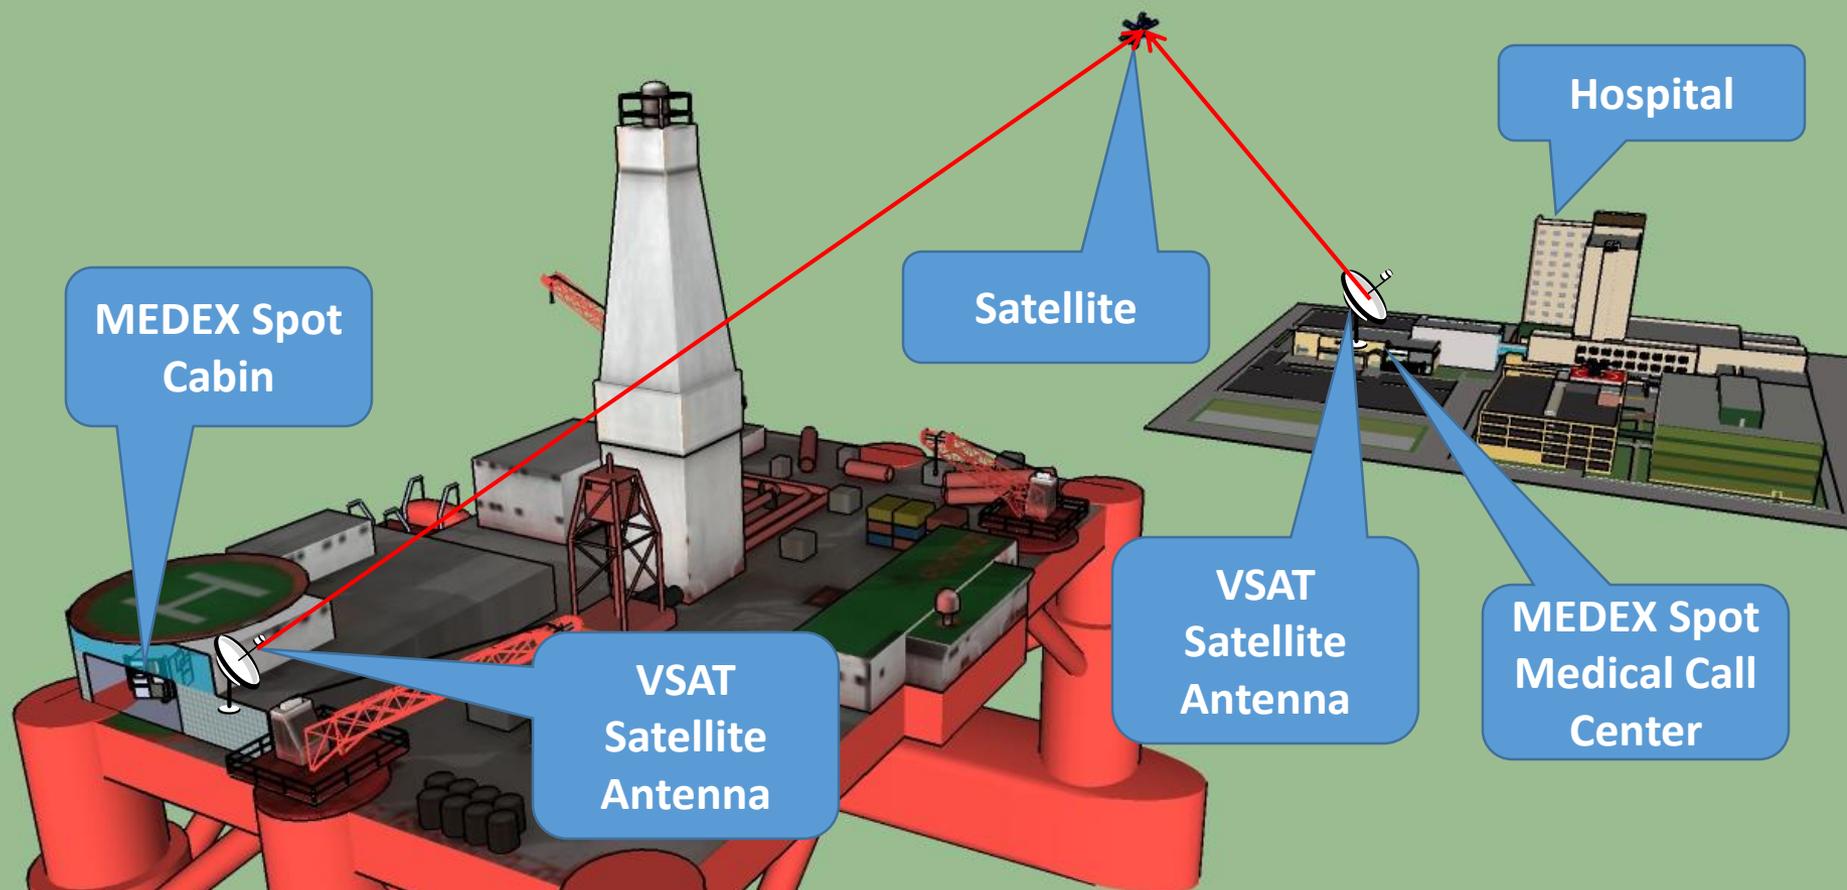

Self Service MEDEX Spot  
Unmanned Micro Clinics are  
available 24 x7 when mobile  
clinics are not visiting

50% to 80% of common ailments can be treated in the MEDEX Spot Unmanned Micro Clinic  
Watch our video at [www.medexspot.com/video2012](http://www.medexspot.com/video2012)

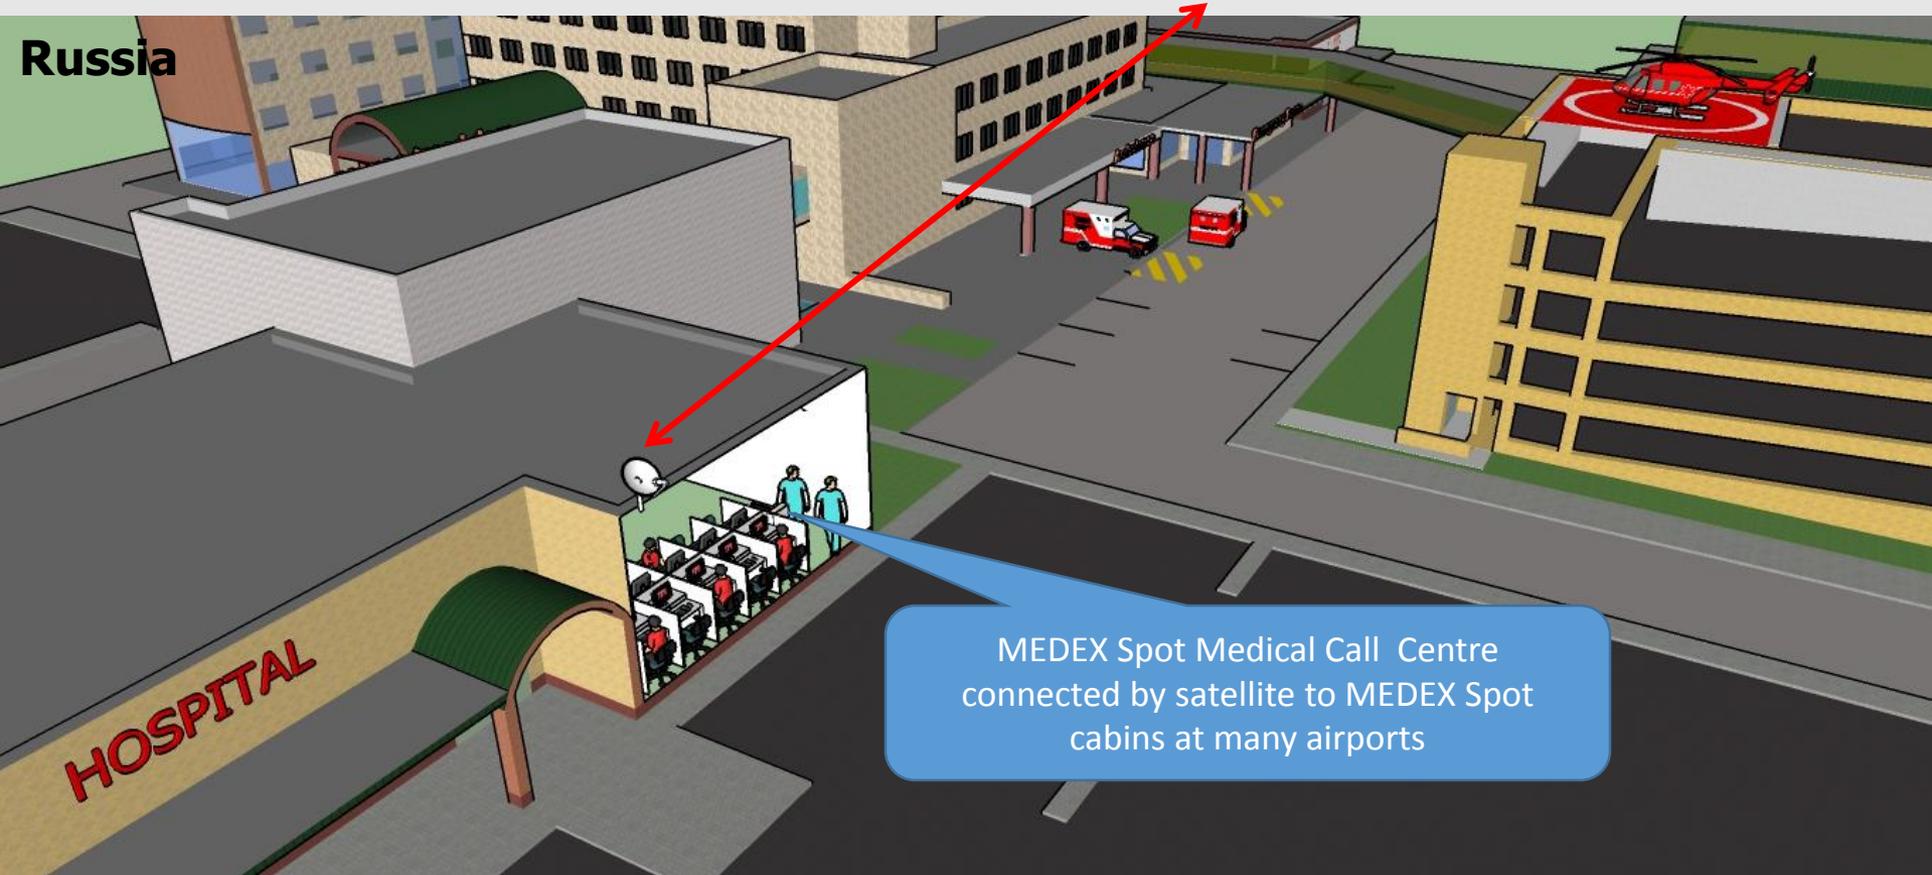

## A new concept in primary healthcare service on Oil & Gas Drilling and Production Platforms

**MEDEX Spot system enables a hospital specializing in servicing remote patients to provide primary healthcare services to personnel working on Oil & Gas Drilling and Production platforms. Satellite connects a Medical Call Center at the hospital to Unmanned Micro Clinics located on the drilling or production platforms.**

## A new concept in civil aviation healthcare service for aircrew at or near airport departure gates

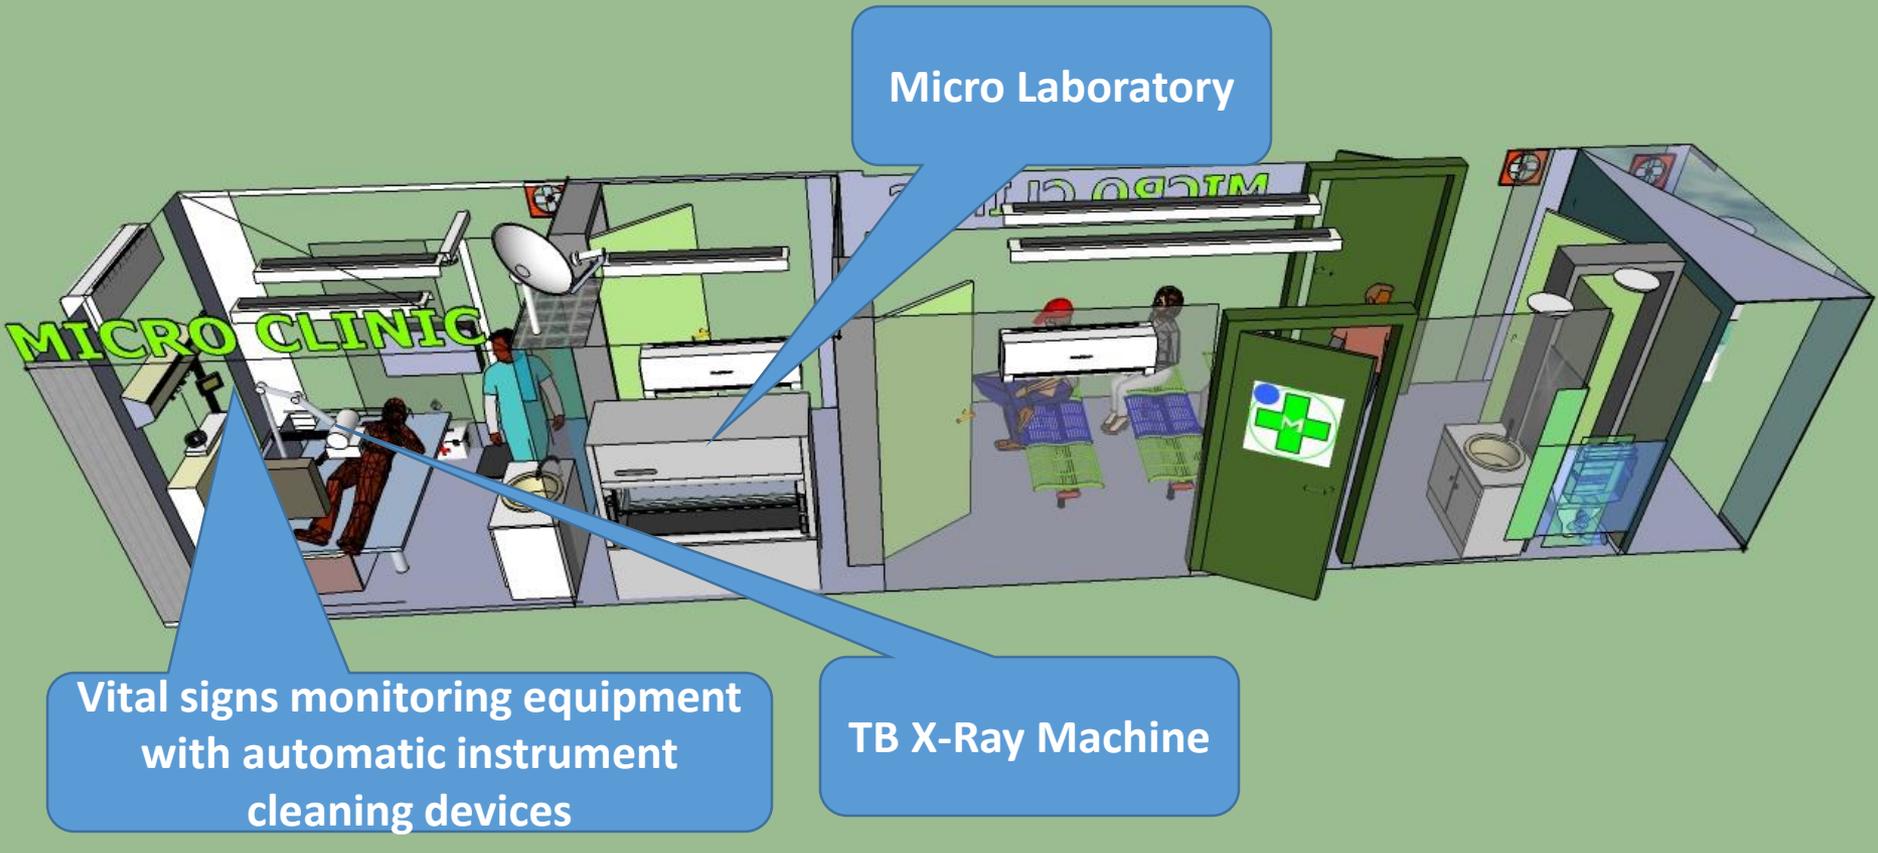

MEDEX Spot Medical Call Centre connected by satellite to MEDEX Spot cabins at many airports

**At the Medical Call Centre the medical practitioners have two way video communication with the patient in the cabin. Using their MEDEX Spot terminals, they have remote access to the vital signs monitoring devices in the MEDEX Spot Unmanned Micro clinics so at airports to perform by remote control a thorough examination of the airline crew before or after flights.**

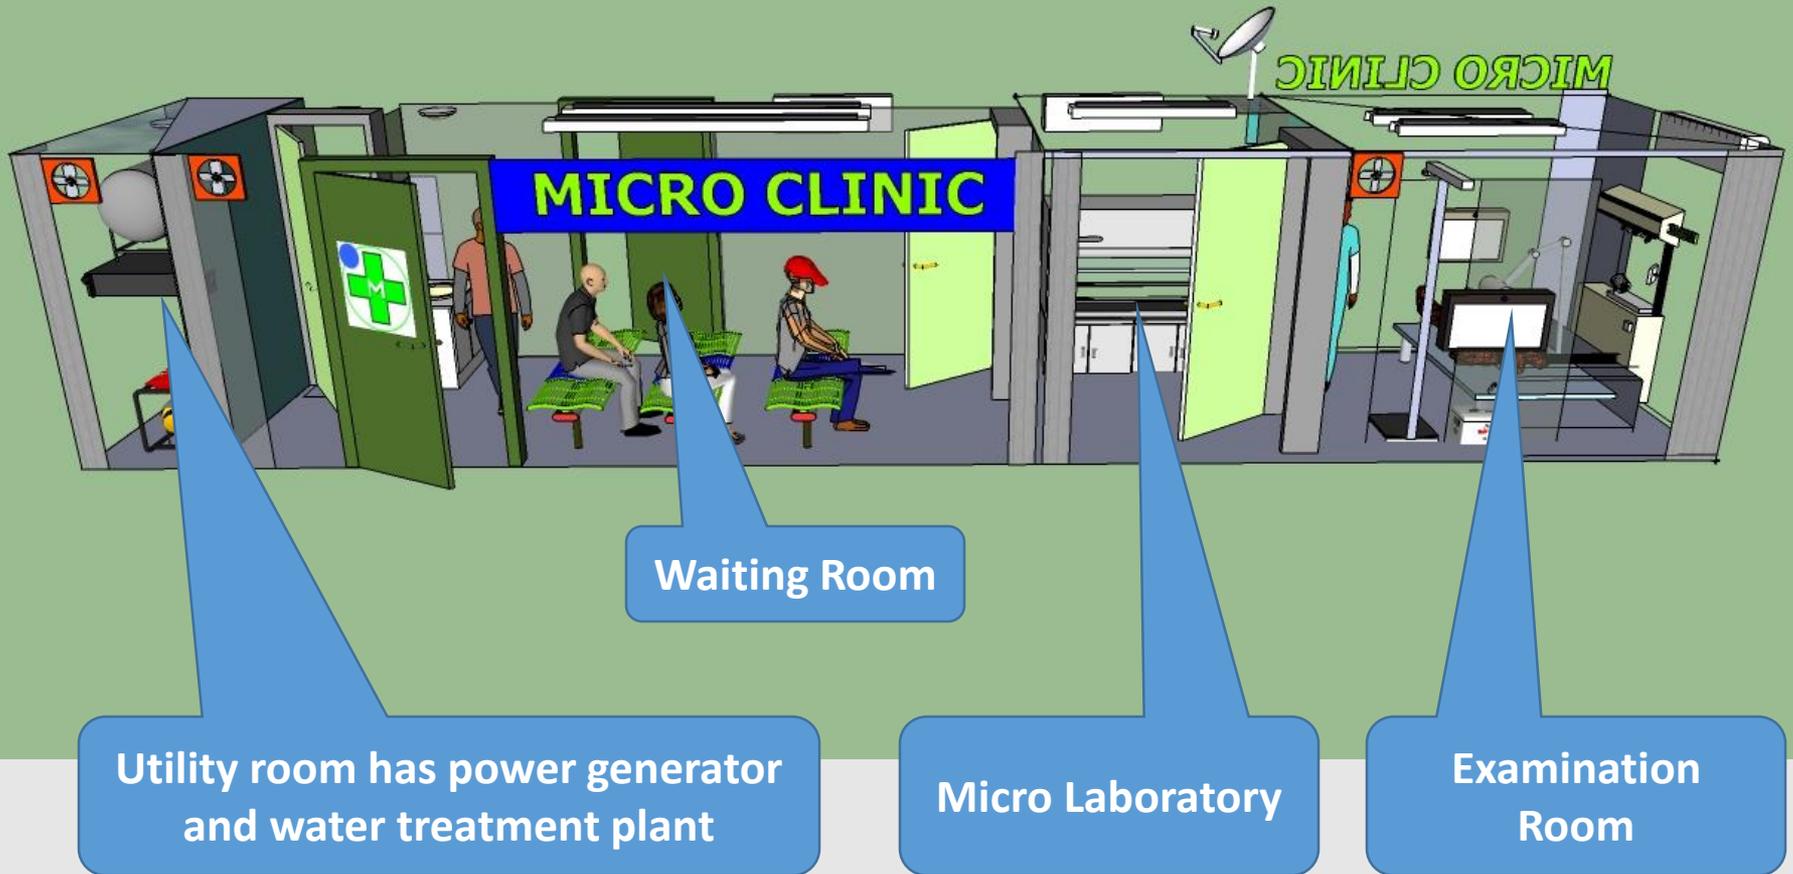

**MEDEX SPOT** transportable micro clinic has a TB X-Ray machine with sophisticated analytical software which can provide a preliminary positive/negative TB test. If test is positive then the X-Ray pictures can be transmitted in minutes to the hospital in Brussels for further analysis

**MEDEX SPOT** transportable micro clinic also has a micro laboratory which enables the medical attendant to take patients specimens and if necessary transmit the test results to the hospital in Brussels for further analysis.

**MEDEX SPOT** transportable micro clinic configuration shown here may change depending on local operating requirements.

# Medex Spot Micro Clinic Myanmar

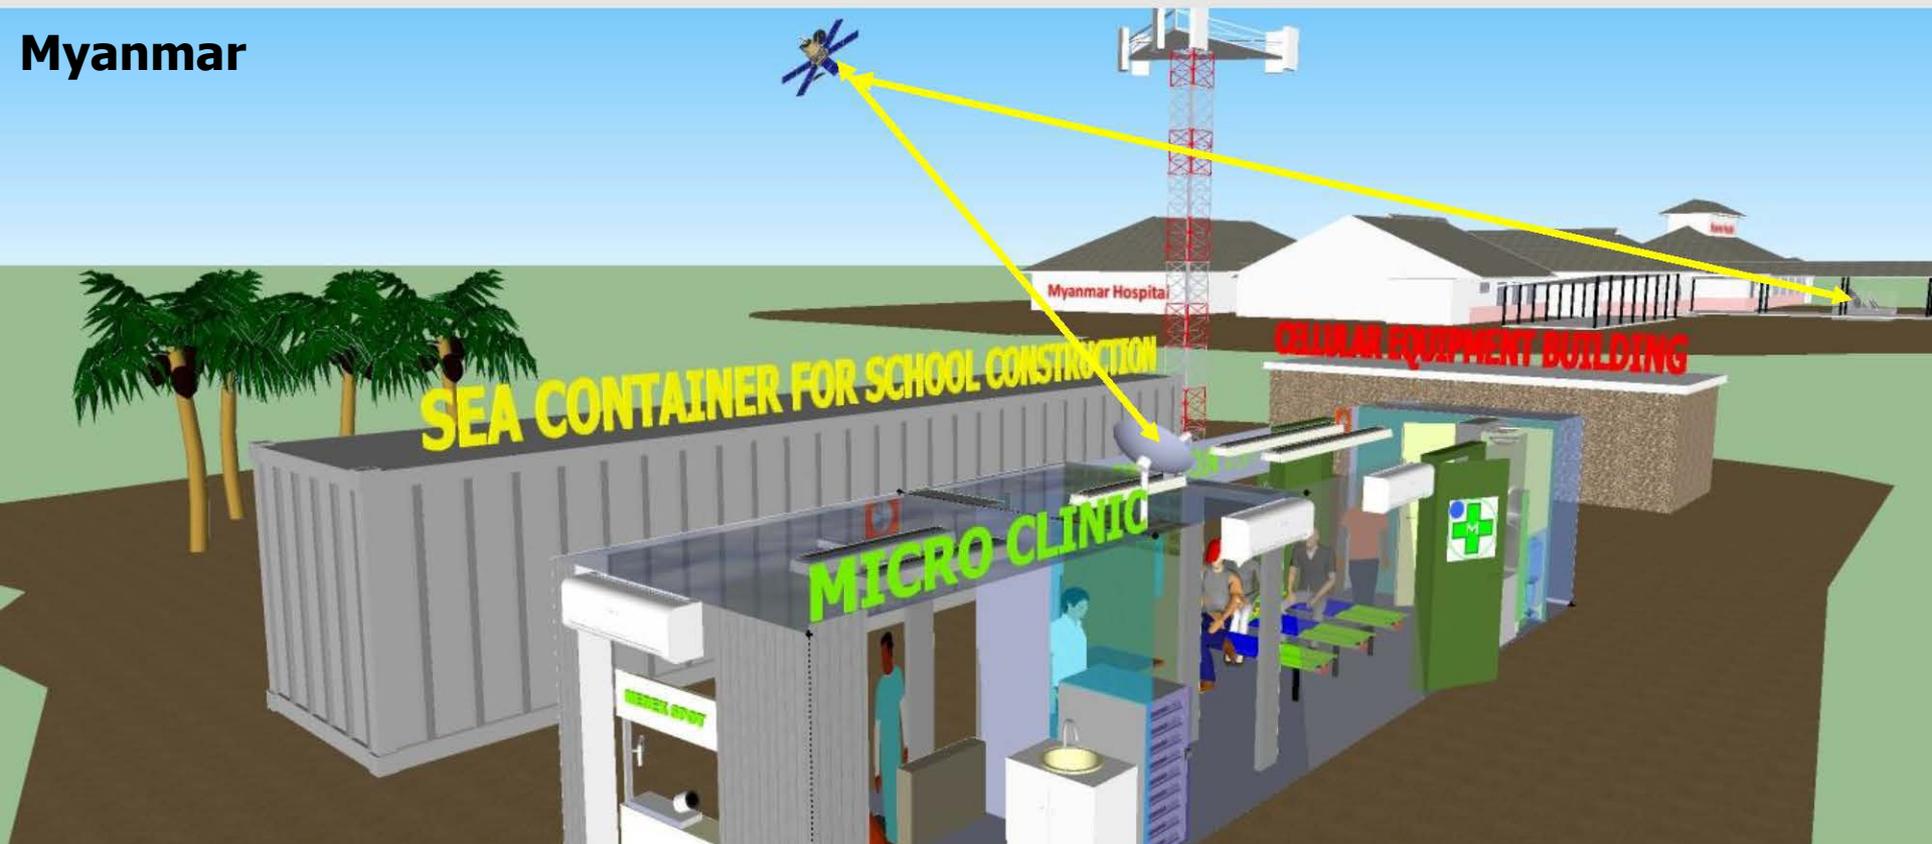

Converted 40ft sea container includes -  
Examination Room – Medic Room – Waiting Room – Utility Room

The MEDEX Spot Micro Clinic may be co-located at a rural social center together with a small school and a cellular telephone site to share resources, including power and communications.
