Federal Trade Commission  
Office of the Secretary  
600 Pennsylvania Avenue, NW, Room CC-5610 (Annex N)  
Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

Ethanol blend fuel was a bad idea from the start. It is more polluting to make, produces less energy and decreases mileage thereby increasing air pollution when used. It burns drier and hotter and can damage engines from the excess heat, especially air-cooled engines. Corn products belong on the dinner table, not in a bad fuel.

Sincerely,  
Steven Linden, NC
