Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

The EPA has acknowledged ethanol causes damage to engines. Anyone who owns a boat, motorcycle, or lawnmower has known this for years. Ethanol costs owners of these machines, thousands of dollars in repair costs, in addition to the constant cost of "stabilizing" gasoline with ethanol mixed into it.

At minimum shouldn't citizens/consumers who purchase gasoline have a choice?

Ethanol has been tested, tried and proved a failure. Stop wasting taxpayer money subsidizing facilities that produce ethanol. Battery and electric power is the future.

Sincerely,
Mark Meccariello - C.P.A., NJ
