Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

In light of the fact that gasoline containing an ethanol content above 10% can damage internal combustion engines, which include everything from ambulances to lawnmowers, it is unconscionable to force feed ethanol fuel on the public. The use of this fuel will be detrimental to nearly all machinery and vehicles on or off the road. This will affect poor people the most as they cannot afford to repair or replace their damaged vehicles.

Sincerely,  
Paul Mantone, NJ
