RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

As an avid motorcyclist and automobile owner I request that the sale of e-15 be denied until it is proven safe for vehicle engines and fuel systems. As of now, the auto manufacturer of my two Toyotas and Chevrolet will void the warranty if e-15 is used. Labelling will not work and is definitely not going to lower the risk. In addition, I believe that ethanol fuels are not energy efficient and the industry lobby is behind the motivation to increase ethanol %.

Sincerely,
David Decker, NY
