600 Pennsylvania Avenue, NW, Room CC-5610 (Annex N)  
Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

I strongly support the AMA position on ethanol in motor fuels for several reasons. First, adding ethanol can damage vehicles not designed for it resulting in major damage and cost. More importantly, the manufacture of ethanol especially using corn, is not an efficient use of resources and causes disruption in the normal production and cost of human food.

Sincerely,  
James Carlson, GA
